CUSTOM CAPABILITIES

I CUSTOM DESIGN OF TIMING AND SENSING SYSTEMS UTILIZING LEACH MIL-STANDARD RELAYS OR SPECIAL SOLID STATE OUTPUTS MAY BE MANUFACTURED BY DISCRETE CIRCUITRY OR THICK FILM HYBRID TECHNIQUES

II COMBINATIONS OF VOLTAGE, FREQUENCY, AND PHASE SEQUENCE DETECTION WITH BUILT-IN TIME DELAYS ARE AVAILABLE FOR SYSTEMS MONITORING

III CUSTOM THICK FILM HYBRID CIRCUITS MANUFACTURED TO, MIL-STD-883 CLASS B REQUIREMENTS

IV SOLID STATE RELAYS WITH UP TO 3PNO CONTACTS AND RATINGS TO 25 AMPERES AC, 3ϕ, 400Hz FOR USE WITH MIL-STD-704 POWER REQUIREMENTS

V RELAY DRIVERS FOR MULTIPLEX INTERFACE AND ISOLATION, INCLUDING INTEGRAL RELAYS, WHICH CONFORM TO MIL-R-28776

VI SOLID STATE SWITCHING DEVICES INCLUDING BOTH AC AND DC MOTOR CONTROLLERS

VII SOLID STATE CIRCUIT BREAKERS, CURRENT SENSORS, AND REMOTE POWER CONTROLLERS

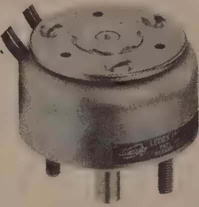
PRODUCT DIRECTORY

ROTARY SOLENOIDS ... direct rotary action

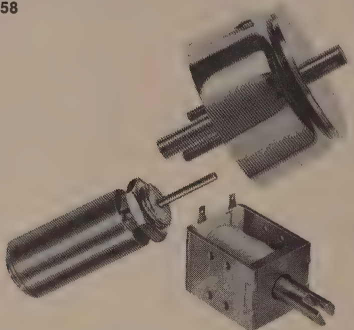
See Vol. I Page 1•1757
Section 4500



Step, turn, pull, push, index, hammer, punch, or trigger — the Ledex rotary solenoid gives you fast, dependable, direct rotary action. Choose from eight basic sizes, right or left hand strokes from 25 to 95 degrees. Torque output to 117 pound-inches. Endurance engineered models have life of 100,000,000 cycles.

PUSH-PULL SOLENOIDS ... short and medium strokes

See Vol. 1 Page 1•1758
Section 4500



Pancake shaped Ledex push-pull solenoids give you high force and fast response. Form factor minimizes size for best efficiency. Flat face models are best for short strokes, to about .060″. Conical face plungers have greater pole surface area — to extend the useful range to .390″.

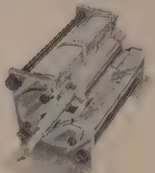
long strokes

For strokes up to .750 inches — Ledex tubular solenoids offer smooth, efficient, long term performance. Included among the Ledex quality features are built-in impact cushions to absorb energy at the end of the stroke, and electroless nickel plated plungers for smooth travel and long wear. Slotted and cross drilled plungers on the pull models simplify your load attachment.

Ledex D-Frame solenoids offer economical, long term service for users whose needs must be matched by a dependable product and reliable source. Eight standard models are available from stock with strokes up to 1.25″. Quick connect terminals and high temperature class "B" coils are standard.

ELECTRO PROPORTIONAL SYSTEMS ... infinitely variable positioning

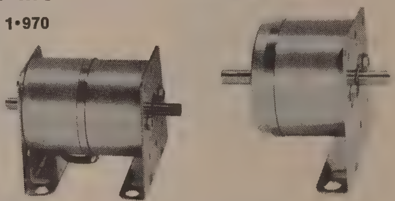
See Vol. I Page 1•262
Section 2200



Accurately positioning mechanical loads from electrical control signals can be economically achieved with a Ledex closed loop electro proportional positioning system. The system contains an EP solenoid, a controller and a feedback device. Stock models available for immediate delivery.

STEPPING MOTORS ... incremental positioning

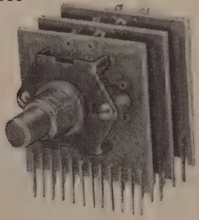
See Vol. I Page 1•970
Section 3500



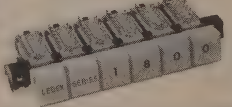
Powerful Ledex Series 50-L Stepping Motors position loads in precise increments of 10, 15, 20, or 30 degrees, accurate to ±1° non-accumulative. Highlights include unidirectional and bidirectional models, shafts on both ends that can be manually turned in either direction, and a tooth clutch drive that gives positive grip stepping action while doubling as a brake to stop overdrive. The new Series 50-L extended life designs provide over 10,000,000 maintenance free steps.

SWITCHES ... multi-pole circuit switching

See Vol. I Page 1•2092
Section 5100



Versatile Ledex solenoid driven stepping switches permit multiple switching functions with a single component, in very little space. They are used for transfer switching, sequencing of complex switching arrangements, and in programming of checkout and sequential operations. There's a wide choice of multi-pole designs in 2, 4, 6, 8, 10, 12, 18, and 24 electrical positions.



manual switching

Rotary or pushbutton gives you flexibility and choice in designing switching combinations. Quality engineered for efficiency and long term dependability. Pushbutton switches are available in momentary . . . push/pull . . . reciprocal release . . . master release . . . switching combinations or single pushbutton and indicator lights. Manual rotary switches are available in 6, 8, 12, 18, 20 and 24 position.

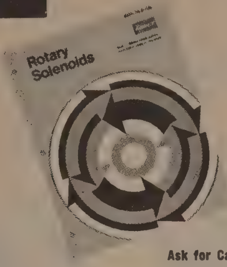
ROTARY SOLENOIDS



Ask for Catalog C-1000

230 stock models for quick prototype starts
Fast, direct rotary action

Ledex Rotary Solenoids step, turn, pull, push, index, hammer, punch or trigger — whenever there's a need for fast and dependable direct rotary action. Known for high force-to-size, ability to resist shock. Family of 8 basic sizes with right and left hand strokes from 25 to 95 degrees. Torque to 117 pound-inches. Wide choice of stock models offer economy and quick starts on prototypes. LIFE: 100,000,000 actuations with special endurance engineered models.

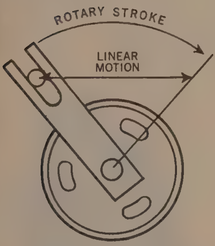
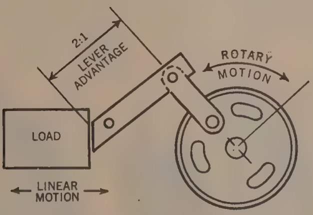
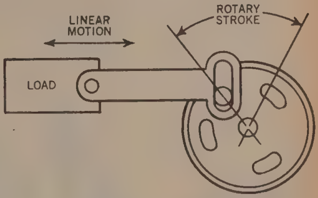
Rotary Solenoid as a Linear Actuator For Longer Strokes



SHAFT BAR LINK



ARMATURE LEVER



ARMATURE DRIVE PIN

When the stroke length is beyond the range of Ledex straight pull solenoids, a rotary solenoid may be the best solution.

Ledex rotary solenoids have raceways coined in the armature and stator. With precision ball bearings riding on inclined raceways, the solenoid provides direct, almost friction-free rotary motion. In the beginning of the stroke, where the output of a linear solenoid is low, the raceways are steep. Toward the closed end, where the magnetic attraction reaches maximum force, the raceways taper off. The effect is to evenly distribute the force.

Ledex solenoids can help you get a lot of work done in places where you don't have much room. We make both push/pull and rotary solenoids in a wide variety of shapes and sizes to solve just about any actuating problem you have.

Call Ledex when you need a lot of power in a small space to push, pull, turn, twist, step, index, hammer, punch or trigger. For a quick start on your prototype, choose from 230 different stock model designs. Or, send details and we'll custom design a space-saving solenoid for you.

PUSH & PULL SOLENOIDS

You name the job.
Short, medium or long stroke. High speed.
Tight space. Unusual load. Ledex has the
solenoid for you, usually on the shelf. Expert design
assistance for your toughest custom requirements.

Pancake shaped Ledex push/pull solenoids are built for high force to size and fast response. Better than 10ms response. Form factor minimizes size, provides maximum pole face surface for best efficiency. Two types available. Flat face is for short stroke, rapid response. Conical face gives more mid-range punch.

(For detail performance curves, ask for Catalog C-1100)

Quality engineered for efficiency and long term dependability, the Ledex long stroke solenoid has a built-in impact cushion pad to absorb energy at the end of the power stroke. For smooth travel and long wear, the solenoid plunger is electroless nickel plated. It rides in a smooth bushing track designed for positive alignment and low friction. Slotted and cross drilled plungers on all stock models simplify load attachment. Off-the-shelf models available for 12, 28 and 100 VDC operations.

D-FRAME SOLENOID

Ledex D-Frame solenoids offer several benefits. The simplified design allows construction methods that result in a more cost effective product.

All solenoids provided with quick connect terminals for fast hook-up. Leads can be provided if desired.

Load attachment through slotted and cross drilled electroless nickel plated plunger for simplified attachment and longer life.

The plunger cavity is an integral part of the bobbin which is constructed of glass filled nylon to meet or exceed class "B" NEMA standard insulation requirements.

The frame is cadmium plated with a supplementary dichromate treatment for added corrosion resistance. Multiple, tapped mounting holes provide for easy installation and interchangeability.

MODEL L6-22 AC OR DC

Holding Force: D.C. Continuous @ 24 VDC cold 35 oz. @ 24 VDC hot 32 oz.
D.C. Intermittent @ 24 VDC cold 37 oz. @ 24 VDC hot 35 oz.
A.C. Continuous @ 120 VAC cold 9 oz. @ 120 VAC hot 6 oz.
A.C. Intermittent @ 120 VAC cold 8 oz. @ 120 VAC hot 7 oz.

Voltages: 6, 12, 24, 120 VAC or DC.
AC Operating Frequency: Std. 60Hz.
Insulation Material: Class "B" (130°C) standard UL recognized materials used in construction.
Dielectric strength: 1000 V (RMS).
Termination: Quick connect terminals standard
Pull Type Operation: Standard Available — Push type on DC units only.
Plunger Mass: 6.3 grams (.22 ozs.)
Total Mass: 48.2 grams (1.70 ozs.)

POWER REQUIREMENTS

Model L6-22	AC	DC
DUTY CYCLE:		
$\left(f=\frac{\text{"on" time}}{\text{"on" time}+\text{"off" time}}\right)$ "on" time = length of longest pulse during one cycle		
Intermittent (f = ¼, "on" time = 300 seconds (max.)	9VA	8.5W
Continuous (f = 1)	5.5VA	4.0W
Expected No. of cycles @ 25°C and 50% of full stroke	5 x 10⁶	

MODEL L44-02H AC OR DC

Holding Force: D.C. Continuous @ 24 VDC cold 144 oz. @ 24 VDC hot 133 oz.
D.C. Intermittent @ 24 VDC cold 180 oz. @ 24 VDC hot 158 oz.
A.C. Continuous @ 120 VAC cold 60 oz. @ 120 VAC hot 55 oz.
A.C. Intermittent @ 120 VAC cold 75 oz. @ 120 VAC hot 70 oz.

Voltages: 6, 12, 24, 120, 240 VAC or DC.
AC Operating Frequency: Std. 60Hz.
Insulation Material: Class "B" (130°C) standard UL recognized materials used in construction.
Dielectric Strength: 1000 V (RMS).
Termination: Quick connect terminals standard. Available — Leads.
Pull Type Operation: Standard. Available — Push type.
Plunger Mass: 35 grams (1.25 ozs.).
Total Mass: 368 grams (13 ozs.)

POWER REQUIREMENTS

Model L44-02H	AC	DC
DUTY CYCLE:		
$\left(f=\frac{\text{"on" time}}{\text{"on" time}+\text{"off" time}}\right)$ "on" time = length of longest pulse during one cycle		
Intermittent (f = ¼, "on" time = 300 seconds (Max.)	66VA	31W
Continuous (f = 1)	16.5VA	10W
Expected No. of cycles @ 25°C and 50% of full stroke	20 x 10⁶	

MODEL L25-11H AC OR DC

Holding Force: D.C. Continuous @ 24 VDC cold 7 lbs. @ 24 VDC hot 5 lbs.
D.C. Intermittent @ 24 VDC cold 8 lbs. @ 24 VDC hot 5½ lbs.
A.C. Continuous @ 120 VAC cold 59 oz. @ 120 VAC hot 50 oz.
A.C. Intermittent @ 120 VAC cold 90 oz. @ 120 VAC hot 85 oz.

Voltages: 6, 12, 24, 120, 240 VAC or DC.
AC Operating Frequency: Std 60Hz.
Insulation Material: Class "B" (130°C) standard UL recognized materials used in construction.
Dielectric Strength: 1000 V (RMS).
Termination: Quick connect terminals standard. Available — Leads.
Pull Type Operation: Standard. Available — Push type.
Plunger Mass: 43 grams (1.50 ozs.).
Total Mass: 177 grams (6.25 ozs.).

POWER REQUIREMENTS

Model L25-11H	AC	DC
DUTY CYCLE:		
$\left(f=\frac{\text{"on" time}}{\text{"on" time}+\text{"off" time}}\right)$ "on" time = length of longest pulse during one cycle		
Intermittent (f = ¼, "on" time = 300 seconds (max.)	40VA	19.5W
Continuous (f = 1)	16VA	8.5W
Expected No. of cycles @ 25°C and 50% of full stroke	1 x 10⁷	

MODEL L51-04H AC OR DC

Holding Force: D.C. Continuous @ 24 VDC cold 176 oz. @ 24 VDC hot 152 oz.
D.C. Intermittent @ 24 VDC cold 260 oz. @ 24 VDC hot 250 oz.
A.C. Continuous @ 120 VAC cold 50 oz. @ 120 VAC hot 43 oz.
A.C. Intermittent @ 120 VAC cold 110 oz. @ 120 VAC hot 88 oz.

Voltages: 6, 12, 24, 120, 240 VAC or DC.
AC Operating Frequency: Std. 60Hz.
Insulation Material: Class "B" (130°C) standard UL recognized materials used in construction.
Dielectric Strength: 1000 V (RMS).
Termination: Quick connect terminals standard. Available — Leads.
Pull Type Operation: Standard. Available — Push type on DC units.
Plunger Mass: 66 grams (2.3 ozs.).
Total Mass: 425 grams (15 ozs.).

POWER REQUIREMENTS

Model L51-04H	AC	DC
DUTY CYCLE:		
$\left(f=\frac{\text{"on" time}}{\text{"on" time}+\text{"off" time}}\right)$ "on" time = length of longest pulse during one cycle		
Intermittent (f = ¼, "on" time = 300 seconds (Max.)	171VA	36W
Continuous (f = 1)	31VA	12W
Expected No. of cycles @ 25°C and 50% of full stroke	5 x 10⁶

SOLID FRAME SOLENOIDS

LIBERTY CONTROLS, INC.

Liberty Controls, Inc. has a complete line of solid frame solenoids which can be tailored to fit your needs. These shown below are the standard line which cover a variety of applications. Each of the below pull solenoids are complimented by a push type with similar characteristics. Plungers and plunger stops are made from a special steel annealed after all machining for maximum efficiency.

Continuous rated units should be used whenever possible. When the mechanical push/pull required exceeds the capabilities of a continuous rated coil, it is important to give us complete information regarding the intended duty cycle so that we may design and supply the best coil for your application. When one of these units will be energized for a period of four (4) minutes or longer, a continuous duty coil **must** be used. Where intermittent coils are to be used the per cent of "on time" is related to this four (4) minute period.

We have designed and built many **special solenoids** including push and pull, very large, and very small units. We are interested in looking at your special requirements.

HOW TO ORDER

When ordering any of the above solid frame solenoids, the part number should be specified as follows:

TYPE	DUTY	VOLTAGE	PLUNGER	
			Front	Back
60 61 81 82 88 89 90	C - Continuous I - 25% On time compared to 4 min. continuous duty cycle P - Pulse - Less than 10% on time	6VDC or AC 12VDC or AC 24VDC or AC 48VDC or AC 115VDC or AC 230VDC or AC	A B E	U X Y

SPECIAL SOLENOIDS

In addition to the standard solenoids above, Liberty Controls has tailored many units to our customers' needs. Whether we design the solenoid entirely, or manufacture it to your specifications, the flexibility offered allows for a quality economical product. In that we have our own tool and die making facilities, wind our own coils, and make the fabricated and screw machine parts in our own plant, we can fill any solenoid requirement.

SPECIAL 82 OPEN

This special design with heavy steel washers on each end of the coil allows for a relatively level pull force throughout the entire plunger travel. Note also the felt pad for quiet operation.

PANEL MOUNT TYPE 60

This unit utilized our Type 60 solenoid characteristics; however it can be panel mounted. Many tubular solenoids are used only because of the ability to panel mount them. Here is a panel mount solenoid with a low cost solid frame design.

Liberty Controls, Inc. 500 Brookforest Avenue, Shorewood, Illinois 60431 815/725-2241

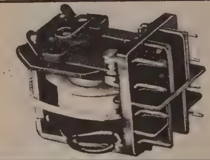
GENERAL PURPOSE TYPE RELAYS

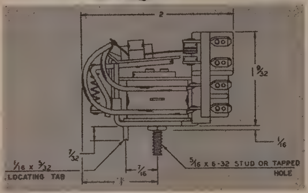
LIBERTY CONTROLS, INC.

Liberty Controls has an outstanding reputation for its line of General Purpose Relays. These relays perform dependably in many diverse applications including light to medium switching and plate circuit operations, in process controls and communication equipment. More recently many of these types of relays have been used as safety features on power equipment, such as, line monitoring for stray currents, discharging voltage on shutdown, and equipment shutdown through fault detection.

A wide variety of contact arrangements and ratings are available in our general purpose relay family. Minimum contact pressures of 25 grams are maintained on the smaller relays while the larger power relays perform at upwards of 200 grams contact pressure. Standard contacts are made of Silver Cadmium Oxide for low resistance qualities and then gold flashed to prevent corrosion and retard pitting which generally occurs with inductive loads.

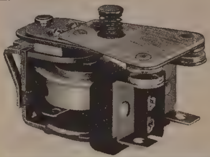
SERIES 210

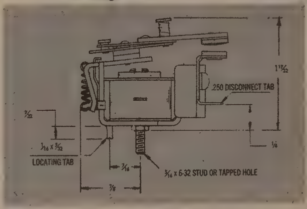




ELECTRICAL CHARACTERISTICS:
CONTACTS: Rated at 5 or 10 amps using silver cadmium oxide as standard. U/L approved. ACTION: SPDT thru 3PDT. OPERATING VOLTAGES: 6, 12, 24, 115, 230 VAC; 6, 12, 24, 110 VDC. TERMINALS: Tab, solder, or printed circuit type. MOUNTING: Frame drilled and tapped for one (1) 6-32 screw and locating tab. Optional with 5/16" X 6-32 stud and w/o locating tab. SPECIAL: Available with SPST normally open or normally closed action. Also available as a manual reset or latching relay. Special plate circuit coils can be provided. See special applications.

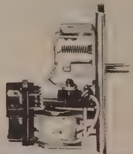
SERIES 250

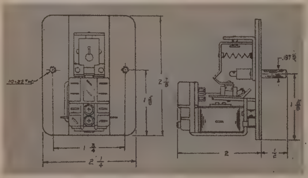




ELECTRICAL CHARACTERISTICS:
CONTACTS: Rated at 25 amps @ 120-240 VAC resistive and 1 HP @ 120-240 VAC. ACTION: SPST Normally open, double break. OPERATING VOLTAGES: 6, 12, 24, 115, 230 VAC; 6, 12, 24, 110 VDC. TERMINALS: 1/4" quick connect for contacts, 3/16" quick connect for coil. MOUNTING: Frame drilled and tapped for one (1) 6-32 screw and locating tab. Optional with 5/16" X 6-32 stud and w/o locating tab. SPECIAL: Available with 5 amps SPDT auxiliary switch.

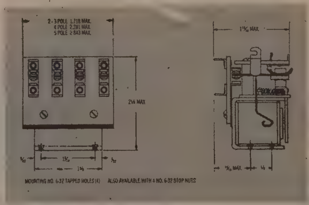
SERIES 218





ELECTRICAL CHARACTERISTICS:
CONTACTS: Rated at 5 or 10 amps using silver cadmium oxide as standard. ACTION: SPST thru 3PDT: OPERATING VOLTAGES: 6, 12, 24, 115, 230, VAC; 5, 6, 12,,24, 110 VDC. TERMINALS: Combination 3/16" quick connect, or solder, or printed circuit type. MOUNTING: 2 holes 10-32 tapped in front plate as shown or 6-32 tapped hole in base of relay. APPLICATION: This relay is typically used in safety circuits and unit shutdown circuits where a pulse to the coil will operate the relay and then the unit bar to be released manually through the reset button.

SERIES 630



ELECTRICAL CHARACTERISTICS:
CONTACTS: Rated at 15 amps. 120V 60 Hz. resistive using gold plated silver contacts as standard. ACTION: DPDT thru 5PDT. OPERATING VOLTAGES: 6, 12, 24, 48, 115, 230 VAC; 3, 6, 12, 24, 48, 110 VDC. TERMINALS: Solder or screw type. MOUNTING: Frame drilled and tapped for four (4) 6-32 screws. SPECIAL: Available in ST normally open or normally closed action. Also provided in 8, 12, & 18 pin Jones Plug or 8, 12, and 20 pin octal type plug.

Liberty Controls, Inc. 500 Brookforest Avenue, Shorewood, Illinois 60431 815/725-2241

TELEPHONE TYPE RELAYS

LIBERTY CONTROLS, INC.

Liberty Controls makes high quality telephone type relays for many special applications as indicated below. Contact materials of the finest quality are used to make any of the contact form arrangements. Special engineering is available for any type of telephone relay application.

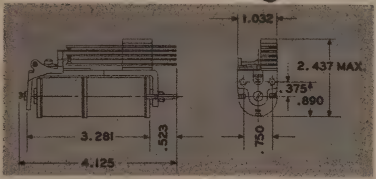
Coil characteristics are tailored to meet your needs and are available as single wound, double wound, concentric wound, and high resistance wound. Copper slugs and sleeves can be used to meet your special operate and release timing needs.

Specially annealed heelpieces and armatures are used to give the most efficient magnetic properties available and bearing pins are used throughout our entire line of telephone relays.

Liberty Controls builds several sizes of relays so that we can offer the most suitable combination of size versus sensitivity. The B and C series offer the maximum sensitivity along with maximum contact arrangements. Then the M series offers similar pile-up arrangements to the C but the coil has been shortened for a smaller space requirement. The G series offers a small relay with multiple terminal applications and is extremely versatile.

We carry other sizes of telephone relays, so contact us with your requirements.

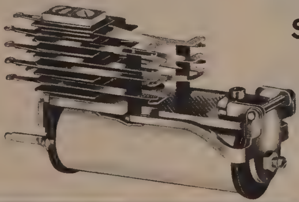
SERIES B

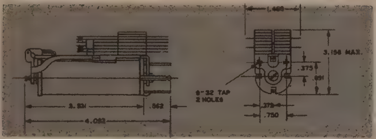


ELECTRICAL CHARACTERISTICS:

CONTACTS: Bifurcated contacts standard but single contacts available. Specify the electrical characteristics you desire. PILEUPS: Maximum of 20 springs in each pileup (one or two pileups). OPERATING VOLTAGES: Up to 230 V AC or DC. VOLTAGE BREAKDOWN: 1500 V RMS 60 Hz. (higher is required). TERMINALS: Solder Type. MOUNTING: Heelpiece drilled and tapped for two 8-32 screws. SPECIAL: Mounting hardware and cover are available. Can be provided as a socket plug-in relay. Also available hermetically sealed. See special applications.

SERIES C

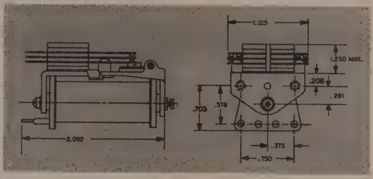




ELECTRICAL CHARACTERISTICS:

CONTACTS: Many contact materials are availáble. Please specify your rating needs. PILEUPS: Maximum of 20 springs in each pileup (one or two pileups) Micro-switch available. OPERATING VOLTAGES: CQA up to 230 VDC, CSO & CSR up to 135 VDC, CAC up to 220 VAC. VOLTAGE BREAKDOWN: 1500 V RMS 60 Hz (higher if required) TERMINALS: Solder Type. MOUNTING: Heelpiece drilled and tapped for two 8-32 screws. SPECIAL: Mounting hardware and cover are available. Can be provided as a socket plug-in relay. Also available hermetically sealed. See special applications.

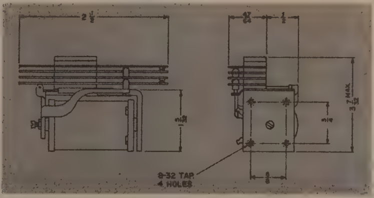
SERIES G



ELECTRICAL CHARACTERISTICS:

CONTACTS: Standard contacts are bifurcated, but many materials are available to meet your specifications. PILEUPS: Maximum of 20 springs in each pileup (one or two pileups). OPERATING VOLTAGE: GQA up to 150 VDC; GSO and GSR up to 110 VDC; GAC up to 220 VAC. TERMINALS: Solder Type, printed circuit type, or GQIN insertable terminals for socket mounting. MOUNTING: Heelpiece drilled and tapped for two 6-32 screws. SPECIAL: Available in 16 pin or 28 pin cover and socket arrangement. See special applications. Hermetically sealed relays also available.

SERIES M



ELECTRICAL CHARACTERISTICS:

CONTACTS: Many contact materials are available. Please specify your rating needs. PILEUP: Maximum of 12 springs in pileup (single pileup only) Micro-switch available. OPERATING VOLTAGE: MQA up to 135 VDC; MSO and MSR up to 115 VDC; MAC up to 220 VAC. VOLTAGE BREAKDOWN: 1500 V RMS 60 Hz. (higher if required). TERMINALS: Solder type. MOUNTING: Heelpiece is drilled and tapped for four 8-32 screws. SPECIAL: Hermetically sealed relays also available.

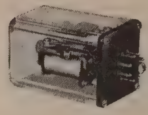
Liberty Controls, Inc. 500 Brookforest Avenue, Shorewood, Illinois 60431 815/725-2241

SPECIALS

LIBERTY CONTROLS, INC.

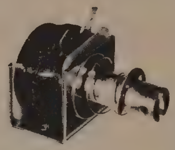
"G" SERIES INSERT TYPE

The series GQIN is a G Relay with a mating flush mounted socket and clear plastic cover which snaps over the socket. Outstanding benefits include pre-wiring socket possibilities, quick installation and removal of relay, environmental protections, and cost savings.



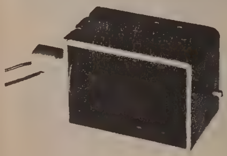
"G" OCTAL TYPE PLUG-IN

In this design, the relay is prewired to an octal type plug to provide yet another means of quick installation and removal. The cover can be Lexan, metal, or hermetically sealed.



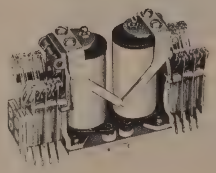
CASH DRAWER SOLENOID

This solenoid was specially designed for releasing a latch to open a cash drawer in an automated check-out counter operation at a department store. The plunger and stop have a special conical design to increase the pull force and the spring then resets the unit when power is cut off.



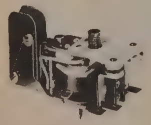
EXTENDED LIFE TYPE 90

The Solenoid shown is a push type with special delrin bushings in the front and rear to support the plunger. This design was conceived to increase the life on the unit as well as allow for shorter cycle time.



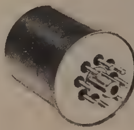
LATCHING RELAYS

The Latch Relay is made up of two relays (available in 210, and G Series) with provision for mechanical interlock. It provides the best features of our relay with a memory. Its twin relay construction permits it to remain locked in either position (independent of possible power supply failure) until the opposite relay is energized. The latching action makes this type of relay ideal for such applications as registry systems or any other system requiring storage of data from an intermittent or short pulse input.



251

This unit uses the standard 250 Series Relay with an auxiliary switch attached. This auxiliary switch is a snap-action switch with 5 ampere rating in a SPDT arrangement. The mounting is the same as that of the standard 250 Series. The auxiliary switch feature enhances the usefulness of the standard relay in that it can be used for switching a light and medium load concurrently.



"S" OCTAL TYPE PLUG-IN

This octal plug-in Series S Relay is an example of how the telephone type, as well as, general purpose type relays can be mounted on a standard octal type plug. Depending on contact arrangements these can be provided in 8, 12, and 20 pin configurations. Hermetic sealing is also available on most series.

Liberty Controls, Inc. 500 Brookforest Avenue, Shorewood, Illinois 60431 815/725-2241

THIS IS LIBERTY CONTROLS

Coil Winding

Liberty Controls manufactures several lines of quality products generally classified as electronic components. Solenoids, general purpose relays and telephone type relays are the quality products we produce.

The company has been in operation since 1960 and we are presently housed in our own 20,000 Sq. ft. building. From this plant we are supplying many major companies including appliance, computer, control and aerospace manufacturers.

Here are some of our capabilities:

Tool and Die Division–We have our own tool and die shop so we can offer prototype product models for new designs. This also gives us a flexibility of design as well as a quick turnaround on new items that must be tooled.

Fabrication–Most of the fabricated parts used in our product are made in plant–offering high quality finished products at very competitive prices.

Coil Winding–All coils used in Liberty Controls are wound "in-house"–giving us high quality and flexibility on special coils not offered by large manufacturers. We have high speed equipment for big volume jobs.

General Assembly–Final product assembly is done completely at our plant. All parts are inspected and only after passing sub-assembly tests are they assembled into the final product. Most of the assembly equipment is designed and built in our facility.

We pride ourselves in having the flexibility to adapt our standard products to your special needs. Tied with this flexibility are production techniques and capabilities to satisfy large volume requirements. You will find that Liberty Controls can handle almost any kind of problem dealing with solenoids, relays or electromechanical devices. Contact our factory or our representative in your area for your special needs in any of our product areas.

LOW PROFILE RELAYS

CLASS 63

LOW PROFILE P.C. BOARD RELAY

NEW

DPDT — 1 AMP

SINGLE & BIFURCATED CONTACTS

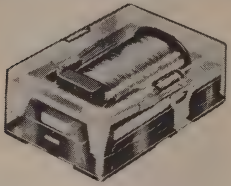
LONG LIFE — HIGH RELIABILITY

DUST PROOF COVER

STANDARD .1 INCH GRID SPACING FOR TERMINALS

DC OPERATION ONLY

LATCHING VERSION AVAILABLE ON SPECIAL ORDER



The Class 63 was designed to fulfill the need for a truly compact low cost printed circuit board relay. The overall height of the relay is .4″ above the P.C. board. DPDT contacts are rated at 1 amp, with a low coil power consumption. Because of the extremely efficient space utilization, the Class 63 is particularly suited for applications where multiple switching functions are needed. Among these applications where dense rack mounting is essential are communication systems, data processing equipment, and automatic control systems.

SPECIFICATIONS

Contact Arrangement: DPDT, single and bifurcated contacts.

Contact Ratings: 1 amp @ 24VDC resistive; .3 amps @ 115VAC/DC resistive.

Capacitance: Contact/Contact — .3 pF. Open Contact/Frame — .6 pF. Closed Contact/Frame — 1.6 pF.

Maximum Ambient Temperature at Nominal Coil Power: 70°C.

Avg. Pull-In Coil Power: 250mW.

Nominal Coil Power: 450mW.

Maximum Coil Power at 20°C Ambient Temperature: 1.5W.

Maximum Switching Rate: 50/second.

Dielectric Strength: Winding/Frame — 500VRMS.

Insulation Resistance: 10,000 Megohms minimum.

Operate Time: 8 msec.

Release Time: 6 msec.

Contact Material: Gold-flashed silver.

Shock: No contact discontinuity—12 G's; Mechanically — 20 G's.

Vibration — 10 to 55 Hz: 10 G's.

Mechanical Life: 2×10^8 operations

Life, under Resistive Load: 12W — 2×10^7 operations; 24W — 6×10^6 operations.

Enclosure: Plastic Dust Cover.

Weight: 15 grams.

Above values are "typical" and are intended to guide the engineer, but are not absolute.

CLEANING BY IMMERSION NOT RECOMMENDED

Stock Part No.	Coil Nom. Volts	Coil Ohms	Must Operate Voltage	Max. Coil Volts	Prices 1-24
BIFURCATED CONTACTS DPDT					
W63TPCX-1	6	81	4.2	11	4.65

W63PCX-3	24	1045	17.0	44	4.45
W63PCX-4	48	5350	32.8	88	4.75

The above values are at 25°C.

Coil resistances are ±15% (24 to 48V coils). ±10% (6 to 12V coils).

CLASS 64

LOW PROFILE P.C. BOARD RELAY

NEW

4PDT AND 6PDT — 1 AMP

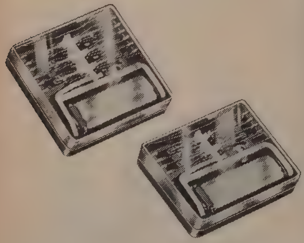
LONG LIFE — HIGH RELIABILITY

BIFURCATED CONTACTS

DUST PROOF COVER

STANDARD .1 INCH GRID SPACING FOR TERMINALS

DC OPERATION ONLY



The Magnecraft Class 64 is the lowest profile electromechanical relay available where close rack mounting of P.C. boards is required. The relay height of .4″ above the P.C. board permits minimum center-to-center P.C. board spacing. Bifurcated contacts are rated at 1 amp for 4PDT and 6PDT applications. The base design protects against flux or solder from entering the relay, thus allowing automated wave soldering processes for simplification and economy. The relay is suited for applications such as communication systems, data processing, and automatic control systems. The low cost Class 64 offers high quality dependable performance and long life.

SPECIFICATIONS

Contact Arrangement (Bifurcated): 4PDT and 6PDT.

Contact Ratings: 1 amp @ 24VDC resistive; .3 amps @ 115VAC/DC resistive.

Capacitance: Contact/Contact — <2pF. Open Contact/Frame — <1.8pF. Closed Contact/Frame — <2.3pF.

Maximum Ambient Temperature at Nominal Coil Power: 70°C.

Maximum Switching Rate: 30/second.

Nominal Coil Power: 700mW.

Average Pull-In Coil Power: 250mW. (4-PDT); 450mW (6PDT).

Maximum Continuous Coil Power Dissipation @ 20°C Ambient Temperature: 2.5W.

Insulation Resistance: 10,000 megohms minimum.

Operate Time: 8 msec.

Release Time: 2 msec.

Contact Material: Gold-flashed silver.

Dielectric Strength: Contact/Contact — 1000 VRMS; Contact/Frame — 1000-VRMS; Winding/Frame — 1000VRMS.

Mechanical Life: 1×10^8 operations.

Enclosure: Plastic dust cover.

Weight: 25 grams (4PDT) 30 grams (6-PDT).

Above values are "typical" and are intended to guide the engineer, but are not absolute.

CLEANING BY IMMERSION NOT RECOMMENDED

LOW PROFILE RELAYS

CLASS 65

MINIATURE P.C. BOARD POWER RELAY

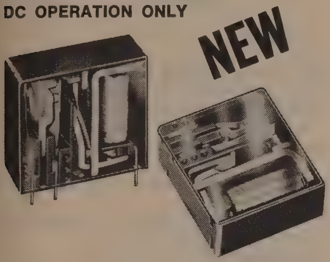
SPDT — 8 AMPS

HORIZONTAL AND VERTICAL STYLES

DUST PROOF COVER

STANDARD .1 INCH GRID SPACING FOR TERMINALS

DC OPERATION ONLY



Magnecraft Class 65 miniature P.C. board power relay fills the needs for a low cost power relay to switch heavy current loads at a lower coil power. The relay's SPDT contacts are rated at 8 amps. The versatile thin pack horizontal and vertical styles can be very important to a design engineer when space is a factor. Typical applications are in heating systems, automotive and consumer electronics, process control, communications and data processing.

SPECIFICATIONS

Contact Arrangement: SPDT

Contact Rating: Maximum Continuous Current — 8 amps; Maximum Switching Current — 8 amps; Surge Rating at 10% Duty Cycle with 4 sec. on-time maximum — 15 amps; Maximum Continuous Volts — 250VRMS.

Power Rating: 100W/500VA

Capacitance: Contact/Contact — 1.6pF; Contact/Winding — 1.0pF; Contact/Frame — <1.25pF.

Maximum Ambient Temperature at Nominal Coil Power: 60°C.

Nominal Coil Power: 450mW.

Average Pull-In Coil Power: 200mW.

Maximum Continuous Coil Power Dissipation @ 20°C Ambient Temperature: 1W.

Maximum Switching Rate: 20/second.

Insulation Resistance: >100Mohms.

Contact Material: Silver cadmium oxide gold flashed — in stock, other contacts available.

Operating Time: 6 msec.

Release Time: 4 msec.

Dielectric Strength: Contact/Contact — 500VRMS; Contact/Winding — 2500VRMS; Contact/Frame — 2500VRMS; Winding/Frame — 500VRMS.

Contact Life, Resistive Load: 100VAC/8 amps — 1 x 10^5; 100VAC/5 amps — 2 x 10^5/ 24VDC/8 amps — 1 x 10^5; 250VDC/0.4 amps — 5 x 10^6.

Mechanical Life: 2 x 10^7.

Enclosure: Plastic dust cover.

Weight: 12 grams.

Above values are "typical" and are intended to guide the engineer, but are not absolute.

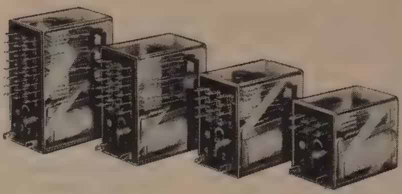
MINIATURE INDUSTRIAL RELAYS

CLASS 67

MINIATURE INDUSTRIAL RELAYS

3 AND 5 AMP CONTACTS
DPDT, 4PDT, 6PDT, AND 8PDT CONTACTS
ENCLOSED PLUG-IN AND P.C.
BIFURCATED CONTACTS AVAILABLE



The Magnecraft Class 67 miniature industrial relays are engineered and designed for applications requiring 2 to 8 form C contacts where space, weight and low cost are of prime importance. Ideal for use in business machines, communication equipment, vending machines and all applications requiring long life and reliable performance. Available with P.C., solder terminal, and plug-in mountings. Single and bifurcated, crossbar contacts of silver alloy gold flashed are rated 3 and 5 amps at 28VDC or 115/120VAC resistive load. All Class 67 relays feature see-thru plastic dust covers and combination solder/plug-in terminals (sockets listed below) with 3-48 NC stud. Voltage specified versions operate at 80% of nominal coil voltage or less with a coil dissipation of 1.8 watts max. The relay has a design feature of extra wide contact blades for greater current carry capacity and cooler operation.

Another Class 67 design feature is the minimum iron to iron hinge gap for maximum magnetic efficiency. AC, sensitive and ultra sensitive versions are also available.

UL listed versions of the standard relays are available on special order. UL File No. E52197.

SPECIFICATIONS

Nominal Coil Voltage: See table on each type for standard voltages.

Contact Combination: DPDT, 4PDT, 6PDT, and 8PDT.

Contact Rating: 3 or 5 amps @ 28VDC or 115VAC resistive load.

Contact Material: Gold flashed silver alloy.

Contact Forms: Bifurcated or non-bifurcated crossbar contacts.

Coil Dissipation: 2.2 watts max.

Dielectric Strength: 1000 volts RMS, contacts to ground, 500 volts RMS between open contacts.

Contact Resistance: .050 ohms max. before life, .200 ohms max. after life.

Nominal Power: See table on each type.

Insulation Resistance: 1000 megohms minimum at 25°C.

Ambient Temperature: −55° to +71°C.

Operate: 80% of nominal coil voltage and 85% AC.

Terminals: Printed circuit, plug-in or solder (solder lug or printed circuit sockets available).

Enclosure: Clear, crackproof cover.

Mounting: Printed circuit, chassis or plug-in.

Weight: 2C — 1.00 oz., 4C — 1.2 oz., 6C 1.3 oz., 8C — 1.4 oz. max.

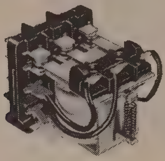
GENERAL PURPOSE RELAYS

NOW UL RECOGNIZED

Magnecraft's Class 388 is a versatile, low cost, general purpose relay designed to meet UL and CSA standards. Class 388 relays are "Component Recognized" under the Component Program of Underwriters' Laboratories, Inc., File No. E43641, and classified "Industrial Control Equipment-Component, Magnetic Motor Controller."

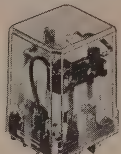
CLASS 388
OPEN TYPE RELAY



3 WAY TERMINALS
PLUG-IN — SOLDER
QUICK CONNECT

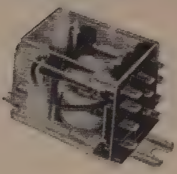
- SPDT-DPDT-3PDT Silver alloy, gold flashed contacts rated 11-13 amps at 28VDC, 120VAC or 240VAC resistive load; ⅓ HP at 120VAC; ½ HP at 240-VAC.
- Dielectric withstanding voltage of 500-VRMS between open contacts; 1500-VRMS between all other elements.
- Terminals are 3-way for plug-in, solder, or .187″ quick connect.
- One #6-32 tapped mounting hole with locating boss.
- Weight — 2.3 ozs. approx.

CLASS 388CP
ENCLOSED PLUG-IN RELAY



- SPDT-DPDT-3PDT Silver alloy, gold flashed contacts rated 11-13 amps at 28VDC, 120VAC or 240VAC resistive load; ⅓ HP at 120VAC; ½ HP at 240-VAC.
- Dielectric withstanding voltage of 500-VRMS between open contacts; 1500-VRMS between all other elements.
- Plug-in mounting, mates with Industrial Screw Terminal Sockets or chassis mount nylon sockets shown on page 13.
- Tough, clear, crackproof cover.
- Weight — 3 ozs. approx.

CLASS 388CQ
ENCLOSED FLANGE MOUNT RELAY



- SPDT-DPDT-3PDT Silver alloy, gold flashed contacts rated 11-13 amps at 28VDC, 120VAC or 240VAC resistive load; ⅓ HP at 120VAC; ½ HP at 240-VAC.
- Dielectric withstanding voltage of 500-VRMS between open contacts; 1500-VRMS between all other elements.
- Solder or .187″ quick connect terminals. Sockets available.
- Tough, clear, crackproof cover with flange mount.
- Weight — 3 ozs. approx.

AC OR DC OPERATION

WIRING LAYOUT FROM FRONT OF LAYOUT BOARD

The Class 588's are low cost UL recognized continuous duty general purpose relays, engineered for maximum efficiency and reliable performance at lowest cost. These relays are ideal for use in test equipment, business machines, automation, and communication equipment.

Contacts are silver alloy, gold flashed rated 5 or 10 amps at 115VAC resistive load. These open type relays have axial type solder lugs for easy wiring and are mounted by a single 6-32 threaded mounting hole with a locating boss for ease of mounting.

The Class 588CP are low cost UL recognized continuous duty general purpose relays. The relays are similar to the Class 588 types but utilize a see-thru plastic cover that protects against dust, damage, tampering and is shatter resistant.
The Class 588CP also has a plug-in base. SPDT and DPDT contacts have 8 pin octal plug-in bases while the 3PDT types use 11 pin plug-in bases. Magnecraft's standard 70-170, 11 pin and 70-169, 8 pin octal sockets are available. The 8 pin type also mates with a chassis mounted socket, Amphenol type 77-MIP-8 and the 11 pin type mates with Amphenol type 77-MIP-11 or equivalents.

GENERAL PURPOSE RELAYS

Class 88 Magnecraft Relays are an abrupt departure in clapper type relay design. Dimensionally interchangeable with relays made by others, the 88 has been developed to provide Telephone Type Relay reliability at general purpose relay prices.

Unique in relays of this type, Magnecraft 88 Relays have rugged, precision-built hinge-pin armature bearings with oversize bearing surfaces — the same construction used in the finest telephone type relays for lowest friction and maximum contact effectiveness with stabilized adjustment over long life.

Glass melamine insulation provides high dielectric strength, essentially unaffected by humidity and temperature changes. Molded nylon bobbins with ruggedized coil terminal inserts eliminate possibility of shorts.

Built-in contact wipe with riveted contacts further enhance reliability through long life.

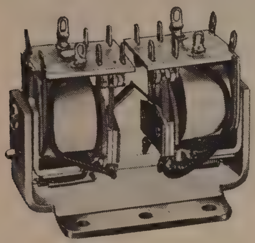
GENERAL PURPOSE RELAYS

CLASS 88L
LATCHING RELAY

4PDT-6PDT
10 AMPS
AC OR DC OPERATION



The Class 88L general purpose relay is a mechanical latching relay whose design combines two Class 88 relays with interlocking latch-in levers mounted on a common base. An added feature of the 88L are the rugged hinge-pin armature bearings which stabilizes the latching mechanism.

- Silver alloy gold flashed conacts are rated at 10 amps.
- Armature latches when pulled in.
- Energizing one armature releases or rests the other.
- Each relay is complete with independent operating coil.
- Stronger magnetic system designed for intermittent actuation.
- Weight — 6½ ozs. approx.

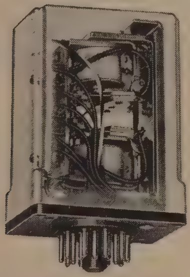
CLASS 88LCP
ENCLOSED PLUG-IN LATCHING RELAY

4PDT
10 AMPS
AC OR DC OPERATION



The Class 88LCP general purpose latching relay is basically identical to the 88L with the exception that it is only available in a 4PDT version with a 10 amp contact rating and has a tough, see-through polycarbonate plastic enclosure. Mounting is by molded phenolic 20-pin octal style plug. Mates with standard 20-pin octal style socket. (Amphenol No. 77-MIP-20 or equivalent.)

- Armature latches when pulled in.
- Energizing one armature releases or rests the other.
- Each relay is complete with independent operating coil.
- Stronger magnetic system designed for intermittent actuation.
- Weight — 8 ozs. approx.

CLASS 88HP
HERMETICALLY SEALED PLUG-IN RELAYS

DPDT-3PDT
10 AMPS
AC OR DC OPERATION

The Class 88HP general purpose relay is available in two contact combinations. DPDT or 3PDT with a 10 amp contact rating. A unique feature of the 88HP is its metal enclosure with heavy duty glass to metal plug pins. Standard is an 8 or 11 pin octal style plug. Also the 88HP is hermetically sealed to afford maximum protection in severe ambient conditions.

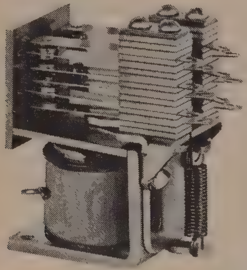
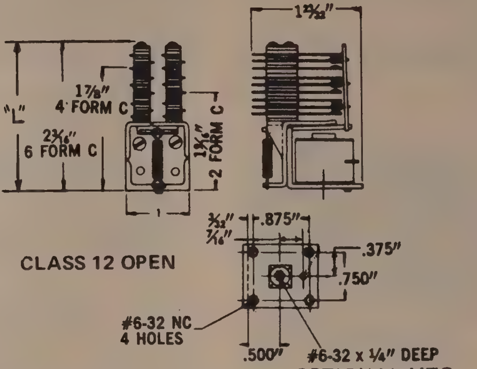
DPDT-3PDT-4PDT-6PDT
10 AMPS
AC OR DC OPERATION





CLASS 12 OPEN

L= 1-9/16 DPDT, 1-7/8 3PDT & 4PDT, 2-3/16 6PDT

The compact Class 12 is an efficient and low cost general purpose relay with multiple contact combinations. Available as standard in 2, 3, 4, and 6PDT silver alloy contacts rated 10 amps at 120 volts AC or 28 volts DC non-inductive load. This is an unusually heavy power control relay for its size.

The Class 12 relay incorporates many new features for longer life and better performance at lower cost. An example of this is a new improved lifter with individual slots to hold each movable contact blade. The contact blade stays in alignment and each slot holds each blade securely in position. The mounting consists of four 6-32 tapped holes on ¾″ x ⅞″ centers. An optional mounting hole tab 6-32 x ¼″ deep is available.

POWER RELAYS

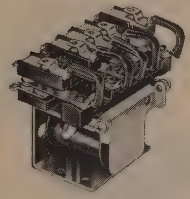
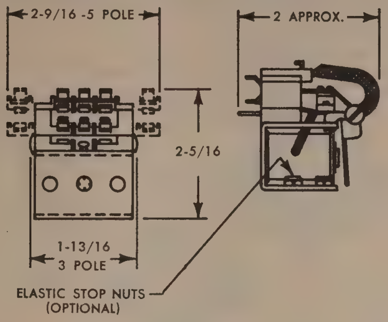
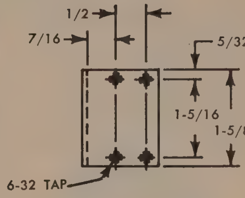
CLASS 93
POWER RELAY

3PDT OR 5PDT IN STOCK
WITH 20 AMP CONTACTS
AC OR DC OPERATION







The Class 93 is a compact power relay designed for versatility and long life. It is available as a unit with 3 through 5 poles with contact ratings of up to 20 amps. Available enclosures add to its versatility. Contacts and terminals are mounted on molded phenolic blocks with integral barriers. Moveable contact blades are made of spring temper copper alloy for high conductivity and long life. Adjusting screws on each blade permit close adjustment and maximum contact pressures with built in contact wipe. Armature pivots on machined bearing pins and pivot holes. All these features contribute to the sensitivity and longevity of this relay.

SPECIFICATIONS

Nominal Coil Voltage: See tables of relay part numbers for standard voltages. Intermediate values available up to 220VDC or 277VAC, 60 Hz.

Contact Combinations: SPDT, DPDT, 3PDT, 4PDT and 5PDT standard. Other contact combinations available.

Maximum Dissipation: 6 watts.

Contacts (10 amp type): Silver alloy gold flashed, 3/16" dia. standard, rated 10 amps at 120VAC, resistive load.

Contacts (20 amp type): Silver alloy gold flashed, 1/4" dia. standard, rated 20 amps at 120VAC, resistive load.

DC Coil Resistance: Up to 35,000 ohms on AC operated relays and up to 60,000 ohms on DC operated relays.

Dielectric Withstanding Voltage: 1000VRMS between mutually insulated conductive elements.

Typical Operate Time (5PDT): 35 milliseconds max. with nominal coil voltage.

Typical Release Time (5PDT): 20 milliseconds max. with nominal coil voltage.

Mounting: Four 6-32 threaded holes.

Terminals: Solder type standard.

Optional Enclosure: Metal dust resistant or hermetically sealed available, solder terminals or plug-in.

- Weight (open style) — 8 ozs. approx.

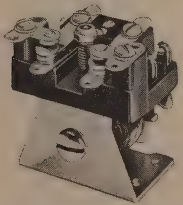
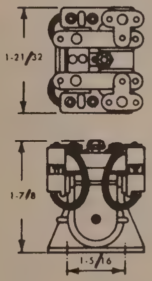
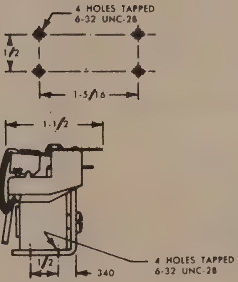
CLASS 96
POWER RELAY

15 AMP DPDT
30 AMP SPDT-DB-DM
AC OR DC OPERATION







The Class 96 is a continuous duty general purpose power relay, available in AC or DC with DPDT (2C) and SPDT-DBDM and (1Z) contact arrangements. This product is excellent for general industrial power control circuits. Silver cadmium oxide contacts are rated at 15 or 30 amps at 28VDC or 115VAC resistive. A variety of enclosures are available for the relay. Contacts and terminals are mounted on molded phenolic blocks with integral barriers. Moveable contact blades are made of spring temper copper alloy for high conductivity and long life. Armature pivots on machined bearing pins and pivot holes are precision reamed. All these features add to this quality built Magnecraft product which is in stock for immediate delivery.

SPECIFICATIONS

Contact Rating: 15 amps resistive at 115VAC or 28VDC, 30 amps resistive for Form X, Y, or Z.

Contact Combinations: 2 Form A, B, or C max., or 1 X, Y, or Z max.

Contact Material: 1/4" dia. silver alloy, gold flashed.

Contact Resistance: .100 ohms max.

Temperature Range: −30°C to +65°C.

Coil Dissipation: 5 watts maximum at 25°C.

Insulation Resistance: 100 megohms min.

Nominal Power: 2.5 watts, Maximum Dissipation: 5 watts.

Dielectric Withstanding Voltage: 500VRMS.

Mounting: Four 6-32 tapped holes.

Terminals: Solder lugs.

Enclosure: Open, dustite, or hermetically sealed.

HEAVY DUTY POWER & SOLID STATE

CLASS 97

ENCLOSED POWER RELAY

25 AMPS — COMPACT
AC OR DC OPERATION
UL RECOGNIZED (U.L. File No. E43641)

The Class 97 is a low cost 25 amp relay for 1 and 2 pole, 120/240VAC applications. It is available with socket for use with standard quick-connect terminals for simplicity and ease in wiring. The Class 97 relay offers high quality, dependable performance and long life.

The latch function is accomplished by means of a "Hold" coil in series with a "Hold" contact. De-latch is accomplished by breaking current in the "Hold" circuit.

"Pick-up" adjustment screw pre-set and locked at the factory.

SPECIFICATIONS

Contact Combination and Rating:

1) 2 form X (double make or SPST-NO-DM) Rated at 25 amps.
2) 2 form Y (double break or SPST-NC-DM) Rated at 25 amps.
3) 2 form Z (double break, double make, SPDT-NC-NO-(DB-DM) Rated at 15 amps.
4) 1 form X, 1 form Y Rated at 25 amps.
5) 1 form X, 1 form Z Rated at 15 amps
6) 1 form Y, 1 form Z Rated at 15 amps

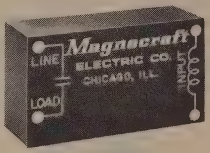
CLASS 501QPC

SOLID STATE HYBRID POWER RELAY

- Printed circuit package.
- IC Compatible.
- Load rating 3 amps at 120VAC RMS or 200VDC peak at 25°C.
- Surge rating: 100 amps for .016 seconds.
- SPST-NO (1 Form A) solid state output.
- Operate time: .003 seconds.
- Weight — 2 ozs. approx.



The Class 501QPC is a reed triggered triac assembly encapsulated in a low profile printed circuit package. It features the long life and isolation of a reed relay to trigger a triac capable of switching the high inrush currents of such devices as lamps, motors, capacitors and heaters. The expected life of the Class 501QPC is approximately 25 million operations.

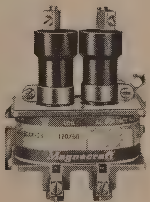
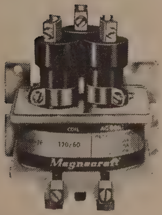
*Contact factory for recommendations.





The Class M35 and M60 are newly designed stainless steel enclosed, hermetically welded, high capacity, compact size Mercury Displacement Relays. Each part has been carefully designed by experienced engineers to optimize performance and minimize costs. A rigorous relay test program is in continuous progress to insure absolute compliance with every design criteria. These steel enclosed MDR's with improved plunger design in a highly effective inert gas atmosphere are capable of switching rated loads for millions of operations. If your application is too tough for a conventional relay, consider our MDR. These unique contactors are capable of switching more than 20 times the published ratings under special conditions. Contact our Engineering Department for more information.

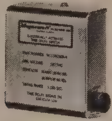
AIR DASHPOT & SOLID STATE HYBRID TIME DELAY

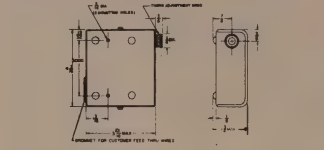
CLASS 112C
AIR DASHPOT TIME DELAY RELAY

DPDT 10 AMPS
±10% REPEATABILITY
OPERATE AND RELEASE DELAY
ADJUSTABLE 1 TO 150 SECONDS
- Weight — 20 ozs. approx.



Class 112C features rugged all metal enclosure with grommet for customer feed through wires. Internally wired by customer to .187 quick disconnect terminals. The solenoid assembly added to air dashpot/snap switch combination initiates time switching function by electrical actuation.

Available in operate or release delay. Release delay accomplished without standby power. Time repeat accuracy ±10%. Mounting: Two 3⁄16″ diameter holes on 3″ centers.



Stock Part No.	Contacts 10 Amps	Coil †Volts	Coil *Ohms	Prices 1-9
		Slow Operate

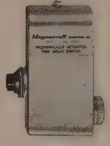
Operate and release delay adjustable 1-150 sec.

CLASS 113C
AIR DASHPOT TIME DELAY SWITCH

SPDT 10 AMPS
±10% REPEATABILITY
PUSHBUTTON RELEASE BUTTON
TIME DELAY IS ON
- Weight — 8 ozs. approx.



The Class 113C Time Delay Switch is a classic case of simplicity in design. Few moving parts, no standby power required to perform timing function. Single hole panel mounting with 5⁄8″ threaded bushing. Easily installed and wired by customer through grommet. Button diameter 1⁄2″. Overall Size: 2 1⁄16 x 3 5⁄8 x 1 5⁄32″.

AIR DASHPOT TIME DELAY RELAY

DPDT 10 AMPS
±10% REPEATABILITY
PLASTIC ENCLOSURE
SCREW TYPE TERMINALS
OPERATE AND RELEASE DELAY
ADJUSTABLE 1 TO 150 SECONDS
- Weight — 14 ozs. approx.

Class 112M comes in molded high impact plastic enclosure and built-in screw type terminals for easy customer wiring. The solenoid assembly added to air dashpot/snap switch combination initiates time switching function by electrical actuation. Available in operate or release delay. Release delay accomplished without standby power. Timing adjustable with knob or capped Allen screw. Flange mounting: Six 3⁄16″ diameter holes 1⁄2″ x 4 1⁄8″ centers.

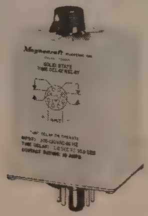
SOLID STATE HYBRID TIME DELAY

CLASS 213CP

PRECISION SOLID STATE (HYBRID) TIME DELAY RELAY

WITH ±1% REPEATABILITY AND IMMUNITY TO FALSE OPERATION
DPDT 10 AMPS
AC RELAYS ARE 50/60 Hz
ENCLOSED PLUG-IN



Will meet the increased demands for highly reliable, precision accurate, industrial electronic control components. Utilizes precise components for close tolerance of operation with 1% repeatability and immune to false operation.

- Adjustable to 300 seconds.
- 1% Repeatability.
- 10 amp DPDT Output Switching.
- Calibrated Dial.
- Fast Reset Time.
- Transient Protection Four Times Nominal Input Voltage for 8 ms. Polarity Protection on DC Relays Only.
- Available for AC Operation.
- Versatile.
- Immune to False Operation.
- Operate Delay.
- Release Delay.
- Molded Plastic Enclosure for Plug-In.

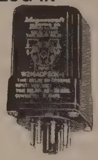
PLUG-IN SOLID STATE (HYBRID) TIME DELAY RELAY

DPDT 5 AMP CONTACTS
±2% REPEATABILITY
AC RELAYS ARE 50/60 Hz
ENCLOSED PLUG-IN



Now Magnecraft offers, in a package no larger than an untimed general purpose relay, a fully adjustable Solid State Hybrid Time Delay Relay with octal style plug. This new Class 214CP is a composite of the finest fully adjustable solid state timing, isolated from a high quality general purpose relay.

- Repeat Accuracy: ±5% at nominal voltage, 25°C.
- Contacts: DPDT, 5 amps at 32VDC or 115VAC resistive.
- Steady State Current: 20 mA.
- Mode of Time Delay: Delay on operate.
- Convenient Top Screw Driver Time Adjustment.
- Reset and Recycle Time: Typically 100 ms.
- Transient Protection to Twice Input Voltage for 8 ms.
- Enclosure: Molded dust cover.
- Mounting: Standard 8 pin octal style plug-in.
- Weight — 3 ozs. approx.
- Polarity Protection (DC Models).

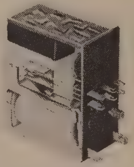
MINIATURE SOLID STATE (HYBRID) TIME DELAY

DPDT 5 AMPS (STD)
±2% REPEATABILITY
DC OPERATION
SLOW OPERATE



SPECIFICATIONS

Repeatability: ±2% of setting at nominal voltage at 25°C — ±10% over the voltage and temperature.
Nominal Input or Coil Voltage: 12 and 24VDC as standard (other voltages available on special order).
Timing Range: Available as standard: .1 sec. to 30 sec.; 1.0 sec. to 240 sec.; 1.0 sec. to 300 sec. (with external resistor only).
Contact Combination: DPDT as standard.
Contact Rating: 5 amps at 28VDC or 115VAC resistive load.
Reset Time and Recycle Time: Typically 100 ms.
Transient Protection: Twice nominal input for 8 millisecond.
Polarity Protection: Standard.
Temperature Range: Operate: −10 to 55°C. Storage: −50 to 85°C.
Time Delay Mode: Delay on operate.

- External resistor or switch not furnished (can also be external potentiometer).

The Class 67 time delay relay makes use of hybrid circuitry, combining a solid state circuit for the timing function with a miniature industrial relay for up to 4PDT 5 ampere output switching. This relay is engineered and designed for applications requiring 2 form C to 4 form C contacts where space, weight and low cost are of prime importance. Ideal for use in business machines, communication equipment, vending machines and applications requiring long life and reliable performance.

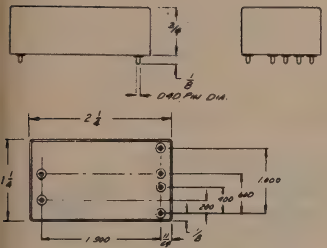
PRINTED CIRCUIT TIME DELAYS

CLASS 502PCSO
SLOW OPERATE P.C. TIME DELAY RELAY

ADJUSTABLE TO 5 MINUTES
SPST-NO (Form A) 1 AMP 15VA, 250VAC

Magnecraft ELECTRIC CO.
CHICAGO
NEG.
POS
MAGNETIME DELAY RELAY



The Class 502PCSOX and 503PCSOX Time Delays make use of hybrid circuitry combining a monolythic silicon structure in the control function with a dry reed relay performing isolated circuit switching. The following outstanding features are offered:

- Time delay on operate, adjustable to 5 minutes.
- Two fully adjustable timing ranges using a remote pot or fixed resistor.
- Encapsulated fully protected construction.
- Polarity protection standard.
- Printed circuit low profile package.

SPECIFICATIONS

Contacts: Two combinations available:—
502PCSOX, SPST-NO, 1 amp, 15VA or 250VAC maximum, resistive.
503PCSOX, SPDT, .5 amp, 10VA or 250VAC maximum, resistive.

Mode of Operation: Time delay on operate.

Timing Ranges: 100 millisecond to 100 second using approximately 50k ohm/sec. external resistor.
3 seconds to 5 minutes using approximately 10k ohm/sec. external resistor.

Timing Repeatability: ±5% at nominal voltage at 25°C after the first cycle and ±10% over voltage range or temperature range indicated.

Nominal Input: 12 and 24VDC standard.

Protection: Transient to twice input voltage for 8 ms. Polarity protection standard DC models.

Steady State Current: 25 mA typical.

Temperature Range: Operate — 10°C to 55°C. Storage — 55°C to 85°C.

Size: 2.25 x 1.25 x .75 inches.

Label: Bottom pin view.

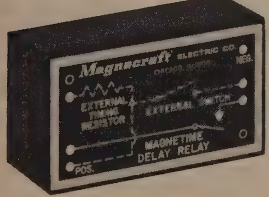
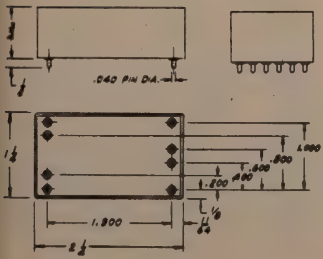
CLASS 502PCSR
SLOW RELEASE P.C. TIME DELAY RELAY

ADJUSTABLE TO 5 MINUTES
SPST-NO (Form A) 1 AMP 15VA, 250VAC





The Class 502PCSRX and 503PCSRX Time Delays make use of hybrid circuitry combining a monolythic silicon structure in the control function with a dry reed relay performing isolated circuit switching. The following outstanding features are offered:

- Time delay on release, adjustable to 5 minutes.
- Two fully adjustable timing ranges using a remote pot or fixed resistor.
- Encapsulated fully protected construction.
- Precise repeatability.
- Printed circuit low profile package.

SPECIFICATIONS

Contacts: Two combinations available:—
502PCSRX, SPST-NO, 1 amp, 15VA or 250VAC maximum, resistive.
503PCSRX, SPDT, .5 amp, 10VA or 250VAC maximum, resistive.

Mode of Operation: Time delay on release.

Timing Ranges: 200 millisecond to 100 second using approximately 50k ohm/sec. external resistor.
1 second to 5 minutes using approximately 10k ohm/sec. external resistor.

Timing Repeatability: ±2% at nominal voltage at 25°C and ±4% over voltage range or temperature range indicated.

Nominal Input: 12 and 24VDC standard.

Reset Time: Typically less than 100 milliseconds.

Protection: Transient to twice input voltage for 8 ms. Polarity protection standard DC models.

Temperature Range: Operate — 10°C to 55°C. Storage — 55°C to 85°C.

Size: 2.25 x 1.25 x .75 inches.

Label: Bottom pin view.

DIPS DUAL-INLINE PACKAGE REED

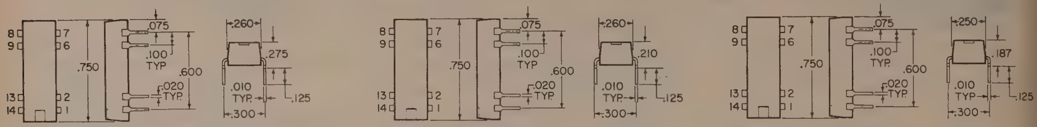
DRY REED DIPS

Magnecraft has always been proud of it's DIP (dual-inline-package) line of 8 and 14 pin reed relays. Now we are even prouder of the latest DIP variations: high voltage, high reliability, and mercury wetted types are now available on special order. All the DIP relays are designed not only to be compatible with the standard packaging developed for integrated circuits, but to offer Magnecraft quality at a low cost. This unique design gives further savings by offering the user the optimum in automated insertion and other economical installation techniques associated with printed circuit applications.

These fantastic, new, epoxy-molded, reed relays are offered in three height profiles (see figure below) and are ideal for use in circuits where high density packaging is essential. The 5VDC IC compatible versions of these relays will operate directly from TTL or DTL circuits.

Other standard coil voltages are available from stock in 6, 12, and 24VDC as well as contact configurations in 1 form A, 2 form A, 1 form B, 1 form C**, and 2 form C**. Most versions are listed with a choice of an internal clamping diode. See wiring diagrams as well as specific information given on each relay for complete details.

THREE STANDARD PROFILE HEIGHTS



SMALL (LOWER COST)
CLASS 171 & 172

SMALLER
CLASS 118 & 117

SMALLEST
CLASS 107

**Under certain drive and load conditions dynamic bridging can occur. The user should protect the circuit.

CLASS 107DIP

8-PIN

SPST-NO
.200 AMPS AT 5VA
LOWEST PROFILE

Contact Load Rating: 5VA at .200 amps max. or 50VDC max. resistive.
Contact Combination: SPST-NO (1 form A).
Operate Time: 200 microseconds typical.
Dielectric Strength Between Contacts: 200VDC min.
Insulation Resistance: 10^9 ohms.
Contact Resistance: 200 milliohms ave.
Typical Life at Rated Load: 10 million operations, longer at reduced loads.
Mechanical Characteristics: Shock 100 g's; at ½ sine wave, 11 milliseconds, Vibration 100 g's 10 to 2000 Hz.
Temperature Range: −55°C to +85°C.
Epoxy Molded Construction

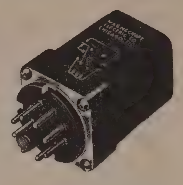
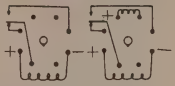
LATCHING REED RELAYS

CLASS 103LCP
PLUG-IN LATCHING REED RELAY



BI-STABLE SPDT .2 AMP

Magnetic latching action requires no coil current to hold either of two latching positions. In the case of the single wound coil switching is achieved by reversing coil current polarity. The double wound coil has separate polarized winding; switching is achieved by use of dual input.



Operate Time: 2 ms ave.
Contact Bounce: 2 ms ave.
Contact Load Rating: 10VA at 0.2 amp. max. or 200V max. resistive.
Contact Resistance: 150 milliohms ave.
Capacitance Across Contacts: 4.0 pF ave.
Typical Life Expectancy: 25 million operations, longer at reduced loads.
Nominal Power: Single coil 150mW, double coil 300mW.
Insulation Resistance: 10^9 ohms min.
- Weight — 5 ozs. approx.

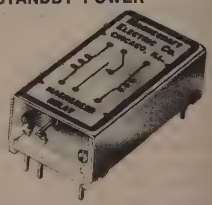
CLASS 101LMPC
MAGNETIC LATCHING REED RELAY



DUAL OR SINGLE COIL — NO STANDBY POWER
SPST (1 form A) .5 amp max.
Vibration and Shock Resistant
Coil Voltages 3VDC to 12VDC
PRINTED CIRCUIT MTG.

The Class 101LMPC is ideal for interfacing with logic circuits, solid state circuits, or industrial control applications. This small relay has a stable memory, even with a power failure. The relay has high output power capability while offering low power input, compatible with T²L and DTL direct drive logic systems. It's available in single and dual voltage power supply systems.

Contact Load Rating: 10VA at .5 amp max. or 200VDC max. resistive.
Capacitance Across Contacts: .3 pF typical.
Typical Operate Time: .5 ms.
Contact Resistance: 200 milliohms ave.
Dielectric Withstanding Voltage Between Contacts: 400VDC.
Typical Life at Rated Load: 1 million operations.
Insulation Resistance: 10^9 ohms min.

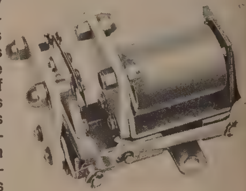
CLASS 158
HIGH VOLTAGE RELAYS

SWITCHING UP TO 5000V @ 200 mA DC OPERATION ONLY
SPDT-DB-DM



The Class 158 relay was developed especially for making and breaking high voltage circuits of low current capacities. Its excellent insulation characteristics will permit the relay to handle high voltages than relays of comparable size. A system of levers operating the armature provides the necessary wide gap for high voltage switching, but keeps the size of the relay to a minimum. The contact assembly is mounted on ceramic to insure high insulation plus strength and low energy loss. The specially designed contact assembly provides for minimum bounce. The ¼″ diameter silver cadmium oxide contacts will break up to 5000VRMS at 200 milliamps current.

TELEPHONE TYPE & COAXIAL RELAYS

CLASS 33HS

HERMETICALLY SEALED SUB-MINIATURE DC DPDT, 4PDT 5 AMP SILVER ALLOY CONTACTS

- Maximum telephone type relay reliability.
- Fast operate and release time.
- One of the smallest hermetically sealed telephone type relays.
- Highly adaptable to applications involving shock, vibration and severe atmospheric conditions.
- Full 5 amp 4PDT switching capability.
- Weight — 3 ozs. approx.

NOTE: 53/64" dia. CHASSIS CUTOUT recommended for terminal cluster.

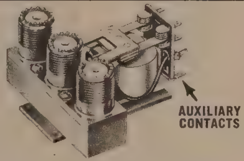
CLASS 128

SPDT & DPDT AUXILIARY CONTACTS AC OR DC OPERATION PANEL MOUNT WITH UHF CONNECTORS



AUXILIARY CONTACTS

Small compact relay combining a heavy duty coaxial cavity and the MAGNECRAFT 88 Relay structure described on page 8. The precision-built, hinge-pin type armature bearings of the Class 88 assure consistent pull-in stability with maximum reliability over long life.

The coaxial contact structure is enclosed in a heavy duty precision machined brass cavity with removable plug for convenient inspection of contacts.

SPDT contacts for switching RF circuits are silver alloy, gold flashed, conservatively rated 500 watts of RF power; impedance matched to 50 ohm cable using standard type UHF connectors. VSWR 1.25: 1 maximum from 0 to 500 megacycles.

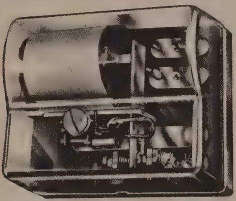
SENSITIVE & SPECIAL RELAYS

CLASS 62
ULTRA-SENSITIVE RELAYS

1 AMP SPDT CONTACTS 5mW
DUST COVER
SOLDER TERMINAL CONNECTORS



The Class 62 is an ultra-sensitive, durable, dustite and fully adjustable relay incomparable for use in any DC circuit restricted to a few thousandths of a watt power consumption. The counter-balanced armature design permits excellent operation in any position. The transparent, molded plastic cover guards against dust or dirt reaching the contacts or other working parts — yet allows immediate visual inspection. The sturdy molded bakelite base has both screw and solder terminal connectors, and convenient means of mounting is provided. Contacts: 1 amp resistive at 115VAC or 28-VDC.

Stadard factory adjustment is 5 milliwatt sensitivity and field adjustments are easily made by using the vernier screws. The silver contacts and spring tension can be accurately and permanently set — yet easily changed. Mounting Data: 2 holes 9/64" dia.

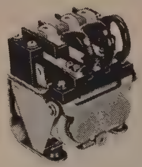
CLASS 27
SENSITIVE POWER RELAY



20 AMPS
275mW PER POLE
DC OPERATION ONLY

The Class 27 relay is a sensitive power relay. It is similar to the Class 93 relay except it has dual coils. The relay is available only for DC operation. The contacts are rated 20 amps at 28VDC or 115VAC, resistive for 3PDT and 5PDT. This two coil design increases the sensitivity of the relay because of the greater ampere turns. The consequent low power requirement coupled with the high load carrying capacity, makes this relay adaptable to a wide variety of industrial applications.

SPECIFICATIONS

Contact Rating: 20 amps resistive at 115VAC or 28VDC.
Contact Combination: SPDT, DPDT, 3PDT, 4PDT, 5PDT.
Contact Material: ¼" dia. silver cadmium oxide gold plated.
Contact Resistance: .100 ohms max.
Insulation Resistance: 100 megohms min.
Dielectric Withstanding Voltage: 1000V min.
Mounting: Four 6-32 tapped holes.
Terminals: Solder lugs.
Enclosure: Available on special order.
Weight: 5 ozs. typical.

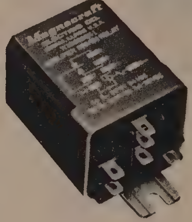
CLASS 388SS
AMPLIFIER DRIVEN GENERAL PURPOSE RELAY

SPDT-DPDT 10 AMPS
DC OPERATION ONLY
SURFACE MOUNT & PLUG-IN



New Super Sensitive solid state hybrid device allows full 10 amps switching with extremely low power (70 microwatts) control.

Classes 388CPX and 388CQX combine "state of the art" high impedance input amplifiers with the proven reliability of our 388 general purpose relay to offer you minimal control circuit loading plus unsurpasses electro-mechanical stability. A control voltage as small as 2.4VDC will signal the amplifier to energize the relay, provided the 24VDC driver supply voltage is maintained. Relay drop out occurs when the control voltage decreases to 1.5VDC or less. Operating temperature range is −10 degrees centigrade to +55 degrees centigrade.

This solid state hybrid device is provided with either SPDT or DPDT configuration capable of switching 10 amps at 28VDC 115VAC resistive load through silver alloy gold flash, 0.187" diameter standard contacts to insure long and reliable life.

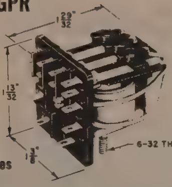
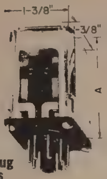
OHMITE® electro-mechanical relays

MODEL GPR



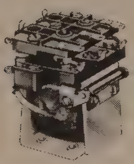
GPR Series 4-Pole

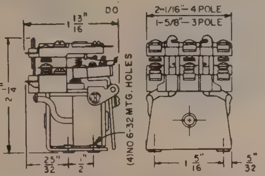


For Octal Plug GPR Series

Simple, rugged, low cost relays handling substantial power for small size. Uncomplicated design provides unusual flexibility for making and changing connection and mounting.

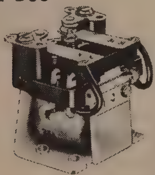
MODEL DO

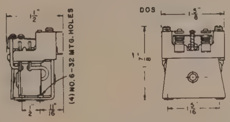




Particularly adaptable to aircraft and mobile equipment applications where severe shock and vibration are encountered. Design of molded parts around contact arms protects against mechanical injury. Stocked in 3-pole or 4-pole type, and also in hermetic enclosures and in latching types.

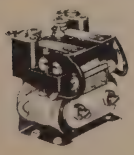
MODEL DOS

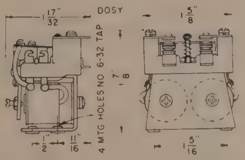




Wide application, general purpose relay, compact and lightweight. Handles loads usually demanded of much larger relays. Meets rigorous aircraft relay standards.

SENSITIVE MODEL DOSY





Similar in construction to Model DOS relay but equipped with twin coils for increased sensitivity. The DOSY relay is adaptable to a wide range of electronic control applications such as plate circuit controls, or as overload or underload controls in D.C. circuits to signal attainment of predetermined current levels.

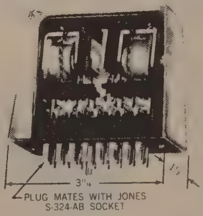
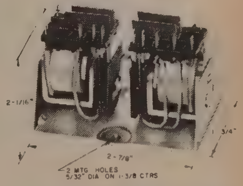
MODEL GPR LATCHING RELAYS



Enclosed Latching Relay

Relay 6PDT Latching



Latching relays consist of two GPR relays with armatures linked so that the n.o. contacts of one are mechanically latched in closed position when, and after, this relay is energized. When 2nd relay is energized, first relay restores and latches 2nd. Permits switching of twice the number of circuits and holding without coil current.

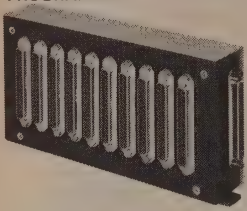
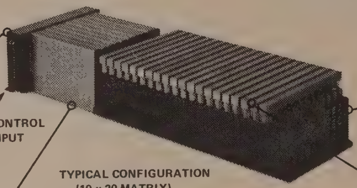
COAXIAL SWITCHING SYSTEMS

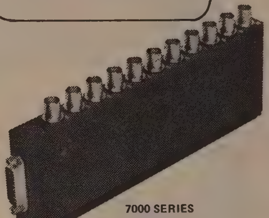
PROGRAMMABLE – COAXIAL RELAY MATRIX



MODEL 6310 DECODE MODULE
- Computer controllable
- 16 bit parallel or ASCII input
- TTL/DTL compatible
- Decodes 200 switchpoints
- Expandable

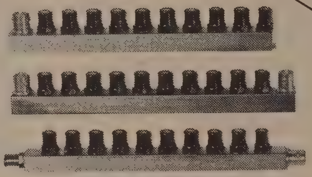


TYPICAL CONFIGURATION
(10 x 20 MATRIX)



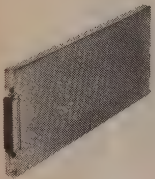
7000 SERIES COAXIAL RELAY MODULE
- 2-20 throws
- 106 dB isolation @ 100 MHz
- 100 watt switching
- DC-300 MHz
- Switched shield
- Self terminating
- 50 or 75 ohm
- Machined housing
- 28 V control

6100 SERIES LOGIC MODULE
- Controls 2-20 switchpoints
- TTL/DTL compatible
- X - Y addressable
- 28 VDC control output
- Latching
- J - K flipflops
- Hex gate drivers



CROSS STRAPS INTERCONNECT COAXIAL RELAYS TO FORM CROSSBAR CONFIGURATION.

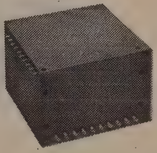
TWO WIRE AUDIO RELAY MODULE



FEATURES:
- Programmable
- Two pole-twenty throw
- Contains four independent two pole, five throw relays
- Dry reed or mercury wetted contacts available
- Independent control
- Compatible with 6100 series latching and drive module
- May be connected in a 2 x 10 or 4 x 5 matrix configuration
- Reed switches easily accessible
- 28 V control

MODEL 6157

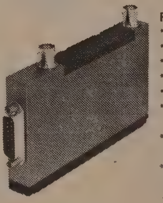
10 x 10 VIDEO RELAY MATRIX



FEATURES:
- Any of ten inputs may be connected to any of ten outputs
- Computer programmable
- Random addressable
- Low VSWR
- Signal circuits isolated from control circuitry
- Switchpoints individually field replaceable
- Stripline construction
- SMA connectors
- 28 V control

MODEL 6160

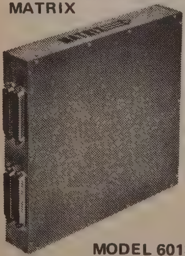
PROGRAMMABLE COAXIAL ATTENUATOR



FEATURES:
- 0 - 63 dB Range
- One dB steps - .5 dB optional
- Pure six bit binary control
- Low VSWR
- Continuous shield continuity
- Signal circuits isolated from control circuitry
- Attenuator elements field replaceable
- Compatible with 6100 series latching logic
- 28 V control

MODEL 6152

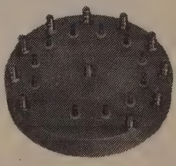
10 x 10 x 2 LEVEL AUDIO RELAY MATRIX



FEATURES:
- Random access
- Balanced switching
- Flexible format
- 1 ms switching
- Scanner capability
- Programmable
- DC - 100 KHz
- 28 V control

MODEL 6013

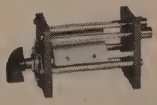
RADIAL RELAY



FEATURES:
- 10 throws
- Matched port to port delay
- Low VSWR
- 5 VDC control
- 50 ohm
- Machined housing
- Coaxical construction
- SMA connectors

MODEL 6210

R.F. ROTARY SWITCH



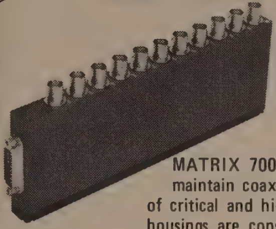
FEATURES:
- Two throw
- Center off
- Self terminating
- 50 or 75 ohm
- Hermetically sealed contacts
- Panel mount
- BNC connectors
- Low VSWR
- High Isolation

MODEL 6172

Matrix Systems Corporation manufactures a variety of Switching Devices. Whether you are Switching VHF, Video, Pulse or Audio or your control requirements are programmable or manual. Give us a call. We specialize in specials. (213) 882-2008

MATRIX
SYSTEMS CORPORATION
9411 Lurline Avenue • Chatsworth, California 91311
(213) 882-2008

COAXIAL SWITCH MODULE



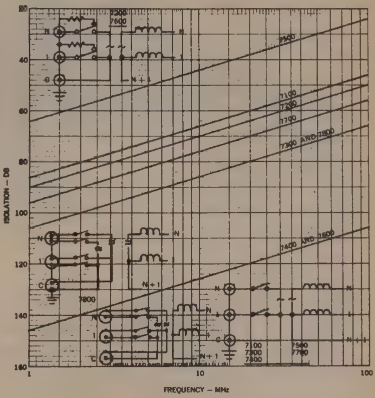
FEATURES

- Two to twenty throws
- Continuous shield continuity
- Rugged machined aluminum housing
- Crosstalk always less than isolation
- Switchpoints individually field replaceable
- Extremely low EMI
- Low VSWR
- Matrix configuration easily assembled using 9000 series cross straps
- Signal circuits isolated from control circuitry

MATRIX 7000 Series Switch Modules are designed to maintain coaxial switching continuity over a wide range of critical and high environmental applications. The switch housings are constructed on precision machined aluminum alloy for structural integrity and hard anodized for durability. All signal shield paths are silver plated with covers gasketed for maximum EMI protection. The basic reed switch elements are hermetically sealed in nitrogen filled gas envelopes and employ rhodium plated contacts to insure non-stick operation. Applications for MATRIX 7000 Series include:

- R.F. and I.F. switching where a low VSWR is required.
- CCTV, base band video and pulse switching where low phase distortion and high pulse fidelity are required.
- Applications requiring a high degree of shielding integrity and low contact and induced noise such as pre amp input switching or the switching of high impedance operational amplifier inputs.

Matrix and hybrid switching systems are easily constructed by using Series 9000 (no output), 9100 (one output) or 9200 (two output) push-on cross straps which mate with the BNC connectors on the switch modules. The cross strap output connectors are BNC female type UG 1094/U. The model number of the cross strap is assigned by replacing the two zeros of the series number with the number of inputs desired. For example, a Model 9108 has eight inputs and one output.



SERIES 7000

7100 –	Standard
7200 –	Self-terminating
7300 –	High isolation
7400 –	Highest isolation
7500 –	High power
7600 –	Highest isolation self-terminating
7700 –	Mercury wetted contacts
7800 –	Twinax

MODEL NUMBER ASSIGNMENT

7 X XX – X

Series

Number of throws

Coil suppression diodes – D
TNC connectors – T
Self-terminating resistance – ohms
Insulated shield – I
Insulated and switched shield – IS
Expander output – E

Any of the above options may be combined

Catalog 100

POTTER & BRUMFIELD offers you a choice from 1000 Standard Relays or, we'll make a SPECIAL for you.

Our list of over 1000 standard relays provides a type for nearly any application. And if a standard model won't meet your requirements, we'll make one that will. You can order any of the standard relays from leading electronic parts distributors, too. They will give you fast, economical, off-the-shelf service.

Next time you need relays, call your local P&B sales engineer or Potter & Brumfield Division of AMF Incorporated, Princeton, Indiana 47671. Our telephone number is (812) 385-5251.

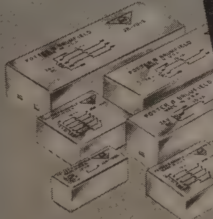
DRY REE

JR STANDARD/JRM



Fast response, reliable performa sensitivity and long life are charac the JR Series dry reed relays. JR and JRM miniature relays are e suited for data processing applicatio puter equipment, logic circuitry and other sophisticated control circuits.

TWO TYPES OF CAPSULES

JR and JRM relays have reed switche either Form A (SPST-NO) or Form C (contact configuration. Biasing with a p nent magnet changes Form A to a Fo (SPST-NC). This arrangement require coil polarity be observed. Combining one Form A with one Form B results in a single Form C (SPDT) break-before-make. A "true" Form C (SPDT) uses a reed switch with two stationary and one movable contact. The movable contact is normally closed until the coil is energized.

RAD 32 x 30

Cylindrical Solenoid with silent Air Damped Feature

This unique solenoid is manufactured with a close tolerance fit between the plunger and the plunger guide, which along with an adjustable air release valve allows the plunger and guide assembly to function as an adjustable aid dash pot. If control of operational speed, or the elimination of noise is your problem — the air damped solenoid provides the ideal solution. At present the air damped feature is availableonly on the 2 inch diameter (RAD 32 x 30) and diameter (RAD 24 x 24) cylindrical solenoids.

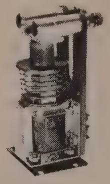
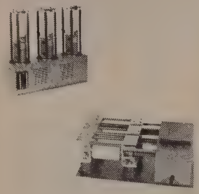
HIGH VOLTAGE DEVICES 1 to 600 KV



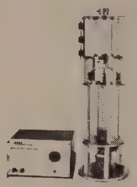
HV RELAYS, E SERIES

Broad line of rugged, air insulated, single or multi-pole HV relays for both low and high current, in either air, oil or gas atmospheres. Used for HV transfer, safety grounding, tap or load selection. 2 to 300 KV PK. Ratings from 1 to 200 A continuous, 100 to 10,000 A momentary and capacitor discharge. NO, NC and DT. Spring return-mount any position or gravity return-mount base up and mount base down designs. Highly conductive, weld-resistant contacts. Withstand high shock and vibration. Specially sealed G-10 Epoxy glass laminate used for support insulation. Low loss G-7 Silicone glass insulation for RF applications. Heavy-duty contacts. Standard 115 V, 60 Hz, or other voltage DC to 800 Hz actuators as specified. SPDT auxiliary contacts available.



THREE-PHASE VACUUM CONTACTORS/CIRCUIT BREAKERS

Compact, lightweight vacuum contactors and circuit breakers. Upright or low profile, and multi-pole designs. For AC high power and industrial controls, ½- to 2-cycle total trip and interrupt or transfer time. NC, NO, DT, latching and trip free types. 1 & 2 pole also available. HV operation: 208 V to 300 KV; 50 to 2,000 A continuous; 2,000 to 31,000 A interrupt; to 60,000 A momentary. Also high speed 1 to 4 millisecond contact parting time, interrupting at first current zero with properly matched Ross SCR controlled drivers and actuators triggered by pulse or other signal voltages. Direct control line actuated or stored mechanical and electrical energy actuated types. Can be equipped with anti-pump or automatic reset actuators.



SINGLE & MULTI-POLE VACUUM CONTACTORS/RELAYS & SOLENOID DRIVERS/ENERGY STORAGE UNITS

Extra high speed contactors/relays used in power supplies for interrupting and crowbarring, capacitor bank charging/discharging, transfer, tap or load selection. Single/multi-pole, NO, NC, DT and latching types. 5 to 300 KV AC/DC; 50 to 36,000 A continuous; 2,000 to 28,000 A AC interrupt; and 10 to 12,500 A DC interrupt. Operate time: 1 to 10 milliseconds when matched with Ross driver. **SOLENOID DRIVERS.** For high speed or loss of power automatic breaker trip and high speed activation of contactor or breaker. Also energy storage and discharge pulse use. Energy storage units: 150 to 700 V, or more. Provides vacuum contact closing or opening times of 0.5 to 10 milliseconds. SCR control triggered by 10 to 100 V pulse or other signal voltage.

HV ROTARY SWITCHES

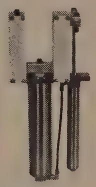
Multi-pole, multi-position. For use in air, oil or insulating gas. Standard to 5 poles, 2 to 12 positions. More are optional. 2 to 100 KV; 1 mA to 100 A and as high as 10,000 A momentary. Manually or electrically operated. Position detents. Safety interlocks to prevent opening under load.

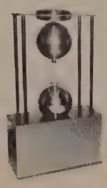
HIGH CURRENT SWITCHES— G SERIES

For min. inductance for power, RF or capacitor discharge pulse, transfer. To 36,000 A continuous. Over 500,000 A pulse. 6 V to 300 KV PK. Air cylinder or motor operated for high contact force. Compact.

HV-RF SWITCHES— RF SERIES

Low loss G-7 Silicone glass or Steatite insulation and non-magnetic materials are generally used. Available up to 50 MHz, high power; 1 to 50 KV; 1 to 800 A. Air, hydraulic, solenoid or motor actuated.





HV GROUNDING RELAYS—D SERIES

Air insulated, extra high voltage low corona types. To 600 KV PK at 100 A continuous. Positive closure. Solenoid, motor or air cylinder operated. Spring or gravity return. Energy dissipating assemblies.

HV REED RELAYS

From 5 to 30 KV, 1 mA to 3 A continuous. Actuator voltages: 6 to 230 V AC or DC are available. Over ten million operations. With terminals or fully insulated HV leads. PC board or chassis mounting.

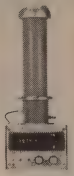
1 to 600 KV

HIGH VOLTAGE DEVICES

HV & LV DIGITAL MULTIMETERS

Measures both high and low voltages. 4½ and 3½ digit planar display units. AC/battery operated. Measures AC, DC, RF and pulse from 0.01 mV to 450 KV, AC or DC, or 750 KV impulse, 0.05% to 3% accuracy. LV range also has Ohms, Megohms, AC and DC milliamps. Peak memory hold for transients as short as 1 uSEC. Instantaneous freeze display. Also follows positive and negative peaks of sine, square, other waves, pulse trains, DC and AC average, and true RMS from 10 uV to 1,000 V basic and to 450 KV, or more, with choice of divider. RF capacity with proper probe, DC to 250 MC, or more. LV range reads 10 uV to 1,000 V DC/AC at 0.05% to 0.2% accuracy; resistance, 0.1 Ohm to 20 Megohms, 0.07% to 0.2% accuracy; current, 1 uA to 2 A DC and AC, 0.1% to 0.3% accuracy.



HV & LV DIGITAL MULTIMETER PROBES

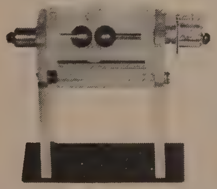
HV probes and digital multimeters. Hand held probe types, both HV and LV measurement with accuracies of 0.05% to 5%, from 100 uV to 200 KV DC or 60 Hz. Provided with collapsible 3 to 7½ ft. insulated safety handles. HV probe can be used with any digital meter or VTVM. Probe is matched for 1,000, 100, 10 or 1 Megohm input and is available to 200 KV DC or 60 Hz. Also available as a complete 4½ digit multimeter, 5 KV to 200 KV, which also reads 0.01 mV to 1 KV DC; 0.01 mV to 500 V AC; 1 uA to 2 A DC; 1 uA to 2 A AC; and 0.1 Ohm to 20 Megohms. LV accuracies vary from 0.05% to 0.3%; HV from 0.1% to 5%. Wide-band resistance-capacitance probe types also available to read sine and square waves, pulse trains, RF and other waves when used with Ross type VMD HV digital multimeters, or oscilloscopes. Multimeter type has removable portable DMM. Bat/AC.

HV VOLTAGE DIVIDERS

Lightweight, compact, resistance-capacitance or portable capacitive or resistive dividers/meter multipliers for use with digital meter, VTVM, oscilloscope, panel meter or recorder. For viewing and recording DC, CW AC, pulse or modulated HV RF. Calibration is matched for 1 Megohm, 20 to 50 PF load impedance or other impedances as required; DC to 5 MHz; to 450 KV DC or PK AC; to 750 KV impulse. Accuracy/stability on most models is generally better than ± 1% DC, ± 3% AC with ± 0.1% DC and ± 1% AC on some models. Units can be built to withstand −65° C to +75° C ambient and shock/vibration to 50 G's, or more. Hermetically sealed design. Filled with corona-reducing gas. Can be ordered with corona rings and used in oil or other atmospheres.

Hi-Z™ HV VOLTMETERS SAFE POWER LINE USE AC-DC

Portable, solid state, 2% to 5% accuracy. Taut-band shielded HV measurement with min. circuit loading. 0.0001 V to 240 KV, AC and DC. Ideal for accurate use with underground elbow capacitance tap voltage test points. For any cable test point or direct line voltage and phasing, or differential measurement.

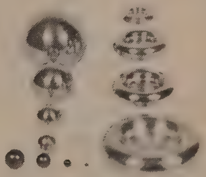


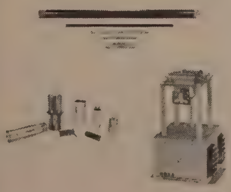
HV ADJUSTABLE SPARK GAPS

Non-melting carbon spheres, 1 to 30 cm, and heavy wall aluminum spheres, 10 to 100 cm. Dust tight transparent covers, 1 to 88 KV. Open style to 670 KV. Direct reading calibrating devices.

TOROIDS, SPHERES, CORONA SHIELDS

For shielding/balancing electrostatic fields to better increase withstand voltage and reduce corona. Avoids excessive gradients at connecting points and other areas. International standard metric diameters to 106 cm.



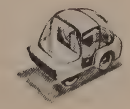


HV SAFETY & ACCESSORIES

Metal film HV resistors, HV capacitors. HV instantaneous overload relays. HV door interlocks, HV grounding rods. Insulation sheet, rod and tube. Solenoids and related equipment. Hot sticks. Many in-stock.

ELECTRIC VEHICLE ENGINEERING

Engineering and manufacturing of LV/HV devices and control units for elec. vehicles, high speed trains and ships.



- **Registered engineers with certified high voltage and high current testing facilities and services.**

SCHRACK ELECTRICAL SALES CORPORATION 1140 BROADWAY, NEW YORK, N.Y. 10001

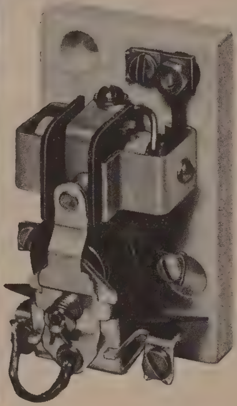
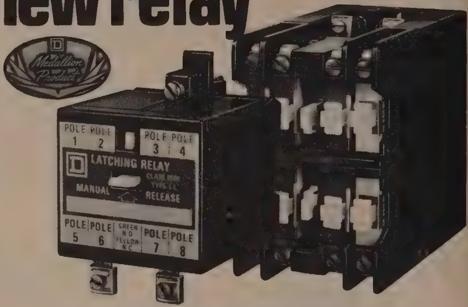
D Relays, Timers & Overloads
INDUSTRIAL RATED

Small rugged DC control relay.



- **Rated up to 15 amps @ 115 VDC**
- **Horsepower rated—¾ hp @ 115 and 230 VDC**
- **Blow-out coils and arc barriers**
- **U/L listed**

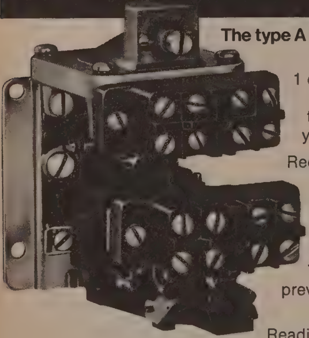
A new latch for a new relay



Any Medallion™ Line Type L 600 Volt Control Relay from Square D can be easily converted to a latching relay. The top mounting latching attachment uses a two coil system with continuous duty coils. So you don't need coil clearing contacts. Up to eight poles are available for customer use. The relay uses unique color-coded plug-in contacts making it the fastest convertible on the market.

The most flexible pneumatic timer

The type A pneumatic timing relay.



1 or 2PDT timed contacts and 1 or 2PDT instantaneous contacts which you can add in the field.

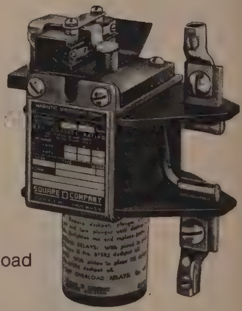
Requires only 10.6 square inches of panel space.

You can easily convert from ON DELAY to OFF DELAY and back.

The closed timing head prevents dirt from clogging up the Type A timer.

Readily available parts make this timer easy to service.

Motor load sensing with magnetic current relays



Square D has three types of load sensing relays for all your wastes compactors, paper shredders, hammer mills or conveyor systems.

Type A Time Delay:
Used mainly to sense motor running overcurrents.

Type B Underload Trip:
Used widely to stop or start one motor by sensing the load in another motor. Resets automatically when load is decreased.

Type N Instantaneous Trip:
Used often to stop conveyors when jam conditions occur.

Featuring:
- Adjustable Trip Current—2:1 Range
- Wide Adjustable Trip Time

World Wide Distribution
For complete listings, prices and application data, contact your nearby Square D field office.
Or, write Square D Company, Dept. SA,
Milwaukee. Wisconsin 53201.

SQUARE D COMPANY
Wherever Electricity is Distributed and Controlled

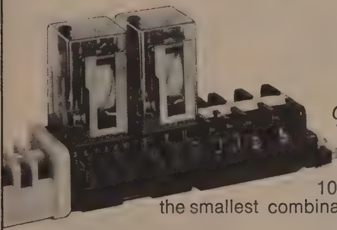
General Purpose Relays

Type K

Extended relay life.
New standard of reliability.

Variety of terminations. 2PDT or 3PDT. AC or DC operation. 10 amp contacts. Options include pilot light and manual operator.

Socket Mounted Version
The Type K general purpose relay is designed for multi-pole switching below 150 volts. Its small size makes it perfect for industrial or commercial control equipment. Troublesome solder connections and pigtail wires have been eliminated to give you an extremely reliable device.



Compact Mounting
Takes up less than 3 square inches of panel space . . . 10 amp relay/socket the smallest combination on the market.

Tube-Type Version
Designed to fit all standard 8 or 11 pin sockets. Interchangeable with other tube-type general purpose relays.

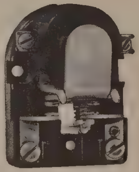
Type J Timing Relay

Integral Type K relay and solid state timing circuit.

Solid state timing relays give ±1% accuracy. .05 to 180 sec. knob adjustable, factory fixed or external resistor adjustable. 150 volt. 10 amp DPDT output contacts. Plug-in tube-type mount.

Type C

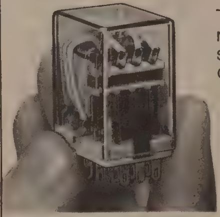
Most available relay.
Low cost.



600 volts maximum. Rated up to 1½ HP. 1 or 2 poles. Stocked by over 400 distributors.

Type R

the dependable miniature relay.



The new Type R miniature relay from Square D is very small, but very superior. It is designed to deliver reliable performance over an extremely long life.

It is the only one to offer all this:

1. Quality inspection and testing before shipment for dependable operation from the start.
2. A standard polarity barrier between each pole which allows the relay to be used where opposite polarity is present on adjacent poles.
3. A complete line of relays and sockets—and we mean complete—which makes the Type R ideal in a wide variety of applications.

In addition you get: 4 poles; double-throw contacts; 5 amp rating at 120VAC; an optional manual operator and a pilot light.

World Wide Distribution
For complete listings, prices and application data, contact your nearby Square D field office.
Or, write Square D Company, Dept. SA,
Milwaukee, Wisconsin 53201.

indefinitely long life
temperature stable

The transistor chopper (or modulator) is a solidly encapsulated unit designed to alternately connect and disconnect a load from a signal source. It may also be used as a demodulator to convert an a.c. signal to d.c. It is capable of linearly switching or chopping voltages over a wide dynamic range which extends down to a fraction of a millivolt and up to 150 volts or more. Unlike mechanical choppers which can only be designed to operate over a narrow and comparatively low frequency range due to mechanical limitations, the transistorized chopper is an inertialess device that can be driven from d.c. to hundreds of kilocycles.

The switching circuitry used, operates the transistors in a manner which provides stability and freedom from drift over a wide temperature range. Only carefully selected and matched transistors are utilized.

The Model NS8000A chopper is transformer isolated, operates up to 1.5 MHz and is a replacement for the discontinued National Semiconductor NS8000 (INCH CHOPPER).

The Models 30, 33, 33P, 40, 40P, 50, 50P, 60, 60P, 70 and 70P are direct-coupled so as to provide the circuit designer with the most basic chopper from which to synthesize solutions to special circuit problems. The Models 33 and 33P are basic field-effect chopper-relays providing exceptional linearity, stability, low noise and offset. The Models 64, 66, 75 and 150 are transformer-coupled for isolation purposes. The Model 150 is for high-level signals. The Models 64 and 66 are for operation from 400 cps and 60 cps sine wave drive at 115 volts a.c. The Models 80, 81, 90 and 91 VIBRACHOPPERS are unique since they require d.c. rather than a.c. drive. The Model 98 has complete isolation and insulation between drive and contacts, even with d.c. drive. The Series 6000 Choppers are interchangeable with Airpax units. The Model TCD-101 Transistor Chopper Driver provides suitable square wave drive voltages for transistorized choppers and synchronous demodulators.

These units are practically immune to the effects of shock and vibration making them ideal for military, space vehicle and portable applications; or where power conservation, miniaturization and elimination of maintenance are a necessity.

Terminals:	Mate with T-Bar Connectors
Dielectric Strength:	1000 VRMS @ 60 cycles/sec. (higher available)
Insulation Resistance:	5000 megohms min. (higher available)

Power @ 25°C:

Poles	Form	Watts
4, 8 or 12	A, B or C	3
24	A, B or C	3.4
36	A, B or C	5.2
48	A	5.2
48	B or C	6.5
52	A, B or C	6.5
60	A	6.5
4, 8 or 12	D	3.4
24	D	5.2
36	D	6.5

NOTE: On all latching standard pulse coil power is 6 watts, except on bifilar coils, which is 10 watts.

Operate and Release Time Typical (at nominal voltage 25°C):

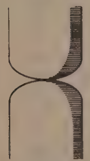
Operate (Refer to factory for faster operation):
4, 8 or 12 poles: 15 MS max.
24 poles: 25 MS max.
36 poles: 30 MX max.
48 poles: 35 MX max.
52 or 60 poles: 45 MS max.
For latching types: latch and unlatch times are 15 MS typical, all sizes.

Release: 5 MS typical

Contact Bounce:
2 MS typical N.O. contacts
6 MS typical N.C. contacts
4 MS typical for latching units (both ways)

Take your choice of 2 contacts!

800 SERIES
for reliable General Purpose Switching



The 800 Series contact is a highly reliable gold-plated button contact. With its high contact pressure and positive wiping action, it is used in control type applications and in general purpose switching, such as relays, valves, lamps, etc. Contact Rating: up to 5 AMPS max.

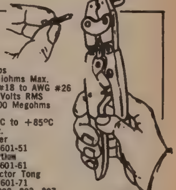
900 SERIES
for reliable Low Level Switching

The 900 Series DATA-RITE™ contact has the reliability of a bifurcated contact with the added feature of two degrees of wiping action. The unique EDGE-TO-DOME contact guarantees a clean surface, which is critical for low level signals. The 900 Series is typically used in computer I/O signals; voice and data-grade communications; thermocouple and strain gauge outputs; all low level switching, whenever reliability is a premium, or whenever slight variations in contact resistance cannot be tolerated. Contact Rating: Microvolts up to 1 AMP max.

T-BAR CONNECTORS

The T-Bar Series 88601 Connector has been specifically designed for use with T-Bar switches and relays. The connector contacts are crimp type which are snapped into a plastic insulator block. After installation, connectors are held in place against shock and vibration by use of a retaining clip.

Current Carrying Capacity	5 Amps
Contact Resistance	5 Milliohms Max.
Wire Accommodated	AWG #18 to AWG #26
Dielectric Strength	1000 Volts RMS
Insulation Resistance	100,000 Megohms Min.
Ambient Temperature	−55°C to +85°C
Weight	0.3 Oz.
Recommended Tools	Crimper P/N 8601-51 Extraction P/N 8601-61 Connector Tong P/N 8601-71
Use 88601 With	801, 802, 803, 807, 901, 902, 907



8601-51 Crimping Tool

HOW TO ORDER

1. Specify Series **2.** Specify Number of Poles and Contact Form **3.** If A Relay, Specify Coil Voltage

Don't forget to order the mating T-Bar Series 88601 Connector! One for each 6 poles.

901 — 12 C — 24

SERIES	Application	No. of Poles	Contact Form*	Actuating Mechanism	Coil Voltage
801	General Purpose	4 to 52 60 Pole Unit "A" Form Only	"A" or "C"	CONTINUOUS DUTY COIL	6, 12, 24, 28, 48, 110 VDC 115 VAC
901	Low Level				
807	General Purpose	12 to 52	"C"	MAGNETIC LATCHING COIL (Pulse to latch, pulse in opposite polarity to unlatch.)	6, 12, 24, 28, 48, 110 VDC
907	Low Level				

*Form "A"—normally open contacts. Form "C"—double throw, break-before-make.

TELEDYNE RELAYS

Military TO-5 Relays

The most versatile line of subminiature relays in the industry. Featuring all welded construction, hermetic sealing, and high force/mass ratios for excellent resistance to environmental extremes. Gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low inter-contact capacitance provide RF switching capability up to 500 MHz. Most models qualified to MIL-R-5757 and MIL-R-39016.

Available in following versions:

- **SPDT & DPDT,** with optional internal suppression and steering diodes
- **SPDT & DPDT Sensitive,** with optional internal suppression and steering diodes
- **SPDT & DPDT Hybrid** (both standard and sensitive coil versions) with internal transistor driver and suppression diode
- **SPDT, DPDT, & 4PST Magnetic Latching,** with optional internal suppression and steering diodes
- **SPDT & DPDT Bifilar**

Special models available on request.

General Specifications:
Contact Resistance: 0.1Ω max. initial/0.2Ω max. after life at max. load
Life: 100,000 operations @ max. rated contact load (life expectancy 10^7 operations at low level)
Temperature: −65°C to +125°C
Vibration: 30 g's to 3000 Hz.
Shock: 80 g's for 11 ms. (some maglatch models higher)

Terminal and Spreader Pad Options:

1. Standard terminal lengths: 1.5″ (38.10 mm) wire leads or .187″ (4.75 mm) pins (pin versions designed for use with plug-in sockets)
2. All models except 411 & 431 series (including D & DD versions) and 441 series can be supplied with spreader pads installed and cemented in place. Spreader pad P/N 192-10 for direct mounting on PC boards; P/N 192-59 designed for use with standard DIP sockets.

*Suffix D denotes internal suppression diode, DD suppression & steering diodes, and T transistor driver & suppression diode.

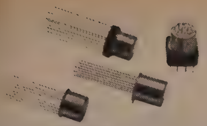
Detailed specifications on any of our products or a complete catalog are available on request.



TELEDYNE RELAYS

Commercial/Industrial TO-5 Relays

Low cost versions of DPDT MIL qualified TO-5 relays. Hermetic sealing, all welded construction, and gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability up to 500 MHz.

Available in following versions:

- **DPDT,** with optional internal suppression diode
- **DPDT Sensitive,** with optional internal suppression diode
- **DPDT Hybrid** (both standard and sensitive coil versions) with internal transistor driver and suppression diode

Special models available on request.

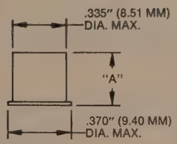
Life: 100,000 operations at max. rated load (life expectancy 10^7 operations at low level loads)
Temperature: −55°C to +71°C (operating)

Spreader Pad Options:
All models can be supplied with spreader pad mounted and cemented in place. Spreader pad P/N 192-10 for direct mounting on PC boards; P/N 192-59 designed for use with standard DIP sockets.

*Ultra-sensitive 732-1000 series designed specifically for use in battery-operated radio transceivers.

TO-5 Relay Case Dimensions



RELAY SERIES	"A" DIM.	
	INCHES	MM
411 412 421 420/422 712	.275	6.99
424A	.325	8.26
431 432 441 442 732	.375	9.53

Spreader Pads for TO-5 Relays

Preform and spread leads to grid patterns compatible with printed circuit board layouts and DIP sockets, with minimum additional profile height.

P/N 192-10

- Preforms and spreads leads to .200" x .300" grid at .100" spacing
- Serves as spacer and insulator for printed circuit board applications
- Simplifies insertion of leads into printed circuit boards
- Reduces stress on glass seals
- Aids visual inspection of solder flow
- Fits all TO-5 relays except 411 and 431 series (including D and DD versions) and 441 series

P/N 192-59

- Preforms and spreads leads to .300" grid at .100" spacing
- Designed for use with standard DIP sockets
- Fits the following TO-5 relay series: 412, 421, and 432 (including D and DD versions), 712 and 732 (including D versions), 431T, and 442

Notes:

1. Relays can be supplied with spreader pads installed and cemented in place.
2. To order relays with 192-10 spreader pads installed, add M to part number (for example: 412D-26 with 192-10 pad installed is 412DM-26).
3. To order relays with 192-59 spreader pads installed, add M2 to part number (for example: 412D-26 with 192-59 pad installed is 412DM2-26). Leads are trimmed to .130" below pad for plugging directly into DIP sockets.
4. Material (both types): Diallyl Phthalate.

TELEDYNE RELAYS

Centigrid® Military Relays

The smallest subminiature relay available. Low profile, .225″ (5.72 mm) high by .370″ (9.40 mm) square, with .100″ grid spaced leads. Features all welded construction, hermetic sealing, and high force/mass ratios for excellent resistance to environmental extremes. Gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low inter-contact capacitance provide RF switching capability up to 500 MHz. Standard models qualified to MIL-R-5757 and MIL-R-39016. Also available with internal suppression and steering diodes.

Vibration: 30 g's to 3000 Hz.
Shock: 80 g's for 11 ms. min.

Mini-T
Subminiature General Purpose Industrial Relay

Smallest 5 amp general purpose relay for commercial/industrial applications. Available with AC coils for 6, 12, 24, 48, 120 and 220 volt operation and DC coils for 6, 12, 24, 48 and 110 volt operation. 2 form C contact arrangement. Optional choice of contact materials: Type Y fine silver for low level to 2.0 amp loads, and Type G silver alloy for 1.0 to 5.0 amp loads. Tight fitting transparent plastic dust cover protects against harsh industrial environments. Mating sockets available for chassis and PC board mounting. Size: .690″ (17.53 mm) square x .875″ (22.23 mm) high.

TELEDYNE RELAYS

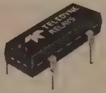
SERENDIP® Commercial/Industrial DIP Solid State Relays



Subminiature solid state relays in standard TO-116 DIP packages. Featuring all solid state circuitry with hybrid microcircuit construction, and high input/output isolation (up to 2500 volts/10^9 ohms). Six models available providing choice of output: bipolar (ac or dc), ac (triac), and dc (transistor). Bipolar (640/644 series) and dc (643 series) are direct pin-for-pin replacements for standard DIP reed relays. AC versions (641 series) are UL Recognized — File #E55197.

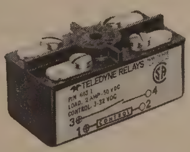
PART NUMBER	INPUT DATA		OUTPUT (LOAD) RATINGS			
				CURRENT		
	VOLTAGE (VDC)	MAX. CURRENT (MADC @ 5V)	AC/DC	@ 10V INPUT	@ 5V INPUT	VOLTAGE
640-1	3.8-10	22	BIPOLAR (AC or DC)	80 MA	40 MA	±50 V_{PEAK}
641-1	3.8-10	15	AC	0.5 A (Note 1)	0.5 A	140 V_{RMS}
641-2	3.8-10	15	AC	0.5 A (Note 1)	0.5 A	280 V_{RMS}
643-1	3.8-10	15	DC	400 MA	200 MA	60 V_{DC}
643-2	3.8-10	15	DC	100 MA	50 MA	250 V_{DC}
644-1	3.8-6	18	BIPOLAR (AC or DC) (Note 2)	5 MA	5 MA	±5 V_{PEAK}

Notes:

1. 1 amp with heat sink. Standard DIP heat sink, Model 640HS, available as accessory.
2. Features low offset voltge (100 microvolts typical).

Solid State DC Relay

603 Series - Optically Isolated



Solid state DC relays featuring LED optical isolation. SPST, normally open. Available in 2 and 5 amp steady state current ratings, up to 50 vdc. Sensitive 3-32 vdc control input is compatible with both low and high level logic systems. As an added option, controlled rise and fall time is offered to limit in-rush currents for lamp loads and switching transients for inductive loads. Package configuration provides either screw or quick disconnect terminals for chassis or panel mounting or solder pins for direct PC board mounting.

Size: 1″ (25.4 mm) x 2″ (50.8 mm) x .9″ (22.9 mm).

PART NUMBER	OUTPUT CURRENT RATING (AMPS)	
603-1	2	
603-2	5	
603-21	2	Controlled Rise & Fall Time
603-22	5	

Basic part number provides screw terminals.
Add suffix "P" for PC board pins, "Q" for quick disconnect terminals.

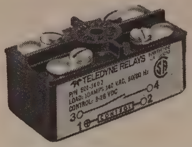
TELEDYNE RELAYS

3155 West El Segundo Boulevard, Hawthorne, California 90250 • Telephone (213) 973-4545

TELEDYNE RELAYS

Solid State AC Relays

601-1400 Series - Optically Isolated



Solid state AC relays featuring LED optical isolation and synchronous/zero voltage turn-on for reducing RFI. Available in 5 or 10 amp steady state current ratings for 120 or 240 volt loads. SPST, normally open. Sensitive 3-32 vdc control input is TTL compatible. The versatile "adaptive" package design of the 601-1400 series provides either screw or quick-disconnect terminals for chassis or panel mounting, or solder pins for direct PC board applications. 1″ (25.4 mm) x 2″ (50.8 mm) x .9″ (22.9 mm) package size makes it the smallest 10 amp AC solid state relay available.

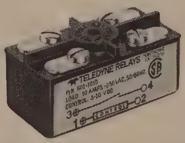
PART NUMBER	OUTPUT CURRENT RATING (AMPS)	OUTPUT VOLTAGE RATING (VRMS)
601-1401	5	140
601-1402	10	140
601-1403	5	250
601-1404	10	250

Basic part number provides screw terminals.
Add suffix "P" for PC board pins, "Q" for quick disconnect terminals

UL Recognized — File #E47991

CSA Certified — File #31043

601-1000 Series — Transformer Isolated



Transformer isolated version of the 601-1400 series. High input/output isolation (1000 v/10^9 ohms) achieved through magnetic coupling. Asynchronous turn-on; zero current turn-off. SPST, available in 3 and 10 amp ratings for 120 or 240 volt loads. Features "adaptive" package design, providing choice of either screw or quick disconnect terminals for chassis or panel mounting or solder pins for direct PC board mounting.

INPUT (CONTROL) VOLTAGE RANGE	OUTPUT VOLTAGE RATING (VRMS)	OUTPUT CURRENT RATING & PART NUMBERS	
		3 AMP	10 AMP
3-10 VDC	140/250	601-1007	601-1010
6-32 VDC or 15-45 VAC	140/250	601-1017	601-1020
60-140 VAC	140/250	601-1027	601-1030

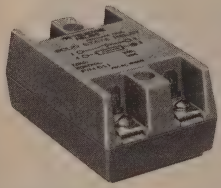
Basic part number provides screw terminals.
Add suffix "P" for PC board pins, "Q" for quick disconnect terminals.

UL Recognized — File #E47991

CSA Certified — File #31043

611 Series - Optically Isolated

High power solid state AC relays, available in 10, 25, and 40 amp ratings, for 120 and 240 volt loads. Features LED optical isolation and synchronous/zero voltage turn-on for reducing RFI. High output transient immunity — 200 volts/µsec. typical. Choice of logic compatible 3-32 vdc or AC line voltage input. Provided with multi-purpose screw and quick disconnect terminals.



UL Recognized — File #E47991

TELEDYNE RELAYS

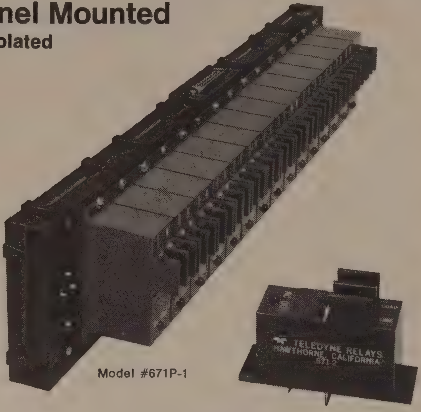
Solid State AC & DC I/O Converters

671 Series — Panel Mounted

Optically Isolated

Designed for use in programmable controllers, computerized process control systems, machine tool controls, etc. All solid state circuitry — optically isolated — with high transient and noise immunity to withstand severe industrial environments without false triggering. Unique single circuit modular package design with logic terminals physically isolated from power wiring, and high barriered power terminals providing for side by side panel mounting thus eliminating the need for additional interconnecting terminal strips. This modular I/O interface concept facilitates installation and maintenance and offers substantially greater system flexibility when compared to conventional multicircuit PC card systems. Integral LED status indicators are included for easy troubleshooting. There are 5 different converter modules in the series as shown on the adjacent table.



Model #671P-1

P/N	DESCRIPTION
671-1	AC Input Converter
671-4	AC Output Converter, 4-10 VDC Input 3 amps/250 VAC (zero voltage turn-on)
671-5	AC Output Converter, 10-32 VDC Input 3 amps/250 VAC (zero voltage turn-on)
671-21	DC Input Converter
671-22	DC Output Converter, 3 amps/55 VDC
671P-1	Mounting Panel

675 Series — PC Board Mounted

Optically Isolated

Functionally identical to 671 Series but featuring low profile PC board compatible potted module construction for greater packaging density and close card spacing. Designed to replace discrete I/O interface circuitry, this modular PC board concept facilitates installation and maintenance. Utilizes all solid state circuitry — optically isolated — with high transient and noise immunity. There are 5 different converter modules in the series as shown on the table.

P/N	DESCRIPTION
675-1	AC Input Converter
675-4	AC Output Converter, 4-10 VDC Input 3 amps/250 VAC (zero voltage turn-on)
675-5	AC Output Converter, 10-32 VDC Input 3 amps/250 VAC (zero voltage turn-on)
675-21	DC Input Converter
675-22	DC Output Converter, 3 amps/55 VDC

TELEDYNE RELAYS

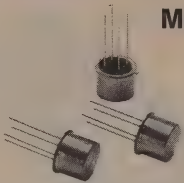
Military Solid State Relays

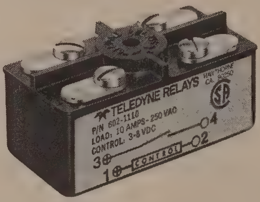
M640 Series Solid State TO-5 Relays



Hermetically sealed subminiature solid state relays in TO-5 package. SPST normally open. Features all solid state circuitry utilizing hybrid microcircuit techniques, with high input/output isolation (1000 v/10^9 ohms). Available with bipolar output for ac or dc loads up to 40 v/60 Ma or dc output for loads up to 40 vdc/300 Ma or 250 vdc/100 Ma. Designed to meet applicable requirements of MIL-STD-883 and MIL-R-28750.

PART NUMBER	OUTPUT RATING
M640-1	40 v/60 MA (bipolar, AC or DC)
M643-1	40 VDC/300 MA
M643-2	250 VDC/100 MA

602 Series 10 Amp/280 Volt Solid State AC Relays

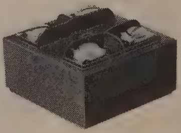


Features all solid state circuitry with high input/output isolation (1000 v/10^{11} ohms). Available in 10 amp rating, at 280 VAC, 50-500 Hz. Synchronous/zero voltage turn-on to minimize RFI is standard. Available with choice of logic compatible dc input ranges or AC line voltage input. Designed to meet applicable requirements of MIL-R-28750 and MIL-STD-704.

INPUT (CONTROL) VOLTAGE RANGE	OUTPUT VOLTAGE RATING	OUTPUT (LOAD) CURRENT RATING & PART NUMBERS
		10 AMP
3-8 VDC	140/250 VAC	602-1110
7-85 VDC	140/250 VAC	602-1120
90-280 VAC	140/250 VAC	602-1130

Basic part number provides screw terminals.
Add suffix "P" for PC board pins.

61A Series 20 Amp/280 Volt Solid State AC Power Relays



Features all solid state circuitry with high input/output isolation (1800 v/10^{11} ohms). Output rating 20 amps/280 vac, 50-500 Hz, with synchronous/zero voltage turn-on to minimize RFI.

Available with choice of logic compatible dc input ranges or AC line voltage input. Designed to meet applicable requirements of MIL-R-28750 and MIL-STD-704.

PART NUMBER	CONTROL VOLTAGE RANGE
61A-20B2-9Z	3-8 VDC
61A-20B2-10Z	7-85 VDC
61A-20B2-11Z	90-280 VAC

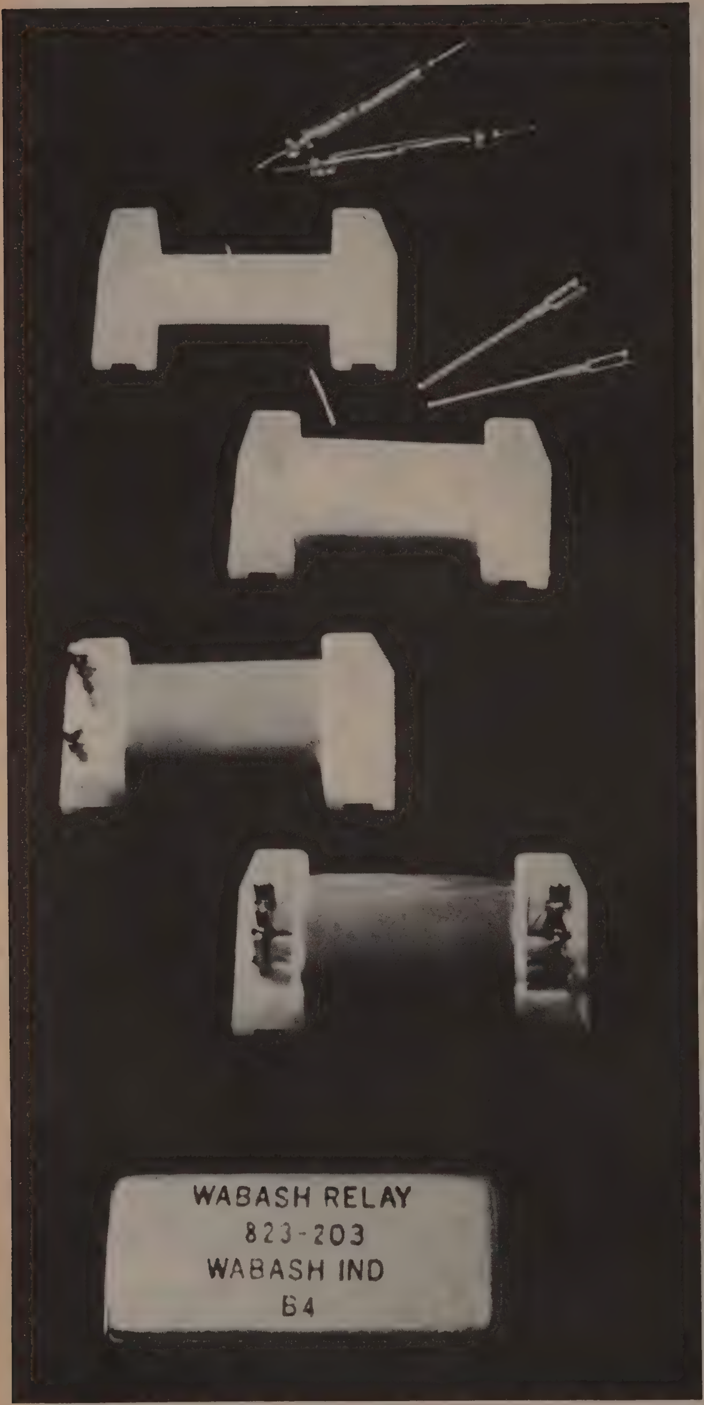
Manufacturer of
Dry Reed Relays
Mercury Wetted Relays
Solid-State Relays
wabash



Wabash Magnetics, Inc.— The Company Wabash Magnetics, Inc. is listed on the American Stock Exchange under the letters WMI. The principle products of the company include a wide variety of electrical coils, transformers, reed, mercury wetted and solid-state relays as well as magnetic coated products such as computer tape, magnetic cards, video and audio tape. The Company has in total nine plants located in five states from which its broad line of products are produced and shipped. Wabash offers years of technical and manufacturing excellence to its growing list of customers and has made the name Wabash synonymous with quality.

Wabash Relay & Electronics, Inc.— A Subsidiary Wabash Relay & Electronics, Inc., a subsidiary of Wabash Magnetics, is primarily located in the state of Indiana. This subsidiary is one of the few companies in the industry manufacturing the glass sealed switches, mercury capsules and relay assemblies. This unique manufacturing capability controls quality performance in their reed and mercury wetted relays. At the same time, the same high quality standards are built into Wabash's solid-state relays.

Front Cover Photo: A common thimble holds 75 Wabash manufactured mini-switches used to activate a burglar alarm. Unlike many manufacturers, Wabash controls quality performance because of their ability to produce their own switches.

A. Viewing a DIP through a large magnifying glass, a Wabash employee solders a switch into final position.

B. Shown is a close-up of one of the production stages of a mercury switch. It is here that a final glass-to-metal seal is made prior to a vacuum being pulled and mercury inserted.

Over 6,000 Variations Available

Vith over 6,000 variations, Wabash is sure o offer the relay you require. Here are out a few highlights:

Dry Reed Relay: Available in standard, miniature and sub-miniature with several variations of pin configuration including DIP.

Mercury Wetted Contact Relays: Comes n standard and miniature sizes in both PC mountable and octagonal base package.

Solid-State Relays: These hybrid relays are available in current ranges from 3 AMPS to 10 AMPS. Ultra-reliability in AC switching applications is the outstanding feature of these relays.

Switches: Dry Reed switches are available in standard, miniature and sub-miniature sizes with varying AMP turn ranges and lead lengths. RF switches are available in the miniature size with varying AMP turn ranges and lead lengths.

Wabash Relay Introduces "The Econo-Miser" Wabash production engineers just perfected a new product system and special equipment that produces a *quality* reed relay at an unheard of price. They are made available in 1 Form A, 2 Form A and 1 Form B, with 1" x .1" or 1" x .15" pin spacing. Wabash needs surprisingly little lead time to deliver.

Quality Assurance and Reliability

With over three billion test cycles run daily, Wabash Relay maintains their reputation for high quality assurance standards. At the same time, each switch is assembled and sealed into glass in hospital-like clean rooms where heat, humidity and dust are controlled.

Wabash engineers are working daily with customer specifications helping to produce or recommend a quality relay that assures top performance. Whatever your needs, look to Wabash for quality, service and delivery.

C. Featured is a photo of Wabash Relay's automatic test station in which three billion test cycles are run per day assuring quality performance.

D. A final electrical check is made before packaging and shipment to one of the many customers who utilize a Wabash relay.

E. Wabash engineers closely reviewing a drawing prior to determining what product best meets the customer's need.

F. To illustrate the many intricate steps that make up a mercury wetted relay, it has been arranged from top to bottom the way it is assembled.

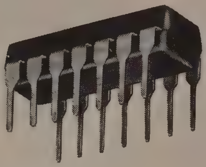
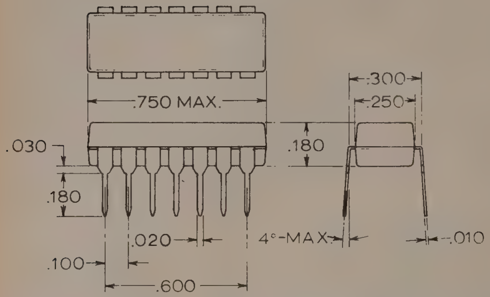
WABASH RELAY AND ELECTRONICS, INC.

DIP PACKAGE DRY REED RELAYS

814 SERIES





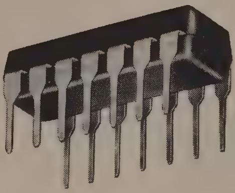
The 814 Series offers dry reed reliability and total isolation in a low profile IC type package, with DTL/TTL compatible coil drive available in most configurations.

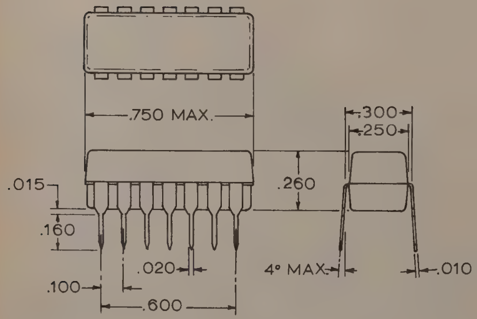
SPECIFICATIONS — Contact Rating: 28 VDC or 0.110 Amps (switching); 3 watts; 200 milliohms max. initial contact resistance; 200 Volt pk. bkdn. **Temperature:** −55°C to +105°C. **Shock:** 100G max., 8±1 mSec. ½ wave. **Vibration:** 20G @ 10-5000 Hz. **Insulation Resistance:** 10^{10} Ohms min. **Capacitance:** 0.2 pf. **Operate Time (Typical):** to 0.5 mSec. **Release Time (Typical):** 0.1 mSec. **Life Expectancy:** 50 x 10^6 operations at signal level; 1 x 10^6 operations at rated load.

Contact Form	Nom. Voltage	Max. Voltage	Coil Resistance ±10% ▲	Part Number
1A	5	16	365	814-101
	5	19	500	814-102
	6	19	500	814-103
	12	24	800	814-104
	24	30	1,250	814-105

▲Measured at 25°C.

815 SERIES





The 815 Series, with a profile slightly higher than the 814, offers increased versatility while maintaining the DIP package approach to hi-density printed circuit applications. Standard part numbers listed are subject to specifications shown for the 814 Series, however, the 815 has the capacity to offer dry reed switches to ½ Amp rating. Optional features include diode suppression, magnetic shielding and electrostatic shielding.

† All relays containing magnets for Form B operation (including the break-before-make 1C) are polarity sensitive and correct polarity must be observed. Dot on relays indicates positive terminal.

‡ A positive voltage must be applied to either dot terminal to close the contact(s) of a latch relay.
A negative voltage must be applied to either dot terminal to open the contact(s) of a latch relay.

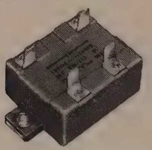
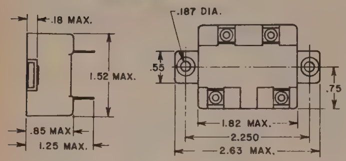
930 SERIES SSR





SPECIFICATIONS — Temperature: −25°C to +70°C operating; −40°C to +100°C storage. **Isolation Breakdown Voltage:** 1500 VDC min. DC control circuit to AC circuit; 1500 VDC min. DC control circuit to heatsink; 1500 VDC min. AC control circuit to heatsink. **Operate Time:** 1 millisecond. **Release Time:** ½ cycle max. of AC load waveform. **dV/dT:** All units have dV/dT communication of 1 Volt per microsecond. **Life:** 500 x 10^6 operations. **Terminations:** Quick connect, screw or solder type. **Mounting:** Two #8 screws on 2.25″ centers. **Low Profile:** Case height is only .850″. **Heatsink:** Extra heatsinking is required on the 6A and 10A modules. **Reliability:** The semi-Solid State Relay combines the reliability of a Solid State Triac and the high quality NPE Reed Relay. This combination offers an excellent heavy-duty AC Relay that can be controlled by an isolated, low-level signal.

FULL WAVE BRIDGE RECTIFIERS

Erie Full Wave Bridge Rectifiers are a series of miniature bridges — double-sealed modules designed for printed circuit applications. Available with working voltage from 100 to 1000 volts per leg. Operating temperature range from −55°C to +100°C. Double seal ensures moisture resistance to MIL-STD-750A, Method 1021.1.

semi about Delco's perience.

1 **Transportation**—Rail Locomotive Power, Electrostatic Painting, Signal Systems, Switches, Ignition Systems, Charging Systems, Heater/AC Controls
2 **Medical**—Electrosurgery, Forceps, Coagulators, Cutters, Nebulizers
3 **Power Supplies**—Linear Regulators, Switching Regulators, Capacitive Discharge Ignition, Battery Chargers 4 **Monitoring**—Displays, Video Remote Sensing, CRT Readout, Television 5 **Entertainment**—Audio Systems, Television 6 **AC Motor Speed Controls**—(used in the production of:) Clothing, Food, Drink, Toys, Light Machinery, Furniture, Packaging, Paper
7 **Communications**—Telephone, CRT, Audio Amplifiers, Computers, Video Cameras
8 **Induction Ranges**
9 **Ultrasonics**—Cleaning (industrial, jeweler, dentures), Welding, Emulsification 10 **Lighting**—Strobe, Fluorescent, Mercury Vapor, Emergency Switches, Timing
11 **Navigation**—Flight Simulators, Sonar Buoys, VLF Transmitters, Phased Array Radar.

You'd be surprised to know in how many industries Delco Electronics has firsthand power semiconductor application experience. They include, among others, transportation and medical, computers and communication, with products that range from motor speed controls to ultrasonic equipment. And the list goes on.

But we realize that you're most interested in how your new product should be designed, how your equipment is functioning and how your business is going. That's where Delco comes in personally.

You see, Delco Electronics has a staff of application engineers available to assist you when you're developing new designs. They have a wide range of application experience to draw from and a wide range of dependable Delco high-energy power semiconductors to work with. Power semiconductors that have been meeting tough government and industrial specifications for years.

Delco Electronics
Division of General Motors

Put the two together, and chances are you'll end up with a well-designed, reliable piece of equipment, sooner.

Call us or your local Delco semiconductor distributor and ask about our full line of reliable semiconductors. And how Delco Electronics engineers may assist you.

OSI SEMICONDUCTOR MATERIALS AND DEVICES
HALL EFFECT — INFRARED — THERMOELECTRIC

ENERGY CONVERSION — IR — DEVICE MATERIALS

Semiconductor compounds and alloys of the following types, covering a wide range of controlled electronic properties for applications such as INFRA-RED DETECTORS, MAGNETIC SENSORS, THERMOELECTRIC COOLING/POWER GENERATION, OPTICAL AND INFRA-RED COATINGS/FILTERS, AND CRYOGENIC SENSORS, are available from stock. High quality electronically characterized materials suitable for PHOTOCONDUCTIVE and PHOTOVOLTAIC sensors are available.

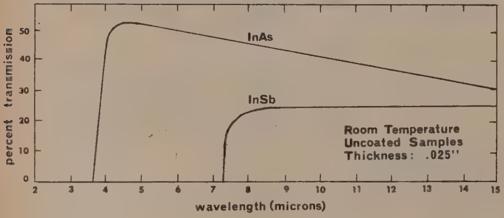
Material	Carrier Concentration/cm³
InAs	10^{15} - 10^{19}
InSb	10^{14} - 10^{19}
Bi-Te alloys	10^{18} - 10^{19}
PbTe and PbTe alloys	As Desired

These materials are available in ingot, rod, slice and polished wafer form. Oriented single crystals of InSb having dislocation densities well below 100/cm² are available for infra-red sensor construction. High figure of merit p and n type Bi-Te alloys are in stock for thermoelectric applications. InAs with Hall coefficients at R.T. in the range from 10 to 1000 cm³/coulomb is immediately available for many device applications.

Any feasible high purity alloy or compound consisting of Pb, Bi, Tl, Tn, As, Sn, Sb, Se or Te with selective doping can be manufactured and supplied on request.

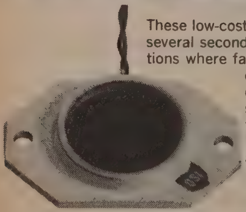
High purity zone refined ingots of most of the above elements used in our electronically characterized compounds can be delivered on request.

INFRARED WINDOWS



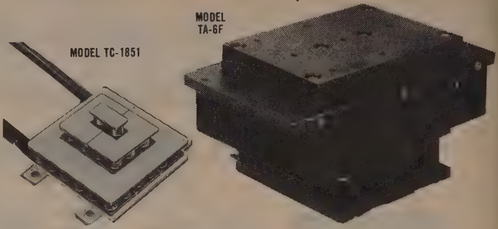
Polished IR windows of single crystal and polycrystalline InSb and polycrystalline InAs are available in sizes up to 1" in square or circular shapes and any desired thickness. Applications include broad band transmission for IR detectors and sources at wave lengths above the cutoff value. Anti-reflective coatings are available, on quantity orders, to increase peak transmission to about 90% for InAs and 80% for InSb.

RADIATION SENSORS

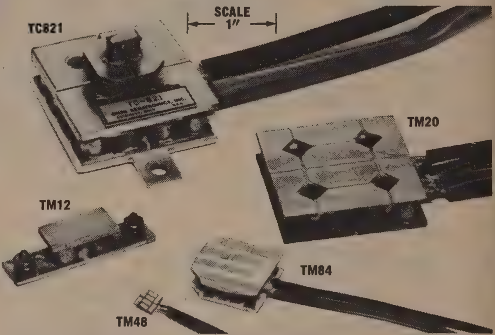


These low-cost, broad-band radiation sensors with several seconds time constant find many applications where fast response is not essential. These detectors are of the thermopile type operating over the IR and visible spectrum. Applications include thermal monitoring and registering. Photo conductive IR InSb detectors are also available.

THERMOELECTRIC DEVICES



(Above Photos Not To Scale)



O.S.I. offers a variety of thermoelectric cooling units ranging from the TC Series, used in spot cooling applications where up to 115 degree Centigrade temperature depression is needed, to the TA Series which can remove up to 85 watts from chemical bath, electronic package, or enclosure. The controllable, reversible heat pumping properties of thermoelectric devices make them ideally suited for temperature control. The MTM48 and TM84 are suited to IR detector cooling. Two and three stage coolers are also available for lower temperature IR detector cooling.

MODEL	ΔT DEG. C.	HEAT PUMP WATTS AT ΔT = 0	MAX. INPUT CURRENT AMPERES
TM-20	65	20	30
TC-44	90	6	30
TM-12	65	2.4	30
TA-6F	55	85	30

TM-318	60	20	8
MTM-48	60	1.7	5
TM-84	65	1	4.4

THERMOELECTRIC COOLED IR DETECTOR ASSEMBLIES

MODEL RTM-164B

Complete IR detector assemblies include mounting base, thermoelectric cooler, cold plates, thermistor, IR detector, window and/or filter. Assemblies may be bare (as shown), sealed or vacuum encapsulated. Customer engineering service is provided to accommodate specified IR detector and filter types. Applications include surveillance, security, instrumentation and industrial process control.

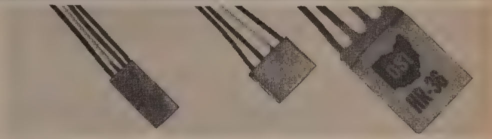
PIONEER IN SOLID STATE TECHNOLOGY FOR ENERGY CONVERSION AND POWER MONITORING

OSI SEMICONDUCTOR MATERIALS AND DEVICES HALL EFFECT — INFRARED — THERMOELECTRIC

HALLTRON, MAGNETIC FIELD SENSORS



OSI offers a wide variety of standard Hall Effect probes for magnetic sensing or measuring applications. The high linearity, low noise, excellent stability and ruggedness permit optimum use in your most critical applications. Reliability has been proved by years of continuous operation in industrial and military systems. Large quantity production enables OSI to offer high quality units at attractive prices.

* Denotes Axial Type Probes. All others are Transverse. Operating Temperature Range: −65°C to +85°C.

OSI has a unique position in the U.S. Hall probe manufacturing indus-ry in that they process their own Hall probe semiconductor materials hus providing the special capability of designing and manufacturing custom probes for any application and to meet any feasible set of specifications.

In addition to the standard probes listed, OSI supplies high-reliability probes with appropriate test documentation for critical industrial and military applications.

Write or call OSI, the recognized leader in Hall effect technology, for assistance in meeting your requirements.

Max. Forward Voltage @ 10 MA	6 Volts
Max. Capacitance @ 0 Volts (Case A)	1 Picofarad
Max. Capacitance @ 0 Volts (Case B)	2 Picofarad

For applications requiring very low reverse leakage and low capacitance (less than 10 nanoamperes and 1 picofarad at operating PIV).

These reliable microminiature diodes were first designed to meet the special requirements of Image Intensifiers for first and second generation Night Vision sights for the U.S. Armed Services.

Custom "Bank" constructions, containing 4 to 12 diodes make power supply designs smaller, and assembly simpler. Details available in request.

Avalanche silicon diodes are connected in series on a PC board, arranged for immersion in electrical grade insulating oil.
Each board is a H.V. diode which is then connected into a full wave rectifier circuit.

HIGH VOLTAGE RECTIFIERS

The MH Series and 20 MH Series High Voltage Rectifiers are both rated at 20 MA continuous current and are available for both standard and high frequency applications to 50MHz. Applications for these types are electrostatic copiers, room electrostatic air cleaners, electrostatic paint spray, and television receivers.

The 350 MH Series High Voltage Rectifiers are rated at 350 MA continuous current in both standard and high frequency applications to 50MHz. Applications for these types are lasers, precipitators, medical defibrillators, and transmitter power supplies.

For information on additional JEDEC types and high voltage, high gain triple diffused mesa devices, contact the local RSM representative.

SINGLE DIFFUSED MESA POWER TRANSISTORS

These rugged single diffused mesa transistors exhibit low saturation voltage and are extremely well suited in applications where freedom from secondary breakdown is desirable. All devices are 100% safe operating area tested (S.O.A.R.) at maximum BV_{CEO}, wattage, and I_C condition for one second.

RSM SENSITRON

Sensitrode®

THE MOST RELIABLE RECTIFIER AVAILABLE TODAY!

SENSITRODE RELIABILITY FEATURES:

- **Lowest Leakage**

The Sensitrode process provides reverse leakage currents as low as 0.1 microamps at peak inverse voltage.

- **True Avalanche Characteristics**

Due to the extremely low surface leakage, avalanche breakdown in the Sensitrode rectifier occurs uniformly across the entire junction area offering the best protection against transient voltage spikes.

- **High Operating and Storage Temperature**

Sensitrode glass passivated rectifier chips are metallurgically brazed to the leads allowing maximum operating junction temperature of 200°C and maximum storage temperature of 300°C. Conventional rectifier chips are soldered to the leads and passivated with organic materials limiting their maximum operating temperature to 150°C and storage temperature to 200°C.

- **Temperature Cycling and Thermal Shock**

The unique Sensitrode method of glass passivation makes possible the widest range of temperature cycling available. The glass formula used provides the closest match to the thermal coefficient of silicon.

- **Life-time Warranty**

The Sensitrode rectifier is unconditionally warranted for the life of the equipment. For specific warrantee conditions, write or call factory.

- **Sensitrode Samples**

For your free Sensitrode evaluation sample, write request on your company letterhead.

HERMETICALLY SEALED −195°C TO +300°C TEMPERATURE RANGE

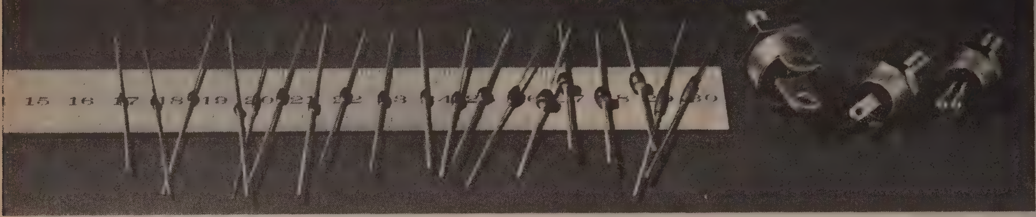
SEMTECH Metoxilite Silicon Rectifiers, Stud Rectifiers, Zeners, Transient Suppressors and Miniature High Voltage Rectifiers



METOXILITE SILICON RECTIFIERS

Metoxilite (metal oxides) is fused to the metallurgically bonded junction-tungsten pin assembly forming a "tough" sub-miniature package. Metoxilite, the material that pushed Semtech to the foreground of the industry for sub-miniature medium power silicon rectifiers, now makes its debut in a whole new spectrum of "state-of-the art" devices.

EIA types are available in JAN and JANTX, and some JANTXV and SIN (NASA) types.

• METOXILITE MEDIUM CURRENT

GENERAL PURPOSE
1N3611, 12, 13, 14 & 1N3957
PIV: 240, 480 720, 920 & 1150 V
Average Rectified Current @ 55°C: 1 A

MEDIUM RECOVERY (Trr) 2 µs
1N4245, 6, 7, 8 & 9
PIV: 200, 400, 600, 800 & 1000 V
Average Rectified Current @ 55°C: 1 A

FAST RECOVERY (Trr) 150 to 500 ns
1N4942, 4, 6, 7 & 8
PIV: 200, 400, 500, 600, 800 & 1000 V
Average Rectified Current @ 55°C: 1 A

MEDIUM RECOVERY (Trr) 2 µs
1N5614, 16, 18, 20 & 22
PIV: 200, 400, 600, 800 & 1000 V
Forward Current @ 55°C: 1 A

FAST RECOVERY (Trr) 150 to 500 ns
1N5615, 17, 19, 21 & 23
PIV: 200, 400, 600, 800 & 1000 V
Forward Current @ 55°C: 1 A

MEDIUM RECOVERY: (Trr) 2 µs
1N5550, 1, 2, 3, & 4
PIV: 200, 400, 600, 800 & 1000 V
Average Rectified Current @ 55°C: 3 A

FAST RECOVERY (Trr) 150 ns
1N5415, 6, 7, 8 & 9
PIV: 50, 100, 200, 400 & 500 V.
Average Rectified Current @ 55°C : 3 A

VERY FAST RECOVERY (Trr) 100 ns
1N5835 & 1N5836
PIV: 30 & 50 V
Average Rectified Current @ 55°C : 3 A

SUPER FAST (Trr) 30 ns
1N6076, 77 & 78
PIV: 50, 100 & 150 V
Forward Current @ 25°C: 3 A

SUPER FAST (Trr) 30 ns
1N6079, 80 & 81
PIV: 50, 100 & 150 V
Forward Current @ 25°C: 5 A

• MINI-METOXILITE — LOW CURRENT

GENERAL PURPOSE (Trr) 2 µs
1N645, 6, 7, 8 & 9
PIV: 225, 300, 400, 500 & 600 V
Forward Current @ 55°C: 0.5 A

MEDIUM RECOVERY (Trr) 2 µs
M2, M4, M6, M8 & M0
PIV: 200, 400, 600, 800 & 1000 V
Forward Current @ 55°C: 0.5 A

FAST RECOVERY (Trr) 150 ns
F1, F2, F4 & F5
PIV: 100, 200, 400 & 500 V
Forward Current @ 55°C: 0.5 A

VERY FAST RECOVERY (Trr) 100 ns
T1, T2, T3 & T4
PIV: 100, 200, 300 & 400 V
Forward Current @ 55°C: 0.5 A

SUPER FAST RECOVERY (Trr) 30 ns
1N6073, 74 & 75
PIV: 50, 100 & 150 V
Forward Current (@ 25°C :1.5 A

• VOLTAGE REGULATORS

SX6.8, 7.5, 8.2, 9.1, 10, 11, 12, 13, 15, 16, 18 20, 22, 24, 27, 30, 33, 36, 39, 43, 47, 51, 56, 62, 68, 75, 82, 91, 100, 110, & 120
Nominal Voltage: 6.8 to 120 V
Low dynamic impedance.

• ZENERS (5 Watt)

1N4954 through 1N4984
Nominal Voltage: 6.8 to 120 V
Low dynamic impedance.

• B1-POLARITY TRANSIENT SUPPRESSORS

L10A, 20A, 30A, 39A, 51A, 60A, 82A, 100A & 110A
Peak Pulse Power: 500 Watts
Breakdown Voltage (I_{dc}) BV Max.: 11 to 121 V

• RADIATION RESISTANT RECTIFIERS

(Trr) 500 ns
R1, R2, R3 & R4
PIV: 100, 200, 300 & 400 V
Average Rectified Current @ 55°C : 1000 mA

SEMTECH
CORPORATION

652 Mitchell Road, Newbury Park, California 91320
(805) 498-2111, (213) 628-5392 / TWX: 910-336-1264

• SILICON STUD RECTIFIERS

DO-5 MEDIUM RECOVERY (Trr) 2 µs
ST1M, 2M, 3M, 4M & 6M
PIV: 100, 200, 300, 400 & 600 V
V_F @ 50A, 100°C: 1.17V

DO-5 FAST RECOVERY (Trr) 150 ns
STF1, F2, F3 & F4
PIV: 100, 200, 300 & 400 V
V_F @ 50A, 100°C: 1.35V

DO-5 LO-VF (Trr) 100 ns
STL03 & STL05
PIV: 30 & 50 V
V_F @ 50A, 100°C: .97V

DO-5L SUPER FAST (Trr) 30 ns
STFF05, 10 & 15
PIV: 50, 100, & 150 V
V_F @ 50A, 100°C: .93V

DO-4 SUPER FAST POWER (Trr) 30 ns
SFF 05, 10 & 15 and 2SFF05, 10 & 15
PIV: 50, 100 & 150 V
SFF = V_F @ 12A, 100°C: .82V
2SFF = V_F @ 20A, 100°C: 1.0V.

DO-4 SUPER FAST CENTER TAPS & DOUBLERS (Trr) 30 ns
SNFF05, 10 & 15; SPFF05, 10 & 15 and SDFF05, 10 & 15
PIV: 50, 100 & 150 V
V_F @ 10A/1eg, 100°C: .82V

DO-4 FAST RECOVERY (Trr) 150 ns
1SF1, 2 & 4; 2SF1, 2 & 4
PIV: 100, 200 & 400 V
1SF = V_F @ 8A, 100°C: 1.35V
2SF = V_F @ 16A, 100°C: 1.35V

• METOXILITE SUB-MINIATURE HIGH VOLTAGE RECTIFIERS

MEDIUM RECOVERY
SM20, 25 & 30
PIV: 2000, 2,500 & 3000 V
Average Rectified Current @ 55°C: 250 mA

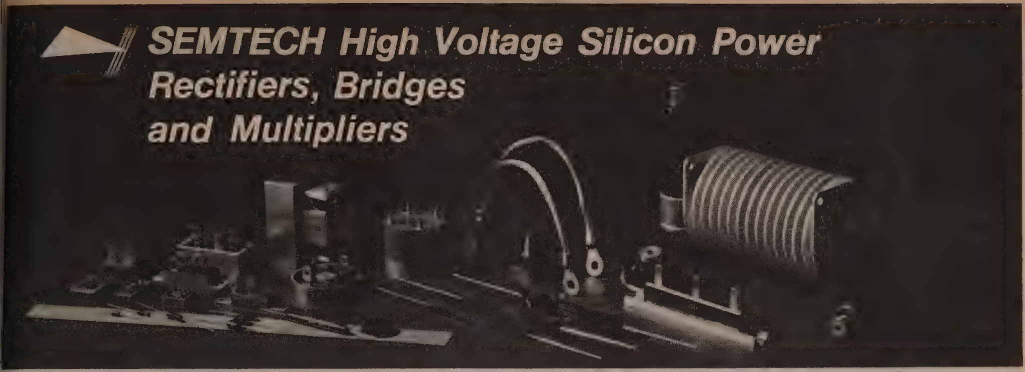
FAST RECOVERY (Trr) 300 ns
S15F, 20F & 25F
PIV: 1,500, 2,000 & 2,500 V
Average Rectified Current @ 55°C: 250 mA

METOXILITE MINISTAC (Trr) 2 µs & 5 µs
M20, 30, 40, 50 A & 60 A
PIV: 2,000, 3,000, 4,000, 5,000 & 6,000 V
Average Rectified Current @ 55°C: 125 mA & 50 mA

Semtech products are available in quantity for immediate delivery.

Ask for our 1975-76 catalog.

SEMTECH High Voltage Silicon Power Rectifiers, Bridges and Multipliers

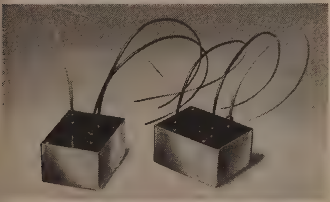


CUPAC RECTIFIERS
150 SILICON POWER RECTIFIERS
FAST RECOVERY (Trr) 200 ns
SCSF05, 1, 2, 4 & 6
PIV: 50, 100, 200, 400 & 600 V
V_F @ 100 A 100°C: 1.35V
MEDIUM RECOVERY (Trr) 2 μs
SCSM05, 1, 2, 4 & 6
V_F @ 100 A 100°C: 1.17V

- **MINISTAC SUB-MINIATURE HIGH VOLTAGE**
SEM30, 40, 50, 60, 70, 80, 100, 120 & 140
PIV: 3,000 to 14,000V
Average Rectified Current @ 25°C: 10 mA
FAST RECOVERY (Trr) 150 ns
SEF30, 40, 50, 60, 70, 80, 100, 120 & 140

- **MINISTIC HIGH VOLTAGE**
SCMS 10K, 15K, 20K, 30K & 40K
PIV: 10,000, 15,000, 20,000, 30,000 & 40,000 V
Average Rectified Current @ 55°C: 10 mA
FAST RECOVERY (Trr) 150 ns
SFMS 10K, 15K, 20K, 30K & 40K

- **COMPAC BRIDGES**
SBR05, 1, 2, 4, 6, 8, 10, 15, 20, 25 & 30
PIV: 50, 100 200 400, 600, 800, 1,000, 1,500, 2,000, 2,500 & 3,000 V
Average Rectified Current @ 55°C: SBR05 thru 10 = 1.5 A, SBR15 thru 30 = .36 A



- **CRT PAC HIGH VOLTAGE MULTIPLIERS**
An aluminum cased multiplier which is shielded from RFI and can be mounted anywhere on the chassis.
SCMA 500, 600, 700 & 800
Output Current: 2.0 mA
Output voltages to 36KV
Also available: Custom designed doublers, triplers and quadruplers, etc.

- **MULTI-PURPOSE BRIDGES**
FAST RECOVERY (Trr) 150 ns
SCBRO 5F, 1F, 2F, 4F & 6F
PIV: 50, 100, 200, 400 & 600 V
Average Rectified Current @ 25°C: 1.5 A

- **ALPAC BRIDGES**
SCBA 05, 1, 2, 3, 4 & 6
PIV: 50, 100, 200, 300, 400 & 600 V
Average Output Current @ 55°C: 25 A dc

ALPAC-JR
SCAJ05, 1, 2, 3, 4 & 6
PIV: 50, 100, 200, 300, 400 & 600 V
Average Output Current @ 55°C: 5 A dc

ALPAC-T
Type: SCBH05, 1, 2, 3, 4 & 6
PIV: 50, 100, 200, 300, 400 & 600 V
Average Output Current @ 55°C: 10 A dc

ALPAC-3T
3-PHASE BRIDGE
SC3BH05, 1, 2, 3, 4 & 6
PIV: 50, 100, 200, 300. 400 & 600 V
Average Output Current @ 55°C: 10 A dc

ALPAC-50
SCBAR05, 1, 2, 3, 4, 6, 8, 10
PIV: 50, 100, 200, 300, 400, 600, 800 & 1,000 V
Average Rectified Current @ 75°C: 50 A

ALPAC-R50
BRIDGE RECTIFIERS
SCBK05, 1, 2, 3, 4 & 6
PIV: 50, 100, 200, 300, 400 & 600 V
Average Rectified Current @ 55°C: 50 A

ALPAC-SR
HIGH CURRENT BRIDGES
1φ FWB: SCAS05A, 1A, 2A, 3A, 4A & 6A
3φ1/2WB: SC3HAS05A, 1A, 2A, 3A, 4A & 6A
3φ FWB: SC3AS05A, 1A, 2A, 3A, 4A & 6A
PIV: 50, 100, 200, 300, 400 & 600 V
Average Rectified Current @ 55°C:
1φFWB = 150 A; 3φ1/2WB = 250 A & 3φ FWB = 190 A

- **HIGH VOLTAGE CERAMIC CAPACITORS**
Corona free, available in voltages up to 20KV. Capacitance values from 250pf to 23,000pf. Also available are monolithic capacitors.

SEMTECH
CORPORATION
652 Mitchell Road, Newbury Park, California 91320
(805) 498-2111, (213) 628-5392 TWX: 910-336-1264

- **SLIMPAC HIGH VOLTAGE,**
SCH5000, 7500, 10,000, 12,500, 15,000, 20,000 & 25,000
PIV: 5, 7.5, 10, 12.5, 15, 20 & 25KV.
Average Rectified Current @ 55°C: .5A

SLIMPAC JR
SCHJ15K, 22.5K, 30K, 37.5K & 45K
PIV: 15,000, 22,500, 30,000, 37,500 & 45,000 V
Average Rectified Current @ 55°C: 50 mA

SLIMPAC SR
SCHS2,500, 5,000, 7,500, 10,000 12,500 & 15,000
PIV: 2,500, 5,000, 7,500, 10,000, 12,500 & 15,000 V
Average Rectified Current @ 55°C: 2 A

- **KV-PAC**
RECTIFIERS, DOUBLERS & CENTER TAPS
SDH10K, 15K, C5K, D5K, C10K, D10K, C15K, D15K
PIV: 5,000, 10,000 & 15,000 V
Average Rectified Current @ 50°C Mtg. 0.6 & 1.2 A

- **HIGH VOLTAGE MODULES**
S & S2HVM15, 12.5, 10, 7.5, 5 & 2.5
S3HVM10, 7.5, 5 & 2.5; S6HVM5 & 2.5; S9HVM2.5
PIV: 2,500, 5,000, 7,500, 10,000, 12,500 & 15,000 V
Average Rectified Current @ 55°C (Oil): 0.5, 2, 3, 6 & 10 A

- **KILOVOLT — STAC**
SCKV100K3, 150K3, 200K3, 50K6, 75K6, 100K6, 33K12, 45K12, 66K12, 12.5K30, 18K30, 12.5K40, 18K40 & 25K40
PIV: 12, 18, 25, 33, 45, 50, 66, 75, 100, 150 & 200 KV
Average Rectified Current @ 55°C (Oil): 0.3, 0.6, 1.2, 3 & 4A

- **STACPAC HIGH POWER**
SCPH2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48 & 50
PIV: (Per Leg) 1 through 25 KV
Average Rectified Current @ 55°C: 5.5 A

Semtech products listed above are also available in other popular voltages, current ranges and recovery characteristics (medium, fast & super-fast). Ask for our 1975-76 catalog.

SIEMENS also offers thousands of custom or proprietary devices in one of the most extensive lines of commercial and military zeners available.

The three quick reference charts shown on the following pages include industry "preferred" Voltage Regulating Diodes. The power dissipation, package type and applications are listed horizontally. Nominal voltage breakdown is listed vertically.

To find the proper device, simply locate the required power dissipation and package type and read **down** until you locate the device number opposite the required nominal voltage.

HY-A-SIL HIGH-AMPERE SILICON RECTIFIERS

FEATURES

- High Operating Temperature, 190°C (Up to 120°C ambient)
- High Operating Voltage (Up to 600 p.i.v.)
- High Efficiency (99% compared to about 75% for selenium)
- Excellent Regulation (4% compared to about 15% for selenium)

EPION™

FAST SWITCHING RECTIFIER SELECTION GUIDE:

ULTRA-FAST RECOVERY RECTIFIERS

...FOR FAST SWITCHING POWER APPLICATIONS

A truly unique, State-of-the-Art, **EPION™ ION-IMPLANTATION PROCESS** has enabled the development of these single-chip rectifiers, in current ratings from 1-100 AMPS, eliminating the inherent reliability problems experienced with competitive multiple-junction rectifiers.

- **10-50 ns MAXIMUM RECOVERY FROM 1-100 AMP RATINGS**
- **SINGLE-CHIP GEOMETRY ELIMINATES MULTIPLE-JUNCTIONS**
- **LOWEST AVERAGE FORWARD VOLTAGE DROP AT RATED CURRENT AND TEMPERATURE (from 600 mv)**
- **PEAK INVERSE VOLTAGES TO 150 VOLTS AVAILABLE**
- **-55°C TO +200°C STORAGE AND OPERATING TEMPERATURE**
- **ALL DEVICES HERMETICALLY SEALED**

These EPION units feature single-junctions, mono-metallic metalization, and are hermetically sealed with glass-to-metal seals instead of epoxy encapsulants. Because of the unique EPION process, greater economies in manufacturing costs will assure the designer and user of continued competitive pricing and greater reliability.

The rugged, single-die construction of the EPION rectifier results in ultra-fast recovery and lower forward voltage drop. Standard units meet the thermal shock requirements of MIL-STD-202, Method 107 (10 cycles, −55° to +200°C) without degradation, which cannot be found in competitive multiple-junction devices now available.

The EPION rectifier is the **only** rectifier available from 1-100 AMPS in single-chip JEDEC packages. And, all units are supplied in standard JEDEC configurations–without modifications. Of course, special packages are available on request.

All units are radiation hardened in addition to ultra-fast recovery (10-50 ns max.), extremely low forward voltage drop and low reverse leakage, making them ideal for military applications; yet EPION rectifiers are competitively priced and stocked for volume use in industrial and commercial applications.

Complete specifications and pricing on request.

FAST SWITCHING TRANSISTOR SELECTION GUIDE:

EPITAXIAL POWER TRANSISTORS

...FOR FAST SWITCHING POWER APPLICATIONS

These high speed SSDI epitaxial base transistors feature fast turn-on and turn-off for switching efficiency at high operating frequencies. The high linear gain of these devices across the entire current range can eliminate or reduce driver transistor requirements. This line of fast-switching NPN power transistors consists of three basic series rated 10 amps, 40 amps and 90 amps, peak I_C.

- **t_{on} 300-600 ns MAX.**
- **t_{fall} 300-450 ns MAX.**
- **VOLTAGES TO 375 $V_{CEO(SUS)}$**
- **LOW SATURATION VOLTAGES**
- **BROAD LINEAR GAIN**
- **MAXIMUM PEAK I_C TO 90 AMPS**
- **UNIFORM t_r AND t_f**
- **f_T FROM 20-60 MHz**

$V_{CEO(SUS)}$ to 375 volts provides increased voltage safety margins; excellent S.O.A. permits applications where high forward bias peak power is required. All devices are hard solder construction to withstand extreme thermal variation.

These features coupled with availability of a variety of popular TO packages make SSDI epitaxial transistors ideal for use in these applications:

Power Supplies / Voltage Regulators
Switching Regulators / DC to AC inverters
DC to DC converters / Oscillators
Pulse Generators / Modulators
Industrial Controls / Switching Circuits
Amplifiers / Constant Current Regulators

SSDI ALSO MANUFACTURES:

a wide selection of popular, "off the shelf" semiconductor devices which will meet a wide variety of applications in military and commercial electronic equipment. SSDI also manufactures and stocks many silicon semiconductor devices not listed here. Refer to the D.A.T.A. BOOK for complete listings.

AXIAL LEAD RECTIFIERS
HIGH VOLTAGE RECTIFIERS
FAST RECOVERY RECTIFIERS
T.C. ZENERS
BRIDGE RECTIFIER ASSEMBLIES
DIFFUSED PNP & NPN HIGH VOLTAGE & POWER TRANSISTORS
SMALL SIGNAL TRANSISTORS

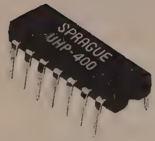
*All 20 amp and above have copper base.
(¹) 20@30A/4V has guaranteed gain at 40 amps.

SOLID STATE DEVICES, INC.

SPRAGUE SEMICONDUCTORS

DIGITAL INTERFACE QUAD POWER DRIVERS



- Monolithic interface circuits incorporating logic gates and high-current switching transistors on the same chip.
- Ideally suited for driving incandescent lamps, relays, solenoids, and other interface devices up to 1A output current per package.
- In the OFF state, Series, UHP-400 devices will sustain 40V; Series UHP-400-1, 70V; Series UHP-500, 100V.
- Inputs compatible with DTL/TTL.
- Pinning compatible with 54/74 networks.
- 500mA output sink current capability.
- High voltage output capability per driver.
- Transient protected outputs on relay driver Types 403, 406, 407, 433, 503, 506, 507, 533.
- 14-pin dual in-line plastic packages. Hermetic DIPs and flat-packs available on special request.
- Operating temperature range: plastic packages, 0C to +70 C; hermetically-sealed packages, –55 C to +125 C.

Order by Complete Catalog Number:

U H P — 4 0 7

Basic Type

P = Plastic DIP
C = Hermetic Flat Pak
D = Hermetic DIP

4 = 40V Breakdown Voltage
5 = 100V Breakdown Voltage
(for 70V add –1 at end of Cat. No,.)

UDN-6184A

- Monolithic high-voltage, bipolar ICs for interfacing between MOS or other low-voltage circuitry and gas discharge displays.
- Reduce the number of discrete components normally required with panels, such as in calculator, clock, and instrumentation applications.
- High output breakdown voltage, low power, minimum size.
- Series UDN-6100 gas discharge display digit drivers have appropriate level shifting, signal amplification, off-stage voltage bias, and 70mA output current sourcing for sequential addressing of display panel anodes.
- In Series UDN-7100 (cathode drivers), Type UDN-7183A is designed for use with 0.7″ clock and 0.4″ calculator panels. Type UDN-7186A is for use with 0.25″ calculator panels.

SPRAGUE SEMICONDUCTORS

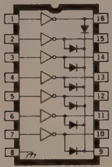
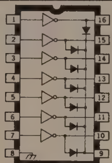
TRANSISTOR ARRAYS

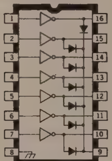
- Special selection of linear integrated circuits.
- Monolithic active-device arrays which combine the performance and versatility of discrete devices with the inherent reliability and matching of integrated circuits.
- Power dissipation, Ta to +55 C is 300mW for each transistor and 750mW for the total package.
- Plastic dual in-line package, 14 or 16 leads.
- Operating Temperature range, 0°C to +85°C.



ULN-2001A
High-Current Darlingtons
7 silicon NPN pairs



ULN-2002A
High-Current Darlingtons
inputs have zener diode,
resistor



ULN-2003A
High-Current Darlingtons

ECONOLINE® SILICON ZENER DIODES

- Offer 500mW power dissipation.
- Low-cost TO-92 package.
- Silicon-Oxide passivated junction.
- Operating junction temp. range, –65C to +150C.
- Zener Tolerances, ±5%, ±10% and ±20%.
- In-line leads for easy insertion.

Type Number*	Nom. Zener Volt. V_{ZT} (V)	at I_{ZT} (mA)	Max. Zener Impedance Z_{ZT} at I_{ZT} (Ω)	Z_{ZK} at 250nA (Ω)

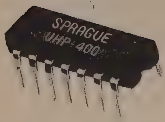
SPRAGUE SEMICONDUCTORS

DIGITAL INTERFACE DISPLAY DRIVERS



- Bipolar devices for interface applications.
- Cut component count by replacing most discrete components typically required between MOS/TTL logic and gas discharge displays such as Burroughs Panaplex®.
- Reliable monolithic integrated construction.
- Low output leakage currents.
- High output breakdown voltages.
- Plastic (UHP) and hermetic (UHD) dual in-line packages. Hermetic package available on special request.
- Drivers in plastic DIPs have operating temperature range of −0 C to +85 C; drivers in hermetic DIPs have operating temperature range of −55 C to +125 C.

- Consumer entertainment integrated circuits with "state-of-the-art" design and process capability.
- Performance advantages not previously available with discrete fabrication techniques, while reducing component count.
- Ion-implanted devices save space, provide time and cost savings to radio and audio equipment manufacturers.
- Devices for preamplifier, general purpose audio, F-M/I-F amplifier, stereo decoder, and complete A-M radio applications.
- The 21 ICs shown below are standard off-the-shelf units which fit a particular function most economically. See table for brief description and package information.

Epoxy and Thermalcote

Thermalbond

Thermally Conductive Epoxy Adhesive

THERMALBOND
THERMALBOND
Thermalloy

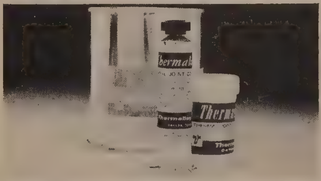
Thermalbond is a thermally conductive, high strength epoxy adhesive. It provides exceptional adhesion to copper, aluminum, steel, glass, ceramics, and most plastics. Thermalbond also has a coefficient of thermal expansion compatible with aluminum, copper, and brass making it particularly well suited for thermally bonding semiconductors and other components to chassis or heat sinks. It has good electrical insulating qualities and is one of the few epoxy adhesives suitable for cryogenic applications.

	SIZE
4951*	3½ oz. (100 Grams)
4952*	7 oz. (200 Grams)

*Matched Quan. of RT-7 Hardener included.

Thermalcote

Thermal Joint Compound



Thermal
Thermalloy

Thermalcote is a superior thermal joint compound for use with all heat sinks. It improves the transfer of thermal energy across the metal-to-metal interfaces between the transistor or rectifier case and the heat sink.

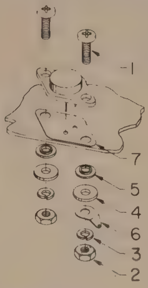
Thermalcote conducts heat approximately 30 times better than air and more than 4 times better than silicone grease. It is non-toxic, an excellent insulator, and extremely stable; neither caking nor running, from -40°F. to +400°F.

Typical Properties

Color	Opaque White
Working Temperature	-40 to +400°F
Maximum Temperature	800°F
Thermal Conductivity	0.430 Btu/(ft)(hr)(F°) 0.00178 CAL/(cm)(sec)(C°) 0.00745 watts/(cm)(C°) 0.0189 watts/(in)(C°)
Dielectric Strength (.050 gap)	300 volts/mil
Volume Resistivity	4 x 10^{14} ohm-cm
Solvent	Trichloroethylene

STOCK NO.	NET WEIGHT
249	1 oz. tube
250	2 oz. jar
251	1 lb.

Mounting Kits without Sockets



4801 & 4810

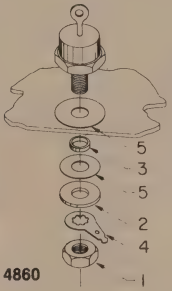
4801 for TO-3

Item	Description
1	Screw 6-32 x ½ Phil Pan Hd. Stainless Steel
2	Nut 6-32 Stainless Steel
3	Lock Washer No. 6 Stainless Steel
4	Flatwasher No. 6 Stainless Steel
5	Shoulder Washer
6	Solder Lugs, Tinned Brass
7	Thermalfilm I Insulator

NOTE: Clearance hole in chassis or heatsink must clear .200"(5.08) maximum shoulder O. D. (Part #5 above)

4810 for TO-66

- Same parts as 4801 except insulator for TO-66. 4-40 screws.

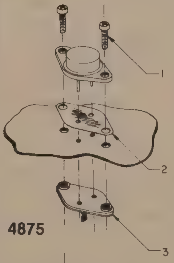


4860

4860 for DO-4 CASE

Item	Description
1	Nut 10-32, Stainless Steel
2	Flatwasher, Stainless Steel
3	Bushing, Teflon
4	Locking Terminal, Stainless Steel
5	Thermalfilm I Insulator

Mounting Kits with Sockets



4875

4875 for TO-3 CASE

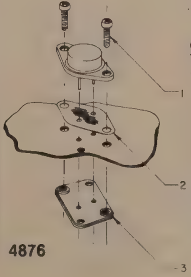
Item	Description
1	6-20 Screws
2	Thermalfilm I Insulator
3	Diamond Shaped Socket

NOTE: Clearance holes for socket shoulder insulator. .205(5.21)

4876 for TO-3 CASE

Item	Description
1	6-20 Screws
2	Thermalfilm I Insulator
3	Square Socket

NOTE: Clearance holes for socket shoulder insulator. .221(5.61)



4876

CONSIDER
THESE ADVANTAGES:

- Simplifies semiconductor mounting.
- Pre-packaged in heat sealed plastic bags for easy use by individual or assembly line.
- Repairs made more economical.
- Stock mounting hardware using one number for better control and identification. Your part number can be printed on plastic bag if requested.

Mounting Pads

- Prevent heat damage during soldering
- Facilitate board clean up
- Prevent solder bridges
- Assure uniform device height
- Simplify board repair

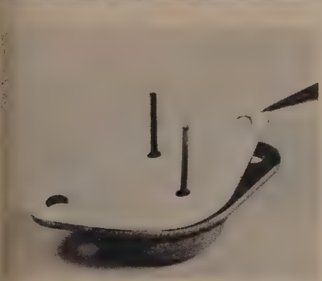
INSULATORS FOR SEMICONDUCTOR DEVICES

Thermalloy, Inc.
Post Office Box 34829 • 2021 West Valley View Lane
Dallas Tex 75234 • (214) 243-4321 • TWX 910-860 5542
NUMBER ONE IN SEMICONDUCTOR ACCESSORIES

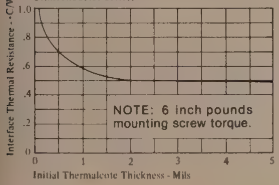
Insul-cote



- Pre-coated insulators for fast installation.
- Saves money by elimination of hand application of thermal grease.
- Provides uniform coating for maximum heat transfer (one mil minimum).

INSUL-COTE consists of a reliable THERMALFILM, Mica or other insulator PRE-COATED with Thermalcote thermal grease, neatly packaged and heat sealed as necessary between two strips of 2¾" wide tape. One side of the tape is separated into pull tabs for easy opening, or the tape may be "peeled" lengthwise exposing the Insulators.

Interface Thermal Resistance versus average initial Thermalcote thickness for a TO-3 Semiconductor device.



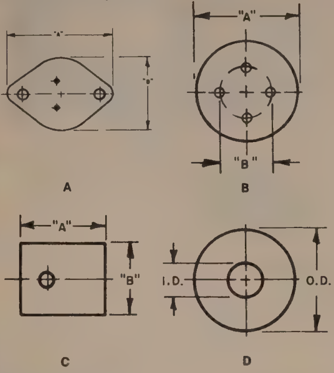
HOW TO ORDER

A partial listing of Insul-cote Insulators is shown below. Please consult Thermalloy, Inc.'s insulator listing for insulator descriptions. The insulator part number is denoted by the 5 or 6 digits of the insul-cote part number. AP denotes "Ammo Pack".

Insul-Cote with Thermalfilm I		Insul-Cote with .002" Mica
43-03-1 AP	43-03-4 AP	56-03-2AP
43-03-2 AP	43-66-1 AP	56-66-2 AP
43-03-3 AP	43-66-2 AP	56-77-2 AP
	43-77-2 AP	

- For individual packets, mica insulators or other INSUL-COTE pre-coated insulators or production dispenser, consult factory.

Insulator Shapes



Thermalfilm

Thermalfilm I plastic film insulators are .002"(.051mm) thick and will not crack, peel, chip or fracture. 5400 volts/mil. -260°C to +400°C. Amber color. Thermalfilm II plastic film insulators have the same attractive qualities except are limited to device temperatures of 125°C. Green color.

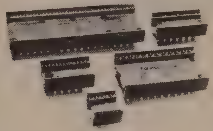
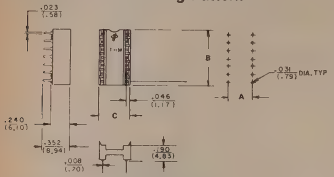
NUMBER ONE IN SEMICONDUCTOR ACCESSORIES

8204 Series — Low Profile DIP Sockets. 8, 14, 16, 24, 40 Pin.



- Phosphor Bronze pre-tinned contacts
- Anti-solder wicking design
- High contact force for electrical integrity
- Maximum packaging density
- Stand-off projections allow easy rinsing
- Accept full range of IC pin sizes
- Wide angle lead-in for easy IC insertion
- Visual marking assures proper insertion

Dimensions and Drilling Pattern



TOLERANCE $\frac{.xxx}{(.xx)} = \frac{\pm .005''}{(\pm .13mm)}$

Part Numbers and Dimensions

Part Number	No. Pins	A	B	C

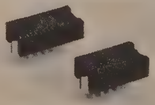
MATERIALS AND SPECIFICATIONS

Body	Glass filled Nylon
Contacts	PhBr - Tin/Lead pre-plate
Contact Resistance	30 milliohms
Interlead Capacitance	1.0 picofarad
Maximum Current	1.5 amperes/contact
Voltage Breakdown	1000 volts minimum
Temperature Range	-55°C to +105°C

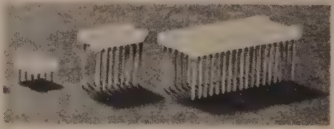
8200 Series — DIP Sockets.



- Same quality features and dimensions as 8204 Series except .240"(6.09) IC base above PC Board.

Part Number	No. Pins	Contact Material	Length
8200 NF 414	14	Ph Br	.700(17.78)
8200 NF 416	16	Ph Br	.800(20.32)

8201 Series — High Rel Low Profile DIP Sockets



- Recessed body for easy IC Removal
- Machined Be Cu Contact Springs for low contact resistance and good device retention
- Closed contact cup precludes solder wicking

Dimensions and Drilling Pattern

-1 suffix denotes solder tail. -3 denotes W. W. post. P C contact sockets (-1) also available with Gold plated sleeve. (Part #8201 WE 3xx-1.)

INSULATOR — Glass filled nylon (105°C Maximum operating temp.)
CONTACT — Beryllium Copper, gold over nickel plated
SLEEVE — Brass

8113 Series Molded TO-3 Socket

- 5 Amperes continous, 15 peak.
- 6-32 threads in mounting plate.
- For heat sinks to ¼" thick. Length 1 9/16 (39.69). Width 11/16 (17.46). Phenolic body. Cad plated. Ph Br Contacts.

Part # 8113 PF 603

8120 Series — Fluorocarbon TO-5 Sockets.

Style 1 Style 2

- for TO-5 package size.
- Gold plated Be Cu contacts.

EBR EPOXY BRIDGE RECTIFIERS

- **Controlled Avalanche series has 250V, 450V, 650V and 850V minimum avalanche voltages (V_{BR})**
- **Non-controlled Avalanche series with 50V, 100V, 200V, 400V, 600V and 800V, and 1000 (V_{RRM})**
- **Fast recovery series with 200 nanosec. max. reverse recovery (t_{rr}).**

The EBR bridge rectifiers combine economical cost, high reliability and circuit-to-case electrical isolation. They are available in a wide range of current and voltage ratings.

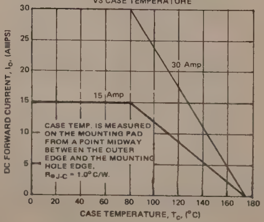
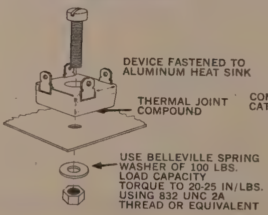
DC FORWARD CURRENT VS CASE TEMPERATURE



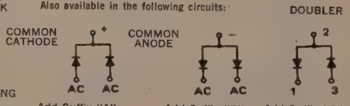
DC Forward Current at T_A=40°C and no heat sink=5 Amps.

TYPICAL MOUNTING



DEVICE FASTENED TO ALUMINUM HEAT SINK
THERMAL JOINT COMPOUND
USE BELLEVILLE SPRING WASHER OF 100 LBS. LOAD CAPACITY TORQUE TO 20-25 IN/LBS. USING 832 UNC 2A THREAD OR EQUIVALENT

Also available in the following circuits:

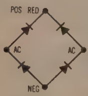


Add Suffix "A" to Part No.

Add Suffix "B" to Part No.

Add Suffix "C" to Part No.

IBR®



SILICON AVALANCHE INTEGRATED BRIDGE RECTIFIERS

10 AMP & 25 AMP SINGLE PHASE, FULL WAVE

- Operation to full rated load at 100°C, T_C
- 250V, 450V, 650V & 850V minimum avalanche voltages (V_{BR})
- Fast recovery series with 200 nanosec recovery time (t_{rr})
- 2000 V minimum circuit-to-case isolation.

The IBR offers full wave rectification in a rigidly constructed, hermetically sealed, welded package. The controlled avalanche characteristics permit the use of lower PRV safety factors for junction protection from transient over voltages. Proper heat sinking allows great flexibility in DC output current ranges.

These characteristics plus the electrically isolated case allows the IBR to be used in applications where space, current and cost requirements have previously not allowed the use of semiconductors.

Three mounting options available, press-fit, stud mount, TO-3 outline flange.

SCHOTTKY BARRIER RECTIFIERS
1 Amp, 3 Amp, 5 Amp and 15 Amp

- 20V and 30V (V_{RRM})
- Extremely fast recovery
- Very low forward voltage drop

With very low forward voltage drop and fast switching time, this family of Schottky rectifiers are ideally suited for application in low voltage computer power supplies, free-wheeling diode applications, flyback diode applications and polarity protection in high speed switching circuits.

SCHOTTKY BARRIER RECTIFIERS

1 Amp, 3 Amp, 5 Amp and 15 Amp

The current flow in a Schottky barrier rectifier is due to majority carrier conduction and is not affected by reverse recovery transients due to stored charge and minority carrier injection as in conventional PN diodes.

The Schottky barrier rectifier may be considered for purposes of circuit analysis, as an ideal diode in parallel with a variable capacitance equal in value to the junction capacitance.

VCB CONTROLLED BRIDGES AND POWER SWITCHES

Available in single and three phase with 60V, 120V, and 230V AC input. Typical applications: DC motor speed control, battery chargers, inverters, solid state relays, light and temperature controls, frequency changers, servo systems, and electric brakes. The barrier pack terminals are isolated by an epoxy barrier strip — eliminating ribbing and waffling which can become clogged with dirt and grease.

HIGH VOLTAGE DIFFUSED SILICON RECTIFIERS

VA

VB, 1N4441

VG

Varo high voltage and high voltage fast recovery time diffused silicon rectifiers are designed for industrial and commercial applications that require high reliability at an economical cost.

These rectifiers offer high voltage ranges in minimum-sized, epoxy-encapsulated packages with low leakage current. All ratings are obtained without the use of special heat sinks or mounting techniques (except VC Series).

They are designed to withstand 500 G's shock and vibration of 100 Hz with a peak acceleration of 10 G's.

Applications: television receivers, electrostatic power supplies, electrostatic copiers, electrostatic air filters and precipitators, cathode ray tube power supplies, transmitters, and microwave ovens.

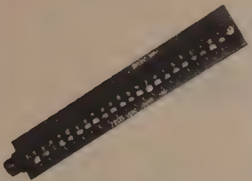
HIGH VOLTAGE RECTIFIERS FOR X-RAY APPARATUS



The required peak reverse voltage determines the number of individual diode packages used in series for the completed, unencapsulated rectifier. Each diode package contains a stack of controlled avalanche chips. In order to achieve the rated voltage and current, the diodes should be submerged in Shell Diala Oil AX electrical insulating oil or equivalent. The diodes used, Varo type H463 may be purchased separately.

SAVE IN DESIGN, TESTING AND ASSEMBLY TIME —
USE PRE-DESIGNED AND PREPACKAGED . . .

2 THRU 25 AMPS MODULAR FULL WAVE RECTIFIER ASSEMBLIES

- Save in assembly time since one assembly replaces 4 rectifiers.
- Save in board space by using Westinghouse Modular pre-packaged circuits.
- Reduce soldering time with silver plated copper leads on MB11 designs.
- Save on assembly costs because Modular Assemblies are electrically insulated, and no insulating material is needed.
- Other features include a wide voltage range availability (up to 1000V), high surge currents, low leakage, and good availability.

NOTE: Fast-recovery inverter types available — see inverter section, Page 16. Reverse polarity devices available for all products shown — for ordering information, see next page.

- Minimize over-rating costs with the wide range of selection of devices, Current (up to 70 A) Voltage (up to 1000V). Complete Alphanumeric listing page 2.
- Reduce transient protection costs due to Westinghouse "soft recovery" characteristics.
- Westinghouse color-coded seals indicate polarity, and help prevent production and inventory mishandling.

Westinghouse

phase control/standard applications stud mount rectifiers — 100 thru 550 amp and scr's (JEDEC) — 16 thru 470 amp

REVERSE POLARITY DEVICES

To specify and order reverse polarity stud diodes, follow these steps:

A. JEDEC Devices — Add suffix "R" to device.
B. Westinghouse Numbers — Increase the **fourth digit** (the third number) by "1."
Example: Forward Polarity R7001603
Reverse Polarity R7011603
C. Complete Alpha-Numeric Listing on Page 2

Westinghouse

phase control/standard applications stud mount scr's — 16 thru 550 amp

- Reduce thermal failure rate in cyclic applications with Westinghouse Compression Bonded Encapsulation.
- Reduce the cost and complexity of your firing circuit package with the soft-fire" capability of di/namic Gate design.
- Insure uniform, repeatable electrical characteristics with the all-diffused fusion design.
- Reduce device costs by tight design specifications since all Westinghouse SCR's are 100% tested, twice, during manufacture.

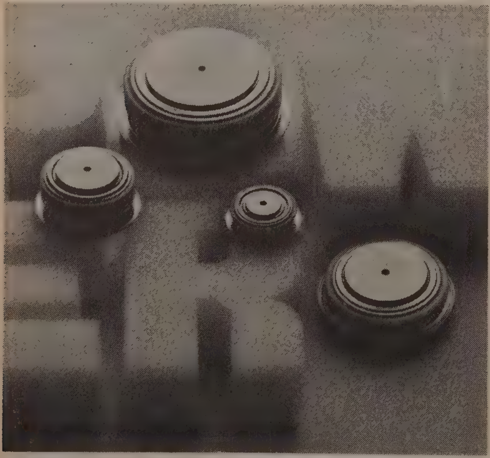
Technical Data (Pg. 25)	← D-8 →										



- Minimize surge failures and the number of devices used due to the high surge capacity available (up to 30,000A).
- Reduce transient protection costs with Westinghouse "soft recovery" characteristics.
- Decrease over-rating costs and minimize series-ing devices due to the high voltage (up to 3000V) and high current (up to 2400A) capability available.
- Pow-R-Disc Rectifiers are available in factory assembled and tested heat sink assemblies from Westinghouse.

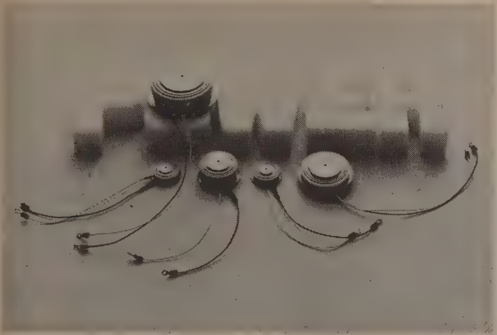
THE WESTINGHOUSE DESIGNER'S DIRECT READ-OUT NUMBERING SYSTEM BENEFITS YOU

The device number is its rating! Why memorize many sets of numbers and ratings?

Rectifier example: R6201230 **R** = rectifier **620** = basic 23mm element Pow-R-Disc package **12** = 1200 Volts PRV **30** = 300 Amps

Westinghouse

phase control applications
pow-r-disc scr's — 200 thru 1570 amp



- Reduce thermal failure rate — Compression Bonded Encapsulation construction reduces thermal fatigue in cycling applications.
- Reduce firing circuit Package costs due to the "soft firing" characteristics of the di/namic Gate design.
- Save by using tighter design specifications since Westinghouse SCR's are 100% tested, twice, during manufacture.

FOR HIGH-FREQUENCY, INVERTER TYPE APPLICATIONS, USE WESTINGHOUSE DI/NAMIC GATE SCR'S. SEE PAGE 17 THRU 19.

Westinghouse

standard applications/rectifier, half, full control pre-designed, stud mount assemblies

THESE STANDARD "CUSTOM" ASSEMBLIES UTILIZE QUALITY WESTINGHOUSE STUD MOUNT DEVICES

GOLD LINE ASSEMBLIES

12 to 1670 Amps

100 - 2,000 Volts

GAIN VALUABLE DESIGN TIME FOR OTHER SEGMENTS OF YOUR EQUIPMENT AND SAVE INDIVIDUAL DEVICE AND HARDWARE PROCUREMENT COSTS AS WELL AS MULTIPLE INCOMING INSPECTIONS AND HANDLING COSTS.

ENGINEER YOUR DESIGN AROUND THESE BASIC CIRCUIT "BUILDING BLOCKS" FROM WESTINGHOUSE. THESE GOLD-LINE ASSEMBLIES ARE THE RESULT OF THOUSANDS OF DESIGN HOURS AND HAVE MILLIONS OF PROVEN OPERATING HOURS "IN THE FIELD."

THE POWER PATHWAYS:

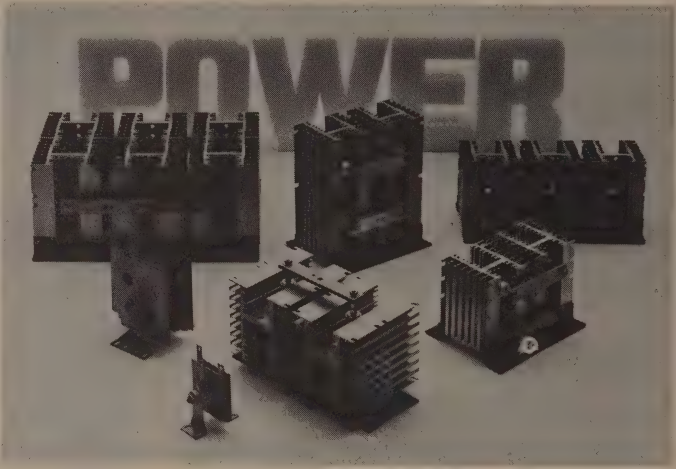
ENGINEERING — Save time in design of your circuit and device selection by choosing one of 2,000 pre-tested assemblies from Westinghouse.

Engineer in increased productivity for your production line — buy the complete assembly.

PURCHASING — Save delivery time while reducing purchasing requirements from up to 26 components down to one.

Speed delivery to your production floor by reducing incoming inspection by the same ratio.

WESTINGHOUSE AIR- AND WATER-COOLED POW-R-DISC ASSEMBLIES HAVE EVEN GREATER CURRENT HANDLING CAPABILITY — SEE PAGE 15.



APPROXIMATELY 2,000 "STANDARD" ASSEMBLIES ARE AVAILABLE FROM WESTINGHOUSE SEMICONDUCTOR, THEREFORE, ONLY THE BASIC CAPABILITIES ARE SHOWN BELOW.

CIRCUIT CONFIGURATION	AVAILABLE CURRENT RANGE Output Current (40°C)	
	Natural Convection	1,000 LFM
Rectifier Control		
Single Rectifier	12-190	22-300
Doubler	12-190	20-300
Center Tap	26-380	45-610
Single Phase Bridge	26-380	45-610
Three Phase Bridge	35-520	61-830
Six Phase Star	114-850	195-1360
Three Phase Wye (with interphase transformer)	140-1040	240-1670
Half Control		
Doubler	12-77	19-140
Single Phase AC Switch	28-180	46-320
Single Phase Bridge	26-161	41-290
Three Phase Bridge	37-232	58-420
Three Phase AC Switch	28-180	46-320
Full Control		
Single SCR	17-98	22-150
Doubler	15-95	20-150
Single Phase AC Switch	34-222	49-340
Single Phase Bridge	34-196	44-310
Three Phase Bridge	45-285	60-440
Three Phase AC Switch	34-222	49-340

For complete application and rating information, send for Westinghouse 36-page Catalog 54-300 by checking Data Ref. D-6 on the Data Request Form on Page 25.

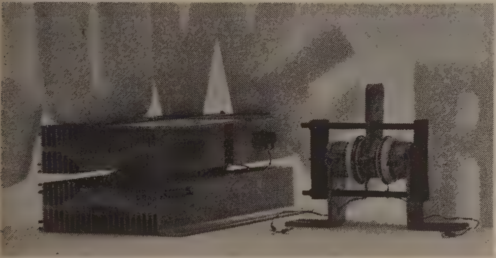
Westinghouse

rectifier and full control pow-r-disc assemblies air and water cooled/custom designed

WESTINGHOUSE POW-R-DISC ASSEMBLIES

- 147-7350 AMPERES
- 100-3000 VOLTS
- WATER AND AIR COOLING AVAILABLE

Higher current and voltage ratings are available by paralleling and seriesing modules. Other circuit configurations are also available on request.



QUALITY WESTINGHOUSE POW-R-DISC DEVICES UTILIZED EXCLUSIVELY

FEATURING:

AIR COOLED

- Aluminum Extrusion Patterns optimized for Forced Air Cooling

WATER COOLED

- Solid Cast Copper Sinks
- R-C Tabs Optional

MORE DATA ON ALL POW-R-DISC ASSEMBLIES — DATA REF. D-10, PAGE 25.

THE RATINGS — MODULAR DESIGN

Save valuable design time and source selection time by using these standard units or request additional design help by completing and mailing the data on the "Assembly Requirements" section of the Data/Action Card on Page 25.

THE COOLING METHOD

You achieve total design approach flexibility since Westinghouse can supply the finest quality heat-sink components, assembled, tested and ready for your application, for both air-cooled and water-cooled requirements.

	Output Current (Ave. Amps)

ORDERING INFORMATION
FAST RECOVERY STUD MOUNT OR POW-R-DISC RECTIFIERS

Procedure

The Westinghouse descriptive numbering system allows you to specify the Stud Mount or Pow-R-Disc Rectifier you want.

From each product chart determine the device and current you need and turn-off capability.

Pick the voltage code you need from the shaded column in the chart, right, and the recovery time code from that shaded column.

Insert these codes in the corresponding shaded areas in the product charts and you have completely specified your device.

Type	Voltage		Current		Recovery Time	
Code	V_{RRM} (V)	Code	I_F(av)(A)	Code	trr μsec	Code
R502 (Standard Polarity)	100	01	80	08	1.5	F J
	200	02				
	300	03	100	10	2.0	E J
R503 (Reverse Polarity)	400	04				
	500	05			3.0	C J
	600	06				
	700	07				
	800	08				
R602 (Standard Polarity)	900	09	200	20	1.5	F J
	1000	10				
R603 (Reverse Polarity)	1100	11	250	25	2.0	E J
	1200	12				
	1400	14			3.0	C J
	1600	16				

Example: You need a 100 Amp, 1000 Volt fast-recovery rectifier with a recovery time of 2.0 μsec. The device best suited for a 100 Amp need is the type R502....10..... The voltage code for 1000 Volts (V_{RRM}) is "10" and for a recovery item of 2.0 μsec is "EJ." Your device is R5021010EJ.

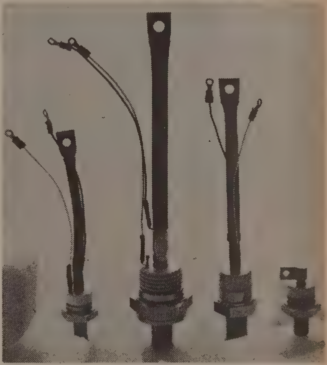
- Reduce the cost of protective circuitry and increase efficiency due to high di/dt and surge capability.
- The cost of proper device selection in the "prototype" stage can be reduced by using the Westinghouse Application Simulator in conjunction with Westinghouse Pulse Rating Data and engineering assistance.
- The costs and complexity of "firing packages" can be reduced due to the "soft fire" characteristic of Westinghouse di/namic Gate Design SCR's.
- You insure that all devices you specify and purchase have electrical repeatability because of the "all-diffused" fusion process.



ORDERING INFORMATION FOR INVERTER SCR'S

Select the proper device for your current requirements from the product charts and determine voltage/turn-off matches. Select the appropriate voltage code and turn-off code from the charts below, and insert them in the corresponding shaded area in the product charts. You have completely specified your device.

Voltage

- T62J Fast-Switching High Frequency SCR's incorporate a new innovation in thyristor date design, the di/namic sno-Flake Design.

It features capabilities best for:

- Low duty cycle operation (peak efficiency with pulse width less than 70 µsec).
- Lower watt/sec per pulse

- T72H Fast-Switching High Frequency SCR's use a new gate design — the di/namic Dual-Ring Gate.
- This "inside-outside" design gives improved turn-on characteristics without major sacrifice to average current rating; Reduce power loss in "snubber" circuit; Optimized efficiency for PWM commutation thyristor.

NOTE: For **standard** and **phase control** applications, use Westinghouse standard and phase control Pow-R-Disc thyristors found on page 11.
The comparable rectifiers are on page 10.

Westinghouse

linear, switching, amplification applications single diffused and alloy npn transistors

DIFFUSED PROCESS TRANSISTORS

- High power handling capability (up to 150 watts)
- Plated steel cases for ruggedness and reliability
- 100% power tested
- Wide range of gain and voltage ratings available

Westinghouse uses a medium speed process to produce transistors for linear and switching applications. These devices have been used extensively in voltage regulators, inverters, and amplifiers because of their economy and power capability.

The Westinghouse Lifetime Guarantee is available on all JEDEC types in this family.

ALLOY PROCESS TRANSISTOR

- Up to 75% more Safe Operating Area (SOA) than other devices
- Increased thermal cycling endurance
- Darlingtons ($h_{FE} = 100$ @ 10 Amperes) available
- Power dissipation capability up to 200 watts @ 75°C

The Westinghouse alloy transistor has been the preferred power device on defense, aerospace, and critical industrial projects since 1960. Its freedom from secondary breakdown (over most of its voltage range) and its ability to resist thermal fatigue make it one of the most reliable semiconductors available today. Every device in this series features a copper stud and a molybdenum "hard solder" wafer attachment system for optimum power dissipation and thermal cycling ability. Each device is 100% power tested and the JEDEC types are available with the Westinghouse Lifetime Guarantee.

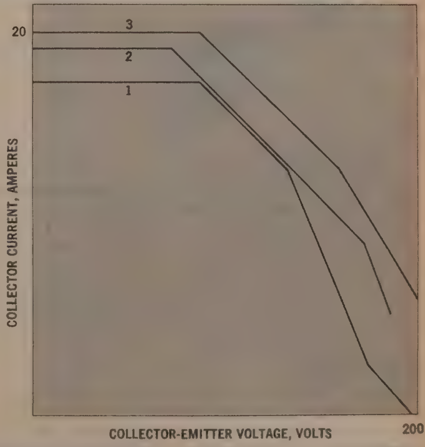
SAFE OPERATING AREA COMPARISON

Westinghouse alloy process transistors feature an extensive Safe Operating Area (SOA). This power handling capability means that the circuit designer's job can be simplified in the areas of heat sink design, transient and over-current protection, and safety margin. Both Westinghouse alloy and single diffused types are more tolerant of high voltage and current conditions than the so-called "high speed" types of devices. In many inverter, regulator, and amplifier circuits this can mean a savings in heat sink size, protective devices, or elimination of paralleling transistors.

Maximum D.C. Operating Areas @ Case Temperature T_C = 75°C

1. "High Speed" Transistors
2. Single Diffused Transistor
3. Westinghouse Alloy Transistor



BULOVA®

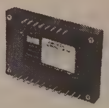
D.C. Servo Amplifiers

25 TO 1000 WATTS

Here's a complete, versatile line of DC Servo Amplifiers with the inherent quality of a Bulova product and value engineered for low cost. Specially designed to meet the many diverse requirements of today's control systems, the units are small in size and provide a large power to volume ratio.

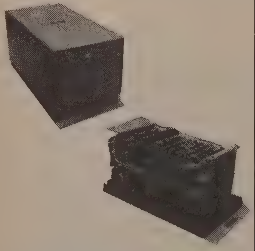
From configuration to current/voltage/power ratings, these Bulova DC Amps provide a full measure of flexibility to make the circuit and systems designer's job easier. Simple tradeoffs are built into the design parameters to permit operation in various modes and gains.

TYPICAL CONFIGURATIONS



DCA 25/60
DCA 50/60

Models DCA 200 & 300



Models DCA 1000 to DCA 2500

SPECIFICATIONS (Nominal @ 25°C)	DCA 25	DCA 25/60	DCA 50/60
OUTPUT (at nominal power supply voltage)			
Voltage, peak (Volts)	±20	±50	±50
Current, continuous (Amperes)	±1.25	±0.5	±1

Operating Temp. Range (°C)	−55 to +125 (5)	−55 to +125 (5)	−55 to +125 (5)

(1) Internally mounted pot adjustable
(2) For detailed electrical parameters see individual data sheet
(3) Internally mounted pot null adjust
(4) Referred to input
(5) Mounting base temperature
(6) Ambient temperature
(7) Not Available
(8) Not Required

Bulova DC Servo Amplifiers are designed to drive–

- DC Torque Motors
- Deflection Coils
- Servo Valves
- DC Servo Motors
- Low Inertia Motors

To meet the application requirements of

- NC Systems
- Instrument Systems
- Tape Drives
- Production Test Stands
- Camera Drives
- Rate Tables

FEATURES

- Adjustable Gain–For optimum servo accuracy and stability
- Current Limiting–To maintain at acceptable levels during motor plugging
- Voltage or Current Feedback–For speed or torque control
- Wide Bandwidth–For fast response and loop stability
- Power Sharing–For maximum utilization of power transistors
- Short Circuit Protection–To prevent accidental shorts or motor plug

Notes

1. The above chart represents standard preferred types of servo amplifiers. Bulova's quick-reaction capability in custom designing to specifications at minimum cost enables you to request variations at costs which are not prohibitive.

2. Unless otherwise stated, all amplifiers listed have isolated DC and signal grounds. An external common between these two points is required for proper operation.

3. All gains are listed as maximum and all input impedances minimum. An external resistor in series with the input terminal will reduce the gain if required and will also allow higher maximum input signal level.

The value of this resistor may be calculated by use of the approximate equation:

$$\text{Required Gain} = \frac{(\text{maximum gain from chart}) \quad (\text{input impedance})}{(\text{input impedance}) + (\text{external series resistor})}$$

4. Tuning of all loads is required for proper operation of the amplifiers, except where single ended untuned load is called out. This is accomplished by use of a capacitor across the output terminals or by split tuning (two capacitors) each having a capacitance twice that recommended by the motor manufacturer and positioned between the amplifier output terminals and either B+ or B− ... NOT ACROSS THE MOTOR. The split tuning has an additional advantage acting as a transient suppression network. In addition, smaller tantalytic capacitors may be used (using correct polarity).

SERVO ELECTRONICS • INDICATORS • SPECIAL SYSTEMS • ACTUATORS

- Units available which will meet applicable MIL Specifications
- Devices designed to operate with A.C., D.C., synchro or resolver command signals.
- All units feature self-contained transistorized high reliability electronics and power supplies.
- Units now in use on numerous systems involving:

Simulators	Ground Support	Aircraft instrumentation
Fire Control	Missile Tracking	Missile instrumentation
ASW	High Accuracy Positioning	Stable Platforms

- Special systems can be designed in accordance to your detailed specifications. CTC will also design "Interface" equipment to integrate major control systems.

Although CTC is best known for its system engineering, a most significant part of the company is in the field of CUSTOMIZING of electronics and electromechanical assemblies for control systems applications. By using the off-the-shelf modules shown in this short form catalogue, we can accomplish such MODIFICATIONS in a short time and in most cases without extra cost.

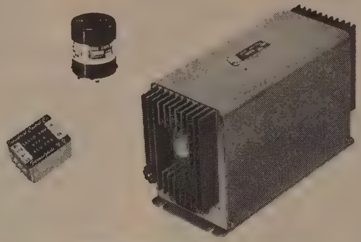
SERVO COMPONENTS

INSTRUMENTS, AMPLIFIERS and ACCESSORIES

FOR MILITARY AND INDUSTRIAL CONTROL SYSTEMS

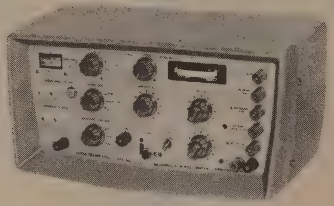
SERVO AMPLIFIERS

- *DC, pot and synchro inputs*
- *60 and 400∼ outputs*
- *Hybrid 972A (.5 cu in, 9 watts) to Triac 893A (800 watts)*
- *160 different models*



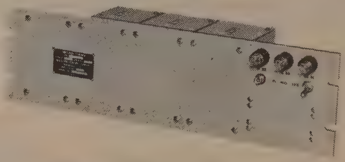
SERVO TESTERS

- *100C, general purpose use*
- *103A, prod and field test*
- *Frequency and transient response*
- *For DC and AC servos*



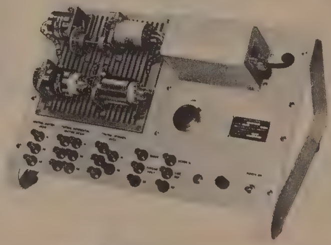
SYNCHRO AMPLIFIERS

- *929R, 90V./line, 400∼ stators*
- *820A, 90V./line, 60∼ stators*
- *Buffer CX's from CT and TR loads*
- *High accuracy and fast response*



SERVO DEMONSTRATORS

- *Laboratory experiments*
- *Industrial training*
- *Synchro and pot data*
- *60 and 400∼ models.*



SYNCHRO DIRECTORS

- *Generate 1 and 36 speed stator voltages*
- *Constant velocity and harmonic motion modes*
- *Computer programmed*
- *60 and 400∼ stator outputs.*

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

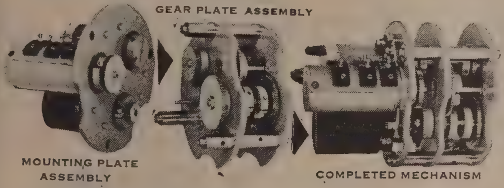
PMC SERVO MECHANISMS & COMPONENTS

PREDESIGNED MECHANISMS

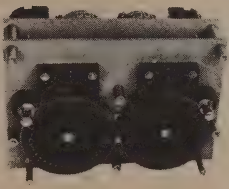
A complete line of off-the-shelf components for assembling an unlimited variety of geared mechanisms. Gear ratios to 78,125:1, zero-backlash spring-loaded gears and torque-limiting slip clutches are featured. Assembled units meet design and materials requirements of MIL-E-5400 and MIL-E-16400.

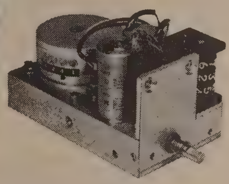


For complete data and catalog of stocked components, request Bulletin 102.

CUSTOM DESIGNS

PMC specializes in design and manufacture servo mechanisms and mechanical modules to user requirements for airborne, ground support, communications, fire control and other critical applications. The units shown below are typical of the mechanisms designed and manufactured for military and industrial equipments.

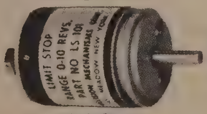




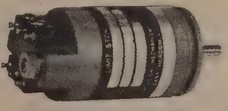
Short lead time delivery on both prototypes and production quantities.

ADJUSTABLE LIMIT SWITCHES & STOPS

0-10, -20, -40 revolutions without snap action switch, 0-25 revolutions with snap action switches actuated just before mechanical stops. All models infinitely adjustable with single external screw. SPDT snap action switch rated 7A, 250V.



Limit Stop
Series LS 100
⅝ and ⅞" dia.



Limit Stop And Switch
Series LS 300
$^{15}/_{16}$" dia.

For complete data, request Bulletins 103 and 104

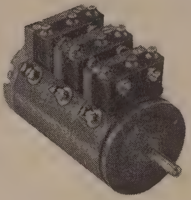
CAM SWITCHES

Adjustable-In-Motion

PMC's patented cam switch design incorporates in a single component all the functions of a conventional plate cam, cam follower and snap-action switch, eliminating the need for separately-mounted cam mechanisms and switches and their associated hardware. Externally-adjustable dwell angles can be set to any position with respect to the shaft. All models available as single- or multi-switch types, with ganged switches independently adjustable.

Model CS 402 Miniature Cam Switches

Miniature units designed and manufactured to military and aerospace specifications.



Diameter: 1-1/16", equivalent to to BuOrd Size 11
Length: 0.8", one switch, plus 0.5" per switch
Dwell Angle: 3° to 357°
Switch: SPDT
Rating: 5A, 250VAC, 30VDC
Multi-Switch Models: up to 10 switches
Shaft: 0.125" dia.

For complete data, request Bulletin 106

Model CS 601 Subminiature Cam Switches

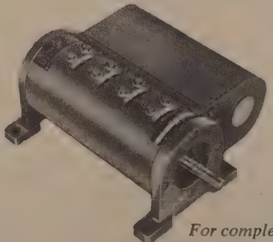
Subminiature units for airborne, space vehicle and other applications where size and weight are critical.

Diameter: 0.75", equivalent to BuOrd Size 8
Length: 0.730" one switch, plus 0.437" per switch
Dwell Angle: 3° to 357°
Switch: SPDT
Rating: 7A, 250VAC, 30VDC
Shaft: 0.125" dia.
Multi-Switch Models: up to 8 switches

For complete data, request Bulletin 109

Model CS 501 High-Power Cam Switches

Industrial types for control, cycling and sequencing of machine operations. End- or side-mounting, with or without switch covers. Dials permit visual adjustment of switching points and dwell angles.



Dwell Angle: 5° to 355°
Diameter: 3.5"
Length: 3" one switch, plus 1.5" per switch
Shaft: 0.5" dia.
Switches: SPDT, DPDT. Special types to requirements.
Ratings: to 25A and 600 V, inrush current to 75A.

For complete data, request Bulletin 108

VERNITRON

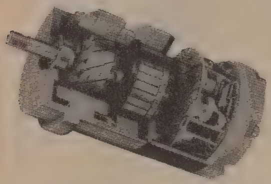
Torqsyn® REMOTE POSITIONERS & ELECTROMECHANICAL ASSEMBLIES

The Torqsyn Remote Positioner is a complete gearless servo system in one small package. It is an integrated system that combines a synchro transformer, torque motor, amplifier, stabilization network in a single package. The Torqsyn thus can simplify design, procurement, assembly and maintenance, and improve reliability.

Torqsyn converts input synchro data into accurate shaft position. High input impedance allows it to be driven by low power signal sources. The Torqsyn Remote Positioner may be used to drive potentiometers, encoders, resolvers, indicators, etc. Size 11, 23 and 37 housings are available.

Complete subsystems and assemblies incorporating Torqsyn units can be designed and or produced to requirements. These include synchro signal amplifiers, synchro signal position-indicators and error detectors. In most cases, these subsystem packages are more compact and reliable than conventional systems.



Typical Torqsyn Performance Characteristics @ 25° C

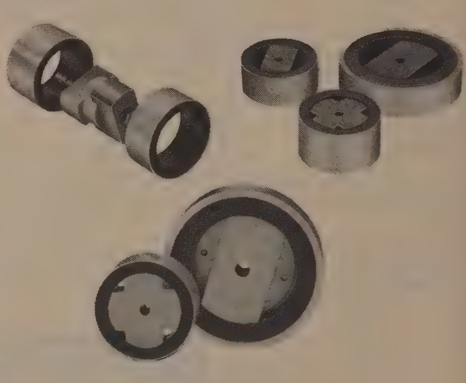
† 45VDC @ 1.5 amps max. external power required.

Vernitorq® BRUSHLESS DC LIMITED ROTATION TORQUE MOTORS



These versatile, wide angle, two and four-pole motors combine accuracy, quality and economy for positioning, drive, actuation or tensioning systems.

Their high torque to power ratio and rapid acceleration at slow speeds allows direct coupling without gears, with resulting smooth, quiet, reliable operation and compact packaging.

Brushless design of VERNITORQ motors provides infinite resolution, high linearity and sensitivity. Ripple slot-lock effect, electrical/mechanical noise and wear are eliminated.

Many models are available with peak torque ratings from 2 to 500 oz-in. Typical angular excursions are approximately 50 degrees for four-pole designs and 120 degrees for two-pole designs.

Space saving pancake units are only 1.7 to 5.2 inches in diameter. Housed versions also are available. Special designs to individual requirements can be provided.

Brushless AC tachs are also available in these same sizes.

VERNITRON SYNCHROS, RESOLVERS AND SELSYNS

Mil-Spec designs housed in all standard and existing frame sizes, plus Selsyn replacement type units are available with accuracies down to 20 seconds on housed synchros and resolvers. Additional features include temperature compensation, varying voltage, frequency and impedance levels.

Pancake synchros and resolvers are available in single speed, multi-speed (2X to 72X), and dual or triple combinations of speeds. Single speed units have accuracies to 10 seconds, multi-speed units have accuracies to 3 seconds.

MOST RELIABLE

The ALCOSWITCHES listed in these two pages offer the most-asked-for premium features as standard, with no hidden costs! Use this quick and easy reference guide to compare the various series and select the switch most suitable for your applications.

Three outstanding features must be emphasized because they solve industry's recurrent problems, namely: (1) Contact contamination from solder flux, dust and cleaning agents, now totally eliminated through Alco's exclusive "molded-in" terminal construction. (2) These switches are designed to be compatible with today's International market needs for high line voltage applications. (3) Oxidation on terminals and contacts is totally inhibited by gold flash for ease in soldering, as well as dependability when switches are used infrequently.

These new series are ideally suited for most applications with high density requirements and where a need exists for high quality and performance. An extremely wide choice of actuator options is offered to satisfy varying cosmetic and tactile requirements in the many segments of the electronics, computer, medical equipment, business machine, communications and production control industries.

ELECTRICAL RATING: MPA-103B & C 1A @ 125 VAC
MPA-103D & F 3A @ 125 VAC
MRC Series 500 ma @ 125 VAC
All Others 6A @ 125 VAC
3A @ 250 VAC

TERMINALS: Exclusive Molded-In terminals, gold flash overall on copper or brass. Featuring a combination "solder/quick connect" with elongated holes accepting two No. 20 AWG wires or Faston® terminals may be utilized for quick disconnect. (® Amp).

CONTACTS: Fine silver clad stationary and moving contacts, with gold.

CASE: Diallyl Phthalate (DAP), green.

TOGGLE LEVER: Chrome-plated brass.

BUSHING: Nickel-plated brass.

ANTI-ROTATION MOUNT: Keyway slot or "D" flat bushing prevents rotation.

MOUNTING HARDWARE: Typically, two nickel-plated brass hex nuts, one nickel-plated brass locking ring and one zinc-plated steel lockwasher provided unassembled in a separate compartment of the switch package.

LEVER/CIRCUIT INTERFACE: All ALCO switches are double throw. The keyway is a helpful guide when switching "momentary" positions. When the lever is thrown, the center terminal is connected to the furthest terminal and vice versa. On three position switches, circuits are "OFF" in the center except for "PA" types which uniquely provide three "ON" positions.

ELECTRICAL AND ENVIRONMENTAL CHARACTERISTICS: Available on request or supplied with switch prints.

This group of ALCOSWITCH rotaries feature an adjustable stop. Terminals are permanently molded into a DAP base to assure that solder flux or other contaminants will not seep into the switching mechanism. Available in 1 through 4 poles with a 36° angle of throw between positions. Adjustable stops are implemented by the position of a supplied stop washer.

Two shaft styles are available. 1/8" diameter x .75 long with standard screw driver slot at the end of the shaft, less knob, or a black phenolic knob with a white hairline indicator. Cylindrical aluminum cases are .610 in diameter. Switch depth behind the panel is .620, less terminals. Contacts are silver. Volume quantity quotations directly from factory.

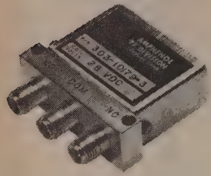
303 Series/High Isolation Miniature & Standard Size Microwave Coaxial Switches



AMPHENOL 303 SERIES
High Isolation Miniature
Fail-Safe 1P2T

Broadband Miniature Switch Series Offering State-of-the-Art Characteristics through 18 GHz

Ideally suited for applications where crosstalk interference must be kept to an absolute minimum, Amphenol's miniature 303 Series provides uniform characteristics through KU band (18 GHz) with isolation of 60 dB minimum, VSWR of 1.5:1 maximum and insertion loss of 0.5 dB maximum. When operating at lower frequencies, isolation can be greater than 90 dB with 0.2 dB insertion loss and VSWR of 1.2:1.

New Amphenol SMA connectors . . . offering significantly better electrical and mechanical performance than competitive designs . . . contribute to the switch's high reliability and fine electrical performance. The miniature 1P2T weight only 2 ozs. and, excluding terminals, is less than 1½ inches high by 1¹¹⁄₃₂ inches wide by ½ inch. In addition to its compact design and reliable RF performance, this switch is capable of operating in environments where temperatures reach 100°C.

Standard Size 303 Series Switches offering High Isolation Qualities through 12.4 GHz

Amphenol's 303 Series of standard size switches is constantly expanding. Cataloged here are a representative collection of the more popular variations. Many combinations of these basic items are available. The ideal switching device tailored for your specific application can be selected from the options described in the table of General Characteristics. This is true of the miniature size 303 Series as well. Whatever combination of specifications you select . . . whether other coil voltage, hermetic sealing, auxiliary contacts, cut-throat latching, etc. . . . the same high isolation and uniform RF performance characteristic of Amphenol's 303 Switch Series will prevail.

COAXIAL SWITCHES

BUNKER RAMO AMPHENOL

MINIform / Sub-Miniature, High Power, Microwave Coaxial Switches

For Applications Requiring Minimum Size, High Power, Minimum Crosstalk and Low Cost

GENERAL CHARACTERISTICS

ELECTRICAL

Frequency Range: 0-6.0 GHz
Connectors: SMA, SUB-Minax 27 Series and Printed Circuit Pins
Switching Time: 15 ms Maximum
Switching Action: Break Before Make
Coil Resistance:
12 VDC Coil: 65 ohms, 28 VDC Coil: 250 ohms
(Also available in other DC coil voltages)
Function: 1P2T Failsafe

ENVIRONMENTAL (per MIL-S-3928B)

Temperature Range: −55°C to 100°C
Moisture Resistance: 10 Day Cycle
Shock: MIL-STD-202D, Method 202C, Test Condition A, 15 G's Peak
Vibration: MIL-STD-202D, Test Condition A, 55 to 2000 Hz at ±10 G's

RF PERFORMANCE (SMA)

VSWR
0-2 GHz: 1.1 max.
2-4 GHz: 1.2 max.
4-6 GHz: 1.3 max.

Isolation
0-1 GHz: >80 dB
1-3 GHz: >70 dB
3-6 GHz: >50 dB

Insertion Loss
0-3 GHz: 0.1 dB max.
3-5 GHz: 0.2 dB max.
5-6 GHz: 0.3 dB max.

RF Power
0.1 GHz: 400 watts
1.0 GHz: 120 watts
3.0 GHz: 70 watts
6.0 GHz: 45 watts

MECHANICAL

Life: 1 million cycles min.
Weight: 1.2 oz.

Amphenol 303 Series MINIform is the industry's most inexpensive miniature high-power, high-performance line of microwave coaxial switches — offering for the first time superior operational performance through six GHz in an economical unit weighing only 1.2 ounces.

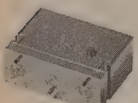
The switches are the smallest and least expensive of this type ever introduced by Amphenol and are designed to outperform all comparable offerings by industry available until now. Displacing less than one-half cubic inch volume, the tiny switches' ratings include performance through 150 watts below specified frequency limitations, offering immediate physical and operational compatibility for a host of signalling, communications and EDP matrix switching applications.

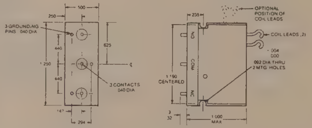
Amphenol 303 Series MINIform switches are 1P2T configurations offered in choice of three popular termination styles: SMA connectors, Amphenol SUB-Minax 27 Series connectors, or printed circuit contacts suitable for solder and solderless wrap board termination. All switches can be provided with coil voltages of 6, 12, 26, 48 and 120 VDC.

Although ideal for typical microwave applications through six GHz where 60 dB isolation is offered by new units, Amphenol's MINIform switches also offer unusually high power handling capabilities for communciations applications for the first time. Through 0 to 1.0 GHz, for example, the MINIform can switch up to 150 watts CW while maintaining maximum VSWR of only 1.1, 0.1 dB insertion loss and 80 dB minimum crosstalk attenuation. Over the range of 1.1 through 3 GHz, VSWR climbs only to 1.2 with power handling capacity of up to 70 watts CW while maintaining 75 dB minimum crosstalk attenuation and 0.1 dB maximum insertion loss.

PRINTED CIRCUIT

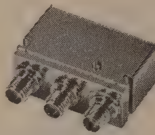
Coil Volts	AMPHENOL Part No.
12 VDC	303-10001-2
28 VDC	303-10001-3

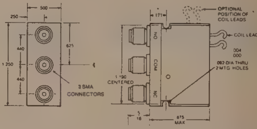




CONNECTORS (SMA shown)

Coil Volts	SMA Conn.	27 Series
12 VDC	303-10002-3	303-10003-2
28 VDC	303-10002-3	303-10003-3





Coaxial Relays

Precision coax units. Maximum time to operate and release is 20 milliseconds. Gold-plated, fine silver contacts assure reliable low-level operation. Minimum life expectancy is 1,000,000 cycles, when switch is operated at speeds of less than 10 Hz. Switches are impedance matched to 50-ohm cable, though loss is negligible with 75-ohm cable. Operation is break-before-make. All materials are corrosion resistant.

Units meet applicable portions of military connector specs as follows: BNC — Mil-C-3608 and N — Mil-C-71.

NOTE: High frequency electrical characteristics are typical values (not maximum) as measured in a 50 ohm circuit and may be used for most design analyses. For more exacting applications, maximum values in the frequency range may be obtained upon request. SWR measured to common with a matched 50 ohm termination. **For additional specifications request Amphenol RF Switches Catalog SS-1.**

Pushbutton Switches/K500 Series

Up to 6PDT — 1 Amp

For chassis or PC board mounting only. No front panel screws. Six PDT silver alloy self-cleaning slide-action contacts. Occupies less than one square inch of panel space. Only 1½" depth behind panel. Long-life special nylon parts used throughout. Pushbutton switches can be furnished with round ⅜" diameter or ¾" square button in white (W), black (BK), red (R), yellow (Y), green (G), or blue (B). Square buttons may be engraved or hot stamped. Illuminated pushbutton switches are available using lamps which are accessible from front. Special unbased lamps in 6, 12, 24 v 1 watt are available all over the world. Prices from $2.30 to $6.00 (1-24 pcs).

SPECIFICATIONS

Contact Rating: 1 amp at 30 vdc or 0.2 amp at 115 vac

Contact Arrangement: Two, four, and six form C contacts

Life Expectancy: 10^6 mechanical; 5 x 10^4 at rated load

Ambient Temperature Range: −20°C to 60°C

Dielectric Strength: Under room conditions, 500v rms

Insulation Resistance: Under room conditions, 10^9 ohms.

Terminals: Solder lugs or PC pins

HOW TO ORDER

Your part number consists of the switch part number, color of button, contact arrangement and PC if printed circuit terminals are desired. Add letters "PC" at end of part number.

For example: to order a pushbutton switch with a push lock, push release function, a non-illuminated square black button, four form C contacts, and printed circuit terminals, the following part number would be used: **K560 BK-4C-PC.**

Note: Solder temperature: Max. 270°C (500°F) Solder time: Max. 5 sec.

PART NUMBERS FOR PUSHBUTTON SWITCHES

Function	Non-Illuminated		Illuminated	
	Round	Square	Round	Square
Momentary	K 500	K 520	K 600	K 620
Push Lock, Push Release	K 540	K 560	K 640	K 660
Push Lock, Reset Solenoid*	K 502	K 522	K 602	K 622

PART NUMBERS

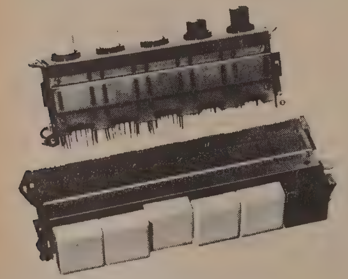
For Incandescent Lamps and Accessories

P/N	Description
2305	6 - 7V, 1W Unbased Lamp
2321	12 - 15V, 1W Unbased Lamp
2341	24 - 30V, 1W Unbased Lamp
LTa110Z1	Lamp Inserter
Z1693	Button Remover

* Standard solenoid is for 24 vac or vdc (200 ohms); other coils can be supplied to special order.

Multiple Switches/T596 Series

Up to 6PDT Per Station — 1 Amp



SERIES T596 MULTIPLE SWITCHES

For front panel, chassis, or PC board mounting using 4-40 screws. Up to 6 PDT silver-nickel self-cleaning slide-action contacts. Occupies less than one square inch of panel space. Only 1½" depth behind panel. Long-life special nylon parts used throughout. Pushbutton switch can be furnished with round ⅜" diameter or square ⅞" x 13/16" with 0.827" center-to-center spacing, in white, black, red, yellow, green, or blue buttons. Square buttons may be engraved or hot stamped. Illuminated pushbutton switches are available using lamps, which are accessible from front. Special unbased lamps in 6, 12, 24 v 1 watt are available all over the world.

SPECIFICATIONS

Contact Rating: 1 Amp at 30 VDC or 0.2 Amp at 115 VAC.

Contact Arrangement: Two, four and six form C contacts.

Life expectancy: 10^5 mechanical; 5 x 10^4 at rated load.

Ambient Temperature Range: −20°C to 60°C.

Dielectric Strength: Under room conditions, 500 v RMS.

Insulation Resistance: Under room conditions, 10^9 ohms.

Terminals: Solder lugs or PC terminals.

SWITCH CHARACTERISTICS

Switch Function	Frame Part Number
Non-lock (momentary) Push lock, push release	T596.10
Interlock	T596.20
Interlock with one non-locking reset button	T596.30

STATION PART NUMBERS

Function	Non-illuminated Round	Non-illuminated Square	Illuminated Round	Illuminated Square
Non-lock (momentary)	500.1	520.1	600.1	620.1
Interlock	500.2	520.2	600.2	620.2
Push lock, push release	540.4	560.4	640.4	660.4
Reset	500.0	520.0	600.0	620.0

FOR EXAMPLE, TO ORDER:

A multiple-station pushbutton switch with: Ten interlock, non-illumnated stations with white round buttons, four form C contacts, and printed circuit terminals, the following part number would be developed: (See example at right)

T 596.20-10 / 500.2 W / 4C / PC

Frame #
Number of stations
Station part #
Color of buttons
Contacts on each station
PC pins

Note: Solder temp.: Max. 270°C (500°F) Solder time: Max. 5 sec.

ARROW HART has been a leading manufacturer of standard and custom designed Specialty Switches for over fifty years.

The Specialty Switch products illustrated and identified on the following pages are currently being produced and shipped in volume to both ARROW-HART authorized distributors for resale and to original equipment manufacturers for use in their products.

These catalog items do not represent all of the switches manufactured by ARROW-HART. They are typical of the products being used in industry at this time.

Many catalog items as shown are available for immediate delivery from our authorized distributors. Others are manufactured on special order only and require manufacturing lead time.

ARROW-HART welcomes inquiries for controls to meet special requirements and will consider the design and tooling of new products where volume warrants.

Contact the nearest ARROW-HART district sales office regarding price, delivery, or any other information required

SNAP-IN MINIATURE ROCKER SWITCHES

- ***Low cost.***
- ***Compact design with popular snap-in fixing.***
- ***Choice of color and termination.***
- ***Complementary indicator lights.***
- ***Slow, make and break action.***
- ***Choice of single pole 1600 Series or double pole 2600 Series.***

Compact design with popular snap-in mounting feature.
UL, CSA, BS and VDE listed, 16 amp 250 VAC. Manufactured to meet specification CEE-24. Other European approvals applied for.

Specifications

Operation: Rocker Lever action, 2 and 3 position, maintained or momentary, with or without illumination.

Function: 1600 Series — single pole, single throw (SPST) and single pole, double throw (SPDT).
2600 Series — double pole, single throw (DPST) and double pole, double throw (DPDT).

Mounting: Snap-in feature (see cutout dimensions).

Termination: Combination Quick Connect, Solder Lug (.250 spade).

Color — lever and base: Standard color stocked presently — Black. Special color base and lever available on special order only.

Insulation Resistance: 50,000 megohms.

Operating Temperature Range: —40° to 55°C.

HOW TO ORDER LIGHTED SWITCHES AND INDICATORS

To the basic catalog numbers, suffix letters and numbers are added to denote color of body and rocker, lamp voltage and termination.

1600 R 2 1 E

BASIC CAT. NO.

Series 1600 — 1 Pole
Series 2600 — 2 Pole
(Indicate actual number for switch circuit required, see Table III)
Series 1609 — Indicator or Dummy Plug

TRANSLUCENT ROCKER/LENS COLORS

A = Amber.
G = Green.
R = Red.
W = White.

BODY COLOR

1 = Black
2 = White
Standard Colors.

3 = Red
4 = Green
5 = Grey
Supplied to special order.

LAMP VOLTAGE

0 = No lamp.
1 = 110V
2 = 240V
Neon.
4 = 6V
5 = 12V
6 = 24V
Filament.

TERMINAL VARIATION

B = Solder lug.
E = Quick Connect (Push-on).

Note: All lamps are assembled integral with the base, except for a switch or indicator with Green translucent rocker/lens. These are fitted with a 110V or 240V fluorescent lamp. These particular lamps are inserted into a tube at the rear of the base.

Other switches with the tube in the base can be supplied to special order to enable lamps to be fitted on site and catalog numbers should be amended to include the letter T, e.g. 1600TR11E.

An all black or all white dummy unit cataloged as 1609DUM11 or 1609DUM22 can be supplied as a blanking plug. Dimensions are as for the 1609 series indicator less terminals.

SPST switches only are built on single pole base. All other circuits are on double pole base.

Arrow Hart

TOGGLE SWITCHES/GENERAL PURPOSE

General purpose toggle switches by Arrow-Hart offer the designer a wide selection of styles, sizes, ratings and termination options. Some of these switches have been the standard of the industry for over 30 years. Proven popularity. Proven dependability. Check, too, the Arrow-Hart Subminiature toggles and Pushbuttons starting on page 9.

CANOPY SERIES

2 POSITION/3 AMP

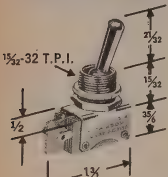

Fig. GT1.

Shown 20994LH.

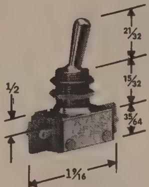

Fig. GT2.
DPST Bat lever.
Shown 20902CX.

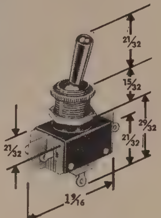

Fig. GT3.
DPDT Bat lever.
Shown 20905FR.

This unique design, dating back to 1925, still offers a full selection of circuits on a small base. Time proven roller mechanism. Long life dependability. Ideally suited for small motor applications. For standard levers available see page 23 Figs. A and B.

OPTIONS (CONSULT FACTORY)

- Screw terminals
- Wire Leads
- Optional levers (Fig. C and E, see page 23)
- Special finishes, metal levers
- Special colors, molded levers
- Slotted and custom machined levers

COMMON SPECIFICATIONS

FOR GENERAL PURPOSE TOGGLES

Exposed metal parts: Bright nickel
Dielectric breakdown: Exceeds 1000 V rms
Contact material: Bronze silver plated
Terminals: Bronze silver plated
Standard hardware: 1 hex nut, 1 knurled nut (unassembled)
Packaging: **Ind.** Each switch and hardware individually packaged (see page 24). **Blk.** Quantity packaged for large volume users (see page 24)

050 SERIES

2 POSITION/LOW LEVEL

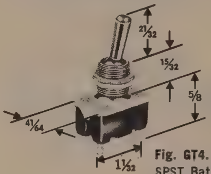

Fig. GT4.
SPST Bat lever.
Shown 83050.

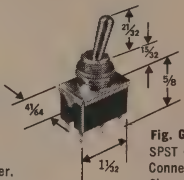

Fig. GT5.
SPST Quick
Connect Terminal.
Shown 83054P.

This small space saving switch has a "quick make/break" **knife** wiping action. This contact mechanism meets the rigid reliability standards established by the Data Processing, Communications, Consumer electronics, and Instrumentation industries. The best choice for low-level switching. Standard models have silver plated bronze contacts. Gold plated and silver alloy are available. For standard levers available see page 23 Figs. B, C, D, E and F.

OPTIONS (CONSULT FACTORY)

- Gold plated contacts
- Silver alloy contacts (type P terminals only)
- Special finishes, metal levers
- Special colors, molded levers
- Silicone rubber seal in sleeve assembly
- Momentary action available

CLASSIC 015 SERIES

STANDARD OF THE INDUSTRY

2 POSITION/LOW LEVEL TO 6 AMP

(Specs on page 4)

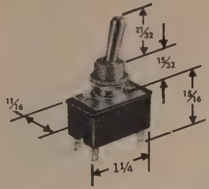

Fig. GT6.
DPST Ball Joint Bat lever.
Shown 81024GB.

This deluxe line, for more than 30 years the standard of the industry, gives maximum reliability in both low-level and rated power (6 amps) applications. The wide selection of options available makes these switches the "classic" choice in many, many applications. Standard lever is a bat handle, see page 23 Fig. B.

OPTIONS (CONSULT FACTORY)

- Wire leads (see page 23 Fig. T3)
- End connected solder lugs (see page 23 Fig. T1)
- Gold plated contacts
- Optional levers (Fig. A, C-F, see page 23)
- Screw terminals (see page 23 Fig. T2)
- Special finishes, metal levers
- Special colors, molded levers
- Slotted and custom machined levers
- Silicone seal in sleeve assembly
- Momentary action

591 SERIES

2 POSITION/6 - 8 AMPS

(Specs on page 4)

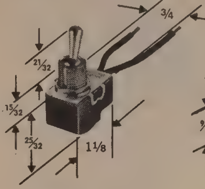

Fig. GT7.
SPST Wire lead.
Shown 80591HDR.

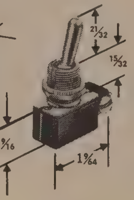

Fig. GT8.
SPST Screw terminal.
Shown 86964E.

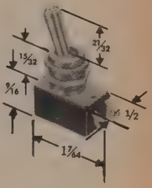

Fig. GT9.
SPST Solder lug.
Shown 86994N.

This series offers a limited selection of medium current (up to 8 amps) in a small molded base. Quick make-break wiping mechanism. Frequently used in small home appliances and consumer electronic applications. Standard lever is a bat handle, see page 23, Fig. B.

OPTIONS (CONSULT FACTORY)

- Optional levers (Figs. A, C, E, F, see page 23)
- Special finishes, metal levers
- Special colors, molded levers
- Momentary action available (6 Amp models only)

POWER TOGGLE SWITCHES/10 AMP TO 60 AMP

Presented in the next four pages is a wide selection of toggle switches for power applications. AC/DC and AC only models are covered with ratings ranging from 10 Amps at 125 VAC to as high as 60 Amps at 250 VAC. Horsepowers to 2 HP are possible with certain models.

COMMON SPECIFICATIONS FOR ALL POWER TOGGLES

Exposed metal parts: Bright nickel

Dielectric breakdown: Exceeds 1000 V rms

Standard hardware: 1 hex nut, 1 knurled nut unassembled

Packaging: **Ind.** Each switch and hardware individually packaged (see page 24). **Blk.** Quantity packaged for large volume users (see page 24)

608 SERIES/AC ONLY

2 - 3 POSITION/1 HORSEPOWER/20 AMP

SPST through 4PDT — Slow make and break utility size. The 608 series is designed to offer high capacity (AC only) on a small size phenolic base with butt type (fine silver buttons) contact and ball joint lever construction for long life expectancy. Available in 2 or 3 position (with or without OFF in center) and momentary contact in one or both sides of the center position.

Arrow Hart POWER TOGGLE SWITCHES/10 AMP TO 60 AMP

800 SERIES FOR DOUBLE INSULATION DESIGNS

MEDIUM DUTY/1 HORSEPOWER/16 AMP

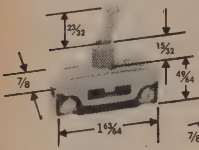

Fig. PT6.
DPST All molded construction.
Shown 83800.

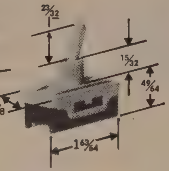

Fig. PT7.
DPST New press fit termination.
Shown 83806.

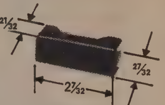

Fig. PT8.
Insulator, optional.
Order Cat. No. 83801.

The all-molded construction of this new series of medium duty switches allows them to be applied where double insulation is desirable — or mandatory. And a new type of press-fit termination alternate offers production economies for large volume users. Use AMP. INC. terminal lug 62008-1 Right hand and 62009-1 Left hand. Molded insulator (see figure) available, order Cat. No. 83801.

OPTIONS (CONSULT FACTORY)

Special colors on levers.

600 SERIES

MEDIUM DUTY/ 1 HORSEPOWER/16 AMP

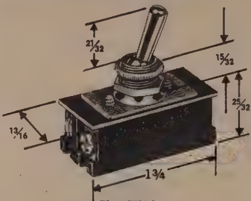

Fig. PT11.
DPST 600 Series.
Shown 80600BJ.

602 SERIES

HEAVY DUTY/ 1½ HORSEPO /ER/20 AMP

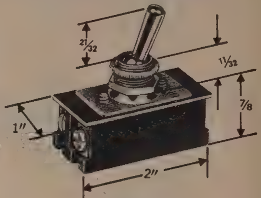

Fig. PT12.
DPST 602 Series.
Shown 80602CA.

These medium and heavy duty switches, available with several lever options and screw or wire termination, are good general purpose controls.

OPTIONS (CONSULT FACTORY)

- Optional levers (Fig. A-F)
- Wire lead terminals
- Special finishes, metal levers
- Special colors, molded levers
- Slotted and custom machined levers

---

421 SERIES

RUGGED DUTY/2 HORSEPOWER/ 20 AMP/250 V

These quick make quick break AC/DC switches are built to handle rugged applications up to 20 Amp and 2 HP at 250 V. Widely used in industrial power tools and floor cleaning and polishing equipment.

SUBMINIATURE SWITCHES/TOGGLE AND PUSHBUTTON

The subminiature switches presented in the next 3 pages give the designer extreme flexibility in selection of performance, actuator styles (lever or push), terminations, and circuits. Two families are available: the Quality Grade for high reliability applications and the Utility Grade for less critical use.

"QUALITY GRADE" SMT/SMP SERIES

These quality grade subminiature toggle and momentary pushbutton switches are ideally suited for applications requiring the highest standards of quality and uniformity. The gold plated contacts permit dependable use in low level circuits especially where long shelf life is critical.

GENERAL SPECIFICATIONS

Exposed metal parts: Gold anodized aluminum

Dielectric breakdown: Exceeds 1000 V rms

Contact material: Gold-plated silver buttons

Movable contact arm: Rhodium-plated silver

Terminals: Gold finish

Standard hardware (omitted on switches with PC terminations): 2 gold-anodized hexnuts, 1 lockwasher, 2 locating rings, unassembled

Packaging: **Ind.** Each switch with hardware individually packaged (see page 24).

Base: Molded diallyl phthalate

Contact mechanism (see illustrations) **TS type** — knee action. **TC, TE, TG, TM type** — Rocker action. **PM type** — Leaf blade with wiping action. **PMQ type** — Snap acting butt type.

Terminations: Standard solder lugs are available. Also three types of P.C. Terminations — Gold plated brass sword shaped terminals which can be connected directly to printed circuit boards — as follows:

Right Angle — Permits mounting switch with lever operation parallel to circuit board, terminals perpendicular to lever.

Straight — Permits mounting switch with lever perpendicular to circuit board, terminals parallel to lever.

End Connected — Permits mounting switch with lever operation at right angles to circuit board, terminals perpendicular to lever.

CONTACT MECHANISMS

The Knee-Action Contact Mechanism found on Type TS switches offer advantages not found on other two position subminiature switches. These advantages are more positive snap, less creep, definite positioning, longer life, and lighter operating force.

UTILITY GRADE

TOGGLE SWITCHES ONLY

Now UL Listed AC Only

ISMT SERIES

These general purpose subminiature utility switches are suited for applications where low cost dependability is important. Because switches meet Continental European Standards (International Electrotechnical Commission) they are ideal for use in products destined for sale in Canada and Europe. These switches are Underwriters listed.

GENERAL SPECIFICATIONS

Exposed metal parts: Chrome-plated steel frame and lockwasher. Chrome-plated brass bushing, nuts, and lever
Dielectric breakdown: 2,000 V rms
Contact material: Silver
Movable arm: Silver
Terminals: Silver
Base: Phenolic
Standard hardware: 2 hexnuts, 1 locating ring, unassembled
Packaging: Ind. Each switch separately
Contact mechanism: Rocker (same as "Quality Grade" see page 9)
Weight: SP is 4 grms. DP is 8 grms.

OPTIONS (SEE PAGES 23 AND 24 FOR ORDERING INFORMATION)

Colored levers: Adapter available for straight lever configuration
Dress nuts: Knurled or tapered
Rubber Boots: Partial enclosing and total enclosing

PUSHBUTTON SWITCHES/GENERAL PURPOSE/POWER

The pushbutton switches portrayed in the next 2 pages are suitable for a wide range of switching — all the way from AC only through AC/DC, for power and low level applications. Termination options such as wire lead, quick connect, solder lug and screw are available with some series. Colored snap-on buttons available (see accessory page 23).

GENERAL SPECIFICATIONS

Exposed metal parts: Bright nickel (except 511 Series)
Aluminum (511 Series only)
Dielectric Breakdown: Exceeds 1000 V rms
Contact material: Bronze silver plated
Terminal material: Bronze silver plated
Standard hardware: 1 hex nut, 1 knurled nut, unassembled
Packaging: **Ind.** Each switch and hardware individually packaged (see page 24). **Blk.** Quantity packaged for large volume users (see page 24).

PUSHBUTTON SWITCHES/DOUBLE ACTING

CANOPY SERIES

GENERAL PURPOSE/3 AMP

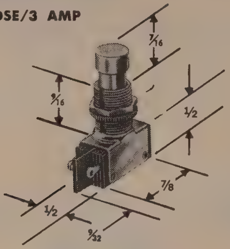

Fig. PB16.
SPDT Standard metal button.
Shown 80711.

Time proven roller mechanism. Choice of many circuits (factory options). Long life dependability. Suited for small motor applications.

OPTIONS (CONSULT FACTORY)

- Screw terminals
- Wire leads
- Snap-on buttons
- Circuitry, optional configurations
- Extra low operating pressure

117 SERIES

DPDT/6 AMPS

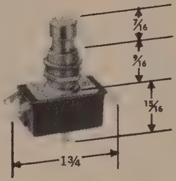

Fig. PB17.
DPDT Solder lug.
End connected.
Shown 81117.

Arrow Hart's unique double acting DPDT switch rated at 6 amps at 125 V. Cataloged is one model from a flexible family of high reliability power and low level rated switches. Many variations are possible similar to those available with the Classic 015 and 087 Series of toggle and pushbutton switches. Consult factory.

403 SERIES

SMALL APPLIANCE/6 AMP

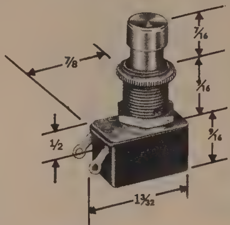

Fig. PB18.
Solder lug terminals. Shown 82403.

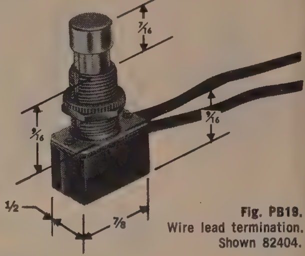

Fig. PB19.
Wire lead termination.
Shown 82404.

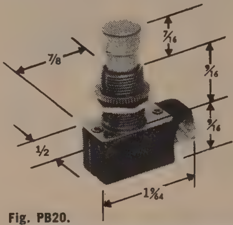

Fig. PB20.
Screw terminal. Shown 82405.

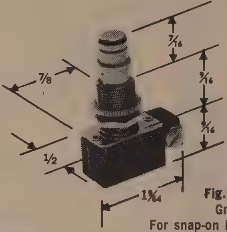

Fig. PB21.
Grooved.
For snap-on button.
Shown 82405CL.

These single pole single throw switches handle 6 amps in a small molded base. Available with screw, solder or wire terminations.

OPTIONS (CONSULT FACTORY)

- Special color buttons
- Extra low operating pressures

OPTION (SEE PAGE 23 FOR ORDERING INFORMATION)

Snap-on buttons: 5/8" dia and 1" dia.

863 SERIES

HEAVY DUTY/ 1 - 1½ HORSEPOWER/ 16 - 20 AMP

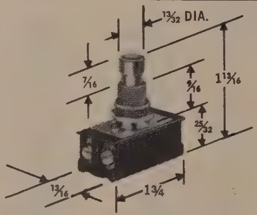

Fig. PB22.
DPST Standard metal button.
Shown 80863.

These heavy duty workhorse switches have quick make quick break wiping action. Factory options include snap-on buttons and wire lead terminations.

OPTIONS (CONSULT FACTORY)

- Snap-on buttons
- Wire lead terminations

ROTARY SWITCHES/2-4 POSITION

These time proven 2 position through 4 position rotary switches are suitable for a wide range of applications from low-level up to 2 HP at 240 volts. Locking versions of most models available.

GENERAL SPECIFICATIONS

Exposed metal parts: Bright nickel
Dielectric breakdown: Exceeds 1000 V rms
Standard hardware (except locking versions): 2 hex nuts, unassembled
Standard hardware (locking type): 1 hex nut, 1 dress nut, unassembled
Packaging: **Ind.** Each switch and hardware individually packaged (see page 24). **Blk.** Quantity packaged for large volume users (see page 24)
Contact materials: See individual series

CANOPY SERIES

TWO POSITION/GENERAL PURPOSE

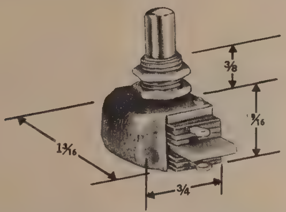

Fig. RS1.
SPST ⅜" shaft projection.
Shown 1561B.

These roto-power switches with silver-plated roller action contacts on a laminated base offer a complete selection of circuits ideal for switching small motor loads. Standard shaft lengths are ⅜", ½" and 1⅛"

OPTIONS (CONSULT FACTORY)

Screw terminals	Custom machined shafts
Wire leads	Special sleeve lengths
Special shaft lengths	

CLASSIC 715 SERIES

2 POSITION/HIGH RELIABILITY

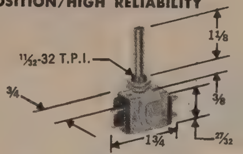

Fig. RS2.
DPDT 1⅛" shaft projection.
Shown 81727J.

This series of 2 position quick make, quick break wiping action in a small molded body. Good for low energy and power applications. Equivalent to the 015 Series of toggle switches. Contact material silver plated bronze.

OPTIONS (CONSULT FACTORY)

Screw terminals	Custom machined shafts
Wire leads	Special sleeve lengths
Special shaft lengths	

702 SERIES/AC ONLY

HEAVY DUTY/2 - 4 POSITIONS

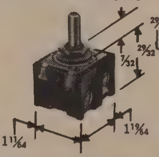

Fig. RS3.
DPST Slotted flatted shaft.
Shown 70302A.

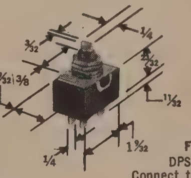

Fig. RS4.
DPST Quick Connect terminal.
Shown 82787D.

With slow make, slow break contacts these heavy duty AC switches can be obtained with 2, 3, or 4 positions. Heavy silver button contacts provide a high current switching capability in a small size body. Ratings up to 20 amps, 2 HP at 240 volts.

OPTIONS (CONSULT FACTORY)

ORDERING INFORMATION

Please specify on order:

Series No. 845
No. of Decks: 1 to 12
No. of Poles per Deck: 1 or 2
No. of Positions: 2 to 10
Type of Contacts: Shorting or Non-Shorting
Terminals: Solder Lug or P.C. Mounting

SPECIFICATIONS

- OPERATION MEANS: 1/8" Dia. flat shaft or Screw Driver Slot
- MOUNTING METHOD: Sleeve 5/16" Long; 1/4-32-NS-2A thread. Ebony Black Finish
- MOUNTING HARDWARE: 2 Mounting Hexagon Nuts 1/16" thick by 5/16" across flats. 1 Lock Washer with internal teeth
- SWITCH SLEEVE AND INDEX HOUSING: Zinc Die Casting. Ebony Black Finish

CONSTRUCTION

- SWITCH BODY: Molded Melamine Thermosetting Plastic per MIL-M-14, Type CMG
- CONTACTS: Wiping Type, Coin Silver with Gold Plating
- CONSTRUCTION: 1 to 12 Decks, 1 or 2 Poles Per Deck, 2 to 10 Positions Per Pole (10 Position Switches furnished with continuous rotation unless otherwise specified), 36° angle of throw. Fully enclosed
- WEIGHT: 14 to 42 Grams depending on number of decks

CHARACTERISTICS

- RATED: To make and break the following loads:
  1/4 Amp. at 115 VAC resistive
  1/4 Amp. at 6-28 VDC resistive
  20 Ma. 115 VDC resistive
  50 Ma. 115 VAC inductive
  Carries 4 Amps. continuous
- CONTACT RESISTANCE: .01 OHMS initial. After 25,000 cycles of operation .020 OHMS, maximum. Typical values are in the range of .010 OHMS
- INSULATION RESISTANCE: Exceeds 200 MEG OHMS at 1000 VDC, 70°F
- DIELECTRIC-STRENGTH: 1000 VAC (500 VAC or better after standard commercial environmental tests)
- LIFE EXPECTANCY: 50,000 operations minimum
- STOP STRENGTH: 15 pounds, minimum
- ROTATIONAL TORQUE: 8-48 ounce-inches, depending on the number of poles per deck and number of decks
- TEMPERATURE RANGE: −85°C to +85°C

ADAPT-A-SWITCH

31 STOCK COMPONENTS BUILD 25,344 DIFFERENT VARIATIONS

Use any of 6 colored lens in three shapes with two actuators (momentary or alternate action). Two contact blocks (standard duty and low energy) allow you to build up to 4-pole switches. Additional hardware includes metal bezels, indicator snap-on clips, and opaque buttons. Now designers may build from standard stock components thousands of variations to meet human factor and functional requirements. Different lens markings give the designer infinite choice. Designers have complete freedom of selection, backed up by immediate delivery from stocked components. Adapt-a-Switch capabilities are only limited by your imagination.

SNAP-ON CONTACT BLOCK

	Rectangular Square Round	 	Single Double* Triple* Quad*

SPECIFICATIONS

Actuator —
Terminals: Tin plated solder type accepts #18 wire
Weight: 8 grms.
Plunger Travel: .094 inches

Contact Block —
Terminals: Solid fine silver solder type. Accepts #18 wire
Weight: 4 grms.
Contacts: Positive snap, wiping action

Contact Ratings —
Standard Duty (Fine Silver): 5 Amp. 125 VAC Resistive — 2 Amp. 250 VAC Resistive — 5 Amp. 28 VDC Resistive

Low Energy (Gold Plated): Minimum rating for dry circuit application is 10 Micro Amp. 50MV. Gold Plated Contacts are for applications under 100 milliwatts

Life: Mechanical and Electrical at full ratings: 100,000 cycles min.

Max. Operating Force:

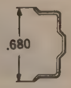
INDICATORS FOR MATCHING ILLUMINATED SWITCHES

Indicators are available that are identical in appearance to the illuminated switches featured here. Same lens shapes and colors, same body styles and dimensions. To order an indicator specify catalog number for indicator body and shape and color for lens (see lens catalog numbers for switches on page 18).

Indicator Bodies	Catalog Number
Rectangular	83507
Square	83508
Round	83509

Note: An actuator can be converted to an indicator only by a snap-on clip Catalog No. 83500-51.



INDICATOR SNAP-ON CLIP

Arrow Hart POWER TOOL SWITCHES SLIDE AND TRIGGER

SLIDE SWITCHES

These slide switches have been designed especially for handling fractional horsepower motors. Their quick make, quick break snap action suits them to AC/DC applications.

GENERAL SPECIFICATIONS

Exposed metal parts: Bright nickel
Dielectric breakdown: 1000 V rms
Packaging: **Ind.** Each switch individually packaged. **Blk.** Quantity packaged for large volume users (see page 24).
Contact materials: Silver plated

Arrow Hart

HARDWARE AND PACKAGING

All sleeve mounted switches are furnished with two mounting nuts. One nut goes behind panel to prevent the bushing or sleeve being distorted by overtightening the front panel nut. Arrow-Hart accepts no responsibility for damage to switches that are mounted without the backup nuts.

PACKAGING METHODS

IND (SCHEDULE 04): One switch individually packed (with hardware unassembled) in plastic bag, Fig. PK1 or Fig. PK2. Note, extra large switches are individually packed in cardboard boxes. Schedule 04 items overpacked 25 units to a carton, Fig. PK3.

IND (SCHEDULE 12 AND SCHEDULE 13): One switch individually packed (with hardware unassembled) in plastic bag, Fig. PK4. Subminiature switches overpacked 25 units to a tray, Fig. PK5.

BLK (BULK PACKS): Shipped in cartons of 100, 200 or 250 units based on size and weight, Fig. PK6. Hardware (nuts, washers, terminal screws) will be bulk packed separately in plastic bag.

BAF	1, 3, 5, 6, 10	250	$1.60	$14.50
BAF	15, 20, 25, 30	125	1.60	14.50

13/32 x 1-1/2 inch FUSES

INDICATING, LAMINATED TUBE FUSES

Red button on indicating pin extends from end of fuse when fuse is blown. Units are built in accordance with Navy Specifications. These units may be used in Buss HPC-C fuseholders. Voltage, (1-15 amps), 250, others, 125 V.

Buss No.	Amperes	Net Price For Ten	100
MIN	1, 2, 3, 5, 10, 15, 20, 25, 30	$4.80	$40.00

SIGNAL OR VISUAL INDICATING FUSES

MIC fuses have silver-plated indicating pin. Pin may be used as visual indicator or may be used to actuate a signal. **MIJ** fuses are similar to MIC types except they have been specially designed for complex circuitry as in computers. Voltage, 250 except 20 amps and over which are 32 V.

Buss No.	Amperes	Net Price For Ten	100
MIC	1, 2, 3, 5, 10, 15, 20, 25, 30	$5.60	$47.00
MIJ	1, 2, 3, 5, 10, 15, 20, 25, 30	6.60	55.00

13/32 x 1-1/2 inch FUSES

HIGH INTERRUPTING CAPACITY FUSES

Type KTK — For use on circuits as high as 100,000 amps and sand filler surrounding a silver fuse at 600 volts or less, AC only. Glass fiber melamine tubes element. **Amperes:** 1/10, 1/8, 2/10, 1/4, 3/10, 1/2, 3/4, 1, 1-1/2, 2, 3, 4, 5, 6, 8, 10, 12, 15, 20, 25, 30. Lot of 10, Net **$12.30**. Lot of 100, Net **$103.00**.

13/32 x 1-1/2 inch FUSES

FUSETRON FIBER TUBE FUSES

Dual-element slow-blowing type, 13/32" x 1-1/2" overall. Fuse link operates only on very high overloads or short circuits; thermal cutout functions on low overloads (cannot operate quickly on any overload, thus providing longer time lag). Carry 110%, open at 135% in 1 hour. 125 and 250 volt sizes U/L Approved.

Buss No.	Amperes	Volts	Net Price For Ten	100

FUSETRON DUAL-ELEMENT FUSES

Long time-lag prevents useless shut-downs caused by ordinary fuses opening on starting currents or other harmless overloads, yet protects against short-circuits. On normal installations will guard motors against burn-out from overloads or single phasing. U/L Listed for motor running and circuit protection up to 250 volts.

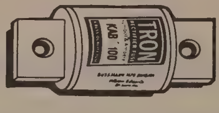
TRON RECTIFIER FUSES

For Protection of Semiconductor Rectifiers and Similar Applications



Especially designed for protection of semiconductor rectifiers, thyristors and other solid state devices. High interrupting capacity and very fast clearing to restrict let-through current and energy to very low values. Give safe short-circuit protection for systems with fault current to 200 kA at 600 volts or less. Carry 100%, open at 1000 secs between 150% and 180% of rating; open within 1 sec at 250% of rating.

GBB SERIES

Size, 1-1/4" length x 1/4" diameter.

Buss No.	Amperes	Max. Volts	Net Each

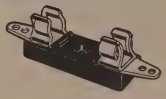
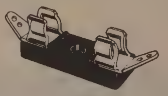
*GBB series — use any BUSS block for 1/4" x 1-1/4" fuse.

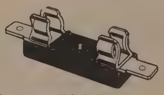
BLOCKS FOR 1/4 x 1 inch FUSES



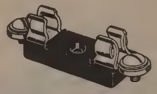
No. 4520 — 1 pole, small bakelite base, solder terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.375 inches. Net Each $0.26



No. 3992 — 1 pole, small bakelite base, one piece solder terminals and spring bronze albaloy plated clips. Base dimensions, .500 x 1.375 inches. Net Each $0.31

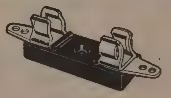


No. 2698 — 1 pole, small bakelite base, ¼ in. quick-connect terminals, spring bronze albaloy plated clips. Base dimensions, .500 x 1.375 inches. Net Each $0.33



No. 4399 — 1 pole, small bakelite base, screw terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.375 inches. Net Each $0.38

BLOCKS FOR 1/4 x 1-1/4 inch FUSES



No. 4405 — 1 pole, small bakelite base, solder terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.26

No. 3998 — 1 pole, small bakelite base, one piece solder terminals and suring bronze albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.26

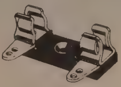
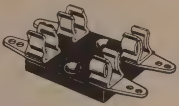
fuses and holders

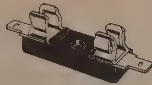
BLOCKS FOR 1/4 x 1-1/4 inch FUSES (cont'd)



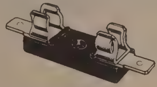
No. 4406 — 1 pole, small bakelite base, side solder terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.26



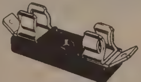
No. 4408 — 2 pole, small bakelite base, solder terminals. Spring bronze albaloy plated clips. Base dimensions, 1.000 x 1.625 inches. Net Each $0.44



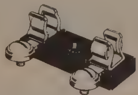
No. 2799 — 1 pole, small bakelite base, 3/16 in. quick-connect terminals. Beryllium copper albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.49



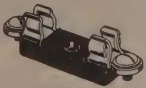
No. 2841 — 1 pole, small bakelite base, 1/4 in. quick-connect terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.33



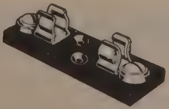
No. 2839 — 1 pole, small bakelite base, 1/4 in. quick-connect terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.33



No. 2958 — 1 pole, small bakelite base, screw side terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.625 inches. Net Each $0.40

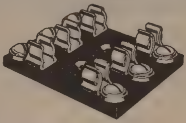


No. 4407 — 1 pole, small bakelite base, screw terminals. Spring bronze albaloy plated clips. Base dimensions, .500 x 1.652 inches. Net Each $0.38

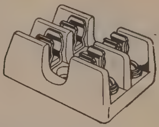


No. 4512 — 1 pole, full bakelite base, screw terminals. Spring bronze albaloy plated clips. Base dimensions, .750 x 2.1875 inches. Net Each $0.46

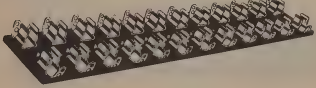
BLOCKS FOR 1/4 x 1-1/4 inch FUSES (cont'd)



No. 4532 — 3 pole, full bakelite base, screw terminals. Spring bronze albaloy plated clips. Base dimensions, 1.6875 x 2.1875 inches. Net Each $1.40



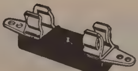
No. 4161 — 2 pole, full porcelain base with side barriers, screw terminals. Spring bronze albaloy plated clips. Base dimensions, 1.3125 x 2.2500 inches. Net Each $1.09



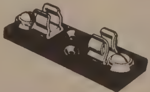
Molded black phenolic base; Albaloy plated spring clips for strong grip, high corrosion resistance. * x 1-5/8", 3823 Series.

Buss No.	No. Poles	Base Size* In.	Net Each
3823-1	1	1/2	$0.26
3823-2	2	1-1/8	.44
3823-3	3	1-3/4	.70
3823-4	4	2-3/8	.86
3823-5	5	3	1.03
3823-6	6	3-5/8	1.28
3823-7	7	4-1/4	1.44
3823-8	8	4-7/8	1.61
3823-9	9	5-1/2	1.85
3823-10	10	6-1/8	2.05
3823-11	11	6-3/4	2.25
3823-12	12	7-3/8	2.47

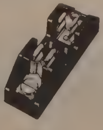
BLOCKS FOR 13/32 x 1-1/2 inch FUSES



No. 4421 — 1 pole, small bakelite base, solder terminals. Beryllium copper silver plated clips. Base dimensions, .6250 x 2.3125 inches. Net Each $0.54

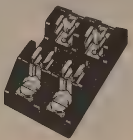


No. 4515 — 1 pole, full bakelite base, screw terminals. Beryllium copper silver plated clips. Base dimensions, .7500 x 2.5625 inches. Net Each $0.72

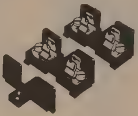


No. 2807 — 1 pole, molded phenolic base with side barriers, screw terminals. Spring bronze albaloy plated clips. Base dimensions, .859 x 3.000 inches. Net Each $0.72

BLOCKS FOR 13/32 x 1-1/2 inch FUSES (cont'd)



No. 2808 — 2 pole, molded phenolic base with side barriers, screw terminals. Spring bronze albaloy plated clips. Base Dimensions, 1.625 x 3.000 inches. Net Each $1.20

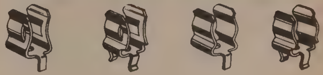


Add-On Fuse Block — Each pole locks into each other. New poles can be added at any time, each has end barrier. Net Each $0.15

No. 3742 Specify End Barrier Only. Net Each $1.09

No. 3743 Specify One-Pole Only — Base dimensions, .787 x2.562 inches. Marking strip in 50 inch lengths. Net Each $0.48

TRON FUSE CLIPS FOR P.C. BOARDS



For ¼" diameter fuses — offer economical way to mount fuses on printed circuit boards. Clips with two tabs, especially bowed that snap in P.C. board to hold clip firmly while being wane soldered, eliminates riveting. Clips available with end stops and single tabs.

BUSS No.	No. Tabs	Clip Material	Clip Finish	Net Each
1A1310-05	1	Beryllium Copper	Tin	$0.13
1A0581-01	1	Spring Bronze	Albaloy	.13
1A0581-05	1	Beryllium Copper	Tin	.13
1A1119-05	2	Beryllium Copper	Silver	.12
1A1119-10	2	Spring Bronze	Albaloy	.039
1A1120-05	2	Beryllium Copper	Silver	.10
1A1120-10	2	Spring Bronze	Albaloy	.087

HGC	Panel	200 to 500	30A	$4.70

OTHER STANDARD AND SPECIAL FUSES, BLOCKS AND HOLDERS

If the fuses, fuse blocks and holders shown do not fit your requirements ask for information on other types. Fuses and fuse mountings to meet JAN and Military specifications also available. If you have a special problem in protection, send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

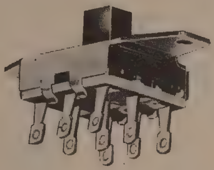
CW INDUSTRIES

SLIDE SWITCHES

QUALITY PRODUCTS THROUGH CREATIVE ENGINEERING

STANDARD SLIDE SWITCHES

Wide Range of Basic Types Available

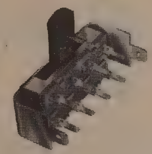


TOP ACTUATED SLIDE SWITCHES

Available from current rating of 3.0 amps AC 0.5 amps DC at 125 volts to 11.0 amps AC at 125 volts, and 8.0 amps DC at 12 volts.

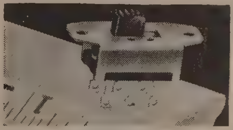
Types include 1 pole, 2 pole, 3 pole and 4 pole in two positions, three positions and four positions. Detent or spring return action.

Variety of mounting options, terminal choice and supplemental features available.



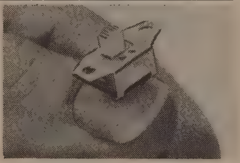
"SYDEWYNDER®" SIDE-ACTUATED SLIDE SWITCHES

Available as single and double pole in 2 positions or 3 positions. Current rating 3.0 amps AC 0.5 amp DC at 125 volts. Mount with two mounting holes on 1⅛″ centers or snap into printed circuit board. Variety of knob lengths and colors available. Particularly suitable for applications where switch actuation from side of switch saves extra mechanical assembly.



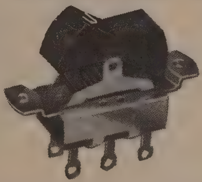
SWIDGET® MINIATURE SLIDE SWITCHES

Available in types having up to 3 poles and 4 positions. 2-position switches mount on .812″ centers; other switches have slightly longer mounting centers. Side or top actuated. Detent or spring return. Variety of terminals and knob sizes. Rated at 0.5 amp AC/DC at 125 volts.



"SWIDGET® JR." SUB-MINIATURE SLIDE SWITCHES

Available as SPDT and DPDT. Mount on 0.562″ centers. Overall length .762″. Rated 0.5 amp AC/DC at 125 volts.



ROCKER SWITCHES

Dress up your unit with handsome CW rocker switches. Four basic rocker superstructures can be added to most CW models. Types include 2-position switches with one, two, three or four poles, in a variety of mountings, rocker knobs and features. Rated from 3.0 amps AC 0.5 amp DC at 125 volts, to 11.0 amps AC at 125 volts and 8.0 amps DC at 12 volts.

Other components manufactured by CW INDUSTRIES include Precision Film Resistors, Wire Wound Potentiometers and Connectors for Flat Flexible Cables. Precision Resistors are available in 1/10 watt through 1/4 watt (RN55, RN60 and RN65) and are fully described in CW Bulletin 2094. Wire Wound Potentiometers described in CW Bulletin 2080 (¾″ diameter) are designed for commercial applications requiring exacting electrical characteristics at competitive price. CW "CEE-WEE" Connectors for Flat Flexible Cables having round and flat conductors are described in EEM Section 2100. Full engineering details are furnished in CW Bulletin 2097.

CW research and engineering facilities are always at your service, to consult with you on any engineering or development problem. Engineering bulletins describing in detail CW products are available upon request. Call or write at any time for consultation.

C & K Switches

C & K Components produces a wide variety of switches to meet many electrical and mechanical requirements. The major product lines consist of **Toggles, Rocker and Lever Handles,** three families of **Pushbuttons and Illuminated Rockers.** Many actuator, mounting, and terminal options, including printed circuit configurations, offer the possibility for a wide variety of panel styles consistent with efficient assembly and the "human factor" requirements.

Shown here are a few examples of C & K switches. Samples of these switches can be obtained by contacting the factory directly and specifying the appropriate EEM-number. For more complete information ask for our new 24-page catalog 703 (EEM).

TOGGLES

SPECIFICATIONS: Contact rating: 5 amp resistive at 120 VAC or 28 VDC, 2 amp resistive at 250 VAC. **Gold Plated Brass Contact:** 0.4 volt-amps (VA) max. at 20 V max. AC or DC. **Electrical life:** 100,000 make and break cycles at full load on all models ending in 01. All other models 40,000 cycles.

CAPITOL

CIRCUIT SELECTOR SWITCHES

CAPITOL SWITCHES are designed for long trouble free life.

GENERAL SPECIFICATIONS (All Switches except R Series)

MATERIALS & FINISHES

Aluminum parts (used wherever practical to achieve light weight) are anodized.
Steel & Brass parts are heavily plated to prevent corrosion.
Phenolics:
Jack spacers — standard grade XXXP.
Other phenolic parts are grade XX or better.
All phenolic parts are fungus resistant.
Leaf Springs standard — 18% B nickel silver.
Contacts & material standard, welded palladium discs.
Other Contact Material: Gold Alloy (WE #1) or Fine Silver.
Contact Ratings: Standard — 3 amp 110 volts AC non-inductive or 1 amp at 28V DC.
Terminals: Standard are hot tin dipped to accommodate two #18 wires. On request, right angle terminals can be provided. Taper tab terminals (to take AMP #78) available. Also PC terminals.

STANDARD CONTACT ASSEMBLIES AVAILABLE

The versatility of Capitol designs enables you to use a wide variation of combinations of the contact assemblies listed above, to operate from the same position. ie. a stack consisting of 2 Form A's, 1 Form B, 1 Form C.

HLB-S

HLB

HLL

- Steel and brass parts are heavily plated to prevent corrosion. ● Positive detent feel.
- All have the same mechanical and electrical capabilities. The basic difference is in the size and method of mounting.
- Lever actions in any combination: Lock, Non-lock, No throw.
- Wide combination of contact assemblies. This allows for a varied circuitry arrangement.
- Can be supplied (on request, at no additional charge) with right angle terminals. This cuts down on the depth requirement behind the panel.
- The model HLL features color coded positions. Filters available for position 1 and 2 are red, green, yellow and amber.
- Neutral position is also illuminated but is not color coded. Take T2 Short Lamp.

ILLUMINATED

Model HPC rugged aluminum frame. Accommodates standard T-2 telephone slide base lamp. Lamp easily replaced from front by removing lens.

Standard buttons furnished are clear lucite. Transparent colors are available on request, (red, green, blue, amber).

S-WITH WATERPROOF BOOT SEALS

Capitol Model "S" series represents the largest selection of illuminated and non-illuminated multiple position strip switches. They offer many variations in mechanical action, methods of illumination and a wide range of contact combinations. The versatility of these switches will meet most any switching requirement.

The non-illuminated switch measures only 2-9/16″ behind the panel. It features a nylon actuator molded on a 5/32″ square metal plunger shaft. Because the shaft is metal rather than plastic, it is extremely rugged.

The illuminated switches are ideal for applications requiring positive knowledge of a position in operation. They will eliminate (in many cases) the need for independent pilot lites. Each position has an independent lamp assembly illuminated either by an external circuit or directly from the switch, depending on how wired. These switches are constructed so that the lamp does not travel when a position is engaged, thus eliminating excessive shock of the lamp. All lamps are easily removed from the top without having to take the assembly apart. If the lamp is to be energized when a position is engaged, an extra set of contacts is usually required for wiring from the lamp terminals to the contact terminals.

SERIES DESIGNATIONS

100	button centers on 5/8″
200	button centers on 1/2″ (non-illuminated only)
300	button centers on 3/4″
400	button centers on 7/8″
500	button centers on 9/16″

MECHANICAL ACTIONS

BASIC MODEL	ACTION
MODEL S	INTERLOCKING
MODEL SP	POSITIVE LOCK-OUT (no two operate)
MODEL SN	MOMENTARY non-locking)
MODEL SPN	MOMENTARY (non-locking) but with LOCKOUT feature.
MODEL SA	ACCUMULATIVE LOCK-UP
MODEL SL	PUSH TO LOCK — PUSH TO RELEASE (not available in 200 and 500 series)
MODEL SLP	PUSH TO LOCK — PUSH TO RELEASE (alternate action). Same as above (Model SL) except it has a lock-out feature so that only one position in the strip may be engaged at one time.

These mechanical actions are available on either the illuminated or Non-illuminated Switch. Combinations of mechanical features described on these switches can be furnished on any one switch for special applications. These switches can also be banked with mechanical interlock and positive lockout between all positions in the bank. A solenoid release can be furnished for remote control of any of these switches (except model SL and SLP), either single strips or banks. Contact assemblies may be mounted on either or both sides of the stack assembly bar (except models SL and SLP) for maximum flexibility of electrical control. Standard contact assemblies have underlapping action — a released position will return to normal before contacts of a newly operated position are actuated.

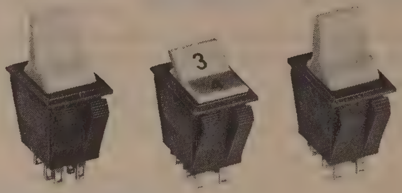
CARLINGSWITCH

THE BIGGEST SINGLE NAME IN SWITCHES

Here are some recent additions to our switch line.

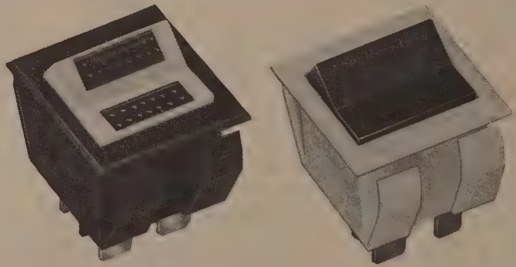
They have new features, new materials, new designs, new ease of installation.

All, however, maintain our standards of quality, reliability, and performance.

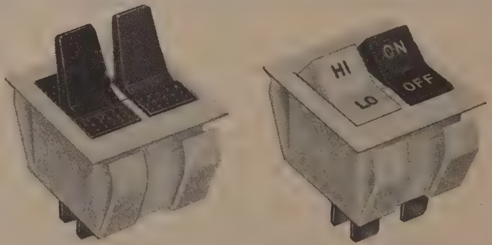


SUBMINIATURE TIPPETTES
Fully insulated nylon body, bracket and actuator. 10 amps, 125 VAC.

CURVED ROCKER TIPPETTES
Fully insulated nylon body, bracket and actuator. Plain (smooth) or lighted versions. May be imprinted.



DOUBLE POLE MINI TIPPETTES
Molded nylon. Lighted and unlighted versions. Imprinting available.



TWO SINGLE POLE TIPPETTES IN COMMON BASE
Paddle and rocker versions available in lighted and unlighted styles. Imprinting available.

CARLINGSWITCH, INC.
505 New Park Avenue, West Hartford, Ct. 06110. Tel. 203/233-5551 TWX 810-845-5150

CHERRY®

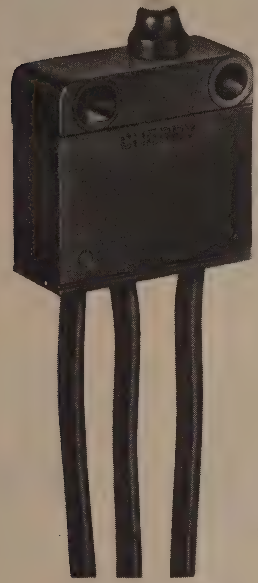
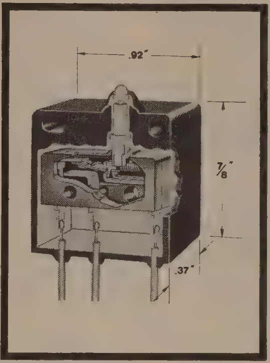
NEW FROM CHERRY — A SWITCH WITHIN A SWITCH — E72 SERIES SEALED SWITCH





Note: For low energy switching applications, the E73 series of this switch is available with gold "crosspoint" contacts.

We built an umbrella around a switch . . . by putting our subminiature snap-action switch inside a sturdy housing and injection molding epoxy plastic that encapsulates the switch and leads to seal out dirt and moisture. The result? A switch you can splash, spray, freeze, subject to all kinds of weather.

Because it's watertight and weatherproof. Making it the ideal switch for use in autos, trucks, boats, snowmobiles, power mowers, outdoor vending machines . . . just about any type of product that is subjected to extreme weather, dust, dirt, grit, grease, grime or spray.

The watertight, weatherproof "inside switch" is our good old reliable E62 subminiature, proven over more than a decade in millions of demanding applications. In this new sealed switch design, its stainless steel coil spring mechanism and reliable rock-wipe contact action are protected by a double enclosure plus a rubber boot on the actuator. So that when it rains . . . it works!

Ideal for use in autos, trucks, boats, snowmobiles and lawn mowers. The E72's protect normal switches from the moisture to which these products are continually subjected. Other applications could be in equipment normally left unprotected from the weather, such as vending machines.

Precision features include a stainless steel coil spring mechanism and reliable rock-wipe contact action that prolongs life and increases reliability. A very compact, functional size, it comes with insulated, 10 inch, 16 gauge leads attached. The E72-40A is rated at 10.1 AMP, ¼ HP and 125/250 VAC.

CHERRY®

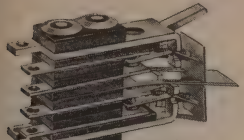
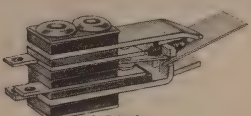
NOTICE: Due to unstable market conditions on precious metals which are used for contact surfaces on switches and printed circuit boards, all list prices shown here are subject to a surcharge to compensate for increases in Silver and Gold prices since January 10, 1974. The base prices for these two metals on January 10, 1974, were: Gold $117.00 Troy Ounce, Silver $3.35 Troy Ounce.

STACK SWITCHES/S36/S37 SERIES



S36 Series
Double Pole



S37 Series
Single Pole

7½ AMPS., 125 VAC
5 AMPS., 250 VAC

Available in single or double pole with momentary or reset (maintained) contact action.

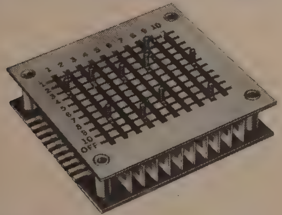
Cherry Gold "Crosspoint" Contact switches are available in a wide variety of switch types and mountings as shown above. These provide extremely low insertion resistance and long life . . . measured in millions of operations. The contact material is W/E Alloy #1 . . . 69% Gold, 25% Silver, 6% Platinum.

MATRIX SELECTOR SWITCH



Manual programming and switching for complex control equipment. Each of two standard types is expandable up to five modules, providing 500 to 1,000 crosspoints. Custom design available up to 2,784 crosspoints.

Electrical capacity:

1. Make and break 48 volts DC at 0.50 Amp. 125 Volts AC at 0.15 Amp.
2. Current carrying only (no make and break) 2 Amp. AC or DC.

Insertion Resistances:

50 milliohms plus 6 milliohms per inch of printed circuit.

Note: Overall width of basic 10 x 10 and 20 x 10 Selector Switch is 3½ inches. For each 10 sliders added to the basic unit add 3 inches to overall width. A 20 slider unit measures 6½ inches wide; a 30 slider unit measures 9½ inches wide; a 40 slider unit measures 12½ inches wide and a 50 slider unit measures 15½ inches wide.

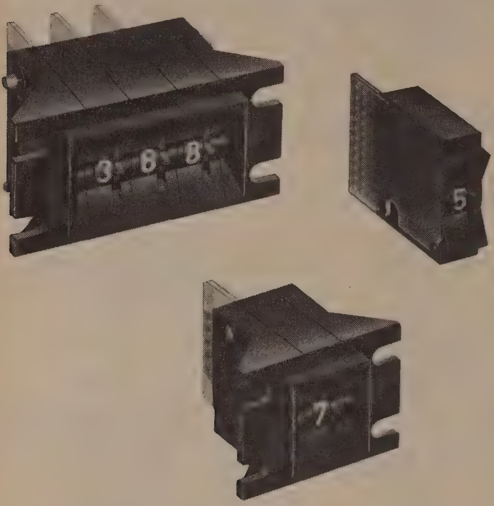
CHERRY®

NEW FROM CHERRY:
THE SMALLEST THUMBWHEEL SWITCH OF THEM ALL



Unique, compact Series T-50 sub-subminiature back mount thumbwheel switch takes only a .315″ x .709″ front panel space . . . just .984″ depth back of panel. This, the smallest version of the extensive line of Cherry thumbwheel switches, is available in a choice of BCD (Binary Coded Decimal), 10 position decimal, single pole repeating (+, −), BCD/Extended P.C. Board and many other of the most commonly used codes.

Even though the new T-50 is the smallest thumbwheel made, the .158″ average height white characters are easily readable. The case is available immediately in black gloss finish, with grey or white finishes available on special order.

SPECIFICATIONS

- Inline readout.
- Modular construction.
- Variations in coding, termination and readout symbols available.

MATERIALS

Case, Levers, End Caps, Wheels — Polycarbonate for high impact, high strength (standard).

Printed Circuit Board — G10 glass filled epoxy per MIL-P-13949. Gold Plated per MIL-G-45204B, Type I, Grade C, Class 1, over Nickel Plate.

Contacts — WE Alloy No. 1 (69% gold, 25% silver, 6% platinum).

Wipers — Beryllium Copper.

SWITCH CHARACTERISTICS

Operating Force	7-10 Ounces
Contact Resistance	0.1 Ohms
Insulation Resistance	10^3 Megohms
Dielectric Strength	500 Volt AC
Vibration	15 G's 10 = 2000 Hz
Shock	50 G's 11 MS
Weight	⅛ Oz.
Electrical Rating	50 Volts AC or DC @ .125 Amps
Maximum Current	Non-Switching Current Carrying Only 3 Amps
Life at Nominal Load	1 x 10^6 Detent Operations

READOUT WINDOW SIZE

Positions	Readout Window Size	Dial Character Height
10	X = .138 Y = .197	.158

NUMBER OF MODULES

Number of Modules	A	B	C	D	E

THUMBWHEEL AND LEVER SWITCHES

DISCOUNT SCHEDULE

Quantity (Individual Switches)	Discount	Multiplier
1-50	List	1.00
51-100	20%	.80
101-200	25%	.75
201-500	27%	.73
501-1000	30%	.70
1001-2000	32%	.68

For quantities greater than those shown consult factory or nearest representative for quotation.

COMPUTATION OF ASSEMBLY PRICE

(Items may be purchased individually)

1. Add the list price for each switch plus the options.
2. Add the spacer and end cap list price.
3. Add the assembly charge (see item 9 on next page).
4. Compute the total number of individual switches to be purchased and refer to the discount schedule for the correct multiplier.
5. Multiply the assembly list price (from 1, 2 and 3 above) by the multiplier (4) to arrive at the discounted assembly price.

CHERRY®

KEYBOARD SWITCHES

For modern electronic desk top calculators . . . computer terminals . . . credit card validators. NEW Gold "Crosspoint" contact key.

This proven design concept (crossed knife edge contact configuration) provides high force per unit of contact area, and virtually eliminates contact closure interference by contaminates. Contacts are normally held apart for greater shock resistance. No microphonics or bounce during turn-off or at rest.

Three types with straight or angled stems for sloped or stepped keyboards.

- Low Power Consumption

RUGGED CONSTRUCTION

Keys are mounted in rugged metal frame for increased protection of printed circuit board against mechanical abuse.

TWO KEY ROLLOVER

Standard keyboard units have 2 key rollover between all data keys, control, shift, and shift lock keys to simulate true typewriter sequencing.

KEYBOARD FLEXIBILITY

Standard keyboard units include:

66 Key Tri Mode ASCII, negative logic
 (with provision to add 4 extra keys)
53 Key Quad Mode ASCII (ASR 33), positive logic
12 Key Numeric, straight output
16 Key Numeric, straight output

In addition, custom designs in mono, dual, tri and quad mode operation available on volume applications, with modest engineering, tooling, and artwork charges.

SPECIAL FEATURES AVAILABLE

Positive logic resting "low" outputs or Negative logic resting "high" outputs. Open collector buffer outputs for hard wire "OR"ing available at no extra cost. Buffer output capable of driving terminated twisted pair or 90 ohm coaxial is optional. Repeating strobe is optional. Key locations may be geographically mixed. Special mono mode encoded keys may be added to configuration. Any of parity and/or data outputs optional may be later changed for modest revision charges.

WE CAN CUSTOM DESIGN YOUR KEYBOARD

If you do not see the keyboard you want among the standard stock units shown here, why not check our custom design capabilities. We specialize in custom designed units and make all our own key caps, switches, printed circuit boards and hardware. Our keyboard electronics utilizes a scanning technique which readily adapts to any keyboard configuration and format. Because of this, and our in-house capability, we can usually provide a custom designed keyboard to meet your application requirements at less than the cost of a standard. Send us your specs and we'll be glad to quote. To help you get started ask for our handy six-page Keyboard Designers' Specification Sheet.

KEYBOARD ELECTRONICS UTILIZES SCANNING TECHNIQUE

The keyboard encoder is based on a scanning technique employing an 8 bit counter, a multiplexer and a 4 to 16 line decoder. Encoded keys form a crosspoint matrix with each key connected to the decoder output and the multiplexer input. The decoder is addressed by the 4 least significant bits and the multiplexer by the 3 most significant bits of the counter.

When a key is depressed a matrix connection between the decoder and multiplexer is accomplished. When the counter reaches the appropriate key code, the multiplexer output goes high and a retriggerable one-shot is fired on the trailing edge of the counter clock stopping the counter. The one-shot is continually refreshed until the key is released. The bit-shift logic translates the counter address into an upper case data word if the shift and/or control key is depressed.

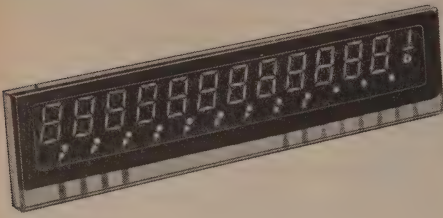
CHERRY®

PLASMA-LUX™ LIGHTED DISPLAY PANELS



"The Bright Ones" are totally new from Cherry. Totally new from the company that brought gold "crosspoint" contact switching to keyboards and calculators in 1968. The same company, too, that introduced a new standard of reliability to snap-action switches with unique coil spring mechanism in 1953.

Now, Cherry brings you a bright new family of digital readout panels called Plasma-Lux. Especially designed and engineered for electronic desk top calculators, for automotive and consumer digital clocks, digital voltmeters and a whole range of electronic instrumentation and equipment requiring high quality digital readouts.

THE NEWEST GAS DISCHARGE DIGITAL DISPLAY PANELS . . . WITH THE FEATURES YOU'VE BEEN LOOKING FOR

- Lighted digital readouts with . . .
- Halo effect backlight gives a more continuous line for greater visibility and clarity
- Greater contrast
- Flicker-free uniform brightness
- Large, 0.40" high size digits are readable from distances of up to 25 feet
- Neon orange color that is easy on the eyes, readily filtered
- Low power ratio to character size (typically 7 mw. per segment)
- Low cost per digit
- AND, they're totally interchangeable with the panels you are now using
- Also available: Custom designs in from 3 to 16 digit formats

Pad No.	Connection	Pad No.	Connection

Connections are numbered from right to left. Special symbols are covered by Anode 1 (Pad No. 3). Anode connections are discernible with the aid of reflected light on face plate.

ELECTRICAL CHARACTERISTICS AT 25°C

Panel Voltage Drop
With Segment Cathode Current of 500 μA.... 145 VDC Typical
With Segment Cathode Current of 1500 μA.. 165 VDC Typical

Initial Ionization Time .... 5 Sec. Maximum

Peak Cathode Voltage .... −180 to −240 VDC (−200 VDC Typical)

(Prior to ionization, voltage between the anode and any cathode may equal this voltage and panel damage will not occur. Peak cathode current must, however, be limited to the absolute maximum rating stated.)

Cathode Off Voltage .... −35 to −120 VDC (−100 VDC Typical)

Cathode On Time is Digit Period Minus Total Blanking Time

Anode Off Voltage .... −30 to −120 VDC (−100 VDC Typical)

Cathode Blanking Interval .... 20 μSec. Minimum
(Interval between turn off of the previous cathode and turn on of corresponding next digit cathode)

Cathode Blanking Overlap .... 10 μSec. Minimum (25 μSec. Typical)
(Interval between turn off of anode for previous digit and turn on of cathodes for next digit)

Voltages are referenced to anode On voltage. All electrical ratings are absolute maximum values beyond which life of device may be reduced. Operating limits do not apply simultaneously — for example: Operation at maximum Segment Cathode Current of 1500 μA may require a longer blanking interval than the 20 μSec. minimum specified.

OPERATING CHARACTERISTICS

Plasma-Lux cold cathode, glow discharge display panels are designed for operation in a multiplexed mode. This is accomplished by the cathode drive and decoder circuitry time sharing among all digit positions. Like cathode segments for all digit positions are bussed. This results in only 12 cathode connections to the display: 7 **segment** connections, 1 **decimal point**, 1 **memory**, 1 **overflow**, 1 **comma** and 1 **minus** connection. There is a separate anode connection for each digit position. Characters are displayed by successively applying positive signals in sequence to the anodes corresponding to each of the digit positions. At the same time, negative signals are applied to the appropriate cathode busses.

OPTICAL CHARACTERISTICS

Color .... Neon Orange

Light Output .. 50 lm/ft² typical at typical operating conditions

TEMPERATURE

Ambient operating temperature .... 0 to +55°C

Ambient storage temperature .... −40 to +70°C

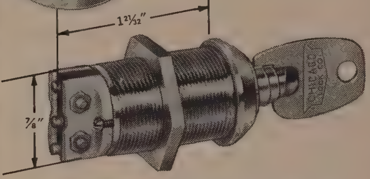
Maximum Security Switch Locks for Every Application

ACE® UL Switch Locks

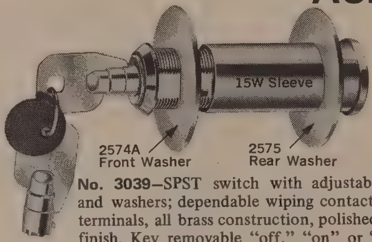
4900 Series
Underwriter's Listed
Ace Locks
20 tumblers



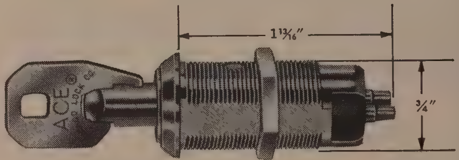
No. 4902—SPDT switch lock. Hardened steel cylinder mounted in a brass barrel 7/8" diameter; solder terminals, polished chrome finish.

No. 4901—(not shown) Same specs as 4902, except with adjustable sleeve and washers. Adjustable 1 7/8" to 2 3/4" thickness.

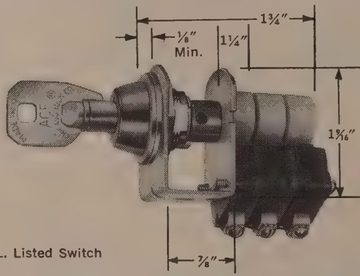
ACE® Switch Locks



No. 3039—SPST switch with adjustable sleeve and washers; dependable wiping contacts. Solder terminals, all brass construction, polished chrome finish. Key removable "off," "on" or "off-on." Also available in die cast outer barrel.

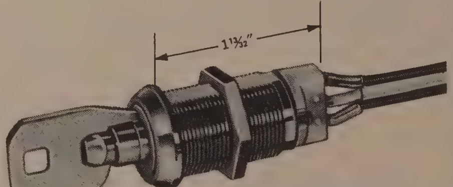


No. 4073—Maintaining contact switch. Key removable "off", "on" or "off-on". Also available as 4073-70 with momentary contact switch Barrel brass. Also available with die cast barrel.



U.L. Listed Switch

No. EXA-112-3—Heavy duty switch lock designed for applications requiring UL Listed switch. Snap action switch actuated by an eccentric cam when key turned 90 degrees. Multi pole combinations available.

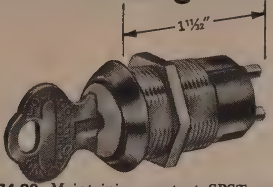


U.L. Listed Switch

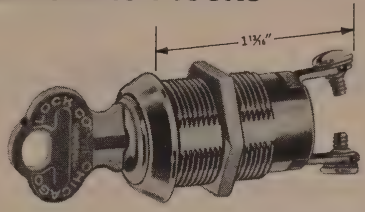
No. 4235—Easy to mount, UL Listed switch available with silver plated contacts and 10" wire leads.

CHICAGO LOCK CO.

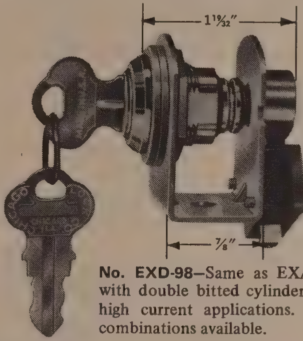
Chicago double bitted switch locks



No. 2274-80—Maintaining contact SPST switch employs wiping contacts. Polished chrome finish. Available with solder terminals as shown or with screw type terminals (No. 2174). Key removable "off", "on" or "off-on". Outer barrel available brass or die cast.

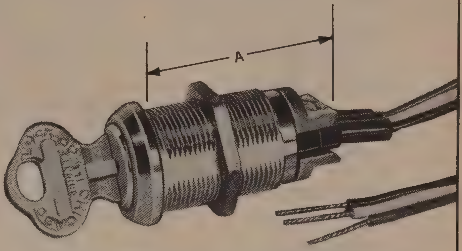


No. 2174-70—Momentary contact switch. Built-in spring returns switch to "off" as key is withdrawn. Outer barrel available brass or die cast.



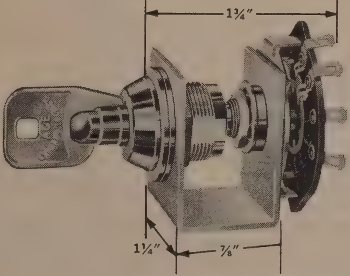
U.L. Listed Switch

No. EXD-98—Same as EXA-112, except with double bitted cylinder. Designed for high current applications. Multiple pole combinations available.

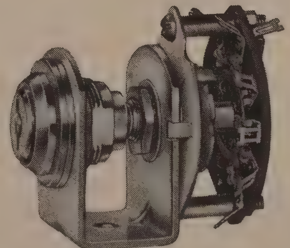


No. 3535—UL Listed switch, SPDT. Furnished with silver plated contacts and 10" wire leads. Same as 4235 except has double bitted cylinder.

Switch locks with wafer type switches



No. 4188—Key operated with bracket mounting and Ace cylinder. Switch designed for low voltage applications. Multiple poles and various throw arrangements available with stacked wafers. Available with double bitted lock No. 2242.



No. 2242—11 blade criss-cross tumblers. Lock unit assembled to wafer switch with bracket mounting. Shown with 2 pole 5 position switch, 2-way 180° key pull.

Same Dimensions as 4188

Current Ratings	Lock Numbers
*125-250VAC, 5 AMP; 30 VDC, 3 AMP	4901, 4902

policy governing blanket orders and scheduled shipments

Chicago Switch offers a lower price to induce you to place a larger order, scheduled over a period of time. This allows us to plan ahead. Long range planning affords economies of scale and economies of flexibility. WE OFFER TO SHARE THESE ECONOMIES WITH YOU. You may change your schedule if necessary, however a delay may cost you at least the price of money and possibly reflect the rising cost of materials and labor.

customer's responsibility

Blanket orders must be based upon a total quantity. Price quotations are applicable only to the total quantity. We reserve the right to fabricate and assemble the entire quantity at one time.

minimum shipments

When a shipping schedule is applied, the minimum quantity per monthly shipment shall be 10% of the total order, and valued at not less than $300.00. The resultant maximum schedule period does not exceed 10 months.

changes in shipping schedule

The entire quantity shall initially be scheduled by agreement. Schedules may be changed during the period to accommodate the customer's requirements. However, minimum monthly shipments must be maintained and prices may be subject to "shipping date increment" to cover cost increases. The entire residual balance must be shipped and billed at the end of the period.

decrease in quantity

If a decrease in quantity is negotiated before manufacture is completed, a revision of the prices may be required (as to quantities already invoiced, as well as to order balances) to conform to our existing price schedules. Also, a possible additional amount may be required to cover work in process.

Special Note: Unless otherwise specified, 2 place decimal tolerances are ±.010. 3 place decimal tolerances are ±.005.

minimum order $25.00

In order to maintain Chicago Switch's high standard of quality, prices and specifications subject to change without notice.

CONTROL SYSTEMS & COMPONENTS

engineering data

The conservative load and life specifications presented as part of this catalog serve as a guide in the selection of switches. Yet, in the majority of applications, one cannot find the specifications which precisely match his load — the variety and mix of parameters render such a listing impossible.

To find what you need, ask the switch manufacturer. Outline your load and life requirements:

- We will test to your parameters, if necessary.
- There is no need to under-design or over-design. Under certain conditions, a 1 amp switch may carry 5 amps; the reverse limitation may also be true. In effect, special criteria may expand the range or impose limitations on rated load and life expectancy specifications.

Our data files continue to grow. As we enter our third decade of experience, we offer increased efficiency and expertise in the design of small, miniature and sub-miniature switches.

DEFINITION OF TERMS

actuation force: See operating force.

ambient: The environment in which a switch operates.

breakdown voltage: (dielectric strength) The highest voltage the insulator can withstand without breaking down.

contact bounce: The time during switching in which electrical instability caused by the rebound of the contacts is observed (millisecond range).

contact rating: The capacity to carry an electrical load.

contact resistance: The resistance of a pair of contacts, measured at the terminals, which effectively appears in series with the load (milliohm range).

dielectric strength: See breakdown voltage.

dry circuit: See low energy.

duty cycle: The ratio of on-time to off-time.

end of life criteria: See life expectancy.

insulation resistance: (leakage resistance) The resistance between two normally insulated parts measured at a specified high D.C. potential (megohm range).

leakage resistance: See insulation resistance.

life expectancy: (useful life) Depends upon the end of life criteria for a specific application. In order to determine your failure criteria, the following parameters should be known:

- — breakdown voltage
- — duty cycle
- — mechanical breakdown
- — contact resistance
- — insulation resistance
- — operating force

low energy: (dry circuit, signal circuit) Definitions vary from a few microamps at a few microvolts to that power level at which no electrical effects such as arcing, melting or softening of contacts are associated with the switching. Low energy as listed in the catalog refers to test data obtained at 5-10 milliamps at 5-6 volts D.C. resistive. As in all our specifications, a conservative safety factor is included.

maintained switch: A switch which maintains the mode or position to which it is actuated.

momentary switch: (spring return) A switch which automatically returns to its original or at rest position.

operating force: (actuation force) The force required to transfer the switch from one position to another (gram range).

signal circuit: See low energy.

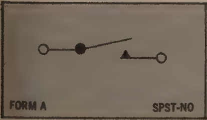
snap-action switch: A switch design whose characteristics tend to remove the control of the actual contact transfer (anti-tease) from the operator or actuator (generally for the purpose of quick make and break).

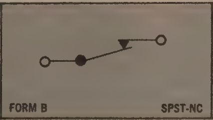
useful life: See life expectancy.

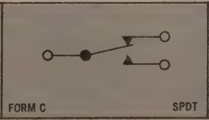
In summary, switches may be rated for a range of applications with electrical loads from low energy up to many amps. A single switch structure may cover a wide segment of the range with or without special contacts.

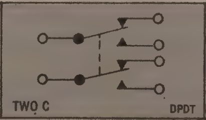
Tell us your needs. Given the details of the electrical load, we can probably supply your switch to live as long as your application requires. We will consider end of life criteria and environment in which the switch must operate.

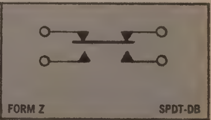
common switch circuits











Special Note: Unless otherwise specified, 2 place decimal tolerances are ±.010. 3 place decimal tolerances are ±.005.

CHICAGO SWITCH, INC. / 2035 WABANSIA / CHICAGO, ILLINOIS 60647 / (312) 489-5500

introduction

Chicago Switch Inc., located in Chicago, has been producing and supplying a broad line of quality switches for over 20 years. Advanced design engineering, automated assembly techniques and a rigid quality assurance program allows us to offer you the same fine quality at competitive prices, that we have provided for a select group of OEM users for over 2 decades.

Besides the large selection of stock switches offered, our engineering services are available to help custom design the exact switch for your application. Depending on quantities a custom switch may be ultimately less expensive.

All specifications listed in this catalog are subject to change without notice.

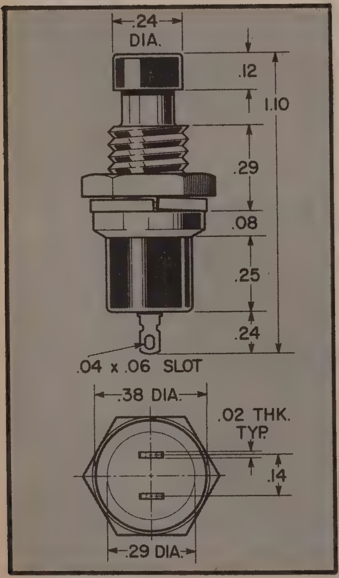
dimensions



DIMENSIONS IN INCHES

These attractive miniature pushbutton switches are ideal for use in applications requiring a SPST momentary action, such as business machines, appliances, communication equipment, vending machines and all applications where space, weight and low cost are of prime importance. These reliable switches are available in a variety of pushbutton colors and include necessary panel mounting hardware.

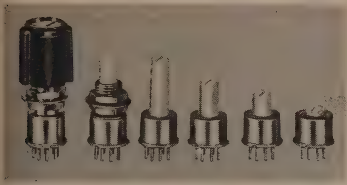
TO-5 rotary spasaver™ switch



- UP TO 8 POSITIONS
- WAVE SOLDERABLE
- GOLD CONTACTS
- COMPACT SIZE

This new sub-miniature rotary switch gets up to 8 positions into a TO-5 can. Gold contacts assure reliable switching over a long life. Mounting can be accomplished by wave soldering directly to P.C. board, by means of board sockets, or panel mounted with optional bushing. The actuator moves through 360° in detented steps of 45°. Also available with stops as required from 2 to 8 positions. Contacts will switch 0.5 amps at 125 VAC (will carry 3 amps) with an operating temperature range of −30°C to 100°C. The exploded drawing will give you an indication of the quality and engineering features of this switch.

The small compact size offers a distinct advantage, particularly in view of the increasing cost of P.C. board real estate and the premium on front or rear panel space. Now you know why we call it a SPASAVER™. With the hand wiring eliminated, the savings are even greater.

The use of glass to metal contact pin seals eliminates any contamination when using the latest wave soldering techniques. This method of soldering not only reduces the time of connecting, removes the possibility of connection errors, but assures uniformly good solder joints as well. A savings in itself.

Applications of switches of this type are widely varied. One of the more popular uses is in manually programming a single standardized P.C. board for test or multifunction usage. With the switch mounted near the access edge, using a thumb wheel, the board does not have to be removed to change function or program. This type of application is used in test equipment, process control equipment, computer peripherals input terminals and telephone switching equipment.

The panel mount bushing version also offers some unique advantages which are cost saving. After the switch or switches are P.C. mounted, the board can be panel mounted via the switch bushings.

standard leaf switch design guide

- **Infinite variety from modular tooling — standard**
- **Quality switching at low cost**
- **Fast delivery**
- **Field tested**

CHICAGO SWITCH custom designed leaf switches provide for low-cost, long life switching in phonographs, hi-fi's, radios, tv's, computers, business machines, electronic organs, vending machines and appliances. We would be pleased to custom-design standard switches to fit your application — without costly retooling or special designing. Because of our engineering, production and design facilities — and the versatility of our tooling — you can get the exact leaf switch to meet your requirements.

Actuation can be furnished in cam, roller, push button, rotor actuated — or any mechanical situation you require.

Contacts and lifters can be located on your switch anywhere along the blade length with increments of .001 of an inch, if necessary.

Contacts can be made of palladium, gold, silver, silver cadmium, 90-10, silver-plated — whatever material will do the best job.

Blade profile — Most industry standards and many specials are available from stock. Any profile can be made to your specifications. Blade material can be any of either the standard or exotic materials.

No matter what your requirements — CHICAGO SWITCH has the experience and facilities to produce leaf switches for you on both large and small orders — switches that are guaranteed to perform and produce to blueprint.

our design...

If CHICAGO SWITCH is to do the designing, give us as much of the following data as possible:

A. circuit

Number and kind of circuits required. When you need a SPST circuit, be sure to specify whether normally open (N.O.) or normally closed (N.C.); if SPDT, whether break-before-make (non-shorting) or make-before-break (shorting).

B. actuation

Kind of actuation required. Will you need a lifter . . . roller . . . cam follower? Will actuation be directly against a metal blade? A fiber-insulator blade?

C. load

Note the load each circuit in the switch is to carry. It determines contact size and material.

D. ambient

Required shelf life, duty cycle, ambient environment conditions — particularly if unusual. Contact material and, perhaps, plating might make a big, favorable difference.

E. stroke

Any critical places within the stroke — if there are any — where switching must occur or actuation force reach a specified level. How far will switch be stroked?

F. mounting

The side of the stack that is to be on the mounting surface, and the relationship to the point of actuation to the mounting surface and front mounting hole (the spacer hole nearest the blades).

G. stack height

Any limits there may be to height of stack.

H. U.L.

Whether the end use of your product requires U.L. approval.

or your design

If you want to do your own designing, you specify the prototype and we'll supply the samples for your approval, then handle the production runs.
What to Specify:

1. mounting centers

You have your choice of ¼″ mounting center with small spacers or with larger spacers, or ⅜″ mounting center or our new, miniature 3⁄16″ line (see page 1•2000).

2. blades

a. Length of each blade
b. Lug position of each blade
c. Thickness and material of each blade
d. Number of blades per switch
e. Preforms

3. contacts

a. Size and shape of each contact
b. Material of each contact
c. Which particular blade each contact goes on and the contact position on the blade

4. lifters

a. Shape of each lifter b. Length of each lifter
c. Which particular blade each lifter goes on and the lifter position on the blade

5. spacers

a. Size of each spacer
b. Position of each spacer in the stack

6. tubing

a. Inside diameter of tubing
NOTE: Only a #3 screw clearance diameter is available in ¼″ x ½″ spacers.

7. other information

a. Forms in blades (if any)
b. Sequence of switching (if necessary)
c. Brackets (if any)
d. Flexible fibre insulators (if any)

8. application information

a. Load c. Life requirement
b. Duty cycle d. Adverse ambient conditions

9. a sketch of the suggested prototype

90% of all leaf switches can be built by using these standard, already-tooled parts. By familiarizing yourself with them you can put together virtually any combination of switching circuits with low-cost leaf switches. Please use decimal-inch or fractional-inch dimensions, if possible . . . other notation if necessary.

blade lengths: Any blade length, contact position, lifter position, or form can be had in any .001″ from .156″ to 2.500″ from the center of the front mounting hole.

thickness: Any blade thickness from .006″ to .020″ can be had.

material: Both nickel-silver, and tinned phosphor bronze, the best all-around long-life spring materials, can be readily soldered to without pre-treatment.

For use with .250″ x .500″ spacers, the mounting holes are .156″ dia.

For use with .296″ x .562″ spacers, the mounting holes are .187″ dia.

fibre insulators: Flexible vulcanized fibre insulators for ¼″ mounting centers can be had in .010″ and .015″ thicknesses. Length from .125″ to 2.000″. .005″ thick insulators can be had in lengths up to 1.312″ maximum.

blade lengths: 1,500 different blade lengths can be had from .875″ to 2.375″ from the center of the front mounting hole. The same wide choice is available in contact hole positions (dimension "A"), lifter hole positions (dimension "B"), and form positions.

thickness: Any blade thickness from .006″ to .020″ can be had.

material: Both nickel-silver and tinned phosphor-bronze are available.

fibre insulators: Flexible vulcanized fibre insulators for ⅜″ mounting center can be had in .010″ and .015″ thicknesses and any length from .156″ to 2.000″.

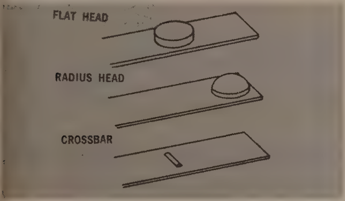
contacts



FLAT HEAD
RADIUS HEAD
CROSSBAR

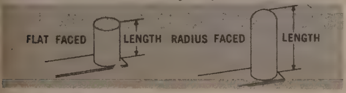
sizes: .017″ to .062″ thick, .109″ to .187″ dia. for round contacts, .019″ thick, .032″ to .125″ long for cross bar contacts.

material: Fine silver for commercial applications, No. 1 gold alloy or palladium for low-energy circuits, silver-cadmium or silver-cadmium oxide for weld and arc resistance, gold flash for shelf life.

stakings: Rivet head contacts are staked into holes in the blades. The staked shank itself can serve as a contact on the other side of the blade, behind the head. You may specify a flat, radiused or point stake, as you wish.

lifters

standard lifters are nylon, .187″ diameter



FLAT FACED
LENGTH

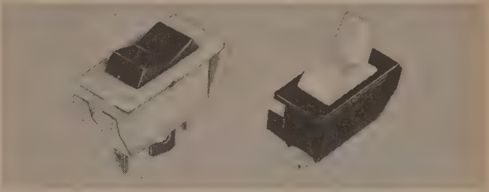
CONTROL SYSTEMS & COMPONENTS

single-pole rocker and paddle switches

26 series and P26 series—unlighted



- U.L. and C.S.A. listed rocker switches (26 Series unlighted) (U.L. File No. E 43318)
- Snap-in Installation
- Modern styling
- Wide range of color combinations
- Special colors, hot stamping and metal bezels available
- Matching panel lights and lighted switches available
- Solder, screw or slip-on terminals
- Low Cost

specifications

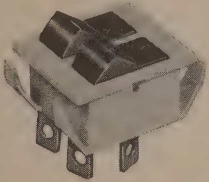
Contacts: silver-cadmium

Contact Rating: 26 series — 10 Amps inductive at 120 VAC
P26 series — 10 Amps inductive at 120 VAC

Breakdown Voltage: 2,000 V, 60 Hz min.
Features: heavy duty versions available

also available

- Two switches in one case. Specify by two part numbers. Such as: "26-290-102 + 26-280-103." Panel cutout 1.08″ x .96″.



- Switch plus a lens in one case.

MADE IN EUROPE

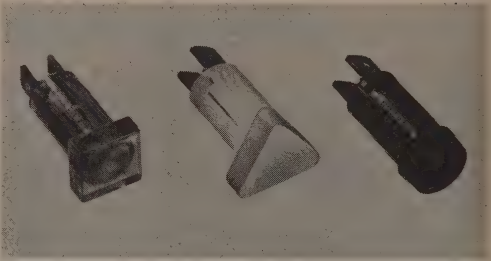
17-11 series

- U.L. listed versions available (U.L. File No. E 43668)
- ¼" wide slip on terminals — standard
- Available with square, triangular or round lenses
- Colors: red, clear, amber, green and white
- Chrome bezels available for round-faced versions

Also available: Versions with wire leads, solder terminals, and with two separate neon lamps.
Also other lamp ratings, 240 V neon versions, and hot stamping.



how to order:

17-11X-XXX

LENS STYLE CODE
- 1 — Round flat lens
- 2 — Round flat lens + chrome bezel
- 3 — Round flat lens + chrome ring
- 4 — Square lens

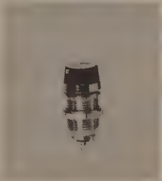
3 — 18-28 V incandescent
4 — 9-14 V incandescent
9 — No lamp (standard - for those who wish to assemble their own)

* Watertight versions.

* Watertight versions available with lens style 1, 5, 6 or 8 only
† Chrome bezel version available with lens style 1 or 5 only

33-70 series submidget-relampable

- For T-1 submidget flange-based lamps
- Hot stamping available
- Each has two sets of threads — one for lamp and lens replacing and one for panel mounting
- Mounts in 9⁄32″ dia. panel hole (hexnut supplied).



how to order:

33-70X-XX

BODY CODE
0 — Special long 2-terminal body (watertight w/neoprene washer)
1 — Special long 2-terminal body accepts T-⅞ as well as T-1 lamp
2 — Standard 2-terminal body
3 — Special body for watertight applications one neoprene washer)
4 — Special P.C. side-mount
6 — Special body with two insulated leads ½″ min. long. For lens styles 2 or 5 only. Built-in lamp non-replaceable *(see below).

LENS STYLE CODE
1 — Model S (standard) chrome ring
2 — Model T (standard) plain lens
3 — Model U (special) black side shroud
4 — Model V (special) fan-shaped panel illumination
5 — Model W (standard) chrome ring
6 — Model X (special) no lens for photoelectric applications - long cylinder
7 — Model Y (special) no lens for photoelectric applications
9 — Model P (special) has extended black side shroud

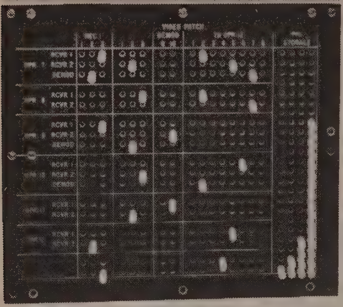
MATRIX PROGRAM BOARDS



CO-ORD Matrix Program Boards are composed of 2 to 8 decks of contacts that are bussed on .250 centers. The contact rows of one deck are usually oriented perpendicular to the rows of adjacent deck(s) so as to obtain switching crosspoints. Electrical connections of the bussed contact rows are effected by inserting shorting pins at the desired crosspoints; "CO-AX", phone plug type pins are available for networks which require component insertion (Diodes, resistors, etc.). Single board matrices of up to 11,000 crosspoints are available in standard or special arrangements. Bussed and isolated contacts can be had alone or in combination. Panels may be screened, engraved, or fitted with pre-punched templates for rapid program changing.

U. S. Patent No. 3,349,361

APPLICATIONS

- Computer memories
- Cordless patch panels
- Function generators (Analog/Digital)
- Power distributors
- Thermocouple signal selectors
- Circuit/Component test programmers
- Lighting systems (Special effects)
- Variable sequence selectors
- Variable diode matrices
- Code generators
- Traffic control panels
- Decade switches
- Vending machine control
- Numeric controlled machinery
- Data channeling and logging
- Communications distributors

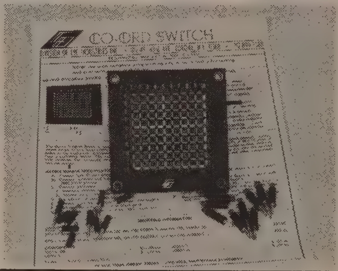
FEATURES

- Closed entry contacts
- High mechanical environment capacity
- Low interlead capacitance
- Attractive and uncluttered
- Compact package
- Standard sizes available
- Permits insertion of components into network without soldering
- Wide variety of switching combinations

SPECIFICATIONS

- Contact Resistance
  - a Total Pin Resistance: .004 OHM MAX.
  - b Volume Resistivity of Strip: .003 OHM/IN
- Breakdown Voltage: 1000 VRMS MIN.
- Current Capacity: 5 AMPS Continuous (up to 100 amps on special application)
- Materials:
  - a Plastic Parts: Black Phenolic XXX
  - b Flexible Contacts: Heat Treated Beryllium Copper
  - c Terminals: Brass
  - d Finishes: Gold, Silver or Nickel

PROGRAM BOARD KITS



KIT BPS-1 consists of a 10 x 10 matrix board similar to #63014-1, below. 10 shorting pins and 10 "CO-AX" diode pins with 1N270's installed $27.00

KIT BPS-2 is the same as BPS-1 but without diodes $22.25

10 x 10 matrix board	$17.00 ea.
Shorting pin	.12 ea.
Diode pin w/1N270	.99 ea.
Diode pin w/o diode	.51 ea.

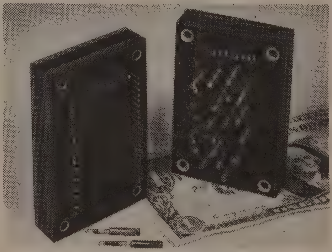
MINIATURE PROGRAM BOARD

.100 and .125 inch Center Line



TENTH INCH MATRIX
AT $.08 PER POINT

These Matrix Program Boards are designed to meet the increased technological requirements for miniaturization in electronic systems and equipment. They have all the same features of the larger matrices and can be supplied in from 2 to 4 decks of bussed contacts. Single matrix boards of up to 2500 crosspoints can be furnished in one solid unit, with rugged Shorting and CO-AX (diode) pins available for programming functions. A standard 2 deck matrix measures .315 inches thick from the front to rear panel; program pins are .280 inches long by .063 inches in diameter. Termination of the bussed contacts are to .040 diameter pin terminals, which allow the matrix to be plugged into mating female receptacles or connected to directly by wave, dip, or hard soldering. Contact resistance is only .005 ohms per crosspoint; breakdown voltage 600 VRMS; current capacity 3 amps continuous.

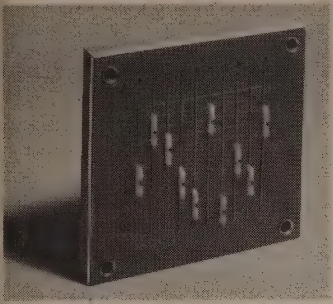
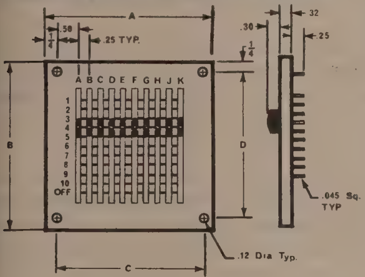
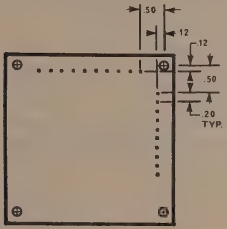
MATRIX SLIDE SWITCHES







CO-ORD Matrix Slide Switches are designed to provide reliable, low cost matrix switching for applications requiring manual data entry operations. These simplified, versatile switches are available in various ranges of standard sizes, with capacities including up to 25 outputs per switching line. Each output is controlled by a separate contact slider which in turn can provide as many as 25 positions (variations). Special designed Matrix Slide Switches can be supplied with as many as 5000 switching positions.

Switching quality and reliability is achieved through such advanced designed features as; positive detent positioning resulting from the unique individual GSD (Guide-Slide-Detent) Housing, panoramic viewing of the switching functions facilitating rapid circuit selection and minimizing data entry error, rugged solid block closed construction containing each contact and slider in a basic unitized assembly, electrical and mechanical integrity assured through the use of only the highest quality materials.

Matrix Slide Switch quick connections/disconnecting to the various input and output lines are accomplished with .045 square wire wrap terminals; these terminals can be either wire wrapped, wave solder on printed circuit cards, plugged into using standard female receptacles, or individually hard solder. Optional terminals can be offered to meet customers specifications. All Matrix Slide Switches are especially compact in size and can be mounted through four convenient mounting holes, one located at each corner of the switch.

The combined features of the CO-ORD Matrix Slide Switch makes it ideally suited for applications where data is to be entered at remote terminals such as test equipment programming, machine tool controls, programming of process controls, as well as numerious other applications.

SPECIFICATIONS

Electrical:

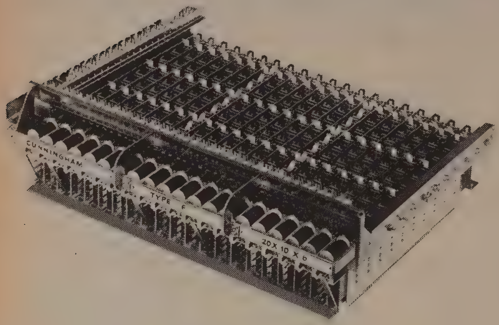
1. **Contact Life Expectancy .... 500,000 crosspoint operations**
2. **Contact Resistance @ 500 Ma, 6 VDC .... 15 Milliohms (Gold plated)**
   35 Milliohms (Nickel plated)
3. **Capacitance, between adjacent circuits .. 50 Picofarids (max.)**
   (Typical for standard 10x10 switch)
4. **Contact Current Rating: Switching .... 0.5 A, DC (max.)**
   Nonswitching .... 2.0 A per contact
5. **Insulation Resistance @ 500 VDC .... 1 x 10" Ohms**
6. **Dielectric Strength: AC .... 1.0 Kv (rms)**
   DC .... 1.5 Kv

Materials:

1. **Slide Contacts: Beryllium Copper, Alloy 25, Condition XHMS.**
2. **Slider: Nylon.**
3. **Face Plate: Brushed finished Aluminum.**
4. **PC Board and Conductor Strips: XXX Phenolic, 2oz. Copper Clad.**
5. **GSD Housing: Nylon.**
6. **Terminals: Phosphor Bronze.**
7. **Finish: Nickel .0001 (min.), or Gold/Nickel .00005 Gold over Nickel Flash.**
8. **Hardware: Nickel plated Brass.**

Write for Bulletin 1474

crossbar matrix switches



Cunningham crossbar switches have a minimum operating life of 20 million operations per crosspoint, due largely to their gold-alloy, self-wiping contacts. These, together with the beryllium-copper coordinate conductors, provide extremely low path resistance and minimal EMF. Insulation resistance is very high, while induced noise is virtually nonexistent. The crossbar actually covers a wider frequency band than any other comparable switching device, and handles low-level to high-power signals. Matrix switches from ten to three hundred 6 wire crosspoints.

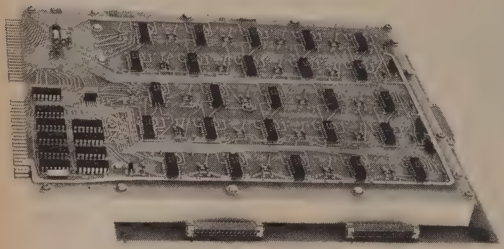
The Type A crossbar is a broadband group-to-group signal routing switch with coordinate actuation of the crosspoints.

The Type F crossbar is a coordinately actuated group-to-one matrix with the capability of connecting any one of a number of inputs to a single output or vice-versa.

The Type P crossbar is a broadband frequency group-to-group signal routing switch with direct actuator coils positioned above each crosspoint.

The Type T crossbar is a group-to-one switch that is ideal for handling low-level (microvolt) signals. Direct actuator coils are mounted above each crosspoint.

reed matrix switches



Two reed matrix models are available for high and intermediate frequencies. They are supplied in the 5x10 (50 crosspoint) configuration only. Crosspoints are interconnected to form a group-to-group switching matrix.

The high frequency (HF) model is a single-pole matrix for switching signals up to 60 MHZ. The multilayer signal board provides shielded signal paths with 50 ohm characteristic impedance. Input and output are through subminiature coaxial connectors. The coaxial cable shields are all tied together through the connector shells to a common ground. Only the center conductor is switched.

The intermediate frequency (IF) model can have one, two, or three poles at each crosspoint and can handle signals from DC to 4 MHz. Multipin connectors are used for input and output signal connections. For general purpose switching applications where the signal frequencies do not need the heavy shielding of the H.F. model.

for applications assistance call (716) 624-2000

SPECIFICATION	TYPICAL CROSSBAR MATRIX	TYPICAL REED MATRIX
Minimum Life:	2×10^7 operations per crosspoint.	10^8 operations per crosspoint.
Current Rating:	Switch 100 mA @ 50 VDC, carry 1.0 A.	Switch 100 MA @ 12 VDC, carry 1.0 A.
Contact Material:	Gold alloy 0.005″ thick.	Rhodium plated.
Contact Resistance:	Less than 30 milliohms.	Less than 300 milliohms.
Contact Stability:	Better than ±5 milliohms.	Better than ±150 milliohms.
Longest Path Resistance:	Less than 400 milliohms—in 30x10 matrix.	Less than 300 milliohms—in 5x10 matrix.
Thermal EMF's:	Less than 0.1 microvolt per °C.	Less than 1.0 microvolt per °C.
Insulation Resistance:	Greater than 100,000 megohms @ 45% R.H.	Greater than 100,000 megohms @ 45% R.H.
Breakdown Voltage:	1000 VAC, rms @ 60 Hz, 1500 VDC between conductors and frame or across open contacts at humidity below 45% R.H.	500 VDC between conductors or to ground, 250 VDC across open contacts at humidity below 45% R.H.
Frequency Range:	To 10 MHz w/—50 db cross-talk and 60 db isolation.	HF Series—to 50 MHz w/—60 db crosstalk and 60 db isolation. IF Series—to 4 MHz w/—60 db crosstalk and 60 db isolation.
Operate Time:	Less than 30 millisec.	Less than 4 millisec.
Release Time:	Less than 10 millisec.	Less than 2 millisec.
Contact Bounce:	Less than 400 microsec on make, not measurable on break.	Less than 100 microsec on make, not measurable on break.
Induced Noise:	Less than 5.0 millivolt.	Less than 100 microvolt.

matrix controller

The 1020 Controller interfaces a switch matrix to any 16 bit address device. Crosspoint connections can be programmed to latch or unlatch as required. CMOS logic is used to insure high noise immunity and low power consumption. Both local and remote control are featured. This standard interface component facilitates a wide variety of matrix applications as in automated testing or telemetry switching.

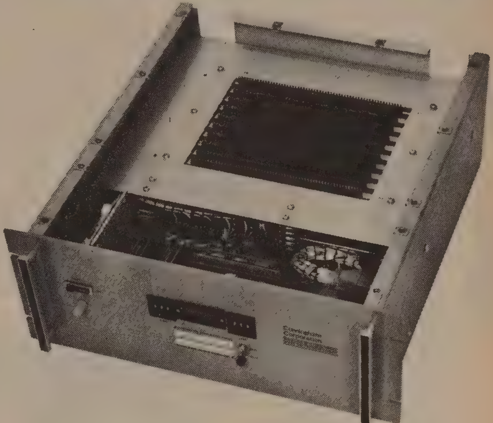
data acquisition scanners

Cunningham has developed two versions of the 2000 Series scanner for sequentially or randomly reading a number of instrument-level signals. One of these uses a crossbar while the other uses SC-10 reed cards for switching. The crossbar matrix switch is ideal for extremely low signal levels (Microvolts). The reed cards are best applied where scanning speeds exceed 50 channels per second.

Control, logic, and interfacing for both versions are performed by integrated circuitry to ensure compatibility with peripheral instruments. All levels are DTL and TTL compatible and each input represents only one standard load. Each output can accommodate 10 standard loads.

Front panel controls include single channel random access, single scan, continuous scan, scan limit switches, and single channel advance. A three-digit display shows which channel is being sampled, Either scanner can be remotely controlled, in which case the unnecessary controls may be omitted from the front panel.



SPECIFICATION 2000 SERIES	REED SCANNER	CROSSBAR SCANNER
Number of data channels	10-100 three-wire in increments of ten channel per plug in scanner card	600 one-wire, 300 two-wire, 200 three-wire, 100 six-wire
Contact resistance	< 100 milliohms	< 50 milliohms
Contact stability at maximum ratings over life	± 2.0 Ohms	±10 milliohms
Initial data path resistance	< 300 milliohms	< 250 milliohms
Thermal EMF's +25°C — +50°C	< 1.0 microvolts/ °C	< 0.1 microvolts/ °C
Open contact capacitance	0.2 pf	0.3 pf
Contact ratings resistive loads	500 milliamps at 200 VDC	100 milliamps at 50 VDC
Open contact breakdown voltage	250 VDC	1500 VDC
Insulation resistance at 95% R.H.	100,000 Megohms	100,000 Megohms
Scan rate	to 200 ch./Sec.	to 40 ch./Sec.
Contact bounce	< 500 microseconds	< 400 microseconds
Contact dwell time at maximum speed	> 2.3 milliseconds	> 7 milliseconds
Expected life at rated loads	10 Million closures/ch.	20 Million closures/ch.
Logic levels	Logic "1" = 4.0 ±1.0 Volts Logic "0" = 0.4 ±0.4 Volts	Logic "1" = 4.0 ±1.0 Volts Logic "0" = 0.4 ±0.4 Volts
Power consumption	45 Watts	50 Watts
Operating temperature range	0°C to 70°C	0°C to 60°C
Signal input connectors*	1 Winchester 50 Pin/Card	20 Cunningham SP-1173
Signal output connectors*	Winchester 4 Pin	20 Pin
Control connectors*	56 Pin	56 Pin
Dimensions	3.5″ High, 22″ Deep, 19″ Wide - front panel	7″ High, 22″ Deep, 19″ Wide-front panel
Weight	21 Lbs.	30 Lbs.
Weight - Packed for shipment	36 Lbs.	45 Lbs.
Contact material	Rhodium plate	Solid gold — .005 in. thick.

* Mating connectors are supplied.

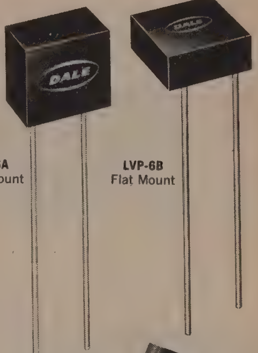
DEPENDABLE DALE® SURGE ARRESTERS

SERIES LVP-6 *Low Voltage Protector*



Designed to mount on printed circuit boards to protect solid state circuitry from transients appearing on low voltage DC circuits. Nanosecond response. Automatically restores circuit to normal when transient has passed. Transients substantially above rated surge current cause failure of the LVP-6 in a shorted condition—still safeguarding valuable circuit components.

PROTECTIVE CAPABILITIES

Clamping Voltage: 6.2, 6.8, 7.5, 8.2, 9.1, 10, 11, 12, 13, 15 volts.
Shunt Capacity: 15 μf.
Operating Temperature: −55° C to 85° C
Storage Temperature: −55° C to 125° C

PHYSICAL SPECIFICATIONS

Body Dimensions = .500″ L x .500″ W x .312″ H.
Lead Dimensions = 1″ ± 1/32″ L x .032″ dia.

SERIES SPA *Secondary Power Arrester—UL Listed* (Model SPA-100)

Designed for fuse or junction box mounting to protect against direct or indirect lightning and other transient voltages. Unit has hermetically sealed pre-ionized spark gap for increased sensitivity and stable breakdown voltage level. Exceeds applicable NEMA, USAS, and IEEE standards. Conforms to lightning protection requirements of **Occupational Health and Safety Act.**

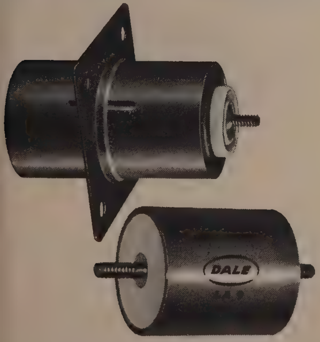
PROTECTIVE CAPABILITIES

DC Arc-Over Voltage: SPA-100 (120 VAC) < 700 VDC; SPA-200 (277 VAC) < 900 VDC; SPA-400 (400 VAC) < 3000 VDC. **Fast Rise Arc-Over Characteristics:** Typically 1500 volts with 10KV/μsec. pulse applied; **Bypass Capability:** Will withstand repeated 10KA, (10x20 μsec.) current surges. Power follow current extinguished in ½ cycle or less. Voltage between terminals less than 2000 volts (2500 volts SPA-400) when conducting 10,000 amps of surge current. **Insulation Resistance:** Greater than 100 megohms. **Shunt Capacity:** Less than 25 pf.

PHYSICAL SPECIFICATIONS

Overall dimensions: (SPA-100 & SPA-200) 1¾″ D x 2-15/16″ L; (SPA-400) 1-55/64″ D x 3⅞″ L. Two 18″ leads provided for circuit connection. Has ½″-14 NPSL conduit fitting with nut for mounting in any position indoors or outdoors

SERIES LA *Miniature Size—Maximum Circuit Protection*



Patented design insures much greater reliability and repeatability than standard spark gap designs. Widely used to protect communications equipment from lightning and to guard industrial controls and electronic equipment from heavy transient spikes.

PROTECTIVE CAPABILITIES

Spark-Gap Arc-Over Voltage: LA20 = Factory adjustable from 500 to 6000 VDC, ±20% standard (10% available). LA9 = Factory adjustable from 500 to 5000 VDC, ±20% (10% available). **Bypass Capability:** LA20 = 50 current surges of 2000 amps peak 1x2 millisecond wave shape (2 coulombs). LA9 = 100 current surges of 300 amps peak 2x4 millisecond wave shape. **Insulation Resistance:** Greater than 1000 megohms initially and greater than 10 megohms after rated current surges. **Shunt Capacity:** LA20 = 8 mmfd, LA9 = 3.5 mmfd.

PHYSICAL SPECIFICATIONS

LA20 = 3-3/8″ outside length. Body 2-1/16″ L x 1-1/4″ D. Weight: 5 oz. LA9 = 1-5/8″ outside length. Body: 1″ L x 3/4″ D. Weight: 2 oz. **Mounting:** Clip, stud or flange. **Terminal:** LA20 = 6-32, 8-32, 10-32 stud or wire; LA9 = 4-40 stud or wire. **Seal:** LA20 and LA9 hermetic.

ADDITIONAL MODELS

- Aircraft lightning arresters of all types
- Arresters for high voltage circuits
- Miniature transient suppressors for circuit board mounting.

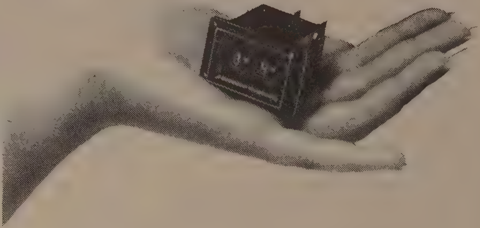
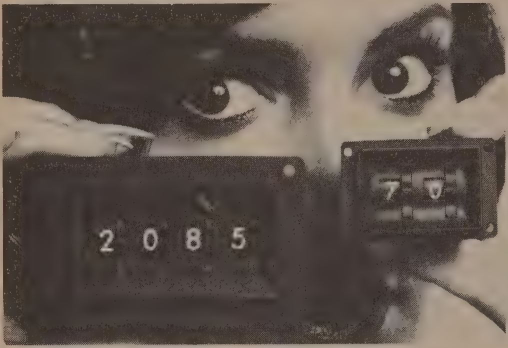
Complete lightning laboratory facilities and engineering assistance available to develop your applications.

DIGITRAN® DIGITAL

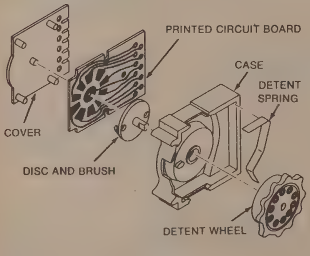
From Hi Rel, QPL Listed Items to Low Cost Commercial Switches, The DIGITRAN® Company, Originators of the DIGISWITCH,® the first Switch of its Type Anywhere, Manufactures the Broadest Line of Digital Switches in the World.





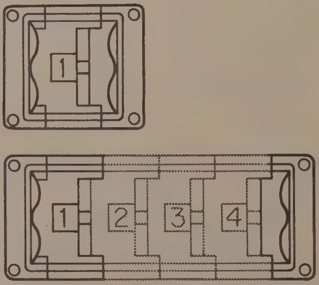
The trademarks DIGISWITCH and MINISWITCH have become almost generic terms for thumbwheel switches. The name DIGISWITCH came first. MINISWITCH was developed later to fill the growing demand for miniaturized devices. Both are popular standards, and some versions are QPL approved to MIL-S-22710.

Construction



The simplicity of design using the least possible number of moving parts provides excellent reliability. A single printed circuit board contains the commutator and output terminations. All electrical surfaces are precious metal alloy for low contact resistance and long shelf life.

Modular Units



Each self contained switching unit locks perfectly with another of the same style. Standard end brackets fit at each end, and the assembly is held together by either threaded shafts or with a snap-on stainless strap. You don't have to assemble them. We do it for you at the factory by standard part number and provide the mounting hardware too.

Codes

Our thumbwheels provide direct conversion from dial settings to coded electrical outputs. Single pole, or multi-pole, shorting or non-shorting, binary-coded octal, binary-coded decimal, with or without complement, and straight decimal output are standard off-the-shelf conversions available in most series of Digitran switches.

Hundreds of difficult coding requirements have been solved for our customers. Special requirements of all kinds are designed and put into production. If you have a unique coding problem, let us help you solve it. In fact, we may already have the code you want in our files . . . ready to use.

Send for our wall chart which depicts over 50 of the codes available.

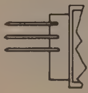
NATIONWIDE REPRESENTATIVES AND DISTRIBUTORS!

THE LARGEST SELECTION OF CODES AVAILABLE!

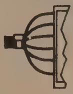
Options

Printed Circuit Board Terminations

- Mate with P/C connector
- Plated thru-holes or eyelets



- .025″ square Wire Wrap* posts.
- Tapered tab terminals.
- Turret terminals.
- Special pin terminals for dip soldering.



- Wire leads

*A Registered Trademark of the Gardner Denver Company.

Replaceable Dial Lighting

If you need dial lighting, it is readily available. Our replaceable lighting system meets the high intensity requirements of MIL-P-7788D. And standard MS-24515 lamps or commercial grade lamps at your option may be supplied with the switch.

Special Dial Markings

Mathematical symbols, [±, X, ÷], directional characters or alphabetical letters, and multiple characters [10's, 100's, ON, and OFF] are available as options on most series.

In addition to special dial markings, switch cases and spacers can be ordered with any desired special marking. Degree, second and minute signs are common requests.

FEATURES AND OPTIONS CHART

This chart is only a guide to assist in determining which switch series outlined is available with the features and options suited to your application. For details contact Digitran.

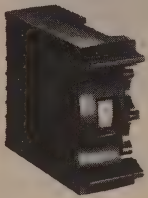
DIGITRAN® DIGITAL

SERIES 200 & 700

MINISWITCH®

8, 10, 12 DIAL POSITIONS

QPL approved to MIL-S-22710/15 & /20



The Series 200 has potted wire lead terminations, and the Series 700 has a P/C board extending from the rear of the switch. Both can be completely sealed. The 700 Series can be furnished unsealed but with the dust proof feature for commercial or non-critical applications. Note that both are physically identical, and therefore may be mixed in one complete assembly with end mounting brackets.

Price range in 1,000 piece quantities (Series 200): $12.00 - $16.00 each.

Price range in 1,000 piece quantities (Series 700): $6.40 - $16.00 each.

SPECIFICATIONS

Operating Force	7 to 12 ounces
Rated Electrical Loads	115 volts A.C. or 28 volts D.C. at 125 milliamps. Non-switching load 3 amps max.
Initial Contact Resistance	(Series 200) 0.2 ohms max. (Series 700) 0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	750 volts RMS
Vibration	MIL-STD-202 method 204, test condition B 15G
Shock	MIL-STD-202, method 213, test condition 1 100G
Life	Over 1,000,000 detent operations
Operating Temperature	—65°C to +85°C
Weight	2/5 ounce per module (approx.)
Standard Color	Non-glare, matte black case and end brackets. Satin black wheel and dial with white characters.
Dial Character Height	0.170 (8 or 10 position)
Moisture Resistance	Per MIL-STD-202, method 106
Thermal Shock	Per MIL-STD-202, method 107, test condition A
Salt Spray	Per MIL-STD-202, method 101, test condition B
Series 200 and 700 are QPL approved to	MIL-S-22710C/15
Series 700 dual lamped units are QPL approved to	MIL-S-22710C/20

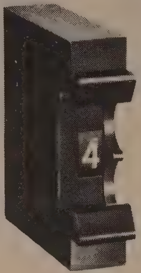
SERIES 300

DIGISWITCH®

8, 10, 12, 16 DIAL POSITIONS

QPL approved to MIL-S-22710/11



This one module shown is our standard, general purpose unit. When grouped together with end brackets, the assembly is installed through a cut-out from the rear of the panel. Simple mounting screws are required. Note that the DIGISWITCH, which is the largest of all our switches, can be supplied with up to 16 dial positions.

Price range in 1,000 piece quantities: $4.00 - $9.60 each.

SPECIFICATIONS

Operating Force	7 to 10 ounces
Rated Electrical Loads	28 volts A.C. or 28 volts D.C. at 125 milliamps. Non-switching load 3 amps max.
Initial Contact Resistance	0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	1000 volts RMS

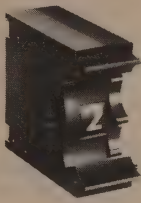
SERIES 8000

MINISWITCH®

8, 10, 16 DIAL POSITIONS



This switch is a miniaturized version of the Series 300 DIGISWITCH. It is mounted from the rear of the panel with four mounting screws and, like the DIGISWITCH, can be grouped with end mounting brackets into as many switching units in a row as desired. Like most of our thumbwheel switches, the MINISWITCH will give you over 1,000,000 reliable detent operations.

Price range in 1,000 piece quantities: $3.60 - $6.40

SPECIFICATIONS

Operating Force	6 to 11 ounces
Rated Electrical Loads	115 volts A.C. or 28 volts D.C. at 125 milliamps. Non-switching load 3 amps max.
Initial Contact Resistance	0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	750 volts RMS
Vibration	MIL-STD-202 method 204, test condition B 15G
Shock	MIL-STD-202, method 213, test condition 1 100G
Life	Over 1,000,000 detent operations
Operating Temperature	—65°C to +85°C
Weight	⅓ ounce per module (approx.)
Standard Color	Non-glare matte black case, end brackets, wheel and dial with white dial characters
Dial Character Height	0.200 (8 or 10 position)
Designed to meet	MIL-S-22710/19

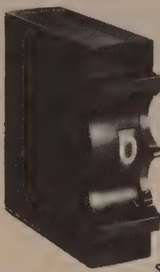
SERIES 9000 & 19000

DIGISWITCH®

8,10,12,16 DIAL POSITIONS

SERIES 9000, QPL approved to MIL-S-22710/12



All switching characteristics are the same as the Series 300 above, only these two modified standards are sealed as follows:

The Series 9000 is completely sealed. Excellent for use on machines or equipment that are exposed to heavy concentrations of liquids such as oils or water. Further, on, you will see that our MINISWITCH also comes in a sealed version. Consider this, however, if your application requires the operator to wear heavy protective gloves, this larger (.6" wide) switch might be more practical. The Series 9000 is QPL approved to MIL-S-22710.

Series 19000 is unsealed, but is considered "dust proof".

Price range in 1,000 piece quantities: (Series 9000): $7.20 - $15.20 each.

Price range in 1,000 piece quantities (Series 19000): $4.80 - $12.80 each.

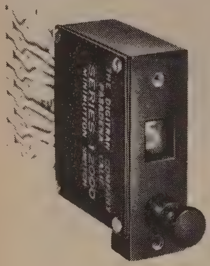
DIGITRAN® DIGITAL

SERIES 12000
MINIBUTTON
8, 10 DIAL POSITIONS



The pushbutton switch has been used on a great number of military applications. Gloved pilots can easily make precise settings with a push of the finger. Each push of the button actuates the switch to the next digit in rotation. The case is metal for grounding purposes, and can be completely sealed. As is the case with most of our switches, dial lighting is available.

Price range in 1,000 piece quantities: $12.80 - $13.50 each.

SPECIFICATIONS

Operating Force	30 to 60 ounces
Rated Electrical Loads	28 volts A.C. or 28 volts D.C. at 125 milliamps. Non-switching load 3 amps max.
Initial Contact Resistance	0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	750 volts RMS
Vibration	MIL-STD-202 method 204, test condition B 15G
Shock	MIL-STD-202, method 213, test condition 1 100G
Life	1,000,000 strokes at +85°C
Operating Temperature	—65°C to +125°C
Weight	½ ounce (approx.)
Standard Color	Non-glare matte black with white dial characters
Dial Character Height	0.170
Moisture Resistance	Per MIL-STD-202, method 103
Thermal Shock	Per MIL-STD-202, method 107, test condition A
Salt Spray	Per MIL-STD-202, method 101, test condition B
Designed to Meet	MIL-S-22710/17

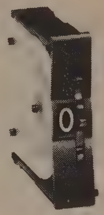
SERIES 23000
"SNAP-IN" SLIMSWITCH
10 DIAL POSITIONS



Our newest addition to the MINISWITCH line. Series 23000 is the economy leader of the digital switch industry. They cost less to buy, less to assemble, less to install. They conserve panel space, too. Using our unique assembly strap, switch assemblies are quickly and easily put together without using tools.

SNAP-IN panel mounting eliminates the need for installation hardware and tools and allows you to relax panel cut out tolerances. The molded-on bezels cover irregular panel cut outs, chipped paint and surface abrasions.

Switch module width is only .315" (8mm) so you can put more switches into a given space with better readability. That's why we call the Series 23000-the SLIMSWITCH.

Price range in 1,000 piece quantities: $2.00 - $3.20 per assembly.

SPECIFICATIONS

Operating Force	4 to 8 ounces
Rated Electrical Loads	28 volts A.C. or 28 volts D.C. at 50 milliamps resistive, at 25°C (77°F). Non-switching current limit: 2 amps
Initial Contact Resistance	0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	500 volts RMS
Vibration	5 G's 70-2000 cps; .06 in. double amplitude, 10-70 cps
Shock	100 G's, 6 millisecond duration, sawtooth.
Life	Over 1,000,000 detent operations at 25°C (77°F)
Operating Temperature	−20°C to 65°C
Standard Color	Case, wheel and end brackets, black or Grey semi-matte as molded. Dial markings, white on black or black on Grey hot-stamped per detail specifications.
Dial Character Height	0.170"

SERIES 24000

DIGILEVER®

10 DIAL POSITIONS

QPL approved to MIL-S-22710/24

Brand new for 1972. This little toggle or paddle handle switch mounts in a panel cut-out with two screws. You can mount a row of them in one large cut-out, or mount them in a series of individual cut-outs. By actuating the toggle in either direction, the digits click in view, in sequence. And, you will like the short arc between each position. It's faster than ordinary toggle and thumbwheel switches. The front face is completely sealed so that with a mounting gasket, your equipment will be properly protected against contamination from the front of the panel.

Price range in 1,000 piece quantities: $12.80 - $13.60 each.

SPECIFICATIONS

Operating Force	15 to 30 ounces
Rated Electrical Loads	28 volts D.C. at 125 milliamps. Non-switching load 3 amps max.
Initial Contact Resistance	< 100 milliohms between common terminal and output terminal
Insulation Resistance	1000 megohms
Dielectric Strength	750 volts RMS
Vibration	MIL-STD-202 method 204, test condition B 15G
Shock	MIL-STD-202, method 213, test condition 1 100G
Life	Over 1,000,000 detent operations
Operating Temperature	—65°C to +75°C
Weight	3/5 ounce per module (approx.)
Standard Color	Non-glare black. Dial: Satin black. Dial Markings: White.
Dial Character Height	0.200″
Moisture Resistance	Per MIL-STD-202, method 103
Thermal Shock	Per MIL-STD-202, method 107, test condition A
Salt Spray	Per MIL-STD-202, method 101, test condition B
QPL approved to	MIL-S-22710/24

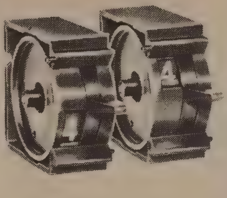
SERIES 28000

MINILEVER®

10, 12 DIAL POSITIONS



The MINILEVER is a comparatively new innovation to thumbwheel switches. Each module is actuated by a geared type lever. By moving the lever in either direction, you can instantly position the digits from zero (0) to ten (10), or zero (0) to twelve (12). For instance, they have been used on credit checking machines. The operator can set up the customers' credit card number rapidly, then push a button and check the customers' credit. He can then instantly reset all digits back to zero with one sweep of the hand. We also have a special version where the reset of all digits back to zero is done with one separate lever. A great switch for peripheral computer equipment.

Price range in 1,000 piece quantities: $4.00 - $8.00 each.

SPECIFICATIONS

Operating Force	4 to 8 ounces
Rated Electrical Loads	28V (D.C.), 50 m.a. per common terminal. Non-switching current limit: one amp. All specs applicable after life at rated load.
Initial Contact Resistance	0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	500 volts RMS
Vibration	MIL-STD-202 method 204, test condition B 15G
Shock	MIL-STD-202, method 213, test condition 1 50G
Life	Over 1,000,000 detent operations
Operating Temperature	—40°C to +71°C
Weight	½ ounce per module (approx.)
Standard Color	Case, end brackets, detent lever: Non-glare black. Dial: Satin black. Dial Markings: White.
Dial Character Height	0.200 (10 or 12 position)

DIGITRAN® DIGITAL

SERIES 29000

ECONOMY MINISWITCH®

10, 12 DIAL POSITIONS

Here is our new little money saver. Although slightly derated electrically from our Series 8000 MINISWITCH, certain mechanical and material changes have reduced the selling price considerably without reducing quality. If you have an application where the ultimate in low cost is mandatory, this is the switch. This switch is also sealed against normal exposure to dust and other dry contaminants.

Price range in 1,000 piece quantities: $2.40 - $3.60 each.

SPECIFICATIONS

Operating Force	4 to 8 ounces
Rated Electrical Loads	28 Vac or 28 Vdc at 50 m.a. at 25°C (77°F). Non-switching load 2 amp max.
Initial Contact Resistance	0.1 ohms max.
Insulation Resistance	1000 megohms
Dielectric Strength	500 volts RMS
Vibration	15 G's 70-2000 cps; .06 in. double amplitude, 10-70 cps
Shock	100 G's, 6 millisecond duration, sawtooth.
Life	Over 1,000,000 detent operations at 25°C (77°F)
Operating Temperature	0°C to +65°C
Weight	¼ ounce per module (approx.)
Standard Color	Beige case and end brackets with black dial characters. Black case with white dial characters on special order.
Dial Character Height	0.200″

DIGIVIDER/DIGIDECADE

DIGIVIDER is a thumbwheel switch that has been converted into a voltage divider. When you dial the voltage setting you desire, that's precisely what you get as an output. You can also order a model that provides high resolution trimming in the least significant digit.

DIGIDECADE is also a thumbwheel switch, only it has been converted to a resistance decade. You dial the output resistance you want and that's precisely what you get.

Why a DIGIVIDER or a DIGIDECADE? Easy. Displaying a series of large digits is generally more accurate than fine line settings required on a potentiometer.

Where precise, repeatable digital setting of voltages or resistances are desired, DIGIVIDER voltage dividers and DIGIDECADE resistance decades provide an optimum design solution well within the limits of equipment design budgets. In addition to presenting a more attractive and sophisticated appearance on your control panel, the DIGIVIDER and DIGIDECADE provide much tighter accuracies than can be achieved with a 10-turn potentiometer.

The unique, error-free *digital setting* wheel provides positive detent action for setting ease and absolute resettability. *Parallel entry* provides a speed of setting unknown to serial entry type devices, while *inline readout* reduces both reading and setting errors. *Modular construction* offers additional design flexibility, as well as ease of installation and savings in control panel space.

In addition, DIGIVIDERS and DIGIDECADES provide *excellent contact resistance stability* and *MIL-Spec switching reliability* (MIL-S-22710.) Reliability, stability and long life are assured through use of redundant precious metal alloy contacts and special printed circuit boards in certain series of switches.

Design flexibility is a feature of both DIGIVIDER and DIGIDECADE, with virtually unlimited choice of electrical characteristics, plus all the additional features of standard DIGITRAN thumbwheel switches. Specify dial stops, decimal points, lighted dials, lighted or movable decimal points, spacers with special markings or symbols. Banks of DIGIVIDERS or DIGIDECADES in a single assembly may be visually separated by spacers or vertical lines, colons or words. RFI shielding and panel sealing are also available. DIGIVIDERS and DIGIDECADES are available in all Digitran Switch Series.

Price range in 1,000 piece quantities (both DV & DD): $18.11 and up.

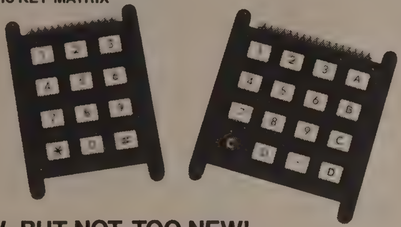
SERIES KL
MINIKEY

LOW PROFILE KEYBOARDS
12 OR 16 KEY MATRIX



NEW, BUT NOT TOO NEW!

After producing 100's of thousands of these highly reliable, miniature keyboards for the Electronic Calculator Industry, Digitran is now releasing two standard versions of the MINIKEY for general sale.

Low profile . . .
MINIKEYS are less than 5/16" high from the top of the key to the rear surface, yet key stroke is almost 1/16".

Tactile Feel . . .
Key operation is positive, natural and quiet . . . the ideal "tactile feel" for keyboards of this type. This excellent tactile feel is the result of "keyswitch design" instead of adding simulator mechanisms.

Reliability . . .
MINIKEYS are made to last over 1,000,000 operations per key, (MTBF) when switching a 50 milliamp resistive load at 28VDC. Precious metal contacts ensure contact closure and reliable performance in "dry circuits" and "logic circuits" as well as at maximum load carrying capacity. A moisture barrier protects the contacts from liquids and dust.

Versatility . . .
MINIKEYS may be used just about anywhere Key operated digital control is required.

- Mounting provisions may be standard or optional within standard dimensions.
- Frame and key colors may be specified by the user, at extra cost.
- Special key legends may be specified by the user, at additional cost.
- Two basic frame designs provide the user with a maximum of 12 Keys in a 3 x 4 Key matrix or 16 Keys in a 4 x 4 Key matrix.
- Electrical terminations with Printed Circuit or Pin terminations are standard. Special terminations provided at additional cost.

SPECIFICATIONS

Electrical Data

Contact rating	50 ma @ 28VDC resistive
Contact resistance	500 milliohms max @ .2 ma @ 17VDC
Insulation resistance	250 megohms min.
Dielectric Strength	250 VAC min @ 60Hz
Contact bounce	3 milliseconds, max.
Operating life	1,000,000 operations per Key, MTBF, @ 28VDC, 50 milliamp resistive load

Mechanical Data

Terminations	Per detailed specifications
Key actuation force	90 ±30 grams
Key travel	.050" nominal
Key overtravel	30% of Key travel, nominal

Materials & Finishes

Keytops	2-shot molded ABS with white keys and black legends are standard.
Housing	Molded ABS, black with textured finish is standard.

Environmental Data

Operating temperature	+32°F, (0°C) to +131°F, (+55°F)
Storage temperature	–40°F, (-40°C) to +160°F, (+71°C)
Relative humidity	0 to 95% (Non-condensing)

DUNCAN Dual In-Line Slide Switch DIP-500

THE WIZARD!

DIP-500 Slide Switch consists of multiple slider-type single pole, single throw switches, in a DIP package with leads on .100 by .300 centers.

For greater convenience and economy, the Duncan Dual In-Line Slide Switch is designed to be serviced or test probed from the top of a PC board. This completely eliminates awkward maintenance and testing from beneath. And once in place, it can be tested without removal from the PC board.

Another unique feature — Duncan's DIP-500 Sliders can be mechanically programmed. This is a major advantage particularly in highly complex circuitry. With its standardized DIP dimensions, it ideally lends itself to **automatic insertion** into circuit boards — and is available in plastic tube holders for automatic insertion equipment.

Model DIP-500 is a high density low profile switch which mounts in the same space as IC DIP packages. It may be wave or dip soldered directly to a PC board, or inserted into a DIP socket, and is available in a wide range of sizes — from 4 to 10 poles. It features a housing of Diallyl-Phthalate which resists cleaning solvents.

The new DIP-500 is especially useful as a selector switch in high density packaged equipment; in automated test equipment, as a programming switch where frequent changes of programs are necessary and programming is set manually; in filter network frequency response and bandwidth adjustment; in time delay relays; and in delay line matching equipment. Applications of this switch are virtually unlimited.

LIGHTED PUSH-BUTTON SWITCHES / INDICATORS

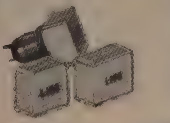
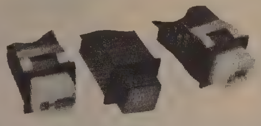
NEW DESIGNS TO ADD TO YOUR PACKAGING HORIZONS

INTERCHANGEABLE PUSH-BUTTON LENS/FILTERS AND BUTTON SHAPES



Displays may be changed or buttons replaced with these non-wearing, clear acrylic interchangeable lens and filter buttons. Legends may be easily changed. Series L150 replaceable lenses may be ordered to provide matching color or numbers with other manufacturers switches.



Choice of push-button shapes and lighting designs enables virtually any tailoring of standard switch or indicator light to meet specific requirements. Standard button or button with opaque sides to prevent light spill-over, or popular keyboard/contoured configuration provides to right appearance and function design. Choice of standard colors and over 30 different sizes, from ½" to 1½", in all popular configurations may be specified.

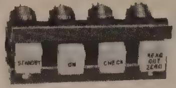
CHROME BARRIER

SERIES 500 WITH INTERLOCK

Added beauty and long-lasting appearance with handsome chrome barriers between each switch or indicator. Independent or interlocking action. Ten types of tracking action and switching sequences. Up to 12 switches in single or dual row, ⅞" or 1" centers.

SUB-PANEL SWITCH ASSEMBLIES

SERIES 400 WITH INTERLOCK



Multi-station switch assemblies designed for sub-panel mounting by means of a flanged "U" channel. All standard ELECTRO-MECH switches can be incorporated with several types of mechanical interlocking/lockout actions between stations. Up to 12 stations in one or two row configurations.

electro-mech quality designs *IN A COMPLETE FAMILY OF* STANDARDS AND SPECIALS

ELECTRO-MECH places emphasis on a tradition of special switch designs to answer unique applications. SUDS — **SPECIAL UTILITY DESIGNS** plan — invites special requirements. Multiple functions, interlocking, matrix systems, flush switch button panels.

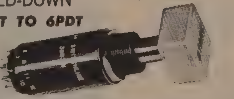
SOLENOID HOLD-DOWN

SPDT TO 6PDT



Switchline Illuminated Pushbutton switches with an integral hold-down coil which is activated with switch. Holds the push-button in the depressed position until coil is de-energized returning it to relaxed position. Available in all circuit configurations up to 6PDT. Same specifications as standard model.

MINIATURE FRONT PANEL MOUNT MOMENTARY SWITCHES

SERIES 5000

An exceptionally short momentary switch available in circuit configurations up to 2PDT. Clear anodized case. All specifications same as standard model except plunger travel which is 3⁄32".

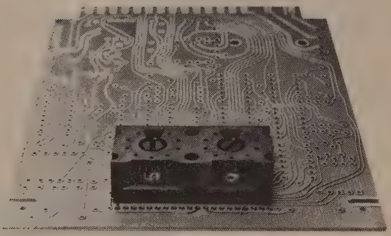
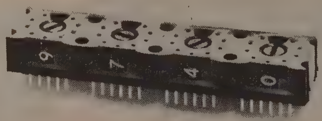
EECO FOR SWITCHES

NEW STRIPSWITCH™

...for direct mounting on printed circuit cards



A "Strip" of coded switching stations that mount directly on a PC board or card. Wave soldering both secures the stripswitch to a board mechanically and connects it electrically to the board wiring.



- BCD, decimal and many other codes
- Custom dial marking
- Horizontal or vertical mounting

- Eliminates wiring costs
- One to six stations
- Color coding available

- 8, 10, 12 and 16 position available
- $1.95 per station (Less than $1.50 in production quantities)

EECO FOR SWITCHES

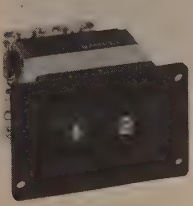
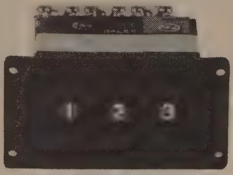
THUMBPOT

NEW

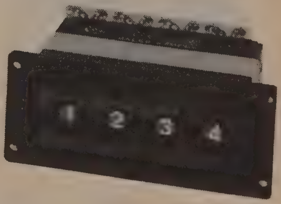
. . . Incremental Voltage Divider to replace ten-turn pots



RESOLUTION 1.0%
(2 decades)



RESOLUTION 0.1%
(3 decades)



RESOLUTION 0.01%
(4 decades)

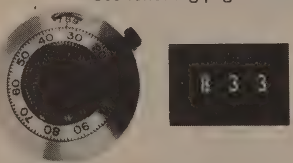
HOW IS ALL THIS ACCOMPLISHED?

The new switching code developed by EECO engineers is similar to the well-known Wolff-Poggendorf voltage divider code (see EECO SWITCH catalog Application notes on Voltage Dividers). The Thumbpot electrically moves the resistors from one line to the other, unlike the Wolff-Poggendorf which alternately switches and shorts matched pairs of resistors. This reduction (by 50 percent) of resistors in each matched set is a prime reason for the attractive price of the thumbpot.

An outstanding feature of the EECO thumbpot is based on the principle that precision is not dependent upon the absolute accuracy of each resistor, but upon their matched ratios. Additionally, this code enables the thumbpot to maintain a constant input resistance, regardless of dial setting.

Like the 10-turn potentiometer, accuracy of the Thumbpot divider is dependent upon the loading resistance. For one percent overall accuracy, load resistance must be at least 100 times the total resistance of the Thumbpot. Similarly, a .1 percent IVD requires a load resistance of 1000 times the Thumbpot resistance. Depending on application requirements, resolution may be increased by increasing the number of switching stations in the IVD. Contact resistance of the switching elements is very stable and temperature coefficients may be specified, consistent with standard resistor characteristics.

- Matte finish, custom dial markings
- Options available: lighting, decimal points, stops, RFI shielding
- Input resistance — 100, 500, 1,000, 5,000, 10,000, 50,000 and 100,000 Ohms (± 1%)
- Accuracy (%) full scale voltage — 1%, .5%, .25%, .1%, .05%
- Two available sizes — 1776 and 1976
- Lighted decimal points
- See following page for dimensional information



- **Perfect Resetability.** When you return to a previously recorded setting, you are assured it is exactly what you read before. In some cases, this feature eliminates the need for additional panel meters.
- **In-Line Digital Display** provides fast, easy reading with no errors . . . even from across the room.
- **Rapid Data Entry.** On a 3-digit incremental voltage divider, large voltage jumps may be made with one quick flick of the finger . . . without having to turn . . . and turn . . . and . . .

THUMBPOT is a revolutionary development by EECO! With the discovery of this new coded approach, THUMBPOT Thumbwheel Switch Assemblies perform all precision voltage dividing and resistance selection functions available with 10-turn pots. THUMBPOT spares you the inherent disadvantages of 10-turn pots and their add-on dials . . . such as hard-to-read dials, slow and awkward dial rotation, lack of exact resetability, resolution limited to 1 part per 10,000 or less.

With the advent of THUMBPOT's newly developed code, EECO can now offer the ultimate in digital voltage dividing at prices that are directly competitive with 10-turn pots — **a first in the industry!** Applications of these voltage dividers range from programmed power supplies to blood cell count analyzers . . . anywhere that precise voltage steps are part of critical programming.

EECO FOR SWITCHES

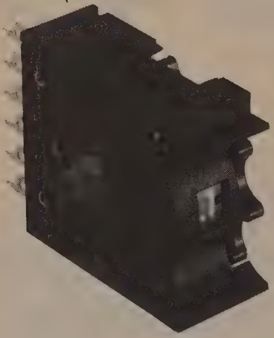
1776 SERIES

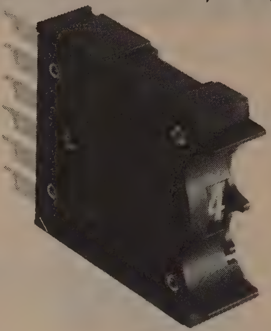
REVOLUTIONARY SLIM

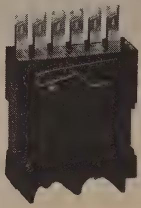
1976 SERIES

. . . prices start at $3.60

- Plastic window readout protection — 1776
- Sealed against dust
- Optional lighting provisions
- Solder tab or notched termination
- Lowest costs
- 8, 10, 12 and 16 positions
- Over 45 standard models
- Choice of Rod or Band type assembly hardware
- Double width switches (triple legend area) — 1776
- Two year warranty







NOTCHED TERMINALS

The solder tab terminals are notched so that the switch can be plugged into a "mother board" and wave soldered.

EECO FOR SWITCHES

2000 SERIES

COMMERCIAL SWITCHES

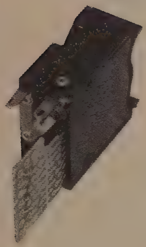
2000 SERIES SUPER SWITCH

- Economical
- Universal Dimensions
- Field adjustable stops
- Optional lighting provisions
- Over 50 standard models
- Sealed or unsealed
- Band or rod assembly hardware
- Detachable indicator ring for quick change of characters
- Prices start at $5.00
- Two year warranty

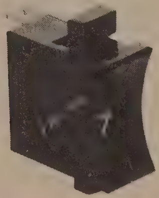
All EECO Switch Products have a two year warranty (except for series 8000 switches)

MILITARY SWITCHES

5000-6000 SERIES — MINIATURE — 700-800 SERIES



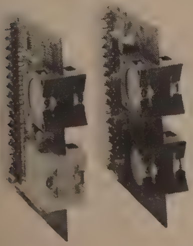
- Meets MIL S-22710
- Cable, printed circuit board or wire loop terminations
- Plastic window readout protection
- Unsealed or fully "O" ring sealed
- Unlighted or lighted with replaceable lamps
- Wide variety of codes and options



- Meets MIL-S-22710
- Circuit board termination
- Lighted or unlighted
- Unsealed or fully "O" ring sealed
- Switches individually replaceable in mounted assemblies
- Extremely rugged mounting hardware

SPECIAL SWITCHES

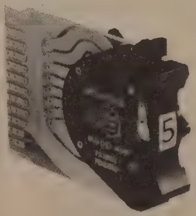
8000 SERIES — LOW COST SWITCH KITS



Mount directly on circuit boards to reduce wiring costs. Code stator pattern is part of the board's etched circuit.

- Low in total cost
- Lighted or unlighted
- Color coded
- Unsealed or fully "O" ring sealed

300-400 SERIES — LARGE AND RUGGED



This large, unusually attractive switch is designed for reliability even in hostile atmospheres and easy operation with gloved fingers.

- Meets MIL-S-22710
- Unsealed or fully "O" ring sealed
- Unlighted or brightly lighted with replaceable lamp
- PCB termination for direct wire and/or connector compatibility

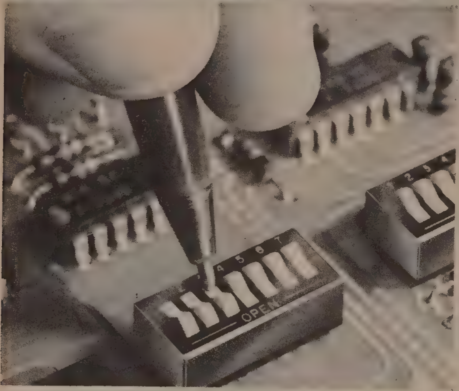
ROCKER DIP SWITCHES— SERIES 76

9 SIZES / 2 THROUGH 10 POSITIONS SPST / INDEPENDENT SWITCHING



ALL THESE DUAL IN-LINE PACKAGE BENEFITS

EASY MOUNTING
to PC board by direct flow-soldering or insertion into a standard socket.

MOLDED-IN TERMINALS
minimize contact system contamination.

COMPACT,
high density design; low profile; minimum above board height .305″.

COST SAVINGS
industry accepted package dimensions; multi-function, programmable PC boards; elimination of mounting hardware or hard-wiring interconnections.

OUTSTANDING PERFORMANCES AT NO PRICE PREMIUM
50 mA at 30 VDC/35,000 operations
125 mA at 30 VDC/25,000 operations
Mechanical life: 50,000 operations

SPRING LOADED
sliding ball contact system provides positive contact, tease-proof reliability, wiping contact, immunity to normal shock and vibration, and exceptionally long life . . . all essentials in back panel logic applications.

PROTECTIVE COVER
reduces contamination during the cleaning and soldering operation — and can remain on the switch in the equipment to deter unauthorized actuation.

OPTIONS
with or without standoffs, protective cover; plus (not available through distributors) black housing (red is standard), variable terminal length. (.125″ max. terminal length is standard).

SPECIFICATIONS

MECHANICAL LIFE: 50,000 operations per rocker.

MAKE AND BREAK CURRENT RATING:
35,000 operations at 50 mA 30 VDC.
25,000 operations at 125 mA 30 VDC.

CONTACT RESISTANCE: 50 milliohms maximum after life (10 milliohms initially) measured at 100 milliamps and 2 VDC.

INSULATION RESISTANCE (at 100 VDC): Between adjacent closed contacts: 50,000 megohms after life, (100,000 megohms initially).
Between adjacent open contacts: 50,000 megohms after life, (100,000 megohms initially).

DIELECTRIC STRENGTH: Between adjacent closed contacts: 500 VAC after life (750 VAC initially).
Between adjacent open contacts: 500 VAC after life (750 VAC initially).

CURRENT CARRY RATING: 5 amps with a maximum contact temperature rise of 20°C.

SHAFT OPERATED, PC MOUNT = BF
INTEGRAL KNOB ACTUATED, PC MOUNT = CF

RATING:

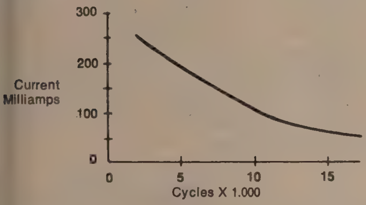

CHART SHOWN FOR NON-SHORTING CONTACTS (BREAK BEFORE MAKE).

VOLTAGE: 115 VAC or 30 VDC, resistive load.

One cycle is 360° rotation and a return through all switch positions to the starting position. The data for the above curve was measured at sea level, 25°C. and 68% relative humidity with the following life limiting criteria.

CONTACT RESISTANCE: 50 milliohms maximum (15 millioms initially).

INSULATION RESISTANCE: 10,000 megohms minimum between mutually insulated parts (50,000 megohms initially).

VOLTAGE BREAKDOWN: 500 VAC minimum between mutually insulated parts.

LIFE EXPECTANCY: As determined from the above curve for the current that must be switched.

Contact GRAYHILL for information if the life limiting criteria are more critical than those listed, if the required cycles of operation are greater than those listed, if a larger make and break current is required than the one listed for the desired number of cycles, or if elevated temperatures or reduced pressures are part of the operating environment.

PRICE: Approx. $3.50 to $5.50 ea. in 100 lots, dependent on style and number of poles.

STANDARD ROTARY SWITCHES

GENERAL RATING:

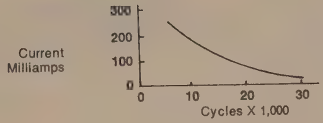

Chart shown for non-shorting contacts (break before make) Voltage: 115 VAC or 30 VDC, resistive load.

One cycle is 360° rotation and a return through all switch positions to the starting position. The data for the above curve was measured at sea level, 25°C. and 68% relative humidity with the following life limiting criteria.

CONTACT RESISTANCE: 50 milliohms maximum. (10 milliohms initially.)

INSULATION RESISTANCE: 10,000 megohms minimum between mutually insulated parts. (50,000 megohms initially.)

VOLTAGE BREAKDOWN: 600 VAC minimum between mutually insulated parts.

LIFE EXPECTANCY: As determined from the above curve for the current that must be switched.

Contact GRAYHILL for information if the life limiting criteria are more critical than those listed, if the required cycles of operation are greater than those listed, if a larger make and break current is required than the one listed for the desired number of cycles, or if elevated temperatures or reduced pressures are a part of the operating environment.

CONTACT CARRY RATING: Switch will carry 6 amperes continuously with a maximum contact temperature rise of 20°C.

MILITARY STYLE ROTARY SWITCHES

The Series 50 and 51 switches are available in two basic styles, with and without a shaft and panel seal. Adjustable stops and terminals for printed circuit mounting can be added to basic styles. All Series 50 switches except styles including a D or a P are qualified to MIL-S-3786/20. All Series 51 switches except styles including a C are qualified to MIL-S-3786/35. To comply with MIL-S-3786, qualified switches must be ordered with the appropriate markings.

Military Style switches meet the following life limiting criteria.

CONTACT RESISTANCE: 20 milliohms maximum. (8 milliohms initially.)

INSULATION RESISTANCE: 10,000 megohms minimum between mutually-insulated parts. (50,000 megohms initially.)

VOLTAGE BREAKDOWN: 600 VAC minimum between mutually insulated parts.

LIFE EXPECTANCY: As determined from the general rating curve for the current that must be switched.

PRICE: Approx. $3.75 to $10.50 ea. in 100 lots dependent on style and number of poles.

ADDITIONAL STANDARD FEATURES OR OPTIONS

- 45°, 60° or 90° Angles of Throw

Grayhill

1 INCH, 1 AMP, SINGLE DECK ROTARY SWITCHES—SERIES 24

SURPRISINGLY LOW PRICES FOR A SWITCH OF THIS QUALITY—36° ANGLE OF THROW, 1 POLE

RATING:

RATED: To make and break the following loads: 1 amp at 115 VAC, resistive; ¼ amp, 115 VAC inductive; 1⁄50 amp, 115 VDC inductive; 1⁄10 amp, 6 to 28 VDC inductive; 1⁄10 amp, 115 VDC resistive; 1 amp, 6 to 28 VDC resistive; to carry 10 amps continuous.

CONTACT RESISTANCE: 10 milliohms initial. After 25,000 cycles of operation 20 milliohms maximum.

INSULATION RESISTANCE: 50,000 megohms.

VOLTAGE BREAKDOWN: 1,000 VAC, (500 VAC, or better after most environmental tests).

LIFE EXPECTANCY: 100,000 mechanical cycles of operation normally.

PRICE: Approx. $1.60 to $2.00 ea. in 100 lots dependent on number of positions, solder lug type. Approx. $2.50 ea. in 100 lots, PC mount type.

ADDITIONAL STANDARD FEATURES OR OPTIONS

—Stainless Steel Shaft

—Special Terminals (Hi Density, Taper Tab, Notched, Shorting Links)

15 AMP, UL LISTED ROTARY SWITCHES—SERIES 19

30° ANGLE OF THROW
1 POLE, 2 TO 11 POSITIONS
SOLDER LUG OR 'FASTON' TERMINALS

RATING:

Series 19 switches are UL listed at:
15 amps, 120 VAC, non-inductive load.
1 amp, 120 VDC, non-inductive load.
This rating is based on the following criteria:

Overload—50 operations at 125% rated AC load and 150% rated DC load.

Endurance—6000 operations at rated load with 900 VAC dielectric strength before and after test.

Temperature Rise—Not to exceed 30°C when carrying rated AC loatd after endurance test.

Contacts will carry 20 amps at 115 volts AC with 30°C maximum temperature rise.

CONTACT RESISTANCE: (Measured at 2 VDC and approximately 100 MA) for new switch approximately 10 milliohms.

INSULATION RESISTANCE: Approximately 100,000 megohms. Between mutually insulated parts.

VOLTAGE BREAKDOWN: Approximately 2500 VAC. Between mutually insulated parts.

PRICE: Approx: $2.75 to $4.00 ea. in 100 lots, dependent on number of positions.

Grayhill

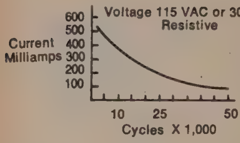
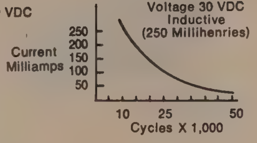
1/2″ DIAMETER, 1/4 AMP, MULTI-DECK ROTARY SWITCHES—SERIES 71

RATING:





Switch rating for break before make contacts.

Curve data based on test data conducted at sea level, 25°C. and 68% relative humidity.

Cycle equals 360° rotation and return.

Cycling rate is 10 cycles per minute.

The curves shown are typical load life curves for a Series 71 Rotary Switch. They show a number of cycles of rotational life that can be expected for the voltages, currents and types of loads shown. Thus, with a 300 milliampere, 115 VAC resistive load, 15,000 cycles of life can be expected. Similarly, if the load were reduced to 200 milliamperes, the life is increased to 25,000 cycles.

Life limiting or failure criteria for these curves are:

CONTACT RESISTANCE: 50 milliohms maximum. (10 milliohms initially.)

INSULATION RESISTANCE: 10,000 megohms minimum between mutually insulated parts. (50,000 megohms initially.)

VOLTAGE BREAKDOWN: 500 VAC minimum between mutually insulated parts.

These switches will carry 4 amperes with a maximum contact temperature rise of 20°C. If the life limiting characteristics are less critical than those shown above, if elevated temperatures or reduced pressures are involved, GRAYHILL can predict the switch life for the application.

SHAFT AND PANEL SEAL

STYLES AS, BS, ASF, BSF

Shaft is sealed by "O" ring inside bushing. Panel is sealed by "O" ring at base of bushing. Seals do not alter dimensions as shown in the drawings when switch is mounted. Panel seal is silicone rubber. Shaft seal is an "O" ring per MIL-P-5516B.

ADJUSTABLE STOPS

STYLES AD, BD, ADF, BDF

Number of positions per pole can be changed by removing and relocating stop pins in holes in the switch front plate. Available in the single shaft versions with either .125" or .250" diameter; 30° or 36° angle of throw; and solder lug terminals or PC mount on one side styles.

MILITARY QUALIFIED (125°C.) = H
MILITARY QUALIFIED (125°C.)
WITH SHAFT AND PANEL SEAL = HS

ELECTRICAL RATING, STYLES A, D AND S

RATED: To make and break the following loads:

	Angle of Throw		
	30° or 36°	45° or 60°	90°
115 VAC resistive	1 amp	5 amps	5 amps
6-28 VDC resistive	1 amp	1 amp	2 amps
115 VAC inductive	0.25 amp	2 amps	2 amps
115 VDC inductive	0.02 amp	—	—
6-28 VDC inductive	0.10 amp	—	—
115 VDC resistive	0.10 amp	—	—

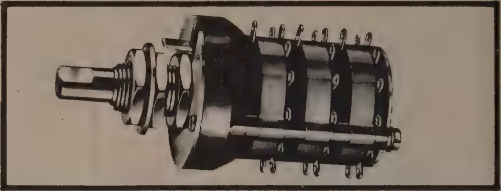
To carry 10 amps continuously.

CONTACT RESISTANCE: After 25,000 cycles of operation 20 milliohms maximum.

INSULATION RESISTANCE: 50,000 megohms minimum (initially).

VOLTAGE BREAKDOWN: 1,000 VAC initially (500 VAC or better after most environmental tests).

LIFE EXPECTANCY: 100,000 mechanical cycles of operation. NOTE: Actual life is determined by a number of facts, including electrical loading, rate of rotation, and environment, as well as maximum contact resistance, minimum insulation resistance, and minimum voltage breakdown required at the end of life.



ELECTRICAL RATING, STYLES M, H AND HS

Rated to make and break the loads stated above, as well as meeting all the electrical and environmental requirements of MIL-S-3786/4. Series 42 and 44 Rotary Switches with these style designations are listed on the Qualified Products List.

CIRCUIT DIAGRAMS

(Switch is viewed from Shaft End and shown in Position No. 1)

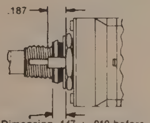
SERIES 42	.562	1.000	.830	.093
SERIES 44	.642	1.162	1.000	.121

SHAFT AND PANEL SEAL — STYLE S

A shaft and panel seal is available to provide watertight mounting of the Series 42 and 44 rotary switches. Sealing is accomplished by "O" ring shaft seal and GRAYHILL's unique panel seal method. Panel seal dimensional differences are shown in the accompanying drawing.



Dimension .147 ± .010 before compression of seal and .093 minimum compressed.

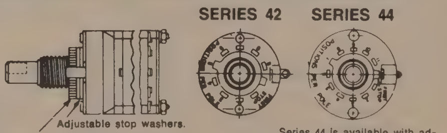
SHAFT AND PANEL SEAL — STYLE HS

Panel is sealed by "O" ring at base of bushing. Shaft is sealed by "O" ring inside bushing. Seals do not alter dimensions shown when switch is mounted. Sealed military qualified switches do not have a non-turn tab. A flat cover plate is supplied with the switch.

A separate non-turn washer is supplied with mounting hardware. Tab projection of this washer is .187" located on a .375" radius from of centerline switch. Non-turn washer must be mounted from front of panel to preserve seal. Panel seal is silicone rubber. Shaft seal is "O" ring per MIL-P-5516B.

ADJUSTABLE STOPS — STYLE D

Adjustable stop switches permit the user to externally set the switch stops which limit its rotation. Adjustment is accomplished by removing the stop washers and relocating them. The knurled nut or the panel can be used to hold-in the stop washers. All other dimensions are the same as the standard style.



SERIES 42
SERIES 44
Adjustable stop washers.

Use of knurled nut is optional.

Series 44 is available with adjustable stops in 30° angle of throw only.

PRICE: Approx. $5.00 ea. in 100 lots, for a 1 deck, 1 pole/deck, 10 position standard switch with fixed or adjustable stops. In 100 lots, these approximate price adders apply $1.30 for each additional deck; $0.50 per pole/deck for multipole switches; and $1.50 each switch for shaft and panel seal.

ADDITIONAL STANDARD FEATURES OR OPTIONS

—45°, 60° or 90° Angles of Throw (Standard or Military Style)
—Concentric Shaft Switches (Standard or Military Style)
—Add-A-Pot Switches (Standard or Military Styles)
—PC Mountable
—Deck Sections and Detent Assemblies
—Keylock (See Description This Section)†
—Push-To-Turn or Pull-To-Turn†
—Spring Return (Momentary Positions)
—Coded Versions
—RFI Grounding†
—Electrostatic or Electromagnetic Shielding†
—Intermix of Shorting and Non-Shorting Contacts†
—Homing Rotor or Progressively Shorting Decks†
—Unidirectional Rotation†
—Special Terminals (Hi Density, Taper Tab, Notched, Shorting Links)†

16, 20 AND 24 POSITION ROTARY SWITCHES — SERIES 53, 57, 59

MAKE AND BREAK MORE CIRCUITS IN LESS SPACE THAN OTHER SWITCHES

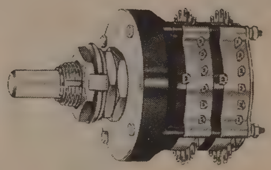
LOGIC LEVEL TO ½ AMP SWITCHING CAPABILITY

STYLE CHOICES AND DESIGNATIONS

MILITARY STYLE = M

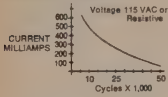
MILITARY QUALIFIED (125°C.)
WITH SHAFT AND PANEL SEALS = HS

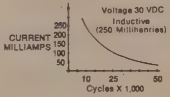
24 POSITION
SERIES 53
STYLE M



Patent No.
3,668,338

GENERAL RATING:





ELECTRICAL RATING, STYLE M

Switch rating for break before make contacts.

Curve data based on test data conducted at sea level, 25°C. and 68% relative humidity.

Cycle equals 360° rotation and return.

Cycling rate is 10 cycles per minute.

The curves shown are typical load life curves for a Series 53M, 57M and 59M Rotary Switch. They show the number of cycles of rotational life that can be expected for the voltages, currents and types of loads shown. Thus, with a 500 milliampere, 115 VAC resistive load, 10,000 cycles of life can be expected. Similarly, if the load were reduced to 200 milliamperes, the life is increased to 30,000 cycles.

Life limiting or failure criteria for these curves are:

CONTACT RESISTANCE: 50 milliohms maximum (15 milliohms initially).

INSULATION RESISTANCE: 10,000 megohms minimum between mutually insulated parts. (50,000 megohms initially.)

VOLTAGE BREAKDOWN: 500 VAC minimum between mutually insulated parts.

These switches will carry 4 amperes with a maximum contact temperature rise of 20°C. If the life limiting characteristics are less critical than those shown above, or if elevated temperatures or reduced pressures are involved, GRAYHILL can predict the switch life for the application.

ELECTRICAL RATING, STYLE HS

Rated to make and break the loads stated above, as well as meeting all the electrical and environmental requirements of MIL-S-3786/36. Series 53, 57 or 59, Style HS Rotary Switches are listed on the Qualified Products List with limitations in the number of decks and poles per deck.

Grayhill

SHAFT AND PANEL SEAL—STYLE HS

In the Style HS switches the panel is sealed by "O" ring at the base of the bushing. Shaft is sealed by "O" ring inside bushing. Seals do not alter dimensions as shown in the line drawings when switch is mounted. A separate non-turn washer is supplied with mounting hardware. See Detail D for Style HS on the drawing page. Non-turn washer must be mounted from front of panel to preserve seal. Panel seal is silicone rubber. Shaft seal is "O" ring per MIL-M-5516B.

PRICE: Approx. $9.00 ea. in 100 lots, for a 1 deck, 1 pole/deck, 24 position switch. In 100 lots the following price adders apply: $3.75 for each additional deck; $0.60 per pole/deck for multiple switches; and $0.50 each switch for shaft and panel seal.

MINIATURE LIGHTED PUSHBUTTON SWITCHES—SERIES 40

Grayhill

ILLUMINATED 1 AMP BUTT CONTACT

NEON, INCANDESCENT AND LED LIGHTING
NO LAMP MOVEMENT DURING ACTUATION

RATING:

RATING AT 115 VAC RESISTIVE: 1 Amp.

CONTACT RESISTANCE: 25 milliohms or less on a new switch.

VOLTAGE BREAKDOWN: 1,000 VAC between mutually insulated parts.

INSULATION RESISTANCE: 1,000 megohms minimum.

LIFE EXPECTANCY: 500,000 operations.

OPERATING FEATURES:

CIRCUITRY: SPST (N.O.) or N.C.), momentary contact.

BUTTON TRAVEL: .062″ ±.010″ for N.O. Switches.
.050″ ±.015″ for N.C. Switches.

ACTUATING FORCE: 16 ounces +8, −4 for N.O. Switches.
7 ounces ±3 for N.C. Switches.

MOUNTING HOLE: 25/64″.

SWITCH TERMINALS: Solder.

LAMP: Neon, General Electric A9A or equivalent.
Incandescent, General Electric 1764 (20 VDC Max.) or equivalent.

INDEPENDENT LAMP AND SWITCH CIRCUITS.

EXTENDED LAMPLIFE: Lamp does not move during actuation of the switch. Incandescent operation at the voltage stated above provides lamp life commensurate with the switch life.

LIGHTED DECORATOR LINE PUSHBUTTON SWITCHES ARE DESIGNATED AS THE GRAYHILL SERIES 80 SPST, SPDT, DPDT CIRCUITRY

CONTACTS: Wiping type.

CURRENT RATING AT 115 VAC RESISTIVE: ¼ amp.

CONTACT RESISTANCE: Less than 25 milliohms on a new switch.

VOLTAGE BREAKDOWN: 1,000 VAC between mutually insulated parts.

INSULATION RESISTANCE: 1,000 megohms minimum.

LIFE EXPECTANCY: 250,000 operations.

BUTTON CAPS: White, Amber, Red, Green and Yellow colors are available as solid color or two color (top and bottom). Caps can be ordered with switches as complete assembly or separately.

LAMPS: All button caps accept standard T-1¾ midget flange base lamps. Lamps are not supplied with button caps or assemblies of caps and switches.
It is recommended that the lamp used in these switches be rated at 0.34 CP to provide sufficient illumination.

PRICE: Approx. $2.65 to $4.65 ea. in 100 pc lots dependent on type required. Price includes button cap.

6 BUTTON MODULE

RATING:

RATING AT 5 VDC: 100 milliamps.

CONTACT RESISTANCE: 25 milliohms or less on a new switch.

VOLTAGE BREAKDOWN: 250 VAC between mutually insulated parts.

INSULATION RESISTANCE: 1,000 megohms minimum.

LIFE EXPECTANCY: 1,500,000 operations.

CONTACT BOUNCE: 10 milliseconds or less for the life of the switch.

7-WIRE CODE CAPABILITY UNDER EACH BUTTON

The GRAYHILL Series 82 Pushbutton Modules represent the most versatile switches now available to generate coded outputs for control systems of all kinds.

They are available in modular form in the following sizes:

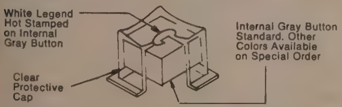
6-button module	2-button module
3-button module	1-button module

By combining these different modules, pushbutton arrays of any shape or size can easily be assembled on a printed circuit board with uniform spacing. The switching capabilities are practically endless since any code up to 7-wire can be accomplished right in the switches. No extra logic is necessary. Refer to circuit diagrams.

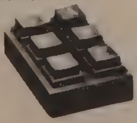
LEGENDING OF BUTTON CAPS

GRAYHILL offers a choice of legending as follows:

STANDARD: Legends hot-stamped on internal button as in this drawing. (See ordering information.)



White Legend Hot Stamped on Internal Gray Button
Clear Protective Cap
Internal Gray Button Standard. Other Colors Available on Special Order



Contact GRAYHILL for Standard Legend Styles & Limitations.

OPERATING FEATURES:

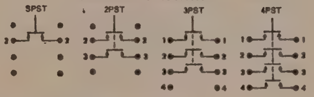
BUTTON TRAVEL: 0.150″ total travel.

OVERTRAVEL: 0.100″ nominal.

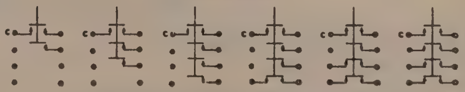
OPERATING FORCE: 4-7 ounces (dependent upon number of poles).

CIRCUIT DIAGRAMS

STANDARD CIRCUITRY

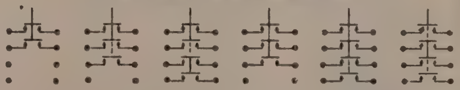


CODED CIRCUITRY



Note: Coded Switches Are Constructed So That Common (C) Is Made After All Other Contacts

OTHER POSSIBLE CIRCUIT CONFIGURATIONS

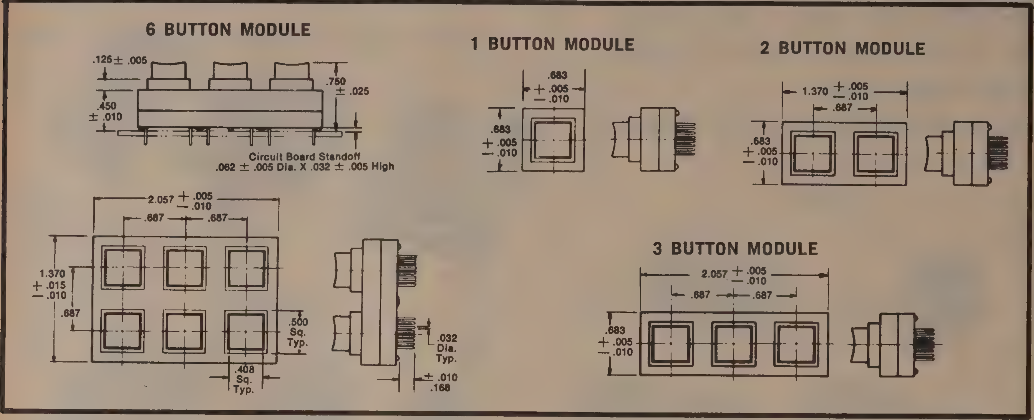


DOUBLE-SHOT MOLDED BUTTON: Takes the place of the internal button and the clear protective cap. Legend permanently molded into button. Available in numerals from 0 to 9 and standard telephone legends. Standard color, gray with white legends; other colors or legends available in large quantities. Also available without legend to provide proper size button to eliminate clear cap.

(continued on page 1•2052)

PUSHBUTTON SWITCH MODULES PC MOUNTABLE—SERIES 82

Grayhill®



6 BUTTON MODULE

1 BUTTON MODULE

2 BUTTON MODULE

3 BUTTON MODULE

MOUNTING:

Modules are designed to plug into any printed circuit board from 1/16″ to 1/8″ thick.

Modules can be stacked horizontally or vertically for any combination of button array and still maintain 11/16″ button centers.

SOLDERING INSTRUCTIONS

Series 82 Pushbutton Switch Modules have been tested, and successfully passed, heat resistance to wave soldering per MIL STD. 202, Method 210A, for the following parameters.

Maximum solder temperature of 260°C (500°F)

Maximum immersion duration of 5 seconds

For best results, your wave soldering procedure should be within these limits. If your application requires you to exceed these limits, contact GRAYHILL for recommendations.

ORDERING INFORMATION:

To order a Series 82 Pushbutton Module, there are five areas in which information is required:

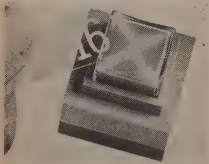
1. **Type of module:** 1-, 2-, 3-, or 6-button.
2. **Type of mounting:** either horizontal or vertical.
3. Circuitry required for each button (A = SPST; B = 2PST; C = 3PST, etc.) or coded or other available circuitry. See opposite page for button letter designations.
4. **Type of button desired:** Standard, or double-shot molded.
   —Color of standard internal button. GRAY is standard; other available colors are WHITE, RED, GREEN, and BLACK.
   Colors can be intermixed. For example, Buttons A through E are GRAY and F is WHITE.
   —Color of button and legend of double-shot molded button (GRAY button with WHITE legend is standard).
5. Legend required on each button (Button A legend #1, Button B legend #2, etc.).

Upon receipt of your order, a part number will be assigned to facilitate future identification of this part. These numbers are sequentially assigned as the need arises and are non-descriptive. Also see below for Series 82 Pushbutton Modules, available from your local distributor.

PRICE: Contact GRAYHILL.

INSERTABLE LEGENDS—STANDARD CIRCUITRY

SERIES 82 PUSH BUTTON MODULES WITH INSERTABLE LEGENDS



For prototype and small quantity usage. Switches are available with clear protective cap slotted on one side to allow the insertion of a clear plastic tab imprinted with the legend. A legend sheet is available with all normally required legends for both vertical and horizontal mounting.

Legend sheet is sold separately, GRAYHILL Part No. 82-AC-2017. Contains white legends 0-19, A-Z, and all other normally used symbols and word groups. Simply cut out and insert in slotted button.

ORDERING INFORMATION:

The following chart lists the part numbers of insertable legend Series 82 Pushbutton Switch Modules with SPST circuitry under each button or 4PST circuitry under each button. For prototypes 4PST circuitry can be ordered and pins can be clipped to provide desired circuitry. Coded circuitry cannot be achieved in this manner. These modules are gray in color and are quickly available through your local GRAYHILL distributor.

INSERTABLE LEGEND MODULES

Part No.	No. of Buttons	Circuitry	Part No.	No. of Buttons	Circuitry

GORDOS
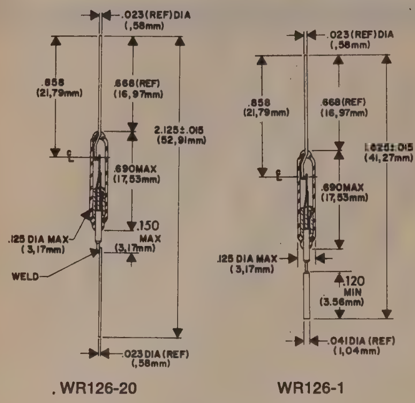
MAGNETIC MERCURY
SWITCH DIVISION

Miniature Mercury-Wetted SPST

WR-126 SERIES



. WR126-20 WR126-1

Approximate Scale 5:4 — Do Not Scale

A miniature pressurized reed switch containing a mercury pool that replenishes the contact surface by capillary action, thus providing a true mercury-to-mercury contact. This switch exhibits the following outstanding features:

1. No bounce
2. 1000-VDC switching
3. 2-amp switching
4. Contact resistance less than 50 milliohms over life
5. Life expectancy in billions of operations

MECHANICAL SPECIFICATIONS

- Contact arrangement — offset gap, normally open
- Mounting position — within 30° of vertical
- External lead finish — electroplated gold suitable for soldering or welding
- Contact material — mercury wet to mercury wet

ELECTRICAL SPECIFICATIONS

- Initial contact resistance — 50 milliohms maximum
- Breakdown voltage(2) — 1500 VRMS minimum
- Capacitance — 0.3 picofarads typical
- Insulation resistance(1) — 1 x 10^9 ohms minimum

CONTACT RATINGS

- Switching voltage — 1000 VDC maximum
- DC resistive load — (reference — 50 watts max.) Consult factory for actual load/life data.
- Current — 2(3) ampere maximum switching, 2 amperes maximum carrying
- Inductive— contact protection required
- Lamp or capacitive — derate by ⅔ or add resistor in series
- Life expectancy —
  28 VDC, 2 amp resistive — 50 million
  50 VDC, 1 amp resistive — 100 million
  50 MVDC, 1 microamp resistive — 5 billion

OPERATE CHARACTERISTICS

- Operate time @ 150% of just operate — 1.8 milliseconds nominal
- Release time — 0.8 milliseconds nominal
- Nominal coil power — 150 milliwatts
- Pull-in sensitivity available — 40 to 80 ampere turns
- Drop-out sensitivity available — 10 ampere turns minimum

MEASUREMENT DETAILS

- Measurements taken in Gordos R-5105 coil with gap centered .140″ above center of coil windings
- R-5105 coil — 10,000 turns No. 48 AWG, 3500 ohms, copper length .750″ (19.05 mm), copper ID .170″ (4.32 mm)

ENVIRONMENTAL SPECIFICATIONS

- Internal atmosphere — hydrogen under pressure

SPECIAL NOTES

- Care must be taken in cutting or bending reed switch leads. End nippers should be used for cutting to reduce the shock wave to the seal. Firm support between the bend and seal is necessary to preserve seal integrity.

(1) Measured @ 100 VDC, higher insulation resistance values are available.
(2) Specific curves on request.
(3) Derate to .002 amps @ 1000 VDC.

GORDOS

REED SWITCH DIVISION

Magnet Biased Compact SPDT

MR-200-1 MR-200-2

Magnet biased
Form "C"
.204″ diameter, max. (5.18 mm)

Switch with a memory

The MR-200-1 is a magnetically biased form "C" switch that will transfer only when the proper polarity magnetic field is applied. Suitable for either permanent magnet or coil actuation.

The MR-200-2 is a magnetically biased latching switch which is bi-stable. Application of a momentary magnetic field of the proper polarity will cause transfer and latch. Reverse polarity will transfer and latch to the opposite pole piece.(3)

MECHANICAL SPECIFICATIONS

- Contact arrangement — offset gap, form "C" (SPDT)
- Mounting position — any plane
- External lead finish — gold over nickel, suitable for soldering or welding
- Contact material
  - N.O. contact — diffused gold
  - N.C. contact — diffused gold
  - Armature — di-met
- Resonance — 1125 Hz typical

ELECTRICAL SPECIFICATIONS

- Initial contact resistance—200 milliohms maximum
- Breakdown voltage(2) — 300 VRMS minimum
- Capacitance — 5 picofarads typical
- Insulation resistance(1) — 1 x 10^{10} ohms typical

CONTACT RATINGS

- Switching voltage — 100 VDC maximum
- DC resistive load — (reference —10 watts max.) Consult factory for actual load/life data.
- Current — .250 ampere maximum switching, 1 ampere maximum carrying
- Inductive — contact protection required
- Lamp or capacitive — derate by ⅔ or add resistor in series

OPERATE CHARACTERISTICS

- MR-200-1
  - Operate time — 1.8 milliseconds typical
  - Bounce time (operate) — 1 millisecond typical
  - Release time — 150 microseconds maximum
  - Bounce time (release) — 2 milliseconds typical
- MR-200-2
  - Transfer time — 1.8 milliseconds typical
  - Bounce time — 1 millisecond typical
- Nominal coil power — 100 milliwatts
- Pull-in sensitivity available
  - MR-200-1 — 20 to 50 ampere turns
    - drop-out — 10 ampere turns minimum
  - MR-200-2 — 20 to 50 ampere turns

MEASUREMENT DETAILS

- Measurements taken in Gordos-580 coil with gap centered, leads full length
- R-580 coil — 10,000 turns #41 AWG, 1400 ohms, copper length 1″ (25.4 mm), copper ID, 0.218″ (5.54 mm)

ENVIRONMENTAL SPECIFICATIONS

- Shock — 50 G's @ 11 milliseconds
- Vibration — 35 G's 50-2000 hertz
- Operating temperature range — −20°C to +40°C
- Internal atmosphere — inert gas

SPECIAL NOTES

- Care must be taken in cutting or bending reed switch leads. End nippers should be used for cutting to reduce the shock wave to the seal. Firm support between the bend and seal is necessary to preserve seal integrity.
- MR-200-1 has red stripe denoting north-seeking pole
  MR-200-2 has green stripe denoting north-seeking pole

---

† *Some parameters are subject to change in other pull-in values.*

(1) Measured @ 90 VDC.

(2) Specific curves on request.

(3) Bifilar coils require diode suppression to avoid the collapsing field from the actuate winding inducing a field in the second winding, resulting in unwanted transfer.

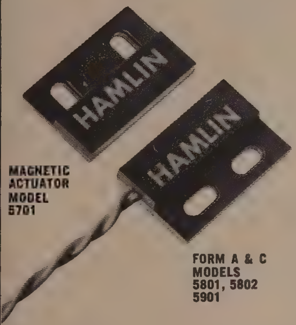
REED SWITCHES / INDUSTRIAL SENSORS • LIQUID CRYSTAL DISPLAYS

Hamlin now offers the extreme reliability and long life associated with magnetic reed switches in our family of temperature sensing reed switches and reed proximity switches. All models listed are available from stock for immediate delivery. Please consult your local HAMLIN representative or distributor for more information.

REED PROXIMITY AND FERROUS SENSING SWITCHES —



MAGNETIC ACTUATOR MODEL 5701

FORM A & C MODELS 5801, 5802 5901

These reed proximity switches offer all the advantages of magnetic reed switches and come packaged ready for mounting. Epoxy packaging and Teflon coated wires resist solvents, acids and salts. These sensors are completely safe for use in hazardous environments and the shock and vibration characteristics are comparable with that of the basic reed switch.

Wt. 1.6 grams

Hamlin temperature sensing reed switches feature automatic resetting, high repeatability, compact size and very long life. Hermetically sealed, safe for use in hazardous environments. Reed switch dependability permits millions of cycles. Standard units from −20°C to +120°C. High temp. units available only in 130, 180, 205 and 250°C temperature ranges, Form B only. Applications include temperature sensing in air, liquids semi-solids, or solids or anywhere that temperature control is needed.

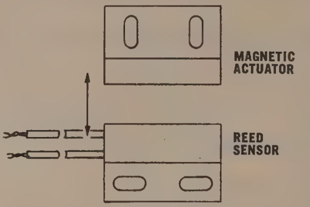
MODES OF OPERATION

MAGNETICALLY ACTUATED PROXIMITY SWITCHES

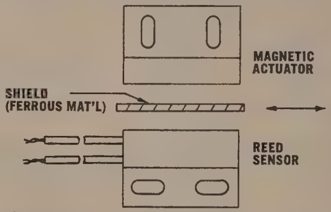
MODES OF OPERATION

Magnetically Actuated Sensors



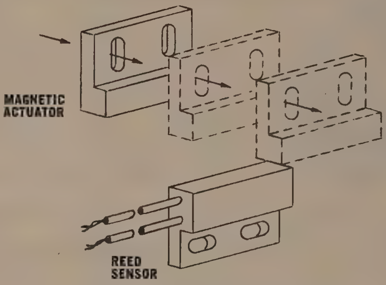
MAGNETIC ACTUATOR
REED SENSOR

In this mode of operation the center lines of the magnetic actuator and sensor remain constant while the distance between the two units varies.



MAGNETIC ACTUATOR
SHIELD (FERROUS MAT'L)
REED SENSOR

In this type of actuation sensor and actuator are permanently fixed. A piece of ferromagnetic material is passed between the magnet and switch to cause deactuation or release.



MAGNETIC ACTUATOR
REED SENSOR

The reed sensor and magnetic actuator pass by each other while remaining parallel and at a constant distance.

WHAT ARE TEMPERATURE SENSING REED SWITCHES?

A basic temperature sensing reed switch consists of a magnetic reed switch, two toroidal magnets and a ferrite whose magnetic reluctance varies with temperature within a narrow range around its curie point. These four components are then potted with an epoxy compound holding the magnets in the proper position about the reed switch contacts. The epoxy also provides a protective coating for the glass to metal seals allowing the forming of the leads without fear of breaking the glass seals.

HEINEMANN

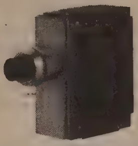
HYDRAULIC-MAGNETIC CIRCUIT BREAKERS

E-FRAME

SERIES AM1

SERIES JA

SERIES JC



SERIES JD

Heinemann breakers offer almost unlimited options: integral or fractional ratings from 10 milliamp to 100 amp, and in steps to 225 amp; single and multipole models; breakers for 60 or 400 Hz AC, or DC service; breakers that meet Mil Specs; and models with special internal circuits like relay-trip and calibrating-tap for control functions. Hydraulic-magnetic actuation assures that ratings and trip points are unaffected by ambient temperature changes. A wide selection of time-delay characteristics permits close match of breaker to equipment requirements. Request the Heinemann Engineering Guide (Bulletin 202), or the Condensed Guide (303), or contact your Heinemann representative. Individual product bulletins listed below.

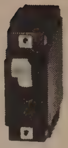
E-FRAME: Smaller than other E-Frame breakers, competitively priced. Approx. 5¾h x 2w x 2⅝d (2-pole). Available in 1 to 6 poles.

SERIES AM1: 1 to 4 poles. UL-component-recognized. Special circuits available. Approx. 2.5h x 2.5d, .75w per pole.

SERIES JA: Compact OEM breaker. Only 2.5 oz/pole. 1 to 4 poles. Approx. 2h x 1.875d, .75w per pole.

JA VARIANTS. Snap-In JB (1 to 4 poles) installs in rectangular panel cutout without screws. JC (1 to 4 poles—single-pole shown) has white or gray rocker handle. JD has round button for push-push operation. JE has moisture-sealed bat-type toggle for marine applications.

CROWBAR IN A CIRCUIT-BREAKER PACKAGE



SERIES JA/Q

The newest **Heinemann JA/Q Electronics Protector** is nearly all-encompassing in its ability to prevent damage to solid-state components. In one standard Series JA package it provides:

- transient/overvoltage crowbar protection, response time 500 nanoseconds;
- electromechanical equipment disconnect (protection for the crowbar) in 10 milliseconds;
- normal overcurrent protection

A thick-film hybrid SCR crowbar microcircuit is packaged into the rear of a Series JA hydraulic-magnetic circuit breaker. A transient or overvoltage on the AC or DC supply line will cause the SCR to fire, placing a dead short across the load to common. The short opens the breaker, removing the equipment from the line. Current ratings 0.020 to 10 A (DC), firing voltages 4.5 to 50 V (DC). Dimensions 2h x .75w x 1.8d. Bulletin 3371.

*AC voltages are 60 Hz unless marked with (400~).

SOLID-STATE DC CIRCUIT BREAKERS

Programable current rating from 0.3 to 1.5A

Last word in speed, reliability, and long life for protection of delicate electronic circuits, the Heinemann Model EA1-B3 reacts within microseconds to overcurrent conditions that might damage components protected even with the fastest electromechanical breaker.

Completely encapsulated; no moving parts; can mount in any position; practically infinite life. Two models—0.3 to 1.0 Adc, and 0.5 to 1.5 Adc, with rating within each range selectable by external programing resistance. Bulletin E-3600.

BROWNOUT PROTECTORS

Solid-state undervoltage sensor installs on third terminal of a Heinemann E-Frame, JA, or AM breaker. When 120V AC line voltage drops and stays between 90 and 100V for two seconds, undervoltage module trips the breaker, protecting motors and other loads from sustained voltage insufficiency. Bulletin 3372.

HEINEMANN ELECTRIC COMPANY 2636 Brunswick Pike, Trenton, N.J. 08602

6236

ILLUMINATED PRODUCTS INC. (formerly MARCO-OAK)

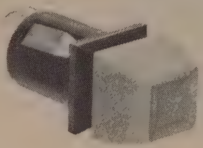
A Subsidiary of OAK Industries Inc.

For over 25 years, Illuminated Products Inc. (Marco-Oak) has been a leading innovator, designer and producer of illuminated pushbutton switches and indicators. IPI's advancements in switch design, esthetics, and dependability will enhance any equipment in which they are used.

IPI illuminated pushbutton switches are offered in a variety of styles: friction caps, low profile, snap-in, Marcoflex, watertight, splashproof, and EMI suppressed. The Presslite switch offers the convenience of a toggle switch combined with an indicator light. Switch bases, mounting hardware, and cap sizes, shapes and colors are designed in modular units ...more than 25,000 variations are possible. In addition, IPI can provide modified or custom switches to fit your panel environment.

SWITCHES — SNAP-IN PRESSLITE AND MARCOFLEX SWITCHES

½ amp momentary action switch and matching indicator



Suitable for use with Light Emitting Diode (L.E.D.)

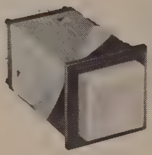
Write for IPI catalog SL-72A

The double break bifurcated wiping action contacts of the Snap-In Presslite Series provide extremely reliable switching for data entry and control applications. In addition to low initial cost, a further major saving results from the very simple mounting procedure of pressing the switch into a round panel hole. The round mounting hole provides a further advantage for matrix mount applications. Instead of the complicated egg crate assemblies which were used in the past, a simple plate with 11⁄16 inch diameter holes punched on ¾ inch centers is all that is needed to mount any size matrix.

All standard pushbutton styles and colors may be ordered for this switch in the type 590 (solder terminals) and 591 (printed circuit terminals) versions. In addition, pushbuttons are available which enhance legibility for use with L.E.D.s and neon lamps.

1. **Switch Characteristics**
   - Contact rating: ½ amp resistive at 30 VDC. 1/10 amp resistive at 115 VAC.
   - Nominal pushbutton travel: .1 in.
   - Nominal operating force: 4 oz.
   - Form X.
2. **Materials and Finishes:**
   - Pushbuttons: high impact plastic per L-P-349a.
   - Housing: black thermoplastic.
   - Mounting clip: stainless steel.
   - Lamp terminals: beryllium copper, tin plated.
   - Switch terminals and contacts: brass, gold plated.
3. **Lamp:** T-1¾ incandescent, T-2 neon, or L.E.D. with midget flange base. Lamp remains stationary when pushbutton is depressed.
4. **Mounting:** Assemblies press fit into .687 ±.005 dia. holes from front of panel .Mounting clips accommodate panels from 1⁄16 in. to 3⁄16 in.
5. **Weight:** Approx. .25 oz.
6. **Solder Terminals:** Terminals accept AMP FASTON receptacle #60415 -1 or equiv.

series 650 marcoflex switch



Write for Marcoflex literature.

The 650 series lighted pushbutton switches are the smallest units currently available that incorporate both double throw and alternate action configurations.

These are the first switches to use IPI's patented Marcoflex switch mechanism, which makes their compact size possible.

Essentially, Marcoflex construction means that switching is performed by a single flexed spring. This simple mechanism reduces the number of parts for increased reliability and low cost. It also provides Series 650 switches with all the desirable mechanical characteristics, generally associated only with larger units: wiping action, multiple point (bifurcated) contact, snap action, tactile feel and high contact force.

The high contact force, together with wipe and bifurcated construction, make the 650 Series switches particularly suitable for low level use. Typical applications are office machines, data systems, computer peripherals, process control apparatus, lab test equipment, broadcast studio controls, telephone systems, point of sale equipment, reservation systems, etc.

Switches are offered in a choice of seven pushbutton colors, which can be custom-engraved to user specifications. Eight lamps are available, ranging from 5 to 125 volts, and the switch can accept any economical unbased T-1¾ or AIC neon lamp. Two mounting choices are available; one has snap mounting clips with solder terminals for mounting on 1⁄16" - 3⁄16" panels, while the second features PC terminals for mounting directly on the PC board.

1. **Switch Characteristics:**
   - Contact rating: 1 amp resistive at 30 VDC, .25 amp resistive at 115 VAC.
   - Single pole, double throw (form C) alternate or momentary action with independent lamp circuit.
   - Wiping snap action; bifurcated contacts.
   - Operating force: 11 oz. nominal.
   - Pushbutton travel: .08 total.
2. **Materials and finishes:**
   - Pushbutton: polycarbonate.
   - Base: molded thermoplastic, black.
   - Terminals (lamp): phosphor bronze, tin plated.
   - Terminals (switch): phosphor bronze, gold plated.
   - Mounting clip: stainless steel.
3. **Lamp:** unit accepts any unbased T—1¾ incandescent or AIC neon lamp. Lamp may be replaced from front of panel by removing pushbutton. No tools required.
4. **Mounting:** two choices available: snap-in mounting clips for 1⁄16"-3⁄16" panels, (5⁄8 in. square holes or slot) or PC terminals for mounting directly on PC board.
5. **Solder terminals** accept AMP FASTON receptacle #60415-1 or equivalent.

ILLUMINATED PRODUCTS INC. (formerly MARCO-OAK)

A Subsidiary of OAK Industries Inc.

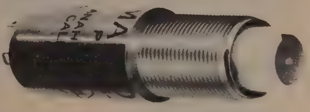
SWITCHES — FRICTION CAP PRESSLITES

Friction Cap Presslites provide the broadest possible flexibility in terms of electrical characteristics, appearance and mounting procedure, allowing the user to "engineer" a switch assembly to meet his specific requirements.

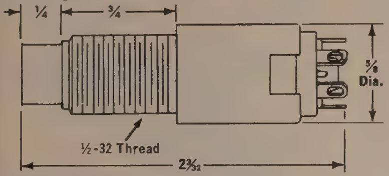
Many pushbutton sizes and configurations are offered, with sufficient space for engraved legends or symbols. Matching indicators are also available.

A wide range of mounting hardware is available to meet virtually every panel appearance or mounting requirement. All use T-1¾ midget flange based lamps.

Bases

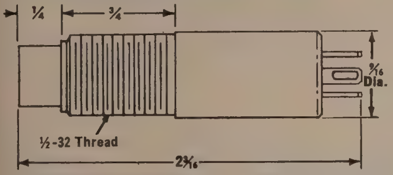


3 amp switch bases (typical)



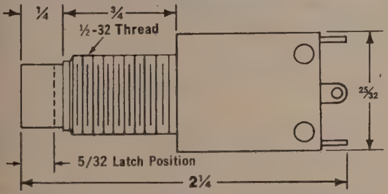
- Momentary Action
- 2 Sizes
- 4 Configurations
- Solder or PC Terminals
- Form Z
- U.L. Recognized
- Low Level Versions

5 amp switch bases (typical)



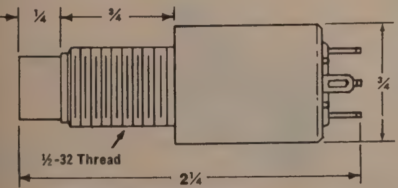
- Momentary or Alternate Action
- 2 Sizes
- Form C and 2 Form C
- With Internal Resistor
- U.L. Recognized

10.5 amp switch bases (typical)



- Momentary or Alternate Action
- U.L. Recognized
- 2 Sizes
- 4 Configurations
- Form X, Z, 2X, 2Z

15 amp switch base



- Momentary or alternate action
- Internal resistor available
- Form C

Pushbuttons

Styles:

Eleven different pushbutton styles are offered for Friction Cap Presslites, including "wrap-around" one-piece continuous construction, black opaque sides with colored top, reverse legend, "invisible" legend except when lit, and covered protected caps. There is a style to fit any panel requirement.

Pushbutton Colors:

Colors include white, lunar, two reds, two greens, blue, yellow, and orange. Standard colors were selected to provide the best compromise between pleasing appearance in the "off" condition and high light transmission in the "on" state.

Shapes:

All shapes are available in keyed or unkeyed (rotatable) designs.

PUSHBUTTON SHAPE	PUSHBUTTON SIZE
ROUND	½ in. ⅝ in. ¾ in.
SQUARE	½ in. ⅝ in. ¾ in. ¾ in. keyboard
RECTANGULAR	½ x ¾ in. ½ x ⅞ in. ¾ x 1 in.

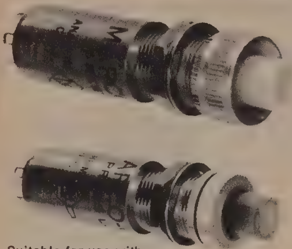
SWITCHES — LOW PROFILE PRESSLITES, SNIPE

5 amp snap action

ALTERNATE ACTION TYPE 416, TYPE 616 MOMENTARY ACTION TYPE 418, TYPE 618

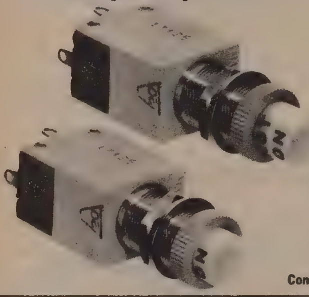
U.L. RECOGNIZED



Suitable for use with Light Emitting Diode (L.E.D.)

1. **Switch Characteristics:**
   - Contact rating: 5 amps resistive at 115 VAC or 28 VDC.
   - Nominal pushbutton travel:
     Type 416,616 7/32 in.
     Type 418,618 ⅛ in.
   - Nominal operating force:
     Type 416,616 1½ lbs.
     Type 418,618 2 lbs.
2. **Materials and Finishes:**
   - Pushbutton: high impact resistant plastic per L-P-349.
   - Pushbutton retention and knurled Mtg. nut: aluminum, bright anodized.
   - Keywasher and Mtg. nut; brass, nickel plated.
   - Housing: aluminum, anodized.
   - Terminals and contacts; coin silver.
   - Terminal board; diallyl phthalate, type SDG.
3. **Lamp:** T-1¾ incandescent, T-2 neon, or D2 L.E.D. with midget flange base. Lamp may be replaced from front of panel by removing pushbutton retention nut. Switches will not operate with lamp removed. Types 416 and 418 contain a built-in resistor for neon lamp use.
4. **Weight:** Approx. .5 oz.
5. **Styles:** Where maximum indication of pushbutton illumination is of primary importance, the reflector style retention nut is recommended.

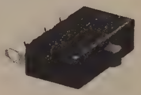
10.5 amp snap action



1. **Switch Characteristics:**
   - Contact rating; 10.5 amps resistive, 125/250 VAC. 10.5 amps resistive, 28 VDC, ¼ H.P. 125/250 VAC. Form C.
   - Alternate action switches: pushing button closes N.O. contacts and latches pushbutton. Pushing button again releases contacts and returns pushbutton to "out" position. Pushbutton latch point is 5/32 in. from "out" position. Switch and latch interlocked to prevent teasing.
   - Nominal pushbutton travel:
     Alternate action switches: 7/32 in.
     Momentary action switches: 3/32 in.
   - Nominal operating force:
     Single pole switches: 12 oz.
     Double pole switches: 20 oz.
   - Form X, 2 form X, form Z, and 2 form Z.
2. **Materials and Finishes:**
   - Pushbuttons; high impact resistant plastic per L-P-349.
   - Knurled nut; aluminum, bright anodized.
   - Keywasher and mtg. nut; brass, nickel plated.
   - Lockwasher; stainless steel.
   - Housing; molded thermoplastic.
   - Contacts: coin silver.
3. **Lamp:** T-1¾ incandescent with midget flange base or AlH neon. Lamp may be replaced from front of panel by removing pushbutton.
4. **Weight:** Approx. .6 oz.
5. **Solder Terminals:** Terminals accept AMP FASTON No. 60729-1 receptacles or equiv.

Contact Module U.L. Listed

10.5 amp, momentary action SNIPE switch



U.L. listed, CSA approved.

The IPI SNIPE (SNap/wIPE) 10.5 amp switch provides reliable switching at both low level and high power levels. The moving member is of rigid construction to assure immunity to high surge currents. One piece, pivotless moving contact construction assures uniformly low contact resistance.

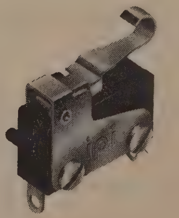
The patented wiping action provides self-cleaning of the contacts on every actuation, for superior low level performance. Optional gold plated contacts are available for use in mildly corrosive environments, or for low level use where the switch is actuated infrequently.

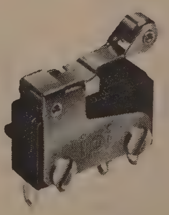
The SNIPE Switch is also available in two convenient, special actuator versions for specific applications.

The loop actuator version is recommended for use with non-sliding surfaces such as equipment doors and safety interlocks. The actuator mechanism is stainless steel.

The roller actuator version is recommended for use with sliding surfaces such as cams and is also of stainless steel construction.

1. **Contact Rating:** 10.5 amps resistive, 125/250 VAC, 10.5 amps resistive, 28 VDC. ¼ h.p., 125/250 VAC.
2. **Switch Characteristics:**
   - Pretravel; .050 in. max.
   - Overtravel; .012 in. min.
   - Operating force; 8 oz. max.
   - Release force; 2 oz. nominal
   - Movement diff.; .020 ± .005 in.
   - Form X or form Z.
3. **Materials and Finishes:**
   - Actuator; molded thermoplastic.
   - Housing; molded phenolic.
   - Terminals; brass, silver plated
   - Contacts; coin silver. Gold plating optional.
4. **Solder Terminals:** Terminals accept AMP FASTON No. 60729-1 receptacles.





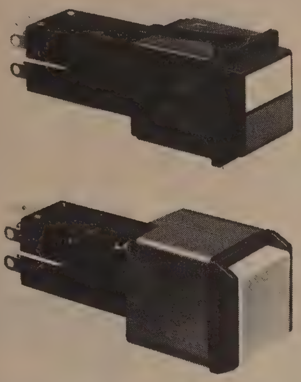
Write for IPI catalog SL-72A

ILLUMINATED PRODUCTS INC. (formerly MARCO-OAK)

A Subsidiary of OAK Industries Inc.

SWITCHES — PRESSLITES

700/800 SERIES



- Contact Rating: 10.5 amps resistive, ¼ H.P., 125/250 VAC. 10.5 amps resistive 28 VDC. Contact modules U.L. listed.
- Latching action: alternate action switches have latching pushbutton feature. Pushbutton latch point is 5/32″ from "out" position.
- Materials and finishes:
  Housing: black thermoplastic
  Contacts: silver alloy
  Lamp terminals: brass, tin plated
  Common terminal is gold finished.
- Lamp: T-1¾ bulb with midget flange base.
- Weight: 1.5 oz. (max.) including pushbutton and mounting hardware.

Illuminated Products 700 and 800 Series Presslites offer a new standard of versatility and convenience to the user. Pushbuttons are available for either split legend (2 lamp) or single legend (1 or 2 lamp) operation. Two optional mounting styles are offered, snap-in for minimum assembly time, and hard mount for application involving shock and vibration. Optional pushbutton barriers or bezels are available, on black or light grey housings. Barriers prevent accidental pushbutton depression.

Both alternate and momentary action is available. Alternate action switches are supplied with a latching pushbutton, which remains depressed while the switch is on, to provide visual recognition of the on-off condition. The latch mechanism (patent pending) is unique in that the switching and latching action are interlocked and occur simultaneously, making it impossible to "tease" the switch. Other latching pushbutton switches require full depression to latch; incomplete depression will temporarily close the switch, but release it as soon as operating pressure is removed.

Contact rating is 10.5 Amps at 125/250 VAC, or 28 VDC. The contact module is U.L. listed and CSA certified. Both single and double pole operation is available, in double break single throw (form X) or double break 2 circuit (form Z). The contacts provide both snap and wiping action, for operation over a broad load range.

All of the above configurations are also available without switch contacts for use as 1 or 2 lamp indicators.

COLORS

Pushbutton colors were selected to provide pleasing appearance in the "off" condition and high light transmission when the lamp is "on". Two red and two green colors are offered to permit effective illumination under both normal and high ambient light environments.

STYLES

Five different bushbutton styles offered meet most requirements. Other styles, such as hidden legends, are also available on special order. Where two different styles are required on a split legend pushbutton, a drawing or sketch should be provided.

ENGRAVING

Illuminated Products Inc. distributors provide custom engraving of all pushbutton styles. Where severe service is anticipated, Style 8 is particularly recommended to protect the engraved legend.

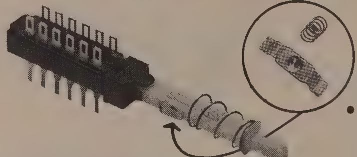
MODULAR PUSH BUTTON SWITCHES

SCHADOW™

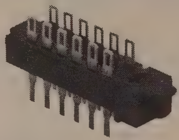
"Creative Switchmakers" for Home Entertainment Products and Test Equipment

If it's a better switch you need . . . better switch to Schadow!

better switch...here's why...

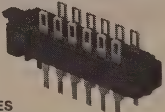


HAND WIRING AND FLO-SOLDERING CONNECTIONS ARE STANDARD
- Solder lugs on top for hand wiring
- PC spikes at bottom for flo-soldering



SUPERIOR MODULAR CONSTRUCTION
- Ease of maintenance . . . switch plunger with sliding contacts is removable from the front without disturbing electrical connections

INDIVIDUAL COIL SPRING LOADED MOVING CONTACTS
- The coil spring-loaded contoured moving contacts have been designed to provide balanced contact pressure for optimum surface to surface interface with the fixed contacts . . . assuring reliable performance in low voltage (dry circuit) applications
- Long term low contact resistance
- Constant coil spring tension at the contact points provides positive self-cleaning action



MODULE ADVANTAGES
- Enclosed housing protects inner contact area from dust and foreign intrusions
- Fixed terminals are "staked" in position, providing an extra seal to help prevent wicking of solder or flux
- Molded PC Board Standoffs, front and back, on bottom side, assure parallel mounting

TECHNICAL DATA

Contact Resistance ....4-6 mOhms
after 25,000 cycles ....6-20 mOhms
Lifetime Expectation Interlocked (50,000)
Momentary, Push Push (100,000) cycles
Material of Construction
Fixed contact. Brass/Silver Plated ....0002"
Moving contact ....Bimetal Brass/Silver .0004"
Plunger Material....Polycarbonate V-0 rated or Delrin
Contacts ....Non-shorting
Housing Material.........Polycarbonate V-0 rated or Glass Reinforced Nylon

Terminal Board Material ....High Grade Paper Phenolic or V-0 rated material......Series F
Key pressure with 2PDT ....28 oz.
Key pressure with 4PDT ....32 oz.
Key pressure with 6PDT ....35 oz.
Key pressure with 8PDT ....42 oz.
Key pressure with 10PDT ....46 oz.
Key pressure with Power Switch ....42 oz.

NOTE: Lighter key pressures available, contact factory for details.

NOTE: For switching applications requiring flame retardant materials, contact factory.

MECHANICAL REFLECTING INDICATOR BUTTONS FOR F & G SERIES

- Uses no energy. Needs no lamp, lamp/holder, power supply, switch contact or wiring.
- Works on the principle of reflecting ambient light through a clear plastic lens.
- Generates no heat and eliminates costly lamp replacement.

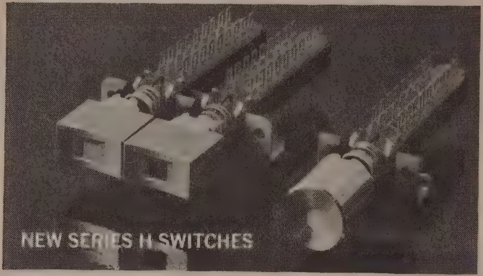
the right touch to turn your equipment on



NEW SERIES H SWITCHES

Out of Schadow and into the limelight emerges a significant and exclusive breakthrough in modular push button switches.

Schadow Series H push buttons always return to the out position to provide continuity of attractive appearance . . . indicate function by a remarkable reflecting principle . . . and are quieter both in push-push and interlocking actions. Add these pluses: constant low contact resistance, coil spring loaded contoured bridging contacts, solder lugs on top, PC spikes bottom, with molded circuit board stand-offs . . . pin centers .157" . . . all the proven characteristics of Schadow successful Series F.

If it's a better switch you need . . . better switch to Schadow.

CA-110 SERIES

Schadow, the creative switchmaker, has developed a "lampless" push button switch, with bright color indicators — with or without graphics — to mechanically indicate changing functions.

This innovative push-button switch, Series CA 110, is for use in high quality commercial applications. The sophistication of the series in terms of electrical construction (bifurcated contacts — coil spring loaded) and mechanical actions available, will satisfy the most demanding switching requirements.

Tableau or stacked switches are available in Series CA 110, 15 switches wide x 10 high per chassis.

Because a lamp and socket assembly is omitted, economies in manufacture permit a lower pricing schedule, and the elimination of another drain on electrical power sources.

If it's a better switch you need . . . better switch to Schadow.

FF, FFA, FFL Series

(available in two rows per assembly maximum)

Model T-Gr — A miniature modular switch assembly featuring row-to-row interlocking at low cost.

Electrical and mechanical specifications are the same as Series F.

FF Series features Standard F Series push buttons. FFA Series features Schadow mechanical reflecting indicator buttons. FFL Series features illuminated push buttons.

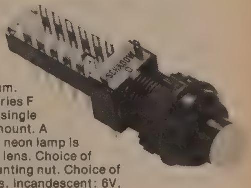
ANOTHER SCHADOW EXCLUSIVE!

MUTE SWITCH
(for F Series only)

To mute noise in critical audio or video circuits. By attaching one Schadow Mute Switch to any module in an interlocking group, momentary closure is made automatically when any button is pushed.

Mute Switch has solder lugs on top, PC pins at bottom in the same plane as F Series switches for ease of installation.

ZFL Series illuminated

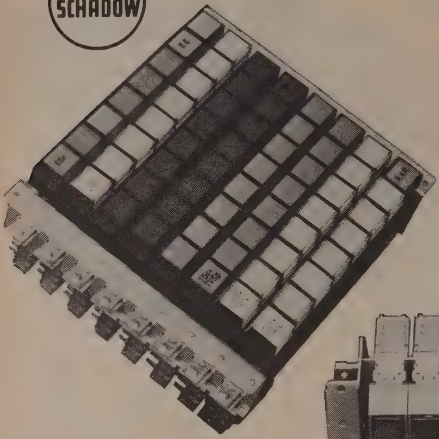


Compact, for illumination where space is at a premium. ZFL can be fitted to any series F module for an illuminated single position central bushing mount. A miniature incandescent or neon lamp is mounted behind a colored lens. Choice of black or chrome front mounting nut. Choice of red, green or yellow lenses. Incandescent: 6V, 12V or 28V Neon: 110-220 AC

Special Terminal Configurations and selective removal of PC pins or Solder lugs as required.

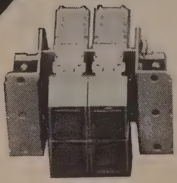
SCHADOW

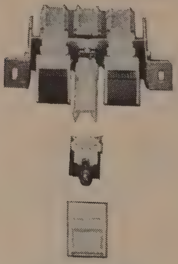
High quality Series CL illuminated and Series C non-illuminated push button switches



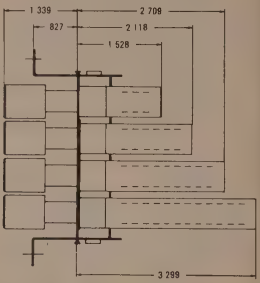
This push-button switch is for use in high quality commercial applications. The sophistication of the Series "CL" & "C" in terms of electrical construction (bifurcated contacts — coil spring loaded) and mechanical actions available will satisfy the most demanding switching requirements.

Tableau or stacked switches available either "CL" or "C" Series, 15 switches wide x 10 high per chassis. With the designation Series "CL" this switch is available with slip-on lamp holder. Use Type 5522 lamp. Button spacing is 17.5mm (.689").





Remover plunger, including button and the sliding bifurcated contacts, by loosening the locking bar.



SPECIFICATIONS: SERIES CL and C PUSH BUTTON SWITCHES

MECHANICAL DATA

Key travel = .315" Contact travel = .197"
Life 300,000 cycles depending upon load.
Key pressure — 2 & 4PDT = 35 oz.; 6 & 8PDT = 49 oz.

MECHANICAL ACTIONS AVAILABLE

Gr	= Interlocking.
Gr_1, Gr_2	= Two independent interlocking groups.
o.A.	= Momentary.
A.o.R.	= Momentary release button for interlocking.
EE	= Push-push.
Z	= Central release for individual latching.
Sp	= Blocking action only one key down. Switching is delayed to increase margin of safety.
Gr + Sp	= Interlocking with blocking. Maximum 15 button (stations) in one row.
Gr_1, + Sp Gr_2 + Sp	= Two groups of interlocking with blocking. (Group 1 can be blocked independent of Group 2.)
o.A. + VSp	= Momentary action with blocking.
EE + VSp	= Push to engage, push again to release — with blocking. The depressed button must first be released before another button can be depressed.
Gr + VSp + A.o.R.	= Interlocking with blocking and locking of button with one central momentary release button. The depressed button must first be released by central release button or solenoid remote release, before another one button can be depressed.
Gr + RSp + A.o.R.	= Locked — Interlocking with blocking. A central release button must first be depressed before any of one interlocked buttons can be depressed; this button remains latched after release button is allowed to return. The main circuit can be interrupted, if necessary, through the release button contacts. In this way, a 4 amp. circuit can be switched, without current, through standard C-Module switch contacts.

CHASSIS AND STATION DATA

Model Number	17.5
Center to center spacing	0.689"
Number of stations	1-15
Standard Buttons-Series "C" (Non-illuminated)	CSX
Standard Buttons-Series "CL" (Illuminated)	CRS, CRR

CONTACT TYPES

Standard: Non-shorting — Solder Terminals Top, PC Terminals Bottom.

Shorting: ks	Short PC top, Standard PC bottom: SI Short PC terminals both sides: SC Special cut off terminals either side .036" long.

INSULATION MATERIAL

Contact Plate: Phenolic 20.62.8 Kl.IV
Module: Polycarbonate (Makrolon)
Contact Plunger 2u, 4u: Polycarbonate (Makrolon)
Contact Plunger 6u, 8u: Polyamid
Outer Plunger: Azetalharz

ELECTRICAL DATA

Voltage Max.: 1000 volts.
Current Max.: 2 amps $\cos_{\phi} = 1$.
Load Max.: 100 watts ac.
Load Max.: 25 watts dc.
Test Voltages: Contact to ground 300 volts ac.
Terminal to terminal: 2000 volts ac.
Auxiliary terminals to outer-terminals: 100 volts ac.
Lamp holder contacts to ground: 1500 volts ac.
Insulation Resistance: $10^{12}\ \Omega$ after 96 hours storage in 95-100% humidity.
Contact Resistance: 5 milli Ω.
Contact Resistance: After 25,000 switching cycles — about 15 milli Ω (depends on load).
Dielectric loss, $tg\delta\ 4x10^3$ (300 kHz).

POWER SWITCH NC17 (UL, CSA and VDE Approved)

Max Voltage — 250 ac.
Max. Current — 6A ($Cos\phi = 0.75$)
Max. Current — 3A (Inductive load)
Max. Voltage — 250 dc.
Max. Current — 4A dc.
Test voltage between terminals & chassis: 3000V ac.
Test voltage between terminals & contacts: 2000V ac.
Contact Resistance: 50 milli Ω (With rated load).

SPECIFICATIONS: SERIES CL TABLEAU SWITCHES

TABLEAU MECHANICAL FEATURES

EGr	= Interlocking independent of each row.
EGr + ESp	= Interlocking with Blocking independent of each row.
TGr	= Interlocking of several (maximum 10) rows up to 150 buttons without blocking.
TGr + ESp	= Interlocking of all buttons, but blocking of buttons in each individual row of switch banks only.
TGr + TSp	= Interlocking and blocking of all buttons (only one button can be depressed at a time).
TGr + TVSp + A.o.R.	= Central release button, or solenoid release, interlocking with blocking. Only one button can be depressed in entire Tableau until central release button is depressed to release previously depressed button.
TEE + TVSp	= Push to engage. Push to release with blocking of tableau section referred to. The only one depressed button must be depressed again to release before any other one button can be depressed.
TGr + TRSp + A.o.R.	= Locked — interlocking with blocking. A central release button must first be depressed and held in its position before any one of the interlocked buttons can be depressed. This button remains latched after release button is allowed to return. The main circuit can be interrupted, if necessary, through the release button contacts. In this way 4 amp can be switched, without current, through the Standard C-Module switch contacts.
EGr + TRSp + A.o.R.	= Central release button in each row (righthand side) with pre-locking of entire keyboard. Only one button can be depressed in the Tableau, and only in that row, the central release button previously has been depressed. The central release buttons are connected as one lock. Each row of interlocked switch banks is independent of each other.

FL Series illuminated push-button switches

Series F switches can be illuminated simply by installing a snap-fit lampholder, a lamp, and an illuminated-type button. Only the basic front dimensions change. The only additional cost is the lampholder, bulb and the illuminated button.

Illuminated buttons are available with clear or colored front mounted lenses with a white translucent markable insert behind the lens. The lens is easily removable to legend the insert or for lamp replacement. Centerline is 17.5mm for Series FL Switches.

STANDARD LAMPS AVAILABLE:

6522- 6V.30mA
12522-12V.30mA
13522-24V.30mA

Unless otherwise specified, lamps are installed at the factory.

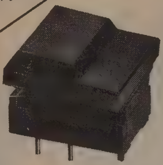
digitast™

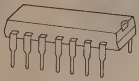
modular electronic switch input component



digitast

SR 12.3mm wide x 17.1mm

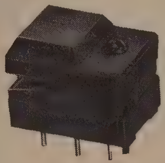
ST 17.3mm wide x 17.1mm (pictured)



digitast

SRL (LED factory or customer installed) 12.3mm wide x 17.1mm (pictured)

STL (LED factory or customer installed) 17.3mm wide x 17.1mm



Digitast is a remarkable new modular electronic switch input component for use with dual in-line packages (DIP). The inner construction, in connection with standard TTL-IC's, eliminates more costly and troublesome conductor plate sandwiched switches.

The single pole, double throw momentary contact element is made of gold-plated over nickel-plated brass. Included in the contact arrangement is a unique bussing contact precluding the need for double-sided printed circuit boards in most applications. The design of the Digitast housing around the outer contacts prevents wicking of flux or solder.

The contact arrangement of the DIP also lends itself to economical PC board designs and assembly techniques of sophisticated electronic equipment. The modular design allows simple plug-in capability, including 2 PC board locator pins and 4 PC board stand offs for flush, parallel mounting. A crisp, consistent tactile feel is achieved through the use of a spring-loaded, vibration-free inner contact arrangement. Two standard button sizes are available: the 12.3mm and 17.3mm widths, with or without light emitting diodes (LED).

The unique two level button design permits the use of the lower level for LED INSTALLATION or for economical HOT STAMPED GRAPHICS.

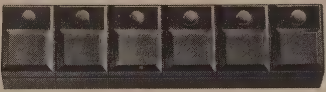
Digitast's uncomplicated construction allows you to economically design varied button configurations to your individual requirements.

Pushing the button applies pressure to the cross bar switching mechanism, in connection with the single pole bussing feature, achieving very low contact bounce and insuring constant electrical output.

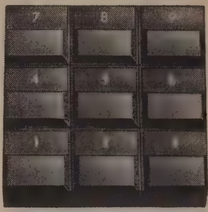
Digitast is innovatively designed for incorporation into the sophisticated electronic equipment of today and tomorrow.

CONSISTENT TACTILE FEEL

Individual button designs for volume orders



Above: Row arrangement—digitast—SRL minimum 12.7mm (.5 in) center distance within a row 17.8mm (.7 in) center distance between more than one row.



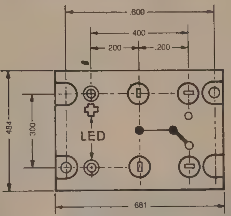
Right: Tableau arrangement — digitast — ST minimum 17.8mm key. centers (.7 in)

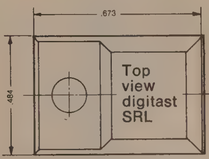
TECHNICAL DATA

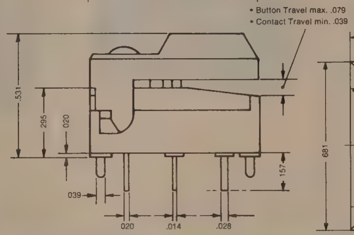
Housing: Polyamid
Total Button Travel: Max. 2mm
Contact Travel: Min. 1mm
Key Pressure: 2N (120p)
Life Expectancy (Mechanical): 5x10⁶
Mounting Method: by soldering to PC board
Ambient Temperature Range: −25°C +85°C
Contact: Brass, gold plated over nickel plated
Current Rating: 24V 10mA
Bounce (Contact time): less than 1MS

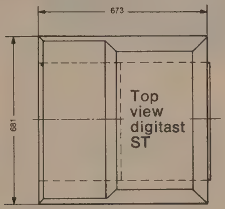
LED SPECIFICATIONS — Type SRL and STL

Type: HP 5082-4484 or equivalent
Color: Red, Green Yellow
Light Band: 660nm
Luminous intensity at 20mA: 8 mcd (1.2 mcd)
DC Forward Current: 50mA (40mA)
DC Power Dissipation: 100mW
Forward Voltage at 20mA: 1.6V
Digitast can be supplied with button disassembled for customer procurement/installation of LED.







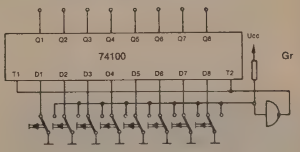


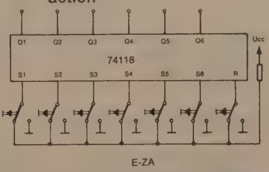
APPLICATION SCHEMATICS — Bounce Free Switching With Standard-TTL-Ics

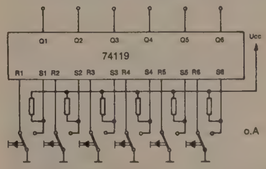
Right: Button arrangement with interlock function

Below: Push to maintain — Button arrangement with central release

Below Right: Button arrangement—Momentary action







Due to continuing research and product technology, specifications are subject to change without notice.

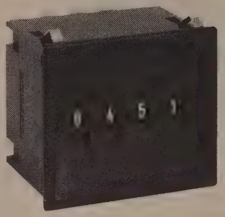
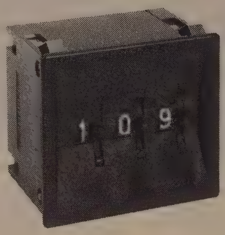
TYPE A

Rear mounted
Housing color: black (std.); grey (special order)
Connections: direct solder or edge connector
Positions available: 10, 11, 12, 16
Overall dimensions for single switch module: 11 mm wide x 53 mm high x 54 mm deep



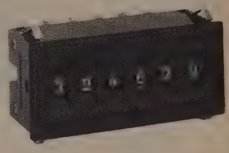
TYPE B

Front mounted
Housing color: black (std.); tan (special order)
Connections: direct solder or edge connector
Positions available: 10, 11, 12, 16
Overall dimensions for single switch module: 12.5 mm wide x 58 mm high x 57 mm deep



TYPE G (the world's largest thumbwheel switch)

Front mounted
Housing color: black (std.); tan (special order)
Connections: direct solder or edge connector
Position available: 10 only
Overall dimensions for single switch module: 10 mm wide x 76 mm high x 79 mm deep



TYPE H (standard) - **TYPE S** (sealed)

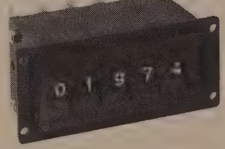
Front mounted
Housing colors: black or tan
Connections: solder, edge connector, PC pins (wire wrap)
Positions available: 10, 11, 16
Overall dimensions for single switch module: 10 mm wide x 33 mm high x 38 mm deep

TYPES L AND N (the world's smallest thumbwheel switches)

Rear mounted
Housing colors: black or tan
Connections: solder, edge connector, PC pins
Position available: 10 only
Overall dimensions for single switch module
Type L - 8 mm wide x 24 mm high x 22 mm deep
Type N - 7 mm wide x 24 mm high x 22 mm deep

TYPE M

Front Mounted
Housing Colors: black or tan
Connections: solder, edge connector, PC pins
Positions available: 10 and 11
Overall dimensions for single switch module: 8 mm wide x 33 mm high x 38 mm deep



TYPE P

Rear mounted
Housing colors: black or tan
Connections: solder, edge connector, PC pins
Positions available: 10, 11, 16
Overall dimensions for single switch module: 10 mm wide x 30.5 mm high x 28.5 mm deep

TYPE R

Front mounted
Housing color: black
Connections: solder, edge connector, PC pins
Position available: 10 only
Overall dimensions for single switch module: 20 mm wide x 33 mm high x 38 mm deep

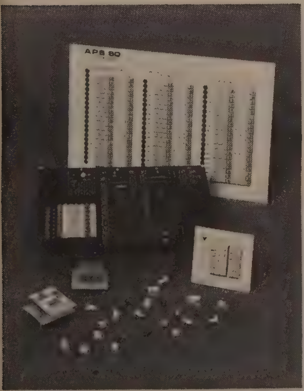
DATA MODULES



FEATURES

- Unique Programming Device
- Full 4-Bit Binary Output
- Compact Size
- Large Visual Display
- Quick Program Change

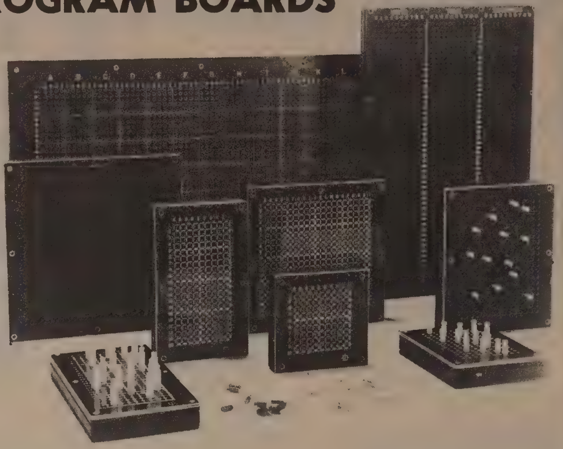
The Data Module is a 5-terminal miniature coding device with a 1 - 2 - 4 - 8 output. The output code selection is obtained by inserting one of 16 different plastic programming keys. The keys selectively close none or more of the contacts housed within the Data Module. These units are available with or without diodes in series with the outputs.

Part Number	Description
All with complement output (4 changeover contacts)	
675-022-200	Direct connection
211	With 4 each 1N4148 anode to common
212	With 4 each 1N645 anode to common
311	With 4 each 1N4148 cathode to common
312	With 4 each 1N645 cathode to common
All with standard contacts	
675-022-300	Direct connection
331	With 4 each 1N4148 anode to common
332	With 4 each 1N645 anode to common
341	With 4 each 1N4148 cathode to common
342	With 4 each 1N645 cathode to common
All with 90° terminations	
675-022-400	Direct connection
431	With 4 each 1N4148 anode to common
432	With 4 each 1N645 anode to common
441	With 4 each 1N4148 cathode to common
442	With 4 each 1N645 cathode to common
All	Programming Keys

MATRIX PROGRAM BOARDS

GENERAL:

As the result of over ten years experience, INFO-LITE has developed a most convenient, compact and economical system for reliable programming and switching • The Matrix Program Board allows a wide variety of switching/programming functions to be performed by simply inserting programming pins (shorting or diode type) into a 2 to10 deck contact matrix • No accessories such as "read" "write" equipment are required • Matrix Board features have lead them to be favored over such devices as patchboards, card readers, toggle and thumbwheel switches, mag/punched tape and electronic memories • The two basic uses for Matrix Program Boards are: (1) Cordless patching (input-output switching), using shorting pins; (2) Programmable diode matrices (logic memories), using diode pins • A two deck (X-Y) contact matrix is comprised of a set of contact busses (inputs) running at 90° to a second set of busses (outputs) • These two contact levels are isolated except at those crosspoints where programming pins are inserted • Terminals (solder/solderless) are provided on the rear surface for each contact buss • INFO-LITE offers two crosspoint grids: the 2000 Series with .250" grid and the 1000 Series with .130" grid • Panels with 5 x 5 to 100 x 100 crosspoints and up to 10 contact decks can be supplied to economically meet your requirements, whether for prototype or production quantities.



FEATURES

- Reliable closed entry contacts
- Rugged programming pins that will not bend
- Rapid & convenient method of programming/switching
- Permits insertion of components into network without soldering
- Replaces costly complex switching hardware
- Attractive and compact package
- Low capacitance for high frequency applications
- Ease of visual program checking

vacuum contactors

INTRODUCTION: Vacuum contactors offer the most reliable means available to control large amounts of power at high voltage. Units designed for dc, power frequency, and rf currents are available in voltage ratings to 50 kv and current ratings to 900 amperes continuous.

ADVANTAGES: The advantages of this type of unit include a high voltage capability, small physical size, high speed quiet operation, long life with minimum maintenance, non-exposed high voltage arcs, and low stable internal losses.

APPLICATIONS: Contactor applications include primary control of power supplies, industrial control of motors, switching in induction heating and mining equipment, tap changing in rf systems, and fault protection of transmitters.

J-B-T general purpose and industrial toggle switches

WHY IT PAYS TO SPECIFY J-B-T TOGGLE SWITCHES

J-B-T concentrates on trouble-free switches. Among the four groups of **toggle** switches, more than 500 models are Underwriters' Laboratories Inc. listed (most of these are also listed by Canadian Standards Association), and more than 170 models are made to MIL-S-83731 (formerly MIL-S-3950D) and other Government Specifications. Recent market studies indicate that while these switches are a **must** in military applications, more than three times as many are produced for general purpose and industrial uses where the principal requirement is dependability.

J-B-T TOGGLE SWITCHES ARE SPECIFIED FOR FOUR MAIN REASONS

1) **MATERIALS ARE GOOD.** For instance, in the heavy duty switches, J-B-T uses generous proportions of specially selected silver alloys in integral construction for contact surfaces, to provide extra overload protection, to dissipate heat and to keep contact resistance under .005 ohms.

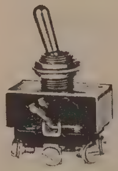
2) **THE DESIGN IS GOOD.** In heavy duty types (AC only), the large contact areas are held firmly in place by the spring action of the lever mechanism. In medium duty types (AC-DC,) self-wiping, heavily silver plated, double-grip contacts are designed for fast make, fast break and wide gap to minimize arcing for greater endurance.

3) **THE VALUE IS GOOD.** The many features required to meet Government standards are also incorporated in the general purpose and industrial series, and together with J-B-T's rigid in-plant testing, pay off in long useful life. And because J-B-T makes **only** quality switches — general purpose, industrial and MIL, the economies of long production runs are reflected in the surprisingly small price differential over run-of-the-mill brands.

4) **DELIVERIES ARE GOOD.** Every effort is made to keep the most popular models on hand in distributor stocks and to produce substantial OEM orders to meet customer's timetables. For complete information on these switches, ask for Catalog TS-7.

ORDERING INFORMATION

There are 3 groups of General Purpose, Industrial, and MIL toggle switches. (A fourth family or group is made up of subminiature models).



Cutaway view showing heavy-duty construction of Group I and Group III switches

Cutaway view showing self-wiping double-grip contacts of Group II switches

GROUP I— Single-pole and double-pole, heavy duty, for AC sevice, rated at 20 A at 125 VAC, 10 A at 250 VAC; ½ HP at 125 VAC, and ¾ HP at 250 VAC. As shown in the cutaway view, the large contacts of silver alloy especially suited for this service are held firmly in place by spring action of the lever linkage. Continuity is made to terminals **opposite** the throw of the lever. Available with screw type, solder type, or push on (spade) terminals.

GROUP II– Single-pole and double-pole, medium duty for AC and DC service, rated at 6 A at 125 VAC-DC, 3 A at 250 VAC-DC. Fast-make, fast-break design with heavily silver plated self-wiping double-grip contacts for exceptional durability. All in this series have solder type terminals. As shown with cutaway view, continuity is made to terminals on the **same** side as the throw of the lever.

GROUP III—3-pole and 4-pole heavy duty for AC service, (also referred to as three-circuit and four-circuit switches which can be used with opposite polarity on adjacent poles). Construction, rating and terminal options the same as Group I.

NUMBERING SYSTEM

For General Purpose and Industrial Switches, part numbers consist of 4 digits and 1 letter. The first two digits designate the Series and Group. 3rd and 4th digits designate the circuit, and the letter designates the type of terminals.

S = Screw Terminals L = Solder Lug P = .250 wide push-on (spade)

Series*	Group & Type	Rating	Terminals Available Standard Type
42	I SP	A	S, L, or P
52	I DP	A	S, L, or P
12 and 16	II SP	B	L only
22, 23, and 26	II DP	B	L only
63	III 3-pole	A	S, L, or P
64	III 4-pole	A	S, L, or P

*All series are also available with lever seal

A - 20 amps at 125 VAC; 10 amps 250 VAC
B - 6 amps at 125 VAC-DC; 3 amps 250 VAC-DC

Example 1: 52 22 P
1 2 3

1) Series and Group:
52 is a Group I Double Pole switch with bat type lever $\frac{11}{16}$" long, and no lever seal.

2) Circuit:
22 is a single throw On-None-Off switch.

3) Type of Terminals:
P is a .250" wide push on terminal.

SPECIALS

Variations from standard switches (such as lever length, finish, etc.) are designated by the standard part number and letter followed by 2 arbitrary numbers, or 2 arbitrary letters or combinations of both.

Example of Special: 52 22 L 00
1 2 3 4

4) 00 designates a specific variation from the standard, such as a bright chrome plated lever.

Prices Net, F.O.B. Factory, domestic packing, were in effect Feb. 1, 1974, and should be regarded as relative only. Quantity prices on request.

UL AND CSA IDENTIFICATION AND RATINGS: CONVERSION TO PREVIOUS NUMBERS

Underwriters' Laboratories, Inc. lists under "Switches, Special Use" all J-B-T general purpose toggle switches, with minor exceptions as noted. Most are also either presently listed by Canadian Standards Association or are in process of being listed. Listing also is given to previous J-B-T UL/CSA numbers as shown in the second column below. Where the new number (1st column) does not appear in the catalog price schedules, it is a model not regularly stocked but manufactured only for substantial production runs. The reference to ST numbers (for JAN-S-23) is to indicate only equivalent circuitry as there are minor construction differences between ST and UL or CSA models.

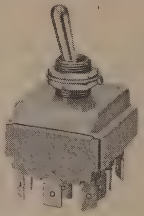
Group III — 3PDT with Solder Type Terminals



Group III — 4PDT with Push on (spade) Terminals

DETAILS ON J-B-T MS & ST TOGGLE SWITCHES

J-B-T MIL Series Toggle Switches MS35058 (SP), MS35059 (DP,) and MS25068 (4-Pole); ST40, ST42, ST50, ST52 (SP & DP) JAN Series. All J-B-T MS families contain a silicone rubber bushing seal to meet or exceed sand and dust toggle seal and other specification requirements. The 4-pole MS25068 switch bodies use a distinctive brown molded material chosen after extensive tests for high arc resistance and low shrinkage. All these MS & ST families have single hole mounting for bushing 15⁄32″-32 NS-2A by 15⁄32″ high, and toggle lever 11⁄16″ long. **Bodies** including terminals: **SP:** 1⅛″ x ⅝″ x 11⁄16″ deep: **DP:** 121⁄64″ x ¾″ x 11⁄32″ or 113⁄64″ deep: **4-pole:** 111⁄32″ x 19⁄16″ x 19⁄32″ deep. **Terminals:** MS, ST40, & ST50 types have solderable 6-32 electro-tinned screw terminals. ST42's and ST52's made to former JAN-S-23 and MIL-S-21195A (Ships) use solder lugs but have no seal. **Nominal Ratings:** 20 Amp. at 125 VAC, 10 Amp., at 250 VAC.

MS25098 (SP) and MS25100 (DP) Military Series; ST12 - 27 JAN Series. All MS25098 & MS25100 switches have case to terminal seals and silicone rubber bushing seal to meet and exceed Military standards. All these families have single hole mounting with bushing 15⁄32″-32 NS-2A by 15⁄32″ high (or ¼″ high in odd numbered ST models) and toggle lever 11⁄16″. **Bodies:** including solder terminals are: 1¼″ long, 11⁄16″ wide, 29⁄32″ deep for all MS models and most ST models. **Nominal Ratings at 65,000′ alt.:** SPST, SPDT, DPST circuits are rated at 3 Amp. at 125 VAC-DC. DPDT are rated at 1 Amp at 125 VAC-DC. At sea level, nominal ratings are substantially higher as in Group II general purpose switches. Significant internal improvements over earlier designs of MS25098 and MS25100 give faster break, wider gap, and increased insulation values, resulting in a longer life.

‡	‡	AN3021-6†	‡	‡	‡						

‡Not included in this specification. †AN3021-6 same as AN3021-5 with jumper. §Same dimensions as MS35059-27.

Note A: MS and AN types use internal sand and dust toggle seal and other high performance features involving extra cost over ST types. MS types to MIL-S-83731 (formerly MIL-S-3950D) have a silicone rubber bushing seal to meet sand and dust, and toggle seal tests. MIL-S-3950 models are superseded by MIL-S-83731 models.

Note B: For heavy duty switches in the MS25068, MS35058, and MS35059 Series, MIL-S-83731 calls for SCREW TERMINALS ONLY. These terminals have SOLDERABLE FINISH and may be soldered after removal of screws.

Prices Net, F.O.B. Factory, domestic packing, were in effect Feb. 1, 1974, and should be regarded as relative only. Quantity prices on request.

J-B-T INSTRUMENTS, INC.
NEW HAVEN, CONNECTICUT 06508

military toggle switches—MIL, and JAN types

Series MS35058, MS35059, MS25100, MS25098 and MS25068 to MIL-S-83731 (formerly MIL-S-3950D); Series ST40A-H, ST42A-H, ST50K-T, ST52K-T to JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings.

NEW! MIL-S-83731 — supersedes MIL-S-3950D for series MS35058, MS35059, MS25100, MS25098 and MS25068: MIL-S-83731 retains the same MS part numbers as well as the temperature, endurance, sand and dust toggle seal, and altitude requirements of former MIL-S-3950D variations. MIL-S-3950E and higher suffixes now are restricted to special purpose environmental switches.

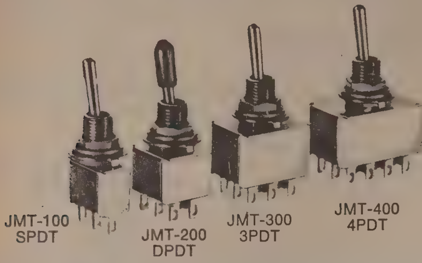
J-B-T SUB-MINIATURE TOGGLE SWITCHES



JMT-100
SPDT
JMT-200
DPDT
JMT-300
3PDT
JMT-400
4PDT

Manufactured by J-B-T in Connecticut, these sub-miniature toggle switches combine drastic reduction in size and weight with the trouble-free performance of J-B-T standard-size General Purpose and Government quality toggle switches.

Widely used in manually controlled, low current, solid state devices, computers, instruments; space, geophysical, and test apparatus, these tiny switches also have application in aircraft, communications, remote control and reservation systems, and peripherals — in short, in the many places where miniaturization makes it necessary to utilize all available space, both in front and rear of panel.

The drawings below cover the basic JMT Series. Standard terminal shown at the right accommodates 3 #22 wires.

JMT-400

● J-B-T Sub-miniature Toggle Switches with distinctive green bodies, ¼″ x ½″ for single-pole, and correspondingly small for 2-, 3-, and 4-pole, are available in 30 double-throw circuit configurations. The JMT Series, shown actual size at the left, with standard bat handle, terminals, and hardware, is considered basic. All Series have high-torque bushings which will not turn or work loose in the J-B-T surface plate; bodies are molded of a superior compound developed for its mechanical and dielectric strength; terminals are firmly staked, and the solder type will withstand repeated solderings.

SPECIFICATIONS

Nominal Rating: 5 amp. resistive load @ 125 VAC and 24 VDC; 3 amp. resistive load, 250 VAC; T01, T02, T06, and T08 Series — .5 Watt, 28 VAC or VDC Max. *UL Ratings:* 5 amp. inductive load (.75PF) @ 125 VAC.

Initial Contact Resistance: 5 milliohms max. 3 VDC, 100 ma.
Insulation Resistance: 20,000 megohms, min. for diallyl phthalate bodies; 10,000 megohms, min. for phenolic bodies.
Dielectric Strength: 1,000 volts rms at sea level.
Life Under Load: 100,000 make-and-break cycles for suffix — 23 models; 60,000 for others.
Bushing Strength: Hi-torque type; 12 pound-inches without physical damage to switch.
Weight (including hardware) = SP, 0.19 oz.; DP. 0.23 oz.; 3 pole, 0.28 oz.; 4-pole, 0.32 oz.

MATERIALS

Switching Contacts and Rockers: Coin silver. *Center Terminals* (non-switching parts): silver plated brass.
Switch Bodies: 1- and 2-pole types molded of green, glass-filled flame retardant diallyl phthalate (DAP) for high strength and arc resistance; at time of publication, 3- and 4-pole types high strength phenolic, but DAP type under development.
Bushings: Brass, nickel-plated. *Clamp:* Stainless Steel.
NOTE: *Gold plated* current carrying parts are available where required for dry circuit (very low energy) applications.
All terminals on MPC, T01, T02, T06, and T08 Series are normally supplied hard gold plated over 200 millionths of nickel, minimum.
Epoxy Sealed terminals are also available.

HANDLE & FINISH

JMT SERIES, standard bat handle; bright chrome-plated brass.
LFH SERIES, for panels up to ¼″, flat handle; satin chrome.
FH SERIES, for panels up to 3/16″, flat handle, satin chrome.
LL SERIES, locking lever with anodized natural aluminum cap; also anodized in red, blue, gold, black, and green for circuit coding and identification.
15 SERIES bat handle, and *15F Series* flat handle, are natural aluminum (also available in bright nickel).
MPC SERIES, TO-1 SERIES, standard bat handle, bright chrome-plated brass.
TO-2 SERIES, PC1,2 SERIES, short bat handle, bright chrome.
PB SERIES, push button, .375″ diam. threaded molded knob, normally black, also red or white. Interchangeable threaded .375″ diam. metal knob anodized in natural alum., red, blue, gold, black or green. Refer to page 5.
(*NOTE:* For other available finishes contact the factory or the J-B-T Sales Representative).
Mounting hardware, Hex nuts and locking ring are brass nickel-plated; lockwasher, steel, cadmium-plated with chromate treatment. Normally supplied: one locking ring *W-RI-12*; two hex nuts, *W-NU-11*; one internal tooth lockwasher, *W-WA-16*. Knurled nut, *W-NU-12* and several varieties of dress nut are also available. For details and part numbers, see page 10.
Color Caps: Tight — grip insulator caps for color coding as on JMT-200 DPDT shown above are available for easy attachment before or after switches are mounted, see page 10.

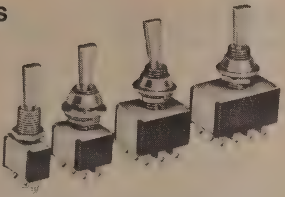
additional sub-miniature toggle switches

LFH AND FH SERIES with Flat Handles

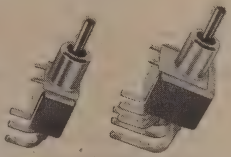


SERIES LFH and FH — provide a human engineering factor, with flat handles that are easy to grasp, give good sensing of the direction of throw, and orderly panel appearance. Flatted on two sides, each lever is permanently aligned in its operating plane perpendicular to the flat. Standard finish is satin chrome, with bright nickel and other finishes available on special order.

LFH and **FH** are identical in appearance, front of panel; the principal differences are .437″ length of bushing and 22° throw on LFH, and .352″ length of bushing with 25° throw on FH, both supplied with W-NU-17B, standard dress nut mounting.

The **FH** Series is designed for mounting on 3/16 in. panels; the **LFH** Series, which is more widely used, is designed for ¼ in. panels, or will provide extra space behind the panel. All models in either series can also be made with MPC or TO2 terminals; most are available with UL listing.

TO2 SERIES for right angle mounting in printed circuit boards



SERIES TO2 — These SPDT and DPDT switches are designed for dry circuit (very low energy) applications. Contacts and terminals are brass, plated with 100 millionths (.0001 minimum) of hard gold over 200 millionths (.0002 minimum) of nickel. Rating 0.5 watts @ 28 volts max. (AC or DC). Other thicknesses of plating on special order. Different from JMT sizes, TO2 bushing is .280″ long unthreaded and lever .272″ long. Terminals are .031″ x .050″.

Other Models and Features — 15/32″ bushing; solderless wrapped terminals; sealed lever; sealed bushing; perpendicular terminals; pinned levers; push-on terminals; epoxy seal

In addition to the best sellers shown in this catalog, J-B-T also produces and will gladly quote on:

Series 15 and 15F — JMT body for space-saving behind panel but substantial 15/32″ bushing and ½″ mounting hole, same as standard size J-B-T toggle switches, for front of panel. Series 15F have flat handles.

Series TO1 — SPDT, DPDT, solderless wrap (wire-wrap terminals for dry circuit applications. Refer to SK-196, -197.

Series TO3 — Sealed lever added to standard J-B-T switches.

Series TO4 — Sealed lever and sealed bushing added to standard J-B-T switch.

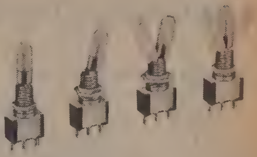
Series TO8 — Right angle bent gold-plated brass terminals for vertical (perpendicular) operation. (90° different from TO2.)

Series T12 — JMT with bat style toggle lever; internally pinned (riveted) where extra ruggedness required.

Series T13 — Standard JMT construction with silver push-on terminals .031″ x .062″ x .200″ for AMP 60900-1 or equal connector.

Epoxy Seal — Seals terminals to case. May be specified on any model.

LL SERIES with Locking Levers



SERIES LL — Made with spring-loaded locking mechanism to prevent accidental shifting of lever — a definite advantage on planes, ships, trains, or other vehicles where sudden motion might cause switching errors. Also, for test equipment, other instrumentation or computer circuits where accumulated data might be lost through unintentional switching. As a human engineering factor, the operator must think about the switching operation before he can complete it.

LL Series are normally stocked with natural aluminum caps, but for circuit identification caps can be supplied with anodized colors: red (danger), black, blue, gold or green.

sub-miniature toggle switches

PC1

SERIES MPC, PC1 AND PC2

Sub-miniature toggle switches are made with terminals for insertion in printed circuit boards; MPC for direct insertion, and PC1 and PC2 with small, attached printed circuit, for right angle insertion. Terminals are plated with 100 millionths (.0002 minimum) nickel for ease of solderability. MPC Series includes the same front-of-panel construction as the standard JMT Series as well as such modifications as FH (Flat Handle), LL (Lever Lock), 15 Series (Large Bushing) and other variations. (Illustrations approximately actual size.)

NEW! SUB-MINIATURE ROCKER AND PADDLE LEVER SWITCHES

PADDLE LEVER SERIES MP1

Series MP1 † 1-, 2-, 3-, and 4-pole, shown approximately three-quarter size. Paddle levers are molded nylon; black supplied as standard; red and white also available. Other colors on special order.

Electrical characteristics and dimensions below the mounting bracket are the same as in JMT's. Switches also may be made with printed circuit terminals (MPC type for direct insertion), push-on terminals (T13 Series), and solderless wrap terminals (T01 Series). In addition to their attractive modern appearance, the MP1 Paddle Lever Series and the MR1 Rocker Series feature extra built-in strength where it is needed most. A sturdy support column with a rivet-pivot actuator fastening attaches the rocker or paddle **through** the support so that it moves freely in its plane but always is aligned and will not wobble or work loose.

PB AND NEW PB1 PUSH-BUTTON SERIES —(SPDT)

Push button switches combine *5 AMP RATINGS OF JMT* switches with *LIFE UNDER LOAD OF 100,000 CYCLES, MAKE-AND-BREAK*. Configurations are Maintained Action or Momentary Action; now made as single-pole, double-pole are under test.

Construction and dimensions differ from JMT switches but electrical specifications are substantially the same. Force to operate is less than 2 lbs. Rapid break generates audible click. SP weight with hardware is 0.4 ozs., over-all depth behind panel .795″. Flatted (D-shaped) bushings standard.

PB models formerly made with .375″ diam. metal knobs (W-KN-10) now have .375″ diam. threaded molded knob (W-KN-13). Colors as listed. PB1 models, new in this catalog, use .200″ diam. push-on molded knob (W-KN-12), black nylon standard, also red and white. *PB* and *PB1* catalog models have standard JMT solder terminals but can be made with other terminations.

NOTE: *PB1* models, such as PB1-123, are interchangeable with PB models, such as PB-123, except for smaller diameter shaft and knob, and slightly less height in front of panel and are priced the same. For details, ask for SK-273.

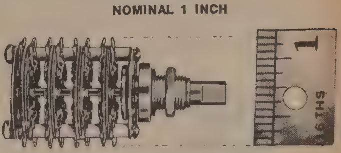
J-B-T INSTRUMENTS, INC.
NEW HAVEN, CONNECTICUT 06508

sub-miniature rotary and lever switches

SUB-MINIATURE SWITCHES MADE TO MANY PERFORMANCE LEVELS OF MIL-S-3786C, TYPE SR05; ALSO NON-MILITARY X AND V VERSIONS.

SERIES 7000, FULL 12 LIVE SWITCHING CONTACTS PER DECK:
SERIES 5000, UP TO 8 POLES PER DUAL-DUTY DECK.

- **Precision built for Low-Current Usage where Size, Weight, Reliability are Important**
- **Unusual Versatility — More Contacts per Deck**
- **Accelerated Snap-Action Detent**
- **MIL Materials Throughout for Military & Non-Military Applications**
- **Uses — For test equipment, airborne and transistorized equipment, geophysical apparatus, and other miniaturized electrical and electronic devices.**



4 DECKS Series 5000
Model Number V-52114N-SR05S30C3MGC. Terminals have hole to accept two 0.032″ dia. wires, and supersede solid "T" terminals formerly supplied.

CAUTION — MIL-S-3786C, a sophisticated specification, spells out more than one performance level in each of several categories such as Temperature-Life, Vibration, Shock, and Altitude, J-B-T SR05 models meet many levels.

TWO BASIC SERIES — Full 12 live switching contacts per deck are available in **Series 7000** using a patented wafer design feature where rotor contacts are on the front, and switching contacts are on the rear of the same deck. 1 to 4 poles per deck 1 to 6 decks, standard.

Up to 8 poles per dual-duty deck are available in **Series 5000** which has up to 12 contacts including common on the front, and up to 12 contacts including common on the rear of the same deck. 1 to 4 poles on each side of dual-duty decks; 1 to 4 decks, standard.

THREE ROTARY TYPES — Both Basic Series are made in 3 types: **MILITARY STYLE SR05,** numbered for specific performance levels of MIL-3786C; **V TYPE,** of similar construction to SR05, but not ordinarily subjected to full military test procedures; and **X TYPE,** using the same materials as V type switches, but intended as replacements for previous models or as original components for non-military devices where requirements are similarly exacting.

LEVER SERIES (L and SR31 Types) — Outstanding design known as VL-7000 or VL-5000 Series, 1 to 4 decks. Illustrated on a following page.

KNOBS — Supplied with individually boxed switches on V and X types; not supplied on SR05 because separate military specification applies.

DIFFERENCES BETWEEN SR05 MILITARY, V & X

Switches other than X types use extra rugged index mechanisms and rotor construction.

* Complete model number for a typical MIL-S-3786C rotary switch is: V-71121N-SR05N30C3MGC, which designates specific performance levels. Likewise, for a typical lever-actuated switch: M3786/31-040. Unless otherwise ordered, switches will be furnished to this suffix (N30C3MGC). On certain models, sealed shaft and bushing are available at $2.00 extra cost, when so ordered.

LEVER ACTION SWITCHES — 2 and 3 Position, 1 to 4 Decks, 2 to 8 Poles Per Deck

SUB-MINIATURE LEVER SWITCHES

Derived from the high-performance subminiature switches described on another page. The VL-7000 and the VL-5000 positive indexing series and the VSRL-7000 and VSRL-5000 spring return types provide excellence in lever switches. MIL materials throughout; crisp 30° indexing. Max. depth behind panel 1.250″; panel slot .962″ x .062″; other details to SK-139, Rev. A and Catalog SM-33.

Typical switches are:

VL-71031N, single-pole, 3-position, one-deck, non-shorting **$5.42**

VSRL-71031N, same as above, with spring return to center position from either side **6.55**

VL-71032N, single-pole, 3-position, two-deck, non-shorting **7.97**

TYPE SR31 LEVER-ACTUATED SWITCHES TO MIL-S-3786C, MEDIUM AND HIGH SHOCK

Sub-miniature open construction, lever-actuated switches, similar to the one illustrated above, recently have been added to MIL-S-3786C as SR31 types. This category covers shorting and non-shorting; 1 to 4 poles per section; 1 to 4 sections per switch; meets both Medium and High Shock requirements as in Models M3786/31-040. Typical models are printed on preceding page.

ON MOST OF THE SWITCHES LISTED, THE FOLLOWING FEATURES ARE AVAILABLE:

1. Deck Identification
2. Extended Thru Bolt for Rear Mounting
3. O-ring Shaft and Panel Seal
4. Combination of Decks
   a) Nonshorting and shorting
   b) Shorting, shorting and bridging
   c) Nonshorting and shorting and bridging
5. Bridging contacts
6. Momentary positions
7. Isolated positions
8. Adjustable stops
9. Solenoid driven
10. Keylock
11. Gang switches
12. Concentric shaft switches

For switches that incorporate these features, a unique Janco part number must be assigned at the plant.

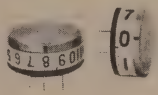
"ADAPTABILITY THROUGH VERSATILITY"

janco CORPORATION

Typical Unique Applications of Janco Rotary Switches

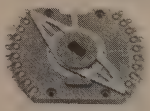
FOR "DRY" CIRCUIT SWITCHING

Intended to interface with low level and "dry" logic circuits. Ideal for use with TTL, ECL, and CMOS type devices, and is available in a variety of detent angles and output codes. The basic switch length is under one inch and additional decks add approximately 5⁄16" each.



MINI CODE SWITCH

Intended to be used with card racks on ½" centers, the unit measures ⅜" high. Provides decimal, octal hexadecimal, and most other common codes. Can also be lighted and supplied with or without seals.



TRANSMISSION SELECTOR SWITCH

Positive heavy detent mechanism produces 6" lbs. of force. Contacts make and break 15 amps @ 115 VAC switch through 10 selectable positions. The heavy duty diallyl provides high insulation resistance. Unique circuit provides isolated 10 position dual output.

FEATURES INTERLOCKING SELECTION MECHANISM

Prevents user from inadvertent selection of an unwanted or undesirable position or digit by automatic, predetermined, limited selection of positions in any switch bank. In its simplest form, a two-bank module could have the left or right switch limited to any number of positions with relationship to the other. Available with any number of banks, positions or selective characteristics.

JANCO
JANCO
JMP 36

MINIATURE PIN-TYPE ROTARY SWITCHES

Designed for printed circuit boards and front panel mounting. Available in various numbers of positions and poles.

FEATURES UNIQUE ON-OFF OPERATION

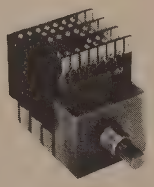
Actuated by pulling knob out of "off" position and rotating to "on" positions. While in "on" positions, circuitry cannot be shut off until knob is returned to "off" position and depressed. Number of positions optional.

MASTER COMMUNICATIONS SELECTOR SWITCH

In addition to providing the standard and modified coded outputs, it offers unique switching functions effected by longitudinal shaft movement. Momentary spring return or detented maintained contact positions actuated by pulling on the shaft. Only .675" in diameter.

MINIATURE POWER SWITCH CUTS COSTS BY 50%

Janco's line of miniature rotary switches is available with an auxiliary snap action switch affixed to the back. Coupled with an isolated positions feature, it enables the user to switch 10 amps with no danger to the switch. Cost reduction is approximately 50% over conventional power switches.



MORE SWITCHING IN LESS SPACE

Circuit board construction is featured in this switch. Offers the same switching capabilities normally associated with switches having 2 to 3 times more decks. Also features isolated positions and custom codes.

JET ENGINE START SWITCH

Switch knob is depressed and the contacts are held in a closed position by the solenoid. After the jet engine reaches the desired RPM, the starter system removes power to the switch, thereby disengaging the solenoid. A lighted knob is coupled with the start system indicating function.

MANUALLY HOMING ROTARY SWITCH

Features instant release button, which automatically returns to predetermined designated home position. Has four positions with visual indicator. Variations available.

JANCO CORPORATION

Box 3038 • Burbank, CA 91504 • 3111 Winona Avenue • (213) 849-2107 • (213) 845-7473 • TWX 910-498-2701

SERIES 1400/Illuminated Push Button Controls

STANDARD FEATURES AND OPTIONS

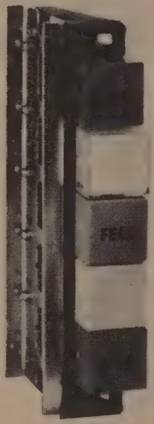
Capacity:	single push button or 2 to 20 on a frame
Contacts:	DPDT, 4 amperes, 125 VAC or 2 amperes, 250 VAC
Contact Material:	silver plated standard, gold plated .0002″ optional
Terminals:	solder or printed circuit (gold plating included when specified on contacts)
Illumination:	6, 12, or 24 volt lamps; sockets and terminals included at all stations. Lamps installed at factory or supplied separately
Legends:	hot stamping or engraving on outer or inner caps; printed transparent film inserts between outer and inner caps
Cap Size:	⅜″ x ¾″ rectangular or ¾″ square
Mounting:	two holes for #6 screws or #4-48 tapped plates; mating #4-48 screws available
Colors:	transparent: (light diffusing grid pattern also available with rectangular cap) red, yellow, green, blue, and clear Opaque: red, yellow, green, blue, white, black, dark gray, and light gray.

SWITCHING COMBINATIONS AND DEFINITIONS

Normal Position:	released condition.
Interlock:	sometimes called lockout, only one of two or more buttons can be pressed at one time. Interlock can be incorporated between any number of buttons.
Momentary:	spring returned to the normal position.
Maintained:	switch remains in depressed position until any of the release actions described below occur.
Push/Push:	push to lock in depressed position. Push again to release.
Reciprocal Release:	the switch remains in the depressed position until another reciprocal release button is pressed.
Master Release:	press to release any of the buttons in the depressed position. (The master release includes DPDT contacts, so it can double as a momentary switch.)
Reciprocal & Master Release:	combines the release actions of both the reciprocal and master release buttons.

SINGLE PUSH BUTTONS AND INDICATOR LIGHTS

For single button DPDT switching, you can order matching series 1400 controls with momentary or push/push action. Then, put an extra attractive touch to the appearance of your equipment with matching series 1400 indicator lights. The single push buttons and indicator lights are identical to the other series 1400 controls in form and fit and they are supplied with the same standard features and options. Mounting plates are optional.



LEGEND SIDE GUIDE

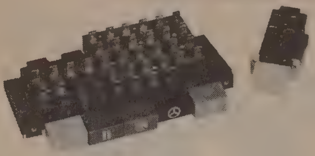
SERIES 1500/Illuminated Push Button Controls
16A-250 VAC POWER SWITCH



The Series 1500 single and ganged switch assemblies give you many benefits not found in other switches.

Up to five circuits per switch station, in combinations of N.O. or N.C. contacts, enables you to perform more complex switching in less space. Switch single phase, two phase/three wire, or three phase power with one module.

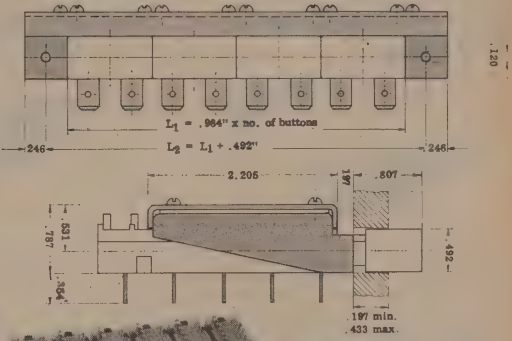
Combine the wide variety of circuits with the interrelated switching logic, such as interlock, reciprocal or master release, or any combination of these for the exact solution to your switching requirements.

All of this, plus the Series 1500 **saves you money**... when buying them — when installing them — when using them! Priced as low as $.85 per station at the 1000 quantity makes them one of the most economical power switches available. When installing them, simply attach spade terminals to the color coded contacts — eliminate soldering and relay hook-up. You get the biggest savings when you use them. Series 1500's are high-quality switches built to take it. The rugged construction and non-removable caps make these switches ideal for use in vending machines, major appliances, and other equipment subject to heavy use.

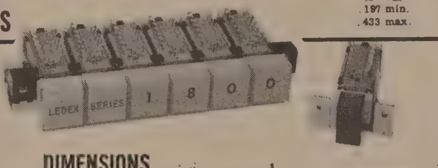
STANDARD FEATURES AND OPTIONS

CAPACITY... single push button to fifteen button assemblies.
CONTACTS... double breaking, silver plated brass.
MAX. CIRCUITRY PER... std. length — 1 NO+3 NC or 2 NO+2 NC or 3 NO+1 NC.
SWITCH MODULE... extended — 1 NO+4 NC or 2 NO+3 NC or 3 NO +2 NC or 4 NO+1 NC.
CURRENT CAPACITY ... 16A/250 VAC resistive.
LIFE, ELECTRICAL @ 10A/250 VAC... 5 x 10^4 with resistive load.
TERMINAL COLOR CODE... red dot — normally closed, no marking — normally open.
TERMINALS... spade lug .248" x .032"; mate with Amp "Faston" #42844-1 or equivalent.
MOUNTING... two holes for #6 screws or #4-48 tapped plates.
CAPS (NON-REMOVABLE)... size — .49" x .96". (Color (opaque) — black, white, red, yellow, green, blue, dark grey, light grey.
LEGENDS... hot stamping or engraving.

DIMENSIONS



SERIES 1800/Illuminated Push Button Controls



Tailor the Series 1800 illuminated push button controls to meet your specific switching requirements. You can integrate up to twenty high and low level switch modules on a mounting rail. The modules can be programmed to provide the interrelated release actions and interlock you desire.

The low level modules, with self-cleaning contacts, should be used to switch loads less than 20 watts. They are available with either 2P2T or 4P2T wiping contacts. For controlling circuits up to 6A/250 VAC, use the modules with bridging contacts. They are available with 2 NC, 2 NO, or 1 NC+1 NO contacts.

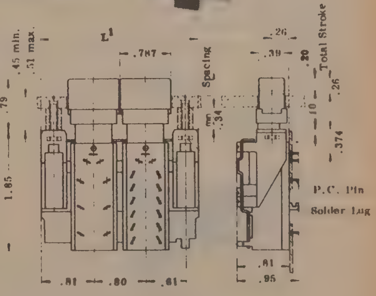
Options include single or dual bulb illumination. Legends can be hot stamped or engraved on opaque and transparent caps. Mylar film legends can be inserted behind the outer button lens on transparent caps.

For ease of installation, assemblies are available with P.C. or solder lug terminals. The solder lug terminals also accept Amp "Faston" #110 connectors or equivalent.

STANDARD FEATURES AND OPTIONS

CAPACITY... one to twenty switch modules on a frame.
SWITCHING ACTION... momentary. Push/push, reciprocal, master, reciprocal plus master release, interlock.
CONTACTS:
WIPING... 2P2T or 4P2T contacts @ 1A/60V. 20W maximum; 10 mA/5V minimum.
LIFE... 1,000,000 actuations @ minimum or 50,000 @ maximum load.
BRIDGING... 1 NO+1 NC, 2 NO or 2 NC contacts @ 6A/250 VAC maximum; 10 mA/20V minimum.
LIFE... 250,000 actuations @ minimum or 50,000 @ maximum load.
MATERIAL... silver plated brass.
TERMINALS... solder lug accepts Amp "Faston" #110 or printed circuit board pins.
LEGENDS... hot stamp, engrave or film insert (see legend chart for standard type).

DIMENSIONS



L¹ = .80" x No. buttons +.82"

ILLUMINATION... single or dual sockets for T4.6 mm lamps at all stations. Rectangle cap style ⁷⁄₁₆ x ¾ available in single socket only.
CAPS:
⅜ x ¾ inch.
Opaque... black, white, red, green, yellow, blue, light gray.
Transparent with light diffusing grid or plain... clear, red, green, yellow, blue.
⁷⁄₁₆ x ¾ and ¾ x ¾ inch.
Opaque... black, light gray.
Transparent for inner cap legend... clear, red, green, yellow, blue.
MOUNTING... front panel mounting with #4-48 screws.

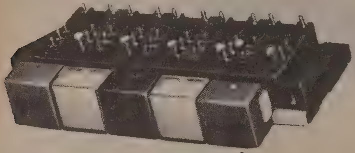
PUSH BUTTON SWITCHES

SWITCHES & SIGNAL LIGHTS

A versatile concept that gives you interrelated switching combinations . . . plus prototypes in 72 hours. Momentary . . . push/push . . . reciprocal release . . . master release . . . inter-lock . . . one assembly does the job of several.



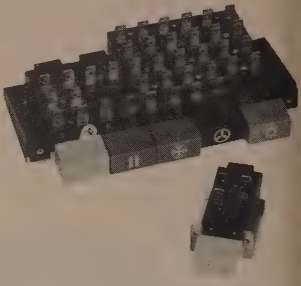
SERIES 1400 — ILLUMINATED PUSH BUTTON CONTROLS

DPDT contacts, 2 amps, 250 VAC. Two to 20 stations on a frame. Mount vertically or horizontally. Single button and indicator lights to match.

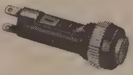
U.L. LISTED

SERIES 1500 — PUSH BUTTON CONTROLS

More switching in less space. Up to five circuits per switch station. Color coded contacts for use with solderless spade terminals. Non-removable caps, rugged construction. Use to switch single phase, two phase/three wire, or three phase power with one module 16A @ 250 VAC resistive.



LIGHTED & UNLIGHTED MINIATURE PUSH BUTTONS



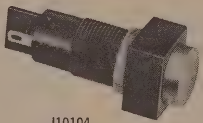
J10107

J15106

Part No. 15106 has double break contacts, with one set NO and one NC. Electrical life is 100,000 operations at contact rating of .1A/24VDC. Built-in lamp life is 10,000 hours.

Part No. J10107 has single throw NO contacts. Push button measures approx. ¼" dia. and has minimum electrical life of 50,000 operations at .1A/24VAC, resistive load.

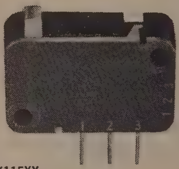
MOMENTARY PUSH BUTTONS



J10104

Round or square bezel 1P1T silver plated contacts, 2A/250VAC. Transparent or opaque caps available for legend display. Other momentary and maintained switches stocked, with a choice of size and colors, ratings up to 10A/250VAC.

CONTACTLESS SWITCHES



K115XX

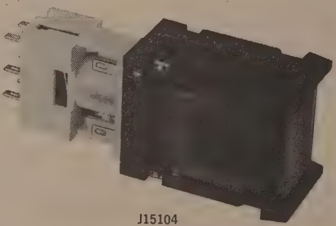
Contactless, miniature, push button and keyboard switches for highly reliable solid state operation, with transistor or Schmitt Trigger output, positive or negative logic. Solid state thumbwheel switches also available.

SERIES 1700 — ILLUMINATED PUSH BUTTONS

J15107

Lighted momentary and maintained with matching indicating lights, 2A/250VAC, 2 to 4 poles. Square, round or rectangular lens. Bulb, lens, and legend insert easily from front end of panel. Bulb life span 50,000 hours minimum.

DUAL BULB PUSH BUTTONS

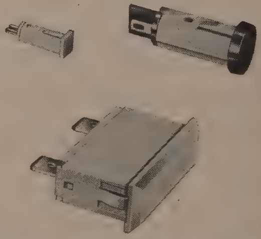


J15104

Lighted dual bulb push buttons with either momentary or maintained action. Available with 1P2T or 2P2T contacts, 6A/115VAC or 2A/250VAC.

License rights by RAFI of West Germany.

SIGNAL LIGHTS



Wide variety of attractively styled lights, from miniature pilot to large signal. Options include opaque or transparent lens, grid patterns, built-in or replaceable bulbs, solder, spade or PC terminals, and ratings from 6 to 220 volts.

STATOR INSULATION GUIDE

STATOR INSULATION	MIL SPEC.	USABLE TEMPERATURE LIMIT (C)	MINIMUM INSULATION RESISTANCE (MEGOHMS)	
diallyl phathalate	*MIL-M-14F type SDG*	*125*	*10,000*	*Most recent material, combines best combinations of desirable dielectric, low moisture, and structural characteristics at prices competitive to phenolic.*
Phenolic	*MIL-P-3115, type PBE-P*	*100*	*1,000*	*Most economical, most commonly used. Though non-nutrient to fungi, varnish impregnation per MIL-V-173 is available. Meets most military and commercial application requirements.*
Epoxy-Glass	*MIL-P-18177, type GEB*	*125*	*10,000*	*Economical, excellent structural and dielectric strength. Lower moisture absorption rate than phenolic.*
Silicone Glass	*MIL-P-997C, type GSG*	*125*	*10,000*	*Good RF characteristics. Lower structural strength than epoxy glass, and slightly higher in cost.*

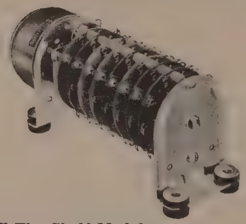
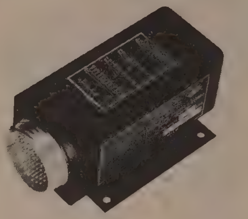
LEDEX REMOTE SWITCHING

STEPPING SWITCHES/CIRCUIT SELECTORS

Versatility, Economy, and Reliability are the main benefits offered by Ledex manual rotary switches. Sizes range from ½″ diameter multi-deck designs to 24-position switches measuring 2¼″ in diameter. For your more complex requirements, switches are available with concentric shafts or as complete switching packages. To simplify wiring and reduce your assembly costs, you can specify designs to include pre-wired components, wiring harnesses, or PC terminals.



30 Off-The-Shelf Models
Ledex Stepping Switches are used for transfer switching, remote control of predetermined circuit patterns, remote sequencing of complex switching arrangements, or in programming checkout and sequential operations. They are known best for their ability to perform multiple switching functions reliably, in limited space, and under severe operating and environmental conditions. Available in open construction, pre-wired modules or as packaged control solutions.

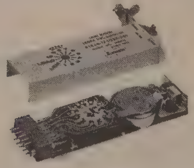


Ledex Hermetically Sealed Switches are engineered to withstand severe shock and vibration, such as encountered in aircraft, missile and military applications, and to provide added switching reliability in adverse environments. Used extensively in aero/space and underwater guidance controls, as mode selectors, in rocket firing devices, and in a variety of military control functions that demand a high degree of reliability. There are 19 models available from the shelf.

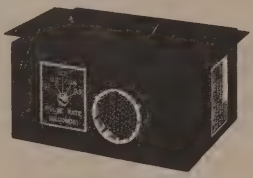
PACKAGED CONTROL SOLUTIONS

Here are examples of Ledex Stepping Switches designed into compact, reliable control packages that combine the best characteristics of solid state and electromechanical technologies.

Whether your problem involves armament controls or commercial control functions, there's a good chance Ledex has already solved a similar problem. Our Packaged Switches Catalog, B-3252, shows several more detailed examples and also includes specifications for 19 hermetically sealed switches available from the shelf.



Miniaturized Armament Control Intervalometer
Flat, compact, 12-position stepping switch measures only ½″ x 1¼″ x 4¼″, fires 19 rockets, sequentially in pairs. It includes a Ledex pulser to control time intervals over mil-spec. temperature and voltage ranges.



40-position Intervalometer with single or optional 5-speed ripple fire control
40-position intervalometer has 5 adjustable control speeds for rocket firing at intervals of 100, 200, 300, 400 or 500 milliseconds. Hybrid design combines best characteristics of solid state and electromechanical products for optimum performance, minimum weight, maximum reliability and lowest cost. Firing time intervals are maintained at ±5% through a voltage range of 22 to 31 vdc.

Universal Stores Dispenser
Intervals Variable on Digital Basis

All solid state and among the most flexible of Ledex intervalometer designs, this one permits the pilot to vary release intervals to any rate ranging from 30 ms to 9.99 seconds in increments of 10 ms. It includes a stepping switch to distribute sequential fire commands. Timing tolerance is ±10% over a voltage range of 22 to 32 volts and temperature to −55°C to +85°C. The package includes built-in suppression to protect solid state circuitry when switching inductive loads.

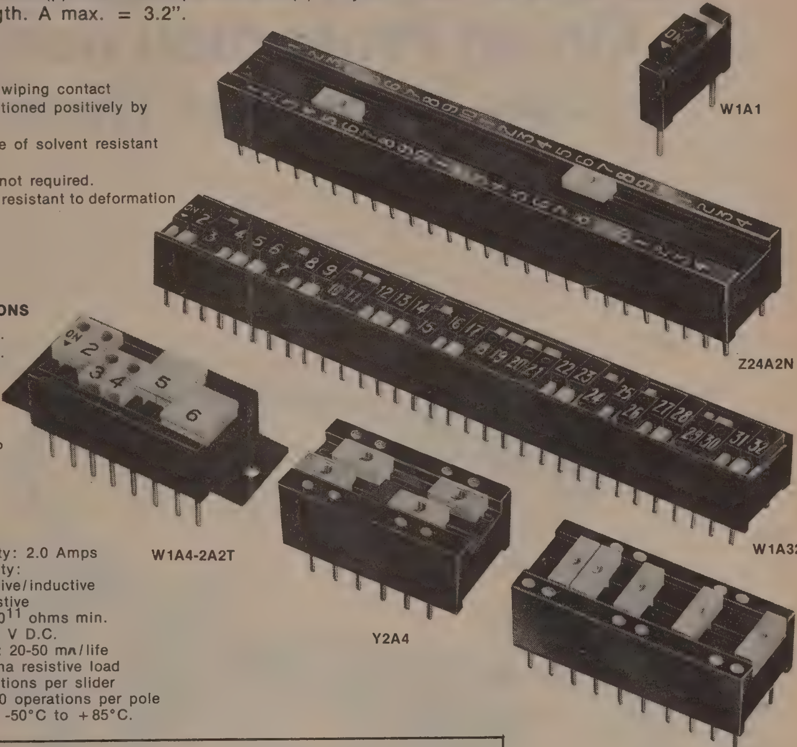
DIP SWITCH SUPERMART

Hundreds of Models • Reliable Performance • Custom Designs • Low Cost

A unique manufacturing process® makes it possible to furnish Lineac Switches in any desired configuration of switch patterns (W; X; Y; Z Series); slider positions or throws (t); poles per slider (p) and sliders per module (s) subject to data of Table #1 and maximum switch length. A max. = 3.2".



IMPORTANT FEATURES

- High reliability, patented wiping contact
- Detent-action sliders positioned positively by fingers or pen-point.
- Housing and sliders made of solvent resistant materials.
- Protective plastic covers not required.
- Pins of rigid alloy material resistant to deformation in handling.

SECONDARY DESIGN OPTIONS

#J -Common connected pins.
#M-Open frame construction.
#N-Numeric scale starting with "O".
#Q-Stops for multiple sliders/track.
#T -Mounting tabs for #2-56 screws.

SPECIFICATIONS

1. Current carrying capacity: 2.0 Amps
2. Current breaking capacity:
   .5A — 28 V D.C. resistive/inductive
   .5A — 115 V A.C. resistive
3. Insulation resistance: 10^{11} ohms min.
4. Dielectric strength: 500 V D.C.
5. Typ. internal resistance: 20-50 mΩ/life
6. Life expectancy at 50 ma resistive load
   W Series: 25,000 operations per slider
   X: Y: Z Series: 100,000 operations per pole
7. Operating temperature: -50°C to +85°C.

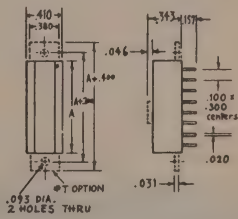
TABLE #1 SWITCH PARAMETERS

Series	Switch Action	Slider Connects A Selected Pin To	Throws (t)	Poles (p)	Sliders (s)	A ≤ 3.2"
W	Transverse Non-shorting	an opposite pin	1(on-off) 2(on-on)	1-8 1-4	1-32 1-16	(.1)pst
X	Longitudinal Shorting	an opposite pin	2-32	1-8	1-16	(.1)pst
Y*	Longitudinal Non-shorting	an opposite pin	2 on-off-on	1-8	1-20	.15ps
Z	Longitudinal Shorting	a "common" end pin	2-30 2-15	1-2 1-4	2 or 1 4 to 1	.200(1+t/2) .200(1+t)

* ps must be an even number. Center-off position available to order

SWITCH OUTLINE

For "A" Dimension - See Table #1



TYPICAL SWITCH CONFIGURATIONS

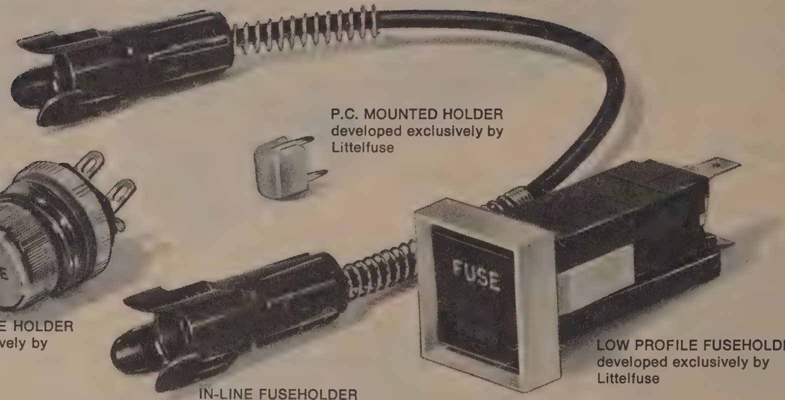
LINEAC CORPORATION
222 LAKE AVENUE, YONKERS, N.Y. 10701 [914] YO 3-5900

At Littelfuse we don't just meet your Circuit Protection needs —we anticipate them.



P.C. MOUNTED HOLDER
developed exclusively by
Littelfuse

TWIN MICROFUSE HOLDER
developed exclusively by
Littelfuse

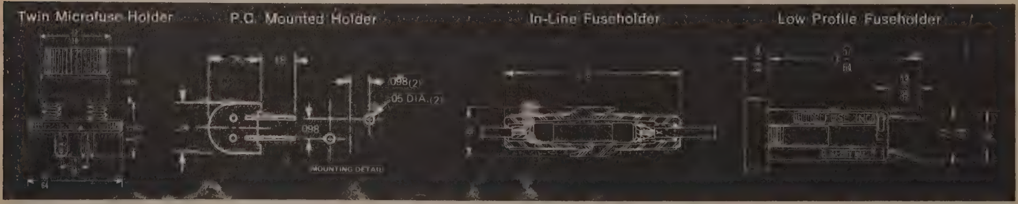
LOW PROFILE FUSEHOLDER
developed exclusively by
Littelfuse

IN-LINE FUSEHOLDER
developed exclusively by
Littelfuse

But that should come as no surprise. Since 1927, Littelfuse has provided the electronic industry with a complete line of fuses, fuseholders, circuit breakers, switches, and relays. Whatever a customer's need, we have a quality product to satisfy it.

But Littelfuse has to do more than keep up with the industry—we have to stay ahead of it. Our research and development engineers are constantly designing and testing to create tomorrow's products—more advanced, more streamlined, more versatile. Low-Profile Snap Mount fuseholders, P.C. Board fuseholders, Twin Microfuse holders, "Twist-Lock" In-Line fuseholders—these are just a few of the products developed exclusively by Littelfuse.

For detailed information on the complete line of Littelfuse products, write for Catalog #17. Or contact our representative or authorized Littelfuse distributor in your area. He will be glad to help you determine your immediate needs—and to help you plan for tomorrow's.



Littelfuse– *first in design and innovation*

P.C. Mounted Holder — 281007
A low-profile, plug-in fuseholder accommodating Littelfuse picofuses and microfuses. Edge-mounted, the holder permits easy and rapid fuse removal and replacement. Rated at 5 amps to 125 volts.

Twin Microfuse Holder — 280021
A versatile twin or single circuit holder for space-tight applications. Accepts two microfuses or a combination of micro and picofuse. Rated at 5 amps to 125 volts.

In-Line Fuseholder — 155100
A low-cost holder with "twist lock" allowing easy fuse extraction and replacement. Accepts all ¼″ x 1¼″ fuses and SFE fuses to 20 amps. Available in black, transparent or six other standard colors.

Low Profile Fuseholder
Square cap fuseholder snaps into chassis, eliminating need for mounting hardware. The cap snaps open for quick and easy fuse insertion and removal. Aesthetically styled to complement modern instrument panels, the holder is available in several color combinations.

HOW TO ORDER LOW PROFILE FUSEHOLDERS

Six digit number is a coded description of fuseholder

348	6	4	5
A	B	C	D

- A Series Number **348** for 3AG Standard fuses, **347** for Pin Indicating.
- B Terminal Style: **6,** 3/16″ w. quick-connect and solder type; **8,** ¼″ w. quick-connect and solder type.
- C Bezel Color: Specify **1,** red; **2,** green; **3,** yellow; **4,** blue; **5,** white; **7,** black; **9,** gray.
- D Cap Color: Specify **1,** red; **2,** green; **3,** yellow; **4,** blue; **5,** white; **7,** black; **9,** gray.

NOTE: To order a cap assembly **only** for 3AG standard fuses, use **348** series number and insert a **0** in the terminal style and bezel color locations (**348 001**). To order a cap assembly for 3AG Pin Indicating fuses, use **347** series number and insert a **0** in the terminal style and bezel color locations (**347 001**). To order a body assembly **only,** use **348** (for 3AG fuses) and insert a **0** in the cap color location (**348 850**). The body assembly only for 3AG Pin Indicating fuses is identical to 348 series.

Littelfuse offers more than 6,000 kinds of fuses, fuseholders, circuit breakers, switches, and relays, including the following:

¼″ dia. x 1¼″ long 3AG fuses for electronic circuit protection applications.

311 Series
Glass tube. Medium-acting for automobiles, radios, amplifiers, etc. 4-30 amps.

312 Series
Glass tube. Fast-acting for general fuse protection. 1/100-10 amps.

313 Series
Glass tube. Slo-Blo. Designed to withstand momentary high-current surges but to open quickly on sustained overloads. 1/100-30 amps.

314 Series
Ceramic tube. High interrupting capacity up to 10,000 amps at 250 volts. 1/8-30 amps.

All fuses shown above can be supplied with pigtail leads for "Soldered In" applications. Similar electrical performance also available in 9/32″ x 1-1/4″ and 13/32″ x 1-1/2″ Fuses.

342 (000) Series
3AG Miniature, Space-saving Panel Fuseholder. Rated at 20 amperes to 250 volts.

341 (000) Series
3AG Panel Fuseholder with screw driver slot knob. Rated at 15 amperes to 250 volts.

342006
3AG Watertight Panel Fuseholder. Rated at 20 amperes to 250 volts.

344 (000) Series
3AG Indicating Fuseholder for visual display of blown fuse. Two lens styles available. Rated at 20 amperes to 250 volts.

340255
3AG Shielded Fuseholder. Eliminates radio frequency interference. Rated at 30 amperes to 250 volts.

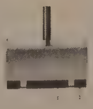
Subminiature Picofuse
9/32″ long x 3/32″ dia. Axial leads— 275 (000) Series. Radial leads— 276 (000) Series. 1/16-15 amps to 125 volts.

Subminiature Microfuse
Plug-in or pigtail types with transparent or metal caps. 10,000 amp short circuit capacity. 1/500-5 amps to 125 volts.

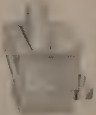
Subminiature Fuseholder
For picofuse and microfuse. Available in standard, indicating, or R.F. shielded types.

Fuse Clips
Available with solder lugs, with and without fuse stops and for printed circuit board mounting.

Fuse Blocks
Open fuse mountings with solder, screw or quick connect terminals. 1-12 poles.



Circuit Breakers
Manual reset breakers. Rated currents 4/10-4.1 amps to 250 volts.



Switches
Momentary action SPST switches. Rated at 5 amps-125 volts or 2.5 amps-250 volts.

Relays
Low voltage power relays for automotive, marine and recreational vehicle applications.

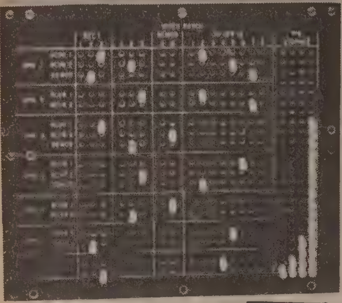
CO-ORD SWITCH · BLOC-LITE DIVISIONS

135-25 37th AVENUE • FLUSHING, NEW YORK 11354

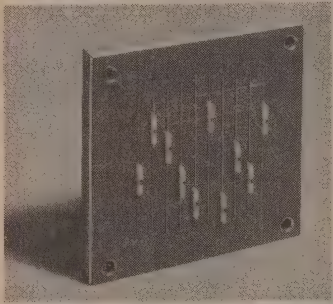
MATRIX BOARDS
SLIDE SWITCHES
LIGHT INDICATORS

MATRIX PROGRAM BOARDS



CO-ORD Matrix Program Boards are composed of 2 to 8 decks of contacts that are bussed on .250 centers. The contact rows of one deck are usually oriented perpendicular to the rows of adjacent deck(s) so as to obtain switching crosspoints. Electrical connections of the bussed contact rows are effected by inserting shorting pins at the desired crosspoints; "CO-AX", phone plug type pins are available for networks which require component insertion (Diodes, resistors, etc.). Single board matrices of up to 11,000 crosspoints are available in standard or special arrangements. Bussed and isolated contacts can be had alone or in combination. Panels may be screened, engraved, or fitted with pre-punched templates for rapid program changing. **Write for Bulletin 1466** U. S. Patent No. 3,349,361

MATRIX SLIDE SWITCHES

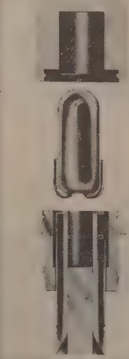


CO-ORD Matrix Slide Switches are designed to provide reliable, low cost matrix switching for applications requiring manual data entry operations. These simplified, versatile switches are available in various ranges of standard sizes, with capacities including up to 25 outputs per switching line. Each output is controlled by a separate contact slider which in turn can provide as many as 25 positions (variations). Special designed Matrix Slide Switches can be supplied with as many as 5000 switching positions.

The combined features of the CO-ORD Matrix Slide Switch makes it ideally suited for applications where data is to be entered at remote terminals such as test equipment programming, machine tool controls, programming of process controls, as well as numerious other applications. **Patent Pending** **Write for Bulletin 1474**

MINI-BRITE "simplicity" in subminiature indicator lights

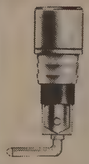
HOUSING GUIDES LAMP LEADS TO CONTACTS



Housing is keyed so that wire leads of lamp will only be accepted by the electrical contacts.

MINI-BRITE
75001
Panel Mount

MINI-BRITE
75002
Panel/Printed Circuit Mount



MINI-BRITE
75003
Printed Corcuit Mount

MINI-BRITE subminiature indicators have been engineered and are manufactured with the idea of achieving the ultimate in simplicity, standardization, reliability and cost reduction . . . this has been accomplished by the design of a unique housing and contact arrangement centered on the use of standard, wire terminal lamps . . . which provides light intensity comparable to units five times their size.
Conforms to MS90308. U. S. Patent #3,559,153

- **FRONT RELAMPABLE** just remove the snap on cap
- **STANDARD LAMPS** any T-1 lamp, wire lead type
- **EASY INSTALLATION** press housing into hole
- **WIRING OPTIONS** combination solder/female terminal
- **MOUNTING OPTIONS** panel mounted, panel/printed circuit
- **HIGH DENSITY PACKAGING** mount on .250 centers.
- **CODED CAPS** available in a variety of colors

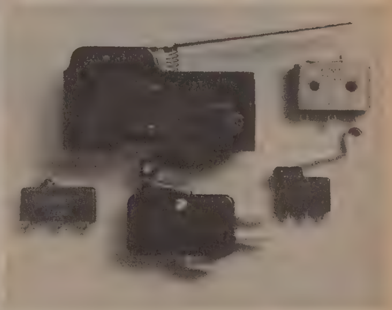
MICRO SWITCH
CATALOG **200**

Position Sensing and Manual Control Switches

FOR COMMERCIAL, COMPUTER, AND AEROSPACE EQUIPMENT

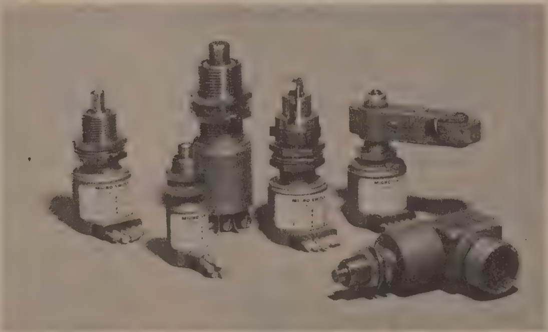
PROXIMITY SWITCHES

PUSHBUTTON SWITCHES



BASIC SWITCHES

TOGGLE SWITCHES



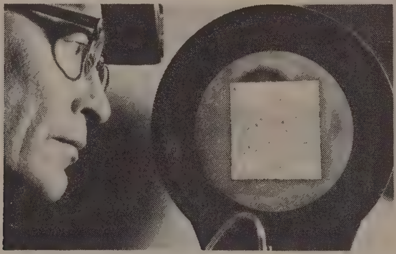
MINIATURE LIMIT SWITCHES

MICRO SWITCH MAKES YOUR IDEAS WORK

Catalog 200 is your guide to position sensing and manual control switches for a wide spectrum of application on aerospace, commercial, and computer equipment. This catalog is a companion to Catalog 50, which primarily covers MICRO SWITCH products for industrial use.

Though thousands of catalog listings can be specified using the pages of Catalog 200, they represent only a fraction of the line available from the world's largest switch manufacturer. If the switch you need to meet your special application requirements isn't cataloged here, contact your nearest MICRO SWITCH Branch Office. It's likely that "special" switch you need has already been built.

QUALITY ASSURANCE

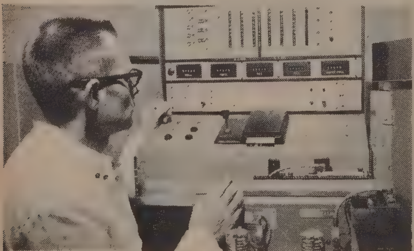


Quality Assurance for the customer is not a department, it is the business of everyone at MICRO SWITCH . . . the result of a total concern for the details that make up customer satisfaction. This program starts with the customer and penetrates the entire organization—from raw material and design on through production and shipping.

The emphasis at MICRO SWITCH is on prevention of defects, rather than simply their detection.

Our QA program is designed to assure reliability *before* manufacturing begins. It includes a strict vendor rating system, and innovative operator self-checking procedures. A management function, QA is organized to assist, train, influence and guide a total effort in producing quality products for our customers.

MICRO SWITCH procedures meet the requirements and intent of MIL-I-4520EA and are under surveillance of the Defense Supply Agency (DSA). Also, since MICRO SWITCH has single standard quality control designation, customers do not pay a premium for special handling of non-qualified products. Where applicable, we meet the requirements of Underwriters' Laboratories, Inc., and the Canadian Standards Association. Control of quality in conformance to our established procedures is applicable to all products, whether for military or commercial use.



SALES AND SERVICE/ WORLDWIDE

MICRO SWITCH maintains the largest field engineering force in the switching industry—close to you and your customer—in Branch Offices in major U.S. cities and Worldwide Sales Offices of Honeywell International.

In addition to MICRO SWITCH facilities in this country, there is manufacturing in Germany, the United Kingdom, the Netherlands, Canada, Australia, Mexico, and Japan.

APPLICATION ASSISTANCE

Our field engineers are especially trained to work on any aspect of your application requirements; from product selection, including reliability and quality/cost factors, to proper installation and operation for maximum service. When a fieldman tackles your problem he's not working on it alone. He is backed up by a whole team of experts at the factory—experienced problem solvers with many specialized talents in engineering products to meet highly sophisticated specifications.

FAST DELIVERY

A nationwide network of MICRO SWITCH Authorized Distributors stock MICRO SWITCH products for immediate off-the-shelf delivery. This means you seldom have to accept a substitute. You get exactly what you need, when you need it. For the location of the MICRO SWITCH Authorized Distributor which serves you, contact your nearest MICRO SWITCH Branch Office.

MOUNTING DIMENSIONS

Mounting dimensions are shown in English and metric equivalents. These dimensions are for reference only. For exacting layout work, request an engineering drawing from your nearest MICRO SWITCH Branch Office.

WARRANTY

Seller warrants its products to be free from defects in material and workmanship under normal use and service and Seller will repair or replace without charge any such product it finds to be so defective on its return to Seller within 18 months after date of shipment by Seller. *The foregoing is in lieu of all other expressed or implied warranties (except of title), including those of merchantability and fitness for particular purpose, guarantees, obligations, or liabilities on the part of the Seller.*

In this catalog . . .

Group I MANUAL CONTROL SWITCHES

Whether you're prototyping a new design or planning to face-lift an existing panel, you'll benefit by considering the wide selection of ***pushbuttons, indicators, toggles, rocker, paddle, rotary selector*** and ***interlock switches.*** Developed with adherance to good human factors principles, these products aid the designer by offering almost limitless options in visual display techniques, operators, and arrangement of components. Many are qualified to military specifications.

The behind-panel options are also extensive, including a choice of circuitry, electrical ratings (from power loads to solid state requirements), and termination means. (For information on MICRO SWITCH oiltight manual controls for industrial application, refer to Catalog 50.)

And, if you have a ***keyboard*** application, MICRO SWITCH has the most complete array of solid state keyboards for unmatched flexibility, including many stock listings available off-the-shelf. Our application engineers will also custom tailor a keyboard to your exact specifications, while providing the most for your switching dollar.

The broad MICRO SWITCH line of manual control switches offers the world's biggest selection from a single source. With such a wide spectrum from which to choose, you're likely to find the right combination of design freedom, product reliability, and cost. These products are backed up by a reputation for built-in quality, which is continually being assured by a program that is the model of the industry.

As control problems become more complex and sophisticated, MICRO SWITCH is continually developing new products and exploring new technologies to help make your ideas work. If you can't find what you need to solve your advanced manual control switching requirements in this catalog, chances are that MICRO SWITCH has the design currently in process.

Group II POSITION SENSING SWITCHES

Snap-action ***basic switches*** are manufactured with watch-like precision to hold exacting tolerances, insuring accurate repeatability and long life. They can be furnished in a wide choice of actuators, circuitry, electrical capacity, operating characteristics, and sealing—from thumb size elements to miniature space and weight savers. Solid state designs are also available.

Mercury switches offer position sensitive quiet operation over a long trouble-free life. Tilting moves the mercury pool which makes or breaks contact between the electrodes in a hermetically sealed glass tube.

Miniature Sealed ***Limit switches*** covered in this catalog are refinements of a design pioneered by MICRO SWITCH for aerospace use 30 years ago. Today, they are an industry standard for high performance switching under demanding environmental conditions, when space and weight specifications are critical. Wide choice of actuators, circuitry, and termination. (For information on oiltight limit switches for industrial applications, refer to Catalog 50.)

No-touch controls described in this catalog are solid state proximity switches, designed primarily for aerospace and ordance equipment. Switch actuation takes place without physical contact. Available in all-metal sensing and magnetically-operated designs, these devices are environment sealed in a compact self-contained assembly. Long life, high reliability switching is provided under severe operating conditions. (For information on other MICRO SWITCH proximity switches and photoelectric controls for industrial application, refer to Catalog 50 or Catalog NTC.)

MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES 4 LIGHTED PUSHBUTTON SWITCHES/INDICATORS

- Choice of Solid State or Precision Snap-Action Switching
- Low Installed Cost
- Front of Panel Mounting and Relamping—Without Tools
- Distinctive Lighted Display Colors
- Attractive Housings with Barriers or Full Bezels

Series 4 provides an attractive panel display and switching versatility at a low installed cost to help you stretch your panel budget. Units can be furnished assembled, with lamp, ready to snap-in the panel. There is a choice of solder/quick-connect terminals or printed circuit board terminals.

HALL EFFECT SOLID STATE SWITCHING

The Hall effect solid state concept sets the standard for switch reliability. An integrated circuit actuated by a magnet produces an analog control voltage which is converted into a digital output with a trigger circuit. Solid state models with current sinking output interface directly with DTL, RTL, and TTL discrete transistor circuits. Current sourcing output is also available. Stable operation is provided from a 6 to 16 VDC power supply. Units for use with a 5 VDC power supply can be furnished. Since these are solid state devices, there is no contact bounce or contamination and a long operating life is assured. No buffer circuitry is required.

PRECISION SNAP-ACTION SWITCHING

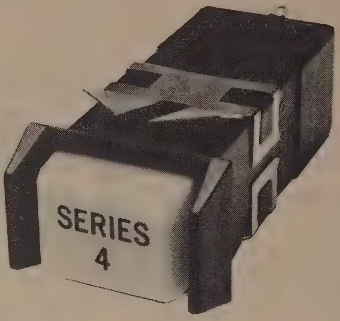
Dependable performance at power (5 and 10 amp, 250 VAC) or low energy loads is provided by MICRO SWITCH time-proven SM type basic switches. Circuitry can be 1-pole (SPDT) or 2-pole (DPDT), momentary or alternate action.

MATCHING INDICATORS

The indicators are identical externally to the Series 4 lighted switches for a harmonious panel appearance.

LOCKED BUTTON OPTION

Series 4 can be furnished with a locked button option for use in areas accessible to the public, where tampering and vandalism are problems. The housing has a special mounting clip with built-in button retainer. This mounting clip must be removed from behind panel to allow button removal. Button movement during switch operation is unaffected by the locked button feature. (These units cannot be relamped from front of panel.)



BUTTONS

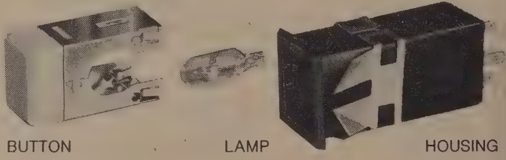
Vivid color buttons provide attractive, clearly visible lighted display with: (1) transmitted color—display color can be distinguished whether the lamp is ON or OFF; (2) projected color—button is white with the lamp OFF and colored when illuminated; and (3) hidden legend/hidden color—button appears black with the lamp off, and legend and color appear when illuminated.

LAMPS

The Series 4 lamp remains stationary during button operation, minimizing filament breakage due to a moving lamp. There is a choice of T-3 ¼ wedge-base lamps (6, 12 and 28 V) or T-2 telephone slide-base lamps (120 V).

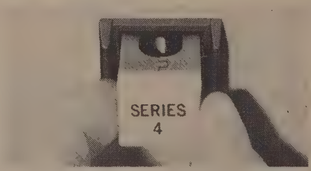
HOUSINGS

Housings for switches and indicators are identical in appearance, but the indicator housings have no provision for switching. They may be snap-in mounted on panels up to .20" (10,2mm) thick. Housings are available in full bezel or barrier styles, momentary or alternate action switching, and contain the lamp socket and termination means.

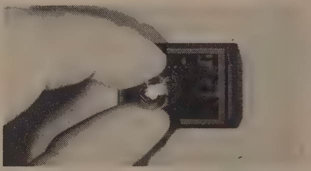


CONVENIENT PANEL FRONT MOUNTING AND RELAMPING

1. Snap-in mounting. Switch or indicator is easily inserted into the cutout. Mounting clips grip the panel. No tools are needed.



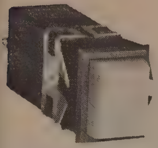
2. Lamps and legends can be changed from panel front. When button is removed, lamp is extracted from its socket and retained in button.



3. Ease of lamp replacement. After the inoperative lamp is automatically removed with the button, the new lamp is inserted without the use of tools.

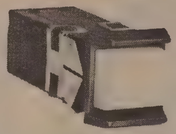
SERIES 4 LIGHTED PUSHBUTTON SWITCHES/INDICATORS A

VERSATILITY IN PANEL ARRANGEMENT

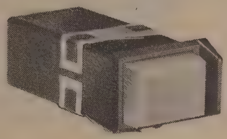


BEZEL ON ALL SIDES

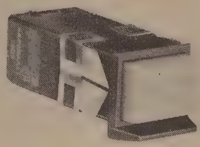
BARRIERS ON SHORT SIDES



BARRIERS ON LONG SIDES



BARRIER ON ONE SHORT SIDE



BARRIER ON ONE LONG SIDE

BEZEL TYPE housings can be top-of-panel or subpanel mounted, individually or in strips. A bezel surrounds four sides.

BARRIER TYPE HOUSINGS are normally mounted top-of-panel in strips, but can also be individually mounted. Barriers are on either the short or long sides.

The drawing below shows how housings with a barrier on one side are used in a strip of two or more units. The first has a barrier on two sides, and all other units have a barrier on one side and butt against each other.

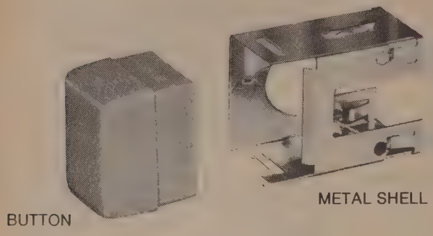
FLEXIBILITY IN ILLUMINATED COLOR TECHNIQUES



BUTTON
METAL SHELL

Series 4 has vivid color lighted buttons, featuring a choice of seven button types which can be used to meet your individual display requirements.

Button Construction

The button assembly consists of a plastic button which snaps into a metal shell. The shell acts as a lamp removal tool and provides a heat sink for the lamp. Construction details of the various button types are shown in the chart below. The A through G button type designations correspond to the code letters in the ordering guide.

Transmitted Color

The display color can be distinguished whether the lamp is ON or OFF. Button types A, E, F, and G can be used. Type A is a one-piece colored button. Type E and F are water-clear colorless transparent buttons, with smooth face and matte finish sides, and have color inserts. Type A, E and G have all five sides lighted, while the type F button has only its face lighted.

Type G buttons are a high-profile design (see chart below) which makes it ideal for sub panel mounting.

Projected Color

White type B buttons with color inserts, appear white when the lamp is OFF and colored when illuminated. All five sides are lighted.

Hidden Legend/Hidden Color

This display appears black when lamp is OFF. Legend and color appear when illuminated. This effect is achieved with a transparent black (smoky gray) button and color insert. Either type C (five sides lighted) or type D (only face lighted) buttons can be used.

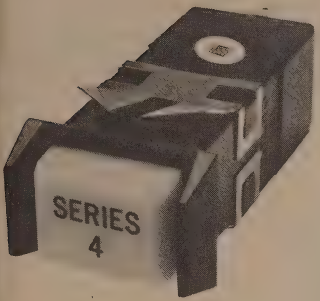
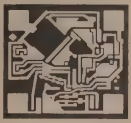
SERIES 4 LIGHTED PUSHBUTTON SWITCHES/INDICATORS

HALL EFFECT SOLID STATE SWITCHES





.040-inch square integrated circuit chip is located in switch base.

ELECTRICAL INFORMATION

Series 4 lighted pushbuttons with switching element code letters **SA, SC, SB, SD and SS** in their catalog listing use the reliable Hall effect solid state switch. The magnetic field from a magnet on the switch plunger produces a digital output from an integrated circuit which interfaces directly with most electronic circuits: discrete transistor circuits, integrated logic circuits, SCR's etc.

Solid state models are available in a choice of current sourcing or current sinking outputs, .110 quick-connect or printed circuit terminals, and operation by a 6 to 16 VDC or 5 VDC power supply.

FOR MORE INFORMATION

Contact your nearest MICRO SWITCH Branch Office for additional information which may be required by your application. Competent field engineers, experienced in applying solid state switches can assist in selecting the proper device to meet your needs.

PUSHBUTTON SWITCH ORDERING GUIDE

Catalog listings for Series 4 pushbutton switches may be derived from the ordering guide to specify either: (1) an assembled unit or (2) a switch housing only (less button), as shown in the following examples:

4A21BBA21 designates a switch housing only. It includes the first four options, but *not* the three which refer to button specifications—Display Type, Display Color, and Legend.

4A21BBA21AYN is a catalog listing for an assembled pushbutton switch. It includes all seven options in the ordering guide—Housing Style, Housing Color, Switching Element, Illumination, Display Type, Display Color, and Legend Codes.

Example: 4A21 B BA 21

ILLUMINATION

Code	Description
11	No lamp, has lamp socket for T-3¼ wedge base lamps.
12	6 volt lamp, ASA #259 (T-3¼)
13	6 volt lamp, ASA #159, (T-3¼)
21	12 volt lamp, ASA #161, (T-3¼).
31	28 volt lamp, ASA #656 or #152, (T-3¼)
41*	No lamp, Has lamp socket for T-2 telephone slide-base No. 5 lamps.
42**	120 volt lamp, (T-2 telephone slide-base No. 5.
91	Unlighted, no lamp socket

**Note:* This illumination code (41) can be used with all housing styles. UL listing is 28 volts max, lamp.

***Note:* This illumination code (42) must be used only where the locked button option is specified in the Housing Style code.

If the locked button option is specified in the Housing Style code, the unit will have a UL Listing of 120 volts max., lamp.

Mounting clips on the long sides of the housing are specified when individually mounted or when the long sides of strip mounted housings parallel the long sides of the panel cutout slot. The most secure mounting is achieved when the mounting clips are on the long sides

Mounting clips on the short sides of the housing are specified when short sides of strip mounted housings parallel the long sides of the panel cutout slot.

SWITCH HOUSING ONLY

At this point, you have a catalog listing for ordering the switch housing only. If you wish to specify a button also, add a code letter from each of the three charts on the facing page.

SERIES 4 LIGHTED PUSHBUTTON SWITCHES/INDICATORS

ELECTRICAL RATINGS

Snap-Action Switching Elements:

SWITCH HOUSING WITH BUTTON, READY TO INSTALL IN YOUR PANEL

INDICATOR ORDERING GUIDE

Series 4 lighted indicators feature the same housing styles as the pushbutton switches — full bezel or barrier types. They are also identical in size and appearance and may be mounted individually or in vertical or horizontal strips. Buttons are interchangeable with the lighted switches. Indicators have no provision for switching. There is a choice of .110 quick-connect or printed circuit terminals.

Housing styles can be used to provide functional "shape coding" in a mixed panel of indicators and switches. For example, bezel types may be specified for indicators and barrier types for switches.

Indicator catalog listings may be derived from the ordering guide to specify either (1) an assembled unit or (2) an indicator housing only (less button), as shown in these examples:

4C11G21ABN is a catalog listing for an assembled lighted indicator. It includes all six options in the ordering guide—Housing Style, Housing Color, Illumination, Display Type, Display Color and Legend Codes.

4C11G21ABN designates an indicator housing only. It includes the first three options, but not the last three which refer to button specifications—Display Type, Display Color, and Legend.

Example: 4C11 G 21

BUTTON ORDERING GUIDE

Buttons may be furnished with or without the metal shell, assembled or unassembled. When type B, C, D, E, or F buttons are ordered unassembled, the insert is also unassembled.

For a detailed description of the various button types and the display effects they provide, refer to page A3.

Catalog listings for Series 4 buttons are derived from the ordering guide, or shown in the example, below.

4B1AGN is a catalog listing for a green (transmitted color) unlegended button. (If the button shell is also desired, substitute 4B2 for 4B1 in the listing.)

Example:

4BI A G N

4BI

BUTTON WITHOUT METAL SHELL

4B1
Button only
(without metal shell)

BUTTON WITH METAL SHELL

4B2
Both button and metal shell provided.

BUTTON WITH METAL SHELL, WITH PROVISION FOR LOCKED BUTTON

4B3
Both button and metal shell provided

A

BUTTON TYPE

A
Transmitted color.
5 sides lighted.
1-piece translucent button.

B
Projected color. 5 sides lighted.
Translucent white button & color insert.

C
Hidden color/hidden legend. 5 sides lighted.
Transparent black button & translucent color insert.

D
Hidden color/hidden legend. Only face lighted. Transparent black button & translucent color insert.

E
Transmitted color.
5 sides lighted.
Transparent colorless button & translucent color insert.

F
Transmitted color. Only face lighted. Transparent colorless button & color insert.

G
Same as type "A" except .250" higher

G

DISPLAY COLOR

B
Std. Blue

G
Std. Green

R
Std. Red

S
Transparent Black (Unlighted applications only)

Y
Std. Yellow

W
Std. White (Do not use with Type B button)

A
Std. Amber (For use with Type A or G button only)

N

LEGEND (Legend Order Sheet must accompany all orders for legended buttons)

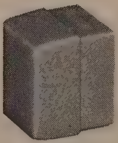
U
No legend, button unassembled (For customer who does his own legending.) Use with any button except 4B1A—

N
No legend, button assembled. (For applications not requiring legends.) Use with any button.

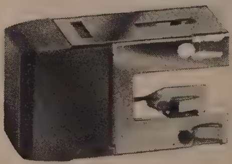
L
Legend on button only, button assembled. (For customer who prefers to have MICRO SWITCH provide legending.)
Use with any button.

K
Legend on insert only, button assembled. (For C, D, E and F button types.)

J
Legends on both *button and insert*, button assembled. Use with C & D button types



Button



Button and Metal Shell

LEGENDING

HOT STAMP LEGENDS

Use the Legend Order Sheet FO-63039 to specify hot stamp legending from MICRO SWITCH. Reproduce it on your office copier or request a pad of forms from our branch office nearest you. Legends are oversprayed for maximum durability.

The drawing at right provides information to build a simple holding fixture (horn) if you prefer to do your own legending of buttons or inserts, by hot stamp or engraving.

FILM LEGENDS

Film legends are not supplied by MICRO SWITCH. However, this service is readily available from commercial photographic or contact printing sources. Films offer the flexibility of using either a positive or negative approach, and enable special characters to be easily produced. The film should be polyester type to withstand lamp heat and must be precision cut, per the dimensions shown on page A3, to insure proper alignment.

The film fits into a shallow undercut on the face of the button insert. The film is held securely when the outer button and insert are snapped together. (Note: It is difficult to disassemble for legend changes without damaging the parts.)

Button and insert should be snapped together prior to being assembled to the button shell.

BUTTON ORIENTATION

The legended button should be assembled to the button in the orientation shown at right, with the button notch keyed to the lamp removal slot in the metal shell. This will reduce the possibility of lamp droppage when the button is removed from the housing. All buttons are legended by MICRO SWITCH in this manner.

REPLACEMENT PARTS

MOUNTING CLIPS

CATALOG LISTING	DESCRIPTION
4Z31	Mounting clips for long sides (2 required per housing)
4Z32	Mounting clips for short sides. (2 required per housing)

METAL SHELL

CATALOG LISTING	DESCRIPTION
4Z41	Metal shell for use with type 4B1 buttons.

LEGEND ORDER SHEET

INSTRUCTIONS:

1. Determine if legend is to be applied to outer button shell, or to button insert.
2. Select appropriate Fig. No. from CHART "A" or "B", and enter on legend order chart.
3. Place ✓ in appropriate "TYPE SIZE" column *(refer to CHART "C" for examples)*.
4. Place ✓ in BLACK or WHITE legend color column.
5. Indicate quantity desired.
6. Fill in legend description *(DO NOT EXCEED MAXIMUM NUMBER OF LINES OR CHARACTERS AS INDICATED BY CHART "A" or "B")*.

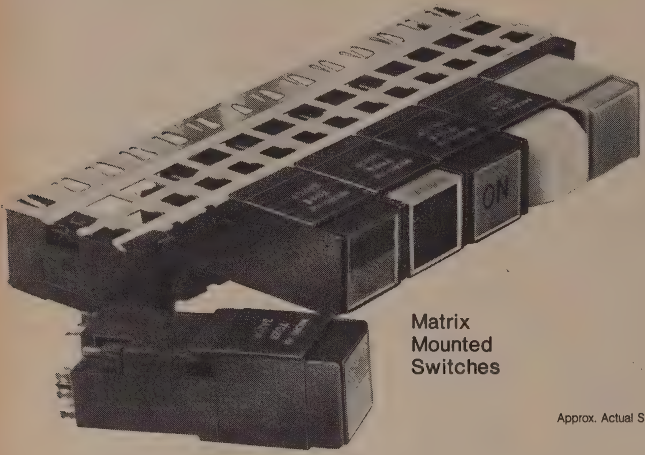
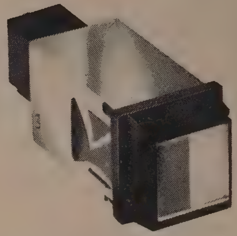
SERIES 3 LIGHTED PUSHBUTTON SWITCHES



Matrix
Mounted
Switches



Approx. Actual Size

Individual
Mount Switch

- Front of Panel Replacement of Switches and Lamps
- Relegendable Buttons
- Six Standard Lighted Display Colors Available
- Momentary or 2-Level Alternate Action
- Power Switches or Electronic Duty Form A Reed Switches

Series 3 has multiple options in the same size package. By standardizing on Series 3 as building blocks for your control panels, you can specify either matrix, individual, or strip mounting, momentary and two-level alternate-action, power or reed switches (with audible "click click" feedback), and matching lighted indicators.

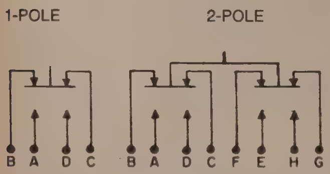
Matrix mounted switches are provided with termination suitable for direct wiring, printed circuit board mounting or plug-in termination to customer pre-wired connector blocks. They can be replaced from the panel front by simply using a screw driver to disengage the switch mounting lugs from the mounting rails.

Individual mount switches have spring clips on two sides for front of panel snap-in mounting.

POWER SWITCHES

Contact Arrangement:

Schematic shows Form Z circuitry (Form X and Y versions available.)



Electrical Rating:

5 amp ind. or res., 115 VDC
3 amp ind., 5 amp res., 28 VDC
100,000 operations at rated load, 95% survival.

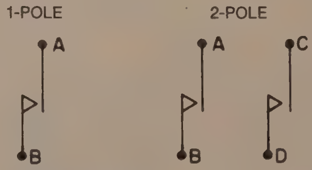
Characteristics:

Operating force 8.0 oz. (227 g.) approx.
Total travel** .25 in. approx. (6,3 mm) approx.

**When alternate-action switches are operated, the button remains depressed approximately .180 in. and the circuit is maintained until the button is pushed again.

REED SWITCHES

Contact Arrangement:



Electrical Rating:

Alternating Current
12VA Max - Inrush or Resistive
Max. Voltage: 240VAC @ 12VA
Max. Current: 250 milliamps @ 12VA

Direct Current
8 Watts Maximum Resistive only
Max. Voltage: 240VDC @ 8 Watts
Max. Current: 250 milliamps @ 8 Watts

VAC 60 Cy.	Maximum Current in Milliamps	Volts DC	Maximum Current in Milliamps
0-48	250	0-32	250
120	100	120	66
240	50	240	33

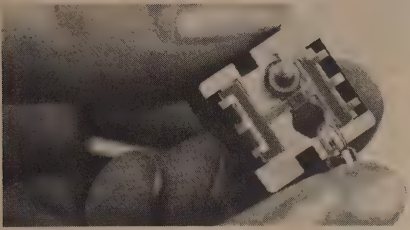
1,000,000 operations at rated load, 95% survival.

Characteristics:

Operating force 3.0 oz. (85 g.) approx.
Total travel** .25 in. (6,3 mm) approx.

SERIES 3 LIGHTED PUSHBUTTON SWITCHES A

BUTTONS



Lamps and legends can be changed from the panel front. The button is removed by pulling it forward out of the switch housing. Lamps are retained in the button for ease of replacement.

Relegendable buttons have a transparent colorless insert which fits over a colored diffuser plate and snaps into the button's shell. Legending may be applied to the diffuser plate. The diffuser plate can be easily removed and replaced if a change of legend information is desired. To ensure proper orientation during assembly, the button is keyed to the switch housing. Lighted display is provided by one or two 5, 12, 14 or 28 volt T-1 lamps.

UL LISTING AND CSA CERTIFICATION

UL listed, CSA certified Series 3 devices are available.

CAUTION: Combining UL-CSA listed *switches* with unlisted buttons, and unlisted switches with UL-CSA *buttons* is not recommended; this may result in excessive wear causing shorter life. Style 3D buttons should only be used with 3A, 3G, 3B and 3H switches. UL-CSA 3N buttons should only be used with UL-CSA switches — styles 3E, 3F, 3K and 3L.

LEGENDING

MICRO SWITCH will furnish hot stamp legending in standard modified Gothic. Contact our local branch office for Series 3 legend order sheets that provide data on type size and possible number of characters per line.

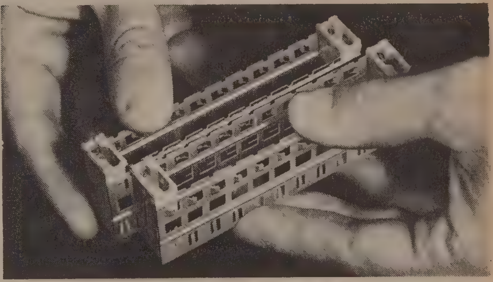
INDICATORS

Lighted indicators are identical in size and appearance to the switches, but without provision for switching.

MOUNTING

Mounting options for Series 3 switches and indicators are:

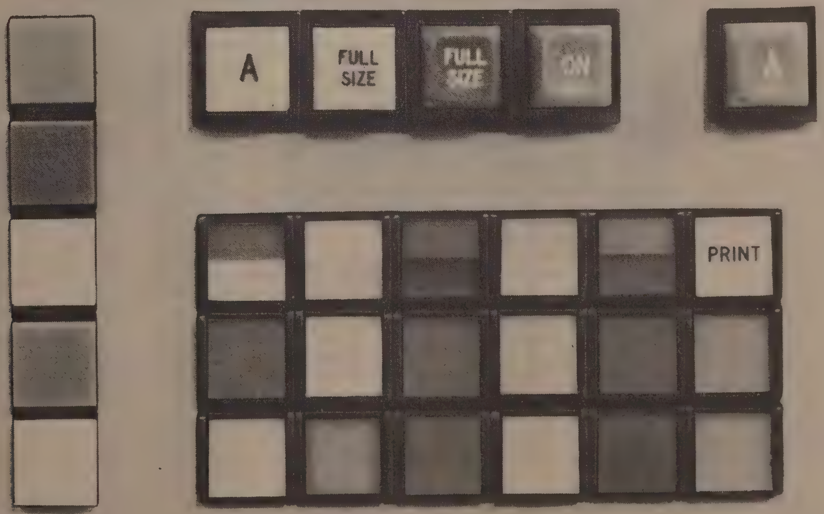
1. Individual mount units have integral clips on two sides of the housing for front of panel snap-in mounting. They can be mounted in separate cutouts or strip mounted in a single cutout.
2. Units that require Type 3M mounting hardware are mounted in a single cutout. Two or more rows can be attached together to form a matrix or a single row can be strip mounted.



TERMINATION-SWITCHES AND INDICATORS

Direct wiring to switch, plug-in to connector blocks, or printed circuit board termination. Available on either switch or connector.

NOTE: Caution should be exercised when soldering to direct wire terminations to prevent overheating and flux contamination of the switch contacts.



POWER SWITCH ORDERING GUIDE

Ordering Example
3A10-A is a power switch for matrix or strip mounting, has direct wire termination, 1-pole Form Z circuitry, momentary action, two lamp circuits, and black housing.

THRU-PLUNGER SWITCHES
Switches with Electrical Codes **16, 17, 66,** and **67,** have thru-plungers which attach to mechanical interlock devices to provide bailing and lookout functions.

Example:

3A 10 A

Add—1 to listing if connector block is required (3A and 3E modules only).
(Connector blocks have direct wire terminations only.)

POWER SWITCH MOUNTING TYPE
3A For matrix or strip mounting. Requires use of 3M type mounting hardware.
3E U.L. listed 3A type device.†
3F U.L. listed 3G type device.†
3G For individual or strip mounting. No additional mounting hardware required.

†Use 3N buttons only.

16 8½-Unit	

Mounting hardware for 3A, 3E, 3B, 3K, and 3C units is provided by a box girder structure (see 3M Type drawings below). Interlocking tabs enable them to be assembled into a multi-row matrix.

To specify the row length in the catalog listing, add the number of switches and/or indicators, then convert the total to the proper suffix number, i.e. "09" for a 5-unit row.

Each 3M Type listing consists of two mounting bars and two mounting blocks in packet form.

COMPLETELY ASSEMBLED STRIPS OR MATRICES USING TYPE 3M MOUNTING HARDWARE

MICRO SWITCH will provide completely assembled strips or matrices at an additional charge per station of first level devices (switches) with no set-up charge. Contact your MICRO SWITCH Branch Office for pricing of assembled strips or matrices.

SERIES 3 LIGHTED PUSHBUTTON SWITCHES

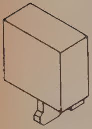
ACCESSORIES

SPACER BLOCKS

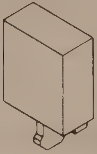
Spacers are used to fill openings in rows of functional modules, provide expansion space or act as barriers against accidental operation.

The 3T1K-1 spacer block contains a low level ½ unit spacer plus a mounting block.

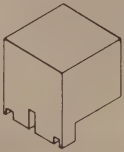
A ½ unit spacer is ¾'' x ⅜''.



3T1



3T2



3T3

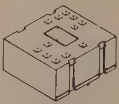
W—White
Y—Yellow

MOUNTING BLOCK
ADD: —1
Omit if mounting block is not desired.

To order mounting blocks for spacers as a separate item, specify 3M4-02. They are also used for attachment to mounting bars in first level 3M hardware packets.

CONNECTOR BLOCKS FOR MATRIX-MOUNTED SWITCHES*

Plug-in at the base of switches and indicators providing means of attaching leadwires. Terminal locations are marked for identification. Connector block consits of a terminal housing with terminals inserted.



3R1 - 3R6

CATALOG LISTING	DESCRIPTION
3R1	Terminal Housing for power switch or indicator module (3A, 3C, 3E types only)
3R2	Terminal Housing with 12 quick connect terminals installed for power switch or indicator module (3A, 3C, 3E types only)
3R3	Terminal Housing with 12 Printed Circuit Board terminals installed for power switch or indicator module (43A, 3C, 3E types only)
3R4	Terminal Housing for reed switch (3B, 3L types only)
3R5	Terminal Housing with 8 quick connect terminals installed for reed switch (3B, 3L types only)
3R6	Terminal Housing with 8 printed circuit board terminals installed for reed switch (3B, 3L types only)
3R7	Quick Connect Terminals (Sold only in multiples of 50)
3R8	Printed Circuit Board terminals (Sold only in multiples of 50)

*To be used only on the matrix mounted switches and indicators using 3M1 hardware

MECHANICAL INTERLOCK

Switches with tru-plungers can be interlocked in single rows, up to 10 units (length), to provide the following functions:

Bail and Lockout. Buttons are operated in one-by-one sequence, with one button in row always held down by a mechanical detent.

Momentary Lockout. Circuit transfer is maintained only while the button is manually held depressed. Only one button is row can be operated at a time. There is no bailing function.

Row Lockout Station. Optional addition to Momentary Lockout row. When this station is operated, other buttons are locked in free position until it is depressed again.

Clearing Station. Optional addition to Bail and Lockout row. Clearing station returns previously operated buttons to free position.

MICRO SWITCH can provide: (a) complete assembly, consisting of 1st level thru-plunger switches and buttons assembled in mounting hardware, and 2nd level interlock assembly; or the 2nd level interlock assembly as a separate item for attachment to the 1st level row by the user.

To order a 2nd level bail and lockout assembly, specify catalog listing **3W7**, plus suffix code which denotes the number of units, etc. up to 10 units. Example **3W7-06** is a six-unit bail and lockout device. Order thru-plunger switches and mounting hardware from the Series 3 ordering guides.

For information to order other mechanical interlock devices and complete assemblies, contact ytour nearest MICRO SWITCH Branch Office.

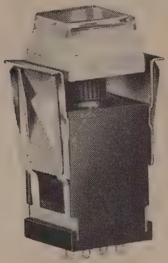
SN SERIES SOLID STATE PUSHBUTTON SWITCHES



The SN Series pushbuttons use the revolutionary Hall effect solid state switch pioneered and developed by MICRO SWITCH. Solid state pushbutton switches eliminate the problem of contact bounce.

This Series is the answer for direct control of solid state circuitry. No matter whether your application calls for one pushbutton, a control panel, or a complete keyboard, we have switch modules to meet your requirements.

The 11SN Series switches are made for direct panel mounting with snap-in hardware and the 101SN Series, 201SN Series and 301SN Series mount direct to printed circuit boards without additional mounting or support hardware. Lighted modules are available in both the 11SN Series and the 201SN Series.

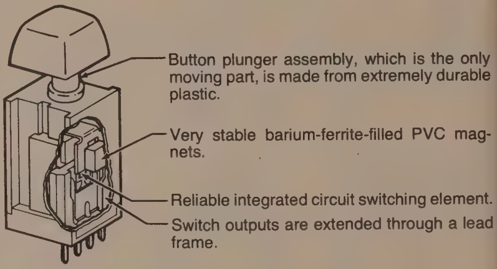
The SN Series is ideal for building custom arrays. There are thousands of legends tooled and we have the in-house capability to tool any special legend you may require. Multiple-unit buttons and space bars with complete mounting hardware are available. In fact, MICRO SWITCH has the largest selection of button shapes, sizes, and colors in the industry.

- Proven Hall Effect Solid State Switching
- Solid State Switching
- Bounce-Free Output
- Lighted & Non-Lighted Switches and Indicators
- Momentary-Action Modules
- Alternate-Action Modules
- Wide Selection of Buttons
- PC-Board Mounting or Panel Mounting
- Long Life and High Reliability

SWITCHING CONCEPT

The Hall effect solid state concept is one of the most reliable switching elements ever designed. An integrated circuit, actuated by magnets, produces an analog control voltage. This voltage is converted into a digital output with a trigger circuit. Two isolated outputs are available from each switch module which may be used individually or wired in parallel. Level and pulsed outputs are available.

CONSTRUCTION DETAILS



Button plunger assembly, which is the only moving part, is made from extremely durable plastic.
Very stable barium-ferrite-filled PVC magnets.
Reliable integrated circuit switching element.
Switch outputs are extended through a lead frame.

OPERATING CHARACTERISTICS

	MOMENTARY	ALTERNATE ACTION
Total Travel	4,75 mm Nominal .187 in.	6,35 mm Nominal .250 in.
Force at operating point	85 g Nominal 3 oz.	127 g Nominal 4.5 oz.
Pretravel	2,54 mm Nominal .100 in.	2,54 mm Nominal .100 in.
Release point @ 5VDC and 75°F (24°C) with respect to free position)	1,02 mm 0.040 in. Min.	1,02 mm 0.040 in. Min.

The operating characteristics of the SN Series have been selected for high operator throughput and are suited for both keyboard and individual pushbutton applications.

11SN SERIES PANEL MOUNTED MODULES

The 11SN Series is designed for panel mounting and comes complete with snap-in mounting hardware. Switches may be mounted individually or in rows. The switch can be specified with either current sourcing or current sinking outputs. Momentary and alternate action modules, lighted or non-lighted, and indicator modules (no switching element) are available. To simplify wiring, the switch is terminated with gold-plated solder lugs. One-unit truncated buttons or relegendable buttons are available for the non-lighted listings. The lighted listings use the same buttons as the 201SN Series.

RECOMMENDED PANEL CUTOUT

No. of Units	Length +.010−.000
1	19,3 mm **.760 in**
2	38,5 mm **1.517 in**

Add .755 (19,2 mm) for each unit over 2 to the 1.517 (38,5 mm)

1. Recommended panel cutout width is .900 ± .010 (22,9 ±0,25 mm) wide .005 (±0,13 mm) x (see chart) for length.
2. With .910 (23,1 mm) panel width
3. Recommended mounting panel thickness is .060 to .250 (1.52 to 6,35 mm)

101SN SERIES MODULES
non-lighted

The 101SN Series modules are designed for direct printed circuit board mounting. They may be used individually or mounted in groups. Standard ¾ inch spacing between switch modules can be maintained for both block and offset arrays. Space bars with mounting hardware are also available. To simplify installation, each module has strips of two-sided tape which hold the module in place during the solder operation.

201SN SERIES LIGHTED MODULES

The 201SN Series are lighted modules which are available either with or without a switching element. The switching modules may be used as individual lighted pushbuttons or for custom arrays. The modules without switching elements are designed for use as lighted indicators.

All 201SN Series modules use a T-1 miniature lamp which projects light through the translucent top surface of the button. The lighted surface of the button is easily distinguishable in the ambient light of office environments. Through the use of a lamp driver circuit the light may be controlled by the switching circuit or it may be controlled by the system depending on the purpose for which the light indicator is used.

The lamp may be changed simply by removing the button. This is especially convenient where only the button is accessible from the front of the panel. The electrical characteristics of the switch are the same as those given for all SN Series switches. See page A28 for buttons.

301SN SERIES TWO-LEVEL MODULES

The 301SN Series switch modules have two levels of output. The first level is pulsed with a pulse duration of 55 microseconds nominal and the second output is level (switch output is on as long as plunger is held depressed to second level). An increase in operating force from 2.8 oz (79g) to 16 oz. (454g) between the two levels prevents accidental actuation of the second level.

The modules are designed for direct printed circuit board mounting and may be used individually or mounted in groups. Standard ¾ inch spacing between modules can be maintained for both block and offset arrays. To simplify installation, each module has strips of two-sided tape which hold the module in place during the solder operation.

The 301SN Series modules may be used for repeat keys when building keyboards from SN Series modules. The operating characteristics are within the parameters established by the office typewriter industry. The first level would be used to generate a normal single coded output; the second level would be used to generate a repeat strobe signal for repeat operation.

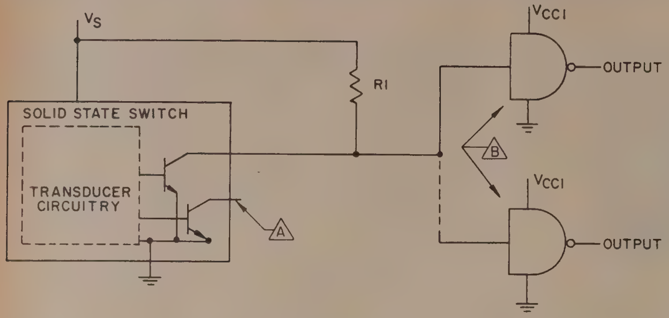
INTERFACING FOR CURRENT SINKING OUTPUTS



μA: Microamps
mA: Milliamps

△A Same fanout applies to second output. If the outputs are paralleled to double the fanout, one resistor of 5K (R1) can be used.

△B Fanout denotes maximum units switch will directly interface per each isolated switch output.

△C The value of R1 is calculated to meet manufacturers' specifications.

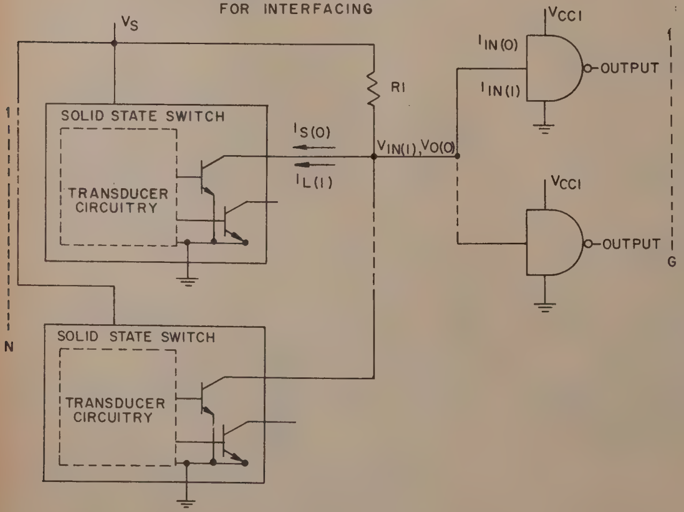
△D Manufacturers' specifications used to calculate R1. See definitions below.

R1 ± 10%
VS — +5.0 ± 0.5 volts
Vcc1 — Logic device supply voltage. Manufacturers' specifications apply.

LOGIC TYPE	VARIATION	SERIES	R1 △C	MAX FANOUT PER OUTPUT	LOGIC "1" △D		LOGIC "O" △D	
					Vin(1)	Iin(1)	Vo(0)	Iin(0)
DTL	Standard	800	10K	2	2.4V.	10μA	0.4V.	1.4 mA
TTL	Low Power	54L/74L	10K	10	2.4V.	10μA	0.4V.	0.18 mA
	Type I	54/74	10K	2	2.4V.	40μA	0.4V.	1.6 mA
	Type II	54H/74H	10K	1	2.4V.	50μA	0.4V.	2.0 mA
	Type III	MC 3000	10K	1	2.4V.	50μA	0.4V.	2.0 mA

GENERAL CALCULATIONS FOR INTERFACING

GENERAL CALACULATIONS FOR INTERFACING



"Logic 1" voltage > "Logic O" voltage (definition).

All of the following parameters should be positive when used in the equations.

N — Number of switch outputs connected. (Can be from same switch and/or different switches)
G — Number of units to be driven.
$V_{in(1)}$ — Minimum input voltage to insure "Logic 1."†*
$V_{O(0)}$ — Maximum output voltage of switch for "Logic O." (.4 volts)†
$I_{in(0)}$ — Maximum input current per unit load at Vo(0).*
$I_{in(1)}$ — Maximum input current per unit load at Vin(1).*
$I_{L(1)}$ — Maximum leakage current per switch output at "Logic 1." (10μ A)
$I_{S(0)}$ — Maximum sink current per switch output at Vo(0). (4.0mA)
VS(m) — Maximum supply voltage to switch.
VS(n) — Minimum supply voltage to switch.

For Logic "1" Conditions:

$$R1 < \frac{V_{s(n)} - V_{in(1)}}{-(N)I_{L(1)} + (G)I_{in(1)}}$$

For Logic "O" Conditions:

$$R1 > \frac{V_{S(m)} - V_{o(0)}}{-(N)I_{S(0)} - (G)I_{in(0)}}$$

Both conditions have to be met. Both limits calculated have to be positive.

†Max and min voltages should have adequate noise margins from switching thresholds.
*Listed in manufacturers' specifications.

SN SERIES BUTTONS non-lighted

MICRO SWITCH offers a wide variety of button sizes, shapes, and colors. We have thousands of legends tooled and the capability of tooling special legends. Check with your nearest MICRO SWITCH Branch Office for the complete button and legend information.

SERIES SD SOLID STATE MODULES A

Build Your Own Low Profile Keyboard

The MICRO SWITCH Series SD module is a low profile solid state keyboard module. The heart of the SD module is the proven MICRO SWITCH Hall Effect integrated circuit. We are using a lower cost, higher reliability integrated circuit packaging technique. The SD module uses a flip-chip, solder bump bonded integrated circuit and ceramic substrate. (A proven IC packaging process). The batch processing aspects of this packaging technique greatly improve the process controllability and cost.

The primary advantages of the SD module are: lower price and profile, with no sacrifice to high quality, reliability and throughput. The SD module has simple construction (see drawing). A height comparison is shown between the original solid state module and the low profile SD module.

The SD module is directly compatible with all common logic families with no special buffering or electronic circuitry needed.

Buttons are available in a wide variety of sizes, shapes, and colors.

SD modules are available with:

- Level or pulsed outputs
- Sourcing or sinking outputs
- Momentary or alternate action
- Scanning interface
- Led Lighting
- Stepped or sloped buttons

Series SD is panel mounted. The simple metal plate grid mounting will allow you to design your own keyboard array. SD modules snap into the panel cutout shown for fast and easy assembly.

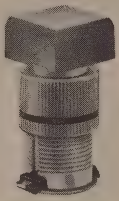
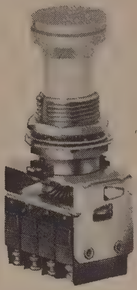
SERIES 1 LIGHTED PUSHBUTTON SWITCHES

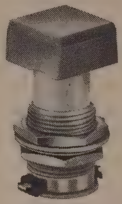
TYPE 1B
SWITCH
(sealed)



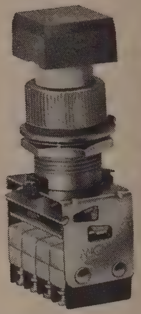
TYPE 1D
INDICATOR
(sealed)



TYPE 1C
SWITCH
(unsealed)



TYPE 1E
INDICATOR
(unsealed)



TYPE IJ
MIL-S-22885/81
(sealed)

- Bushing Mounting Simplifies Installation
- Panel Seal Option
- Front of Panel Relamping
- Stationary Lamp Socket
- 1-4 SPDT Switch Units
- Round or Square Buttons
- Matching Indicators
- Momentary or Alternate Action
- Precision Switching Reliability
- Solid State Switching Option

Series 1 can be provided with a panel seal between the actuator button and bushing, and bushing and panel to provide a completely panel sealed unit. These seals are not removed during relamping, thus are not subject to damage or loss. Sealing is in accordance with the drip-proof requirements of MIL-S-22885.

RELIABLE, LONG-LIFE OPERATION

Long life mechanical and electrical performance is assured by the rugged Series 1 construction and use of time-proven type SM basic switches. There is a choice of silver or gold contacts, momentary or alternate action, solder or quick connect termination, and up to four-pole double-throw circuitry. Solid state switching can also be furnished.

Military type 1J versions are qualified under MIL-S-22885/81.

These one-lamp pushbuttons have a stationary lamp socket which is part of the bushing assembly. Since the lamp does not move when the button is operated, filament breakage due to a moving lamp is minimized, resulting in an extremely reliable lighted switch.

Relamping can be accomplished quickly and easily by releasing the lamp from its socket detent with a side push on the bulb.

ATTRACTIVE DISPLAY COLORS

Illumination is provided in a well balanced display of five transmitted colors: white, green, yellow, blue and red. They provide an attractive panel display whether lighted or unlighted. Series 1 offers a choice of round or square button design, which can be furnished with hot stamp legending.

Panel installation is quick and easy, since the switch is bushing mounted. Several versions are provided with a keying washer which prevents the unit from being rotated while mounted in the panel.

PERFORMANCE

Series 1 meets or exceeds the following requirements of MIL-S-22885:

Mechanical Life: 150,000 operations

Temperature: −67° to +185°F (−55° to +85°C)

Seal: Meets drip proof, sand, and dust requirements.

PANEL THICKNESS

Series 1 switch/indicators can be mounted in panels up to 6.4 mm/.250 in. thick. Round display devices with bezels fit panels up to 12.7 mm/.50 in. thick.

ORDERING INFORMATION

Use the ordering guides to build up catalog listings for buttons, switch/indicators, indicators, and bezels:

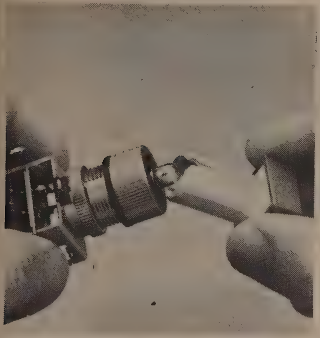
Switch/Indiactors	page A33
Indicators only	page A34
Buttons	page A34
Bezels	page A34

The MIL-S-22885 qualified Series 1 is an exception to the above procedure (page A36). It is ordered as an assembly, i.e., switch/indicator and button.

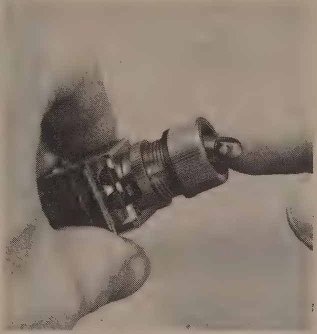
SERIES 1 LIGHTED PUSHBUTTON SWITCHES

FRONT-OF-PANEL RELAMPING

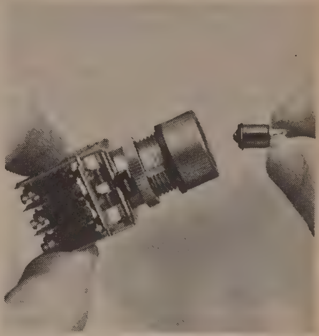
Should a lamp burn out, relamping can be accomplished quickly from the panel front, without tools, as shown below.



1. Remove button from switch with an outward pull.



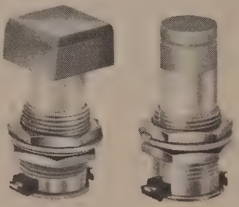
2. Dislodge lamp by pushing it in the direction of the keyway, to disengage it from the socket detent. Remove the lamp.



3. Insert new lamp by pressing it into the socket until it snaps into the socket. Replace the button.

BEZEL ACCESSORY

Aluminum bezels can be provided for use with 5/8-inch diameter round buttons. Button height can be adjusted during installation to be above flush or flush with the bezel. Bezels are available with or without a panel seal; in bright, dull or black finishes.



MATCHING INDICATORS

Indicators are identical to lighted switches in appearance from the panel front, providing a uniform display appearance. Buttons are interchangeable. Indicators have no provision for switching.

BUTTONS

In addition to ¾-inch square buttons, Series 1 offers interchangeable ½, 5/8 and ¾-inch diameter round buttons. Round or square buttons can be used in the same panel display for shape coding of switch functions, or to differentiate between switches and indicators.

From left, above, are two bezel-equipped Series 1 units and the hardware used for mounting, a round display device without a bezel, and a round button.

LEGEND SERVICE

MICRO SWITCH provides hot stamp legending for Series 1 buttons. Legending is applied directly to the front of the button. All buttons are provided with a clear wear-resistant finish for maximum legend durability and to reduce surface glare.

Legend order sheet FO-63157 should be used to specify hot stamp legending from MICRO SWITCH. Buttons may also be hot stamped or engraved by the user.

LAMPS

Series 1 devices can be furnished with flange base T-1¾ incandescent lamps.

LAMP NUMBER	VOLTAGE	CURRENT
327	28 VDC	.040 Amp
328	6 VDC	.200 Amp

MOUNTING DIMENSIONS

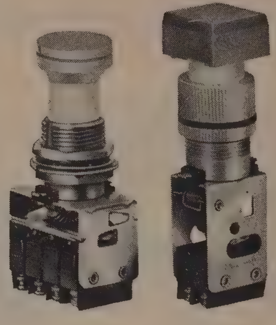
Refer to pages A35 and A36 for Series 1 mounting dimensions and panel cutout information.

SWITCH/INDICATOR ORDERING GUIDES

Select one feature character from each section of the ordering guide to specify the catalog listing that meets your specific needs.

Example: 1B100-2 designates a sealed, 1-pole momentary-action switch with silver contacts and a 28 volt lamp.

Each Series 1 switch/indicator consists of the switching units, bushing and lamp (if requested).



Without Seal With Seal

SNAP-ACTION SWITCHES

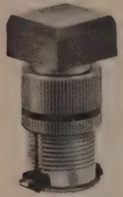
Contact your nearest MICRO SWITCH branch office for further information

OTHER SWITCHING OPTIONS

Possible Series 1 switching variations include power switches which will handle up to 20 amps; and quick-connect, Termi-point, and screw terminals. Refer to the section on Series 2 switch modules which begins on page A49 for examples of switch options that can be provided.

SERIES 1 LIGHTED PUSHBUTTON SWITCHES A

INDICATOR ORDERING GUIDE



With Seal

Without Seal

Matching Series 1 indicators use the same buttons as the lighted switches and provide a uniform panel appearance in a display of mixed indicators and switches. Buttons are ordered as separate items.

Catalog Listing 1D1 has the same knurled seal nut, panel seal, and knurled back-up nut as the type 1B lighted switch.

Catalog Listing 1E1 is not panel sealed and has a pair of hexnuts in place of the knurled nuts. It matches the type 1C lighted switch.

Indicators do not have a provision for switching. Select the desired indicator catalog listing from the chart below:

Example: 1D1-1 is a sealed indicator with a 6 volt lamp.

ORDER BUTTONS SEPARATELY FROM CHART AT RIGHT.

Example:

1D1 -1

INDICATOR TYPE	LAMPS
1D1 Sealed **1E1** Unsealed	**-1** 6V **-2** 28V (Omit character if no lamp desired)

BUTTON ORDERING GUIDE

Select one feature character from each section in the chart below to specify a complete button catalog listing. Example: 1A11G-L is a ¾-inch square green button, with legend. Note button type for use with panel seal and unsealed panel version.

Example:

1A11 G -L

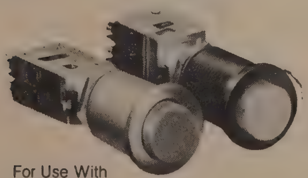
SQUARE BUTTON TYPE	COLOR (Transmitted)	LEGEND*
For use with panel seal devices: **1A11** (¾″ square) For use with unsealed devices: **1A12** (¾″ square)	**R** Red **G** Green **B** Blue **Y** Yellow **W** White	**L** With Legend (Omit if no legend is desired)

ROUND BUTTON TYPE
For use with panel sealed devices: **1A13** (½″ dia.) **1A15** (⅝″ dia.) **1A17** (¾″ dia.) For use with unsealed devices: **1A14** (½″dia.) **1A16** (⅝″ dia.) **1A18** (¾″ dia.)

*Legend Order Sheet, FO-63157 must accompany all orders for legended buttons.

Copies are available from your nearest MICRO SWITCH Branch Office.

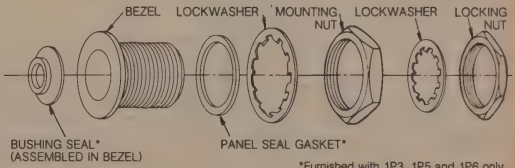
BEZEL ORDERING GUIDE



For Use With 5/8" Dia. Buttons

Bezels are furnished in packets which include mounting hardware. They may be specified with or without a panel seal, in a choice of three finishes. Bezels have an external thread for mounting and an internal thread which accepts Type 1M switch/indicators (see mounting dimension drawing on the following page).

BEZEL ASSEMBLY



*Furnished with 1P3, 1P5 and 1P6 only.

Button height can be adjusted during installation to be above flush or flush with the bezel.

TYPE 1J
4-POLE ASSEMBLY
• (Also available with 2 poles)

MIL-S-22885 switch assemblies consist of the switch unit, bushing, mounting hardware, and button. They may be ordered from the chart above. Lamps are ordered as separate items.

Type 1J devices are furnished with the ¾-inch square button assembled to the bushing.

ELECTRICAL DATA

5 amps resistive, 3 amps inductive (sea level); 5 amps resistive, 2.5 amps inductive (50,000 feet), 28 VDC., 2.4 amps, lamp load.
UL listed: 5 amps, 250 VAC.

LAMP DATA

Lamps are not furnished with MIL-S-22885/81 switches. However, T-1-¾ incandescent lamps with a flange base may be ordered as separate items from MICRO SWITCH, as shown in the chart below.

Users having lamp contracts may prefer to purchase larger quantities by that means.

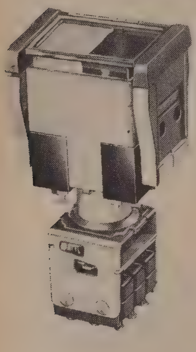
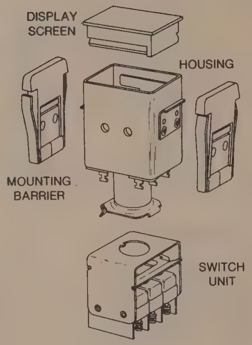
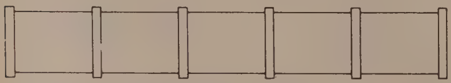
SERIES 2 RECTANGULAR DISPLAY MODULAR LIGHTED

- Up to Four-Lamp Indication
- Choice of 1, 2, 3 or 4-Section Display Screens
- Barrier Mount
- Modules Assemble Easily, Without Special Tools
- Thousands of Color Display and Circuit Control Combinations
- Flange Mount

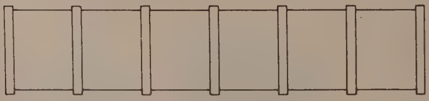




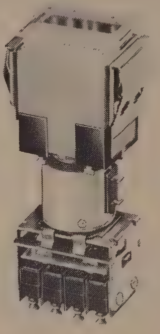
Barriers serve as mounting devices and separate the display screens to prevent accidental operation. The desired number of units are combined in a strip and snapped into the panel slot.

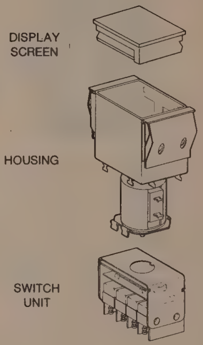


BARRIERS ON SHORT SIDES

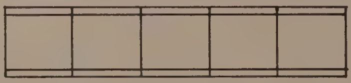


BARRIERS ON LONG SIDES

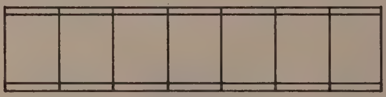




Flange mounted units are supplied with the mounting devices ready-attached. They can be individually installed or replaced, and permit an overlay panel. Optional spacing barriers can be used to separate groupings.



FLANGES ON LONG SIDES



FLANGES ON SHORT SIDES

HOW TO ORDER

Each Series 2 module has its own catalog listing and is ordered as a separate item.

Barrier Mount Modules:

HOUSINGS	Page
Operator-Indicators, Type 2C & 2C200	A39
Indicators Only, Type 2F & 2F200	A40
DISPLAY SCREENS, Type 2A	A43,44
LAMPS, Type 2E	A48
LAMP TOOL, 15PA32 (required for 2C and 2F housings only)	A37
SWITCH UNITS, Type 2D	A49-52
MOUNTING BARRIERS, Type 2B	A40
SWITCH GUARD, 2H20 (optional)	A38

Flange Mount Modules:

HOUSINGS	Page

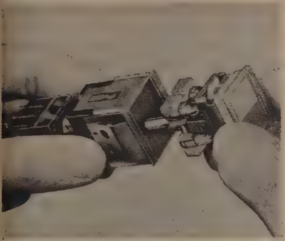
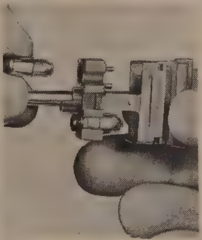
DISPLAY SCREENS, Type 2A	A43,44
LAMPS, Type 2E	A48
LAMP TOOL, 15PA32 (required for 2C & 2F housings only)	A37
SWITCH UNITS, Type 2D	A49-52
RFI SHIELD	A44
SWITCH GUARD, 2H20 (optional)	A44
PANEL SEAL, 2H11 (optional)	A38
SPACING BARRIERS (optional)	A42
MIL-S-22885 ASSEMBLIES, Type 2W	A53,54

SERIES 2 PUSHBUTTON SWITCHES AND INDICATORS A

FRONT OF PANEL RELAMPING



1.



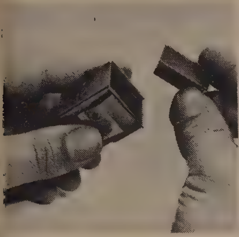
2.

TYPE 2C200 AND 2F200 HOUSINGS ARE RELAMPED WITHOUT TOOLS

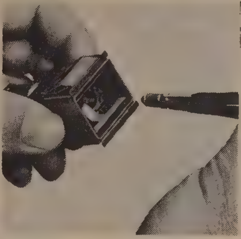
Type 2C200 (operator-indicator) and 2F200 (indicator only) housings have a separate lampholder assembly that can be removed to enable replacement of lamps or filters, without tools. The unit is keyed to maintain proper orientation.

1. Remove display screen/lampholder assembly.
2. Relamp and replace assembly.

LAMPS: T-1-3/4 flange base lamps only.



1.



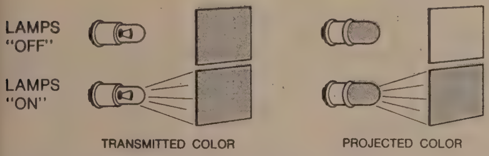
2.

USE LAMP TOOL WITH TYPE 2C AND 2F HOUSINGS

To easily remove and replace lamps or color filters from Type 2C (operator-indicator) or 2F (indicator only) housings, a Catalog Listing 15PA32 lamp tool is inserted into the socket until it bottoms against the lamp base flange. The glass bulb portion of the lamp is gripped, when installing.

1. Remove display screen.
2. Relamp with 15PA32 tool and replace screen.

LAMPS: T-1-3/4 grooved base lamps are recommended.



DISPLAY COLOR OPTIONS

Transmitted color refers to the use of clear lamps and colored buttons in applications which require the color to be distinguished when the display is unlighted.

Projected color is a technique that uses white buttons and colored filters over the clear lamps. When the lamps are lighted, the white translucent button takes on the color projected by the filters.

MODULES ASSEMBLE EASILY, WITHOUT SPECIAL TOOLS

All modules are ordered as separate items which snap together for easy assembly. Switch modules are shown here being attached to spring clips on the bottom of operator-indicator housing.

COIL EQUIPPED UNITS FOR REMOTE OPERATION

Housings with integral hold-in coils enable maintained and remote released contacts. Pull-in coils (available as flange mount only), in addition, provide remote actuation.

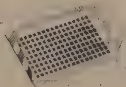
COLOR FILTERS

Filters used with Type 2C and 2F housings are fitted over the lamp bulb, while those used with Type 2C200 and 2F200 housings are slipped over the lamp sockets.

	Catalog Listings					
Filter Style	Red	Yellow	Green	Blue	Amber	White*
For Type 2C and 2F Housings	2G5	2G6	2G7	2G8	2G10	2G11
For Type 2C200 and 2F200 Housings	2G12	2G13	2G14	2G15	2G16	2G17

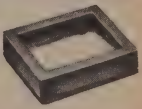
*Has blue tint to compensate for high yellow content of incandescent lamps at low voltages.

RFI SHIELD



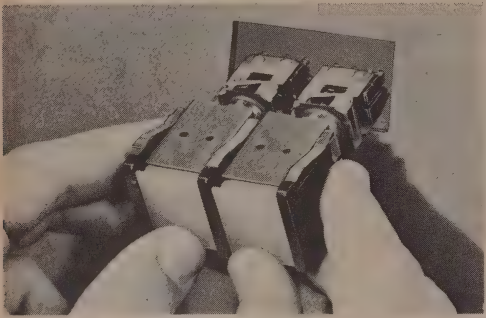
An accessory Radio Frequency Interference shield is available for use with flange mount Type 2C200 and 2F200 housings only. It consists of a metal grid which is installed under the display screen and grounded to the housing. Catalog Listing 2H18 fits one-section screens, while the 2H19 is for 2, 3 and 4-section screens.

PANEL SEAL



Catalog Listing 2H11 (for flange mount only protects the pushbutton and behind panel components from contamination by moisture and dirt entering through the panel cutout. It consists of a gray snap-on cover with transparent elastomer seal and a gray base with an adhesive seal for bonding to the panel.

SERIES 2 BARRIER MOUNT MODULES



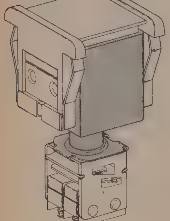
Barrier Mount

Type 2C, 2F, 2C200 and 2F200 barrier mount assemblies are identical in panel appearance. However, the Type 2C200 and Type 2F200 housings have different internal construction to enable relamping without tools. Housings are available for long or short barrier mounting, with two or four lamp sockets, and in indicator and operator-indicator designs (with or without integral d-c hold-in coils). Socket terminal locations are identified, as shown in the dimension drawings.

Lampholder Assemblies

Lampholder assemblies are furnished with 2C200 and 2F200 housings. Lampholders may also be ordered separately for replacement by specifying the following catalog listings: for operator-indicators—15PA203 (4-lamp type) and 15PA204 (2-lamp type); for coil-equipped operator-indicators—15PA207 (2-lamp type) and 15PA2001 (4-lamp type); for indicators only—15PA205 (4-lamp type) and 15PA206 (2-lamp type).

Operator-Indicator Housing Modules



HOUSINGS THAT USE LONG BARRIERS

These housings are assembled to panels with mounting barriers attached to the longer sides.

Switch modules shown on pages A49-A52.

*Nominal dimensions, tolerance ± 0,25 mm/.010 in. (In 5% of the cases, the cutout will be undersized for the build-up of assembled units and will require enlargement).

HOLD-IN COIL ELECTRICAL DATA

(also available in Flange mount.)

Hold-in coil equipped operator-indicator housings enable electromagnetic maintained and released contact. When energized, the coil holds the device in the operated condition, after the screen has been manually depressed.

Approximate coil power ratings are 1.3 watts, 6 vdc coil and 1.7 watts, 28 or 48 vdc coil.

ELECTRICAL BAIL

The circuit at right shows a means of operating any number of hold-in coil units, one-by-one, in situations that require only one switch to be operated at a time. A cancel switch can be installed at either or both points "A" and "B" to perform clearing of all switches.

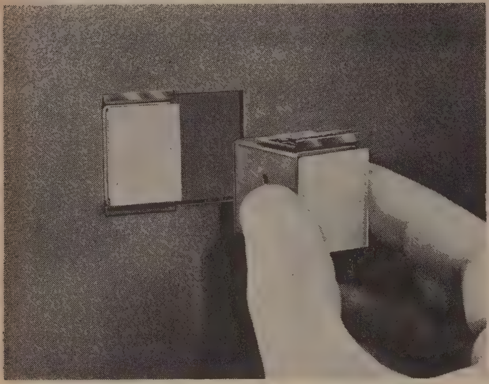
SERIES 2 FLANGE MOUNT MODULES



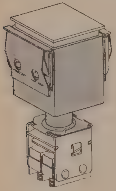
Flange Mount

Type 2C, 2F, 2C200 and 2F200 flange mount assemblies are identical in panel appearance. However, the Type 2C200 and 2F200 housings have provision for manual relamping, without tools. Housings are supplied with long or short mounting flanges, two or four lamp sockets, and in indicator and operator-indicator designs (with or without integral d-c hold-in or pull-in coils). A panel seal accessory is available.

Lampholder Assemblies

Lampholder assemblies are furnished with 2C200 and 2F200 housings. Lampholders may also be ordered separately for replacement by specifying the following catalog listings: for operator-indicators—15PA203 (4-lamp type) and 15PA204 (2-lamp type); for coil-equipped operator-indicators—15PA207 (2-lamp type) and 15PA2001 (4-lamp type); for indicators only—15PA205 (4-lamp type) and 15PA206 (2-lamp type).

Operator-Indicator Housing Modules



HOUSINGS WITH FLANGES ON LONG SIDES

These housings have spring clip mounting devices ready-attached on the longer sides.

Switch modules shown on pages A49-A52.

*Nominal dimensions, tolerance ± 0,25mm/.010 in. (In 5% of the cases, the cutout will be undersized for the build-up of assembled units and will require enlargement.)

**Add 4,19mm/.165 in. to length for each optional spacing barrier used with flange mount units.

PULL-IN COIL ELECTRICAL DATA

(available in Flange mount only)

Pull-in coil equipped operator-indicators enable electromagnetic actuated, maintained and released contacts. Energizing the coil pulls in the operating plunger, causing circuit transfer in the switching unit. A 28 vdc, 2.2 amps. (approx) is required during actuation (for about 20 ms or less) and only .11 amp. (approx) during hold-in. (Recommended for operation at 85 to 100% of rated voltage.)

Switch units that can be used are "TB", "PL" and all "SM" types except low force and 4-pole alternate-action designs. Maximum ambient temperature limits are 120°F (48.9°C) (1 or 2 pole momentary-action), 110°F (48.9°C) (3-pole momentary-action), 100°F (37.8°C) (4-pole momentary-action) and 90°F (32.2°C) (all alternate-action or momentary/alternate-action) switch units.

Note: A 4-pole momentary switch such as a 2D9 requries 28 volts for proper actuation.

ELECTRICAL BAIL

The circuit at right shows how any number of Catalog Listing 2D162 can be operated in one-by-one sequence. Each actuation releases previously actuated switch. Power is required only during the reset pulse. (Reset can also be accomplished by depressing previously actuated screen.)

SCREENS WITH COLORED RIM CAPS

FIG. 1

FIG. 2

Catalog Listings

COLOR OF RIM CAP		
Red	Green	Blue
2A106	2A108	2A107

With these screens, a change in control status can be indicated by both color and shape. They have colored transparent rim caps, colorless transparent inserts and white translucent bases. Filters of the same color as the caps are put on two of the four lamps. When the filtered lamps are lighted, a solid color appears (Fig. 1), while the unfiltered lamps, when lighted, result in a white display with a colored frame. (Fig. 2).

Since the insert is exposed, legending should be done on the base or reverse side of the insert.

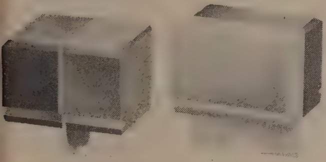
SERIES 2 PUSHBUTTON SWITCHES AND INDICATORS

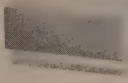
"GUMDROP" TYPE DISPLAY SCREENS

These bright colored screens are available in two heights, for sub-panel or flush-panel mounting.

Style 1 projects ½" (approx.) and Style 2 projects ⅜" (approx.) above the housing, as compared with the 3/16 (approx.) projection of the standard 2A1 type button. MICRO SWITCH provides hot stamp legending, which is oversprayed for maximum durability. Single section and two section longitudinal and lateral splits are available in both heights.



TWO SECTION (style 1 shown)



SINGLE SECTION (style 2 shown)

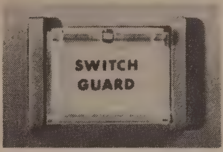
Catalog Listings

Style	Single Section Display Screens				
	Red	Yellow	Green	Blue	White
1	2A2011	2A2012	2A2013	2A2014	2A2015
2	2A2001	2A2002	2A2003	2A2004	2A2005

There are many color combinations available in the two section "gumdrops". Please contact your nearest MICRO SWITCH Branch Office for further information.

SWITCH GUARD

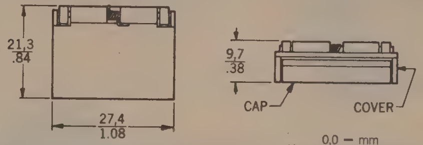
Catalog listing 2H20 has a hinged cover which prevents accidental depression of the display screen. It takes the place of the transparent slide-on cap furnished with three-piece display screens.



Barrier mount assembly with guard installed (can also be used with all flange mount units).

Guard requires a "lift-to-push" response to operate switch.

Note: When the 2H20 is to be used with pull-in coil devices, specify 2C200 type.



DIMENSIONS SHOWN ARE FOR REFERENCE ONLY

Key: 0,0 – mm / 0.00 – inches

LEGEND INFORMATION

MICRO SWITCH provides legend service on the inserts supplied with three-piece screens for Series 2 and Series 2N. Ordering forms are available, upon request.

Note: MICRO SWITCH does not provide legending service on 2A1 type one-piece screens.

Legend pricing is shown in the list price and discount schedule. Special symbols trademarks, etc., are offered on the basis of tooling.

On any one screen, only one size of type is provided in either black or white. After legending, the insert is assembled to the display screen. The type face used is "Modified Gothic".

RECOMMENDED SCREEN AND LEGEND COLOR COMBINATIONS FOR OPTIMUM LEGIBILITY

Screen Color	Legend Lettering Black	White
Red		X
Green		X
Blue		X
Yellow	X	
Amber	X	X
White	X	

TEMPERATURE CONSIDERATIONS

DISPLAY SCREENS—Series 2 display screens covered in this catalog are acrylic. They will withstand temperatures up to +120°F (49°C) total ambient. For applications requiring tolerance of ambients up to +150°F (66°C), polycarbonate display screens are available. Consult your nearest MICRO SWITCH Branch Office for further information.

OPERATOR/INDICATOR HOUSINGS—The 2C, 2C200, 2F, and 2F200 housings will withstand ambient temperatures to +275°F (135°C).

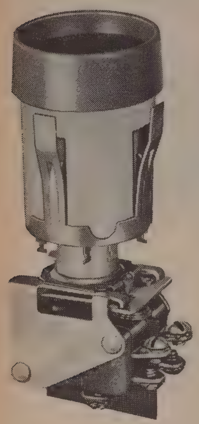
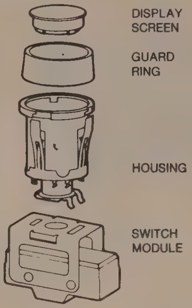
MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES 2M ROUND DISPLAY MODULAR LIGHTED



Round display modules are compatible with rectangular Series 2 in color, size and light output.

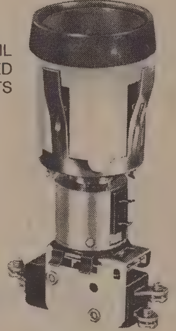


- Guard Rings Help Prevent Accidental Operation
- All Modules Keyed to Panel
- Up to Four-Lamp Indication
- Wide Array of Switch Modules
- Wide Selection of Modules for Custom Panels

Guard rings encircle the display screens from front of panel and help prevent accidental operation. By choice of color, the user can employ them to aid color coding in a closely grouped arrangement. The different guard ring colors can also be used to code control functions to enable faster, easier station location by the operator.

All modules-housing, screens, guard rings and switch modules, assemble quickly, without special tools. All modules are keyed to insure proper legend orientation.

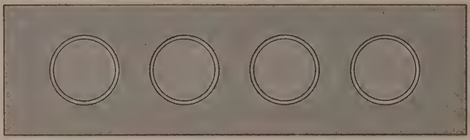
MATCHING INDICATORS



COIL EQUIPPED UNITS

Matching indicators for round display operator-indicators provide a uniform panel appearance.

Housings with integral hold-in coils enable maintained and remote released contacts.

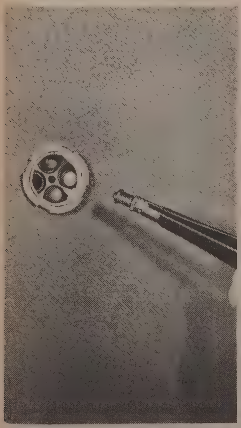


CHOICE OF TRANSMITTED OR PROJECTED COLOR

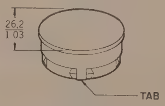
Colored screens can be used for transmitted color or white screens with color filters over the lamps can provide projected color schemes. Use the same filters, as shown for "Type 2C and 2F."

LAMP-FILTER TOOL

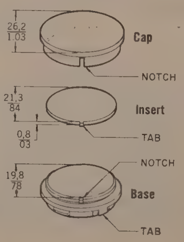
This tool, Catalog Listing **15PA32**, permits changing of lamps and color filters from the panel front.



1-PIECE SCREEN



3-PIECE SCREEN



DISPLAY SCREENS

One-piece translucent screens and three-piece (cap, insert and base) screens are available in five colors.

The three-piece screens can be furnished with either transparent colorless caps or transparent caps colored to match the translucent base. Inserts are colorless transparent.

NOTE keying tab relationships.

Catalog Listings

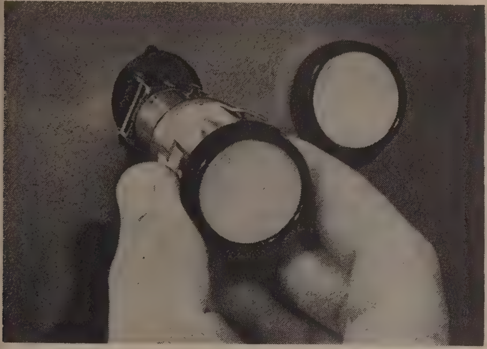
SERIES 2M PUSHBUTTON SWITCHES AND INDICATORS A



Round display indicators and operator-indicators are assembled to the panel by pressing them into the round hole provided. Panel thickness can range from 1/16'' to 5/16'' thick.

Switch units are attached to spring clips on the bottom of each operator-indicator to provide combined control and indication.

HOUSINGS FOR INDICATORS AND OPERATOR-INDICATORS

Four flexing spring leaves on the housing hold it secure in the panel. Housings are available with two or four lamp sockets.

Operator-indicators can be furnished with or without integral holding coils.

Catalog Listings

	Operator-Indicator Housing			Indicator Housing
		With Hold-in Coil		
No. of Sockets	Without Coil	6vdc	28vdc	
2 (A & C)	2M1	2M3	2M5	2R1
4 (A, B, C & D)	2M2	2M4	2M6	2R2

Note: Since guard rings overlap slightly, 57,4 mm/1.26 in. is required between mounting hole centers for side-by-side mounting.

GUARD RINGS

Colored guard rings have two height options: a .315'' type which extends slightly above an unoperated screen and a .475'' type which gives extra protection against accidental operation. They are attached to the housing from the panel front by a turn-to-lock action, making them easily removable when relamping.

Catalog Listings

Guard Ring Color	Red	White	Gray	Black	Blue

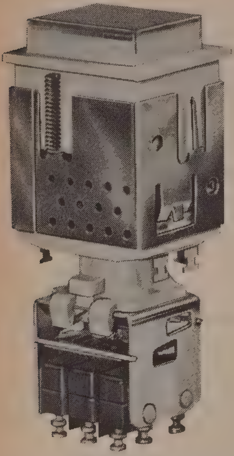
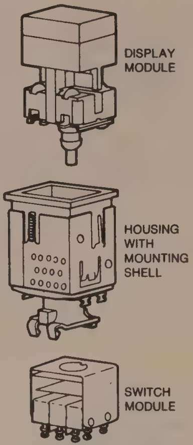
SERIES 2N MODULAR LIGHTED PUSHBUTTONS AND INDICATORS





- **Molded-In Color Housings**
- **Spring-Lock Mounting**
- **Up To Four-Lamp Indication**

Series 2N has a spring-lock mounting which holds units secure in the panel, yet provides resiliency to protect against the effects of shock. Molded color housings, in gray, white or black, can be supplied with terminals for two or four lamps.

Catalog Listings

No. of Lamp Terminals	Housing Code*		
	Gray	Black	White
2 (A & C)	2N1	2N3	2N6
4 (A, B, C & D)	2N2	2N4	2N6

*Other colors available in production quantities. Contact Branch Office for details.

HOLD-IN COIL MODULE

Coil modules are attached between the housing and switch module for electromagnetic maintained and released contact.

A downward push on the terminal boss (see photo) permits it to be turned and locked in two positions, 90° apart, for wiring convenience.

Catalog Listings

Coil Module	2P1	2P2	2P3
Voltage	6 vdc	28 vdc	48 vdc
Rating	.47 amp	.10 amp	.066 amp

A 12 vdc coil is also available. Contact your nearest MICRO SWITCH Branch Office for ordering information.

HOW TO ORDER

Each Series 2N module has its own catalog listing and is ordered as a separate item.

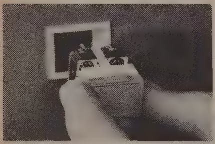
MOUNTED WITH LONG SIDES ABUTTING

MOUNTED WITH SHORT SIDES ABUTTING

SPACING BARRIERS

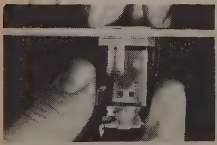
Spacing barriers can be used in rows that are mounted with the short sides abutting. Two colors are available: black - Catalog Listing 2B44 and gray - Catalog Listing 2B43.

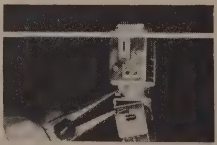


MANUAL RELAMPING

Both lamps and filters can be replaced from the panel front manually, without tools.

1. Grasp screen and pull out display module.
2. Remove inoperative lamp and make replacements.





EASY INSTALLATION

Spring loaded detents in the mounting shell provide a firm pressure to lock the housing securely in the panel, yet provide resiliency to protect lamp filaments from the effects of shock and vibration.

1. Insert housing in panel and slide on mounting shell.
2. Attach switch module to mounting clips on housing.

SERIES 2N MODULAR LIGHTED PUSHBUTTONS AND INDICATOR

"V3" Compact (SPDT-DPDT) Switch Modules

Catalog Listing 2D70 is single-pole double-throw. Catalog Listing 2D72 has double-pole double-throw circuitry.

Screw terminals with lockwashers are provided. On double-pole units, a flexible insulating barrier is installed between the basic switches. Series 2 assemblies built up from short flange operator units and "V3" switch units should have spacing barriers between them to prevent mechanical interference.

These switch units are also available with quick-connect terminals for fast, easy wiring. Contact your nearest MICRO SWITCH Branch Office for details.

ELECTRICAL RATING

"TB" Compact (2-Circuit) Switch Modules

Catalog listing 2D64 (screw terminals) and 2D86 (solder terminals) have a two-circuit "TB" switch which gives very close to simultaneous operation of all contacts. Twin-break silver contacts provide the versatility required when two isolated circuits must be controlled. There are four terminals, with one normally closed circuit and one normally open. A single-pole double-throw circuitry is easily arranged by connecting the two terminals on one side of the switch together and using the combination as the common terminal.

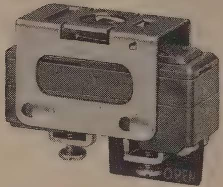
"MT" High d-c Capacity (SPDT) Switch Unit Modules



Catalog listing 2D88 has a "MT" magnetic blowout basic switch with high direct-current capacity. It provides means of switching d-c loads up to 10 amps, 125 volts, when wired either polarized or non-polarized. A small permanent magnet is incorporated in its design. This magnet protects the contacts when the circuit is broken by blowing the d-c arc away from them. Terminals are screw type.

ELECTRICAL RATING

Non-Polarized:

125 vdc	10 amps res., ¼ hp
250 vdc	1.5 to 3 amps res.

Polarized*:

125 vdc	10 amps res., ½ hp
250 vdc	1.5 amps res.

*To polarize, connect negative side of line to common terminal or mount switch with brass screws, using a non-conducting barrier between switch and mounting surface.

LAMP INFORMATION

T-1 ¾ incandescent lamps are available from MICRO SWITCH in 6, 14, and 28 volt versions. Order flange base lamps for products which have the no-tool relamping feature.

Use of neon lamps is not recommended. Light output is approximately 30% of an incandescent lamp. Also, a neon lamp will not illuminate blue or green filters or display screens due to the absence of these colors from the neon light spectrum.

CATALOG LISTING	BASE STYLE	TYPE NO.	RATING			LIFE/VOLTAGE†	
			VOLTS	AMPS	LIFE IN HOURS	VOLTAGE	EXPECTED LIFE (HRS.)

*Flange Base (for Series 2 Type 2C200 and 2F200, and Series 2N)

**Grooved Base (for 2C and 2F)

***6 volt lamps are best suited for applications where shock or vibration is a factor.

†These are experimental continuous life test results supplied by a lamp manufacturer for reference only. Intermittent operation may reduce these figures as much as 50%. Ratings are based on median values of current and life.

Lamp Policy—No warranty is offered or implied hereby, the service being one of convenience only for customers not having a convenient source of miniature lamp purchase contract. MICRO SWITCH cannot guarantee to provide lamps from specific manufacturers. Any technical or quality questions regarding such lamps should be directed to the lamp manufacturer.

TEMPERATURE CONSIDERATIONS

DISPLAY SCREENS—Series 2 display screens covered in this catalog are acrylic. They will withstand temperatures up to +120°F (49°C) total ambient. For applications requiring tolerance of ambients up to +170°F (77°C), polycarbonate display screens are available. Consult your nearest MICRO SWITCH Branch Office for further information.

OPERATOR/INDICATOR HOUSINGS—The 2C, 2C200, 2F, and 25200 housings will withstand ambient temperatures to +275°F (135°C).

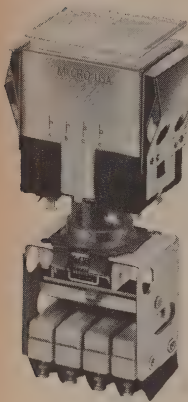
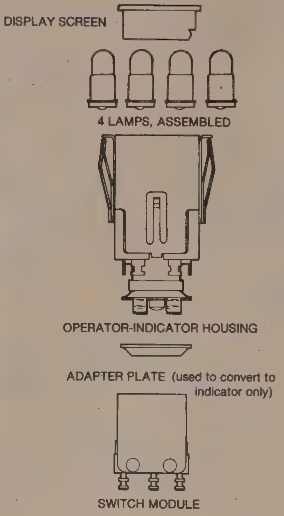
MICRO SWITCH

A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032 / PHONE 815-232-1122

SERIES 2W

ASSEMBLED MIL-S-22885/15 LIGHTED PUSHBUTTON SWITCHES





DISPLAY SCREEN
4 LAMPS, ASSEMBLED
OPERATOR-INDICATOR HOUSING
ADAPTER PLATE (used to convert to indicator only)
SWITCH MODULE

- Meet MIL-S-22885 Requirements
- Projected Color
- Short and Long Flange Mounting
- Front Panel Relamping

2W Series Lighted Pushbutton Switches and Indicators are ordered as assembled devices from a single part number. Relamping can be accomplished from the panel front, without tools (refer to 2C200 relamping procedure on page A38).

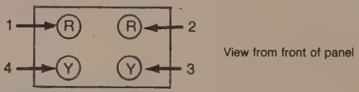
MIL-S-22885/15 covers the assembled lighted pushbutton switch listings. They consist of a display screen, an operator-indicator housing, 4 lamps and a switch module.

FILTERS (Optional)

Filters for projected colors conform to MIL-S-22885/12. They can be ordered assembled or as separate items. To order filters *in the assembly*, they are to be indicated by suffix letters in place of the "XXXX" portion of the MIL or MICRO SWITCH listing. Color suffixes are B = blue, G = green, R = red, W = white, Y = yellow and A = amber. The suffix letters should be listed in the order of their desired lamp socket location.

EXAMPLE: **M22885/15-49RRYY** or **2W106RRYY**.
1234 1234

An X must be used to denote the absence of a filter.



To order filters separately, refer to chart below.

Color Filter	Blue	Green	Red	White*	Yellow	Amber
Catalog Listing	2G101	2G102	2G103	2G104	2G105	2G106

*Has blue tint to compensate for high yellow content of incandescent lamps at low voltages.

LAMPS

Four 28V T-1¾ flange base lamps will be in each assembly which is ordered by the MIL listing unless otherwise specified on the order. If the MICRO SWITCH listing is used for ordering, the lamp option must be specified as a suffix. (See chart below).
EXAMPLE: **2W106XXXX-*2A*.**

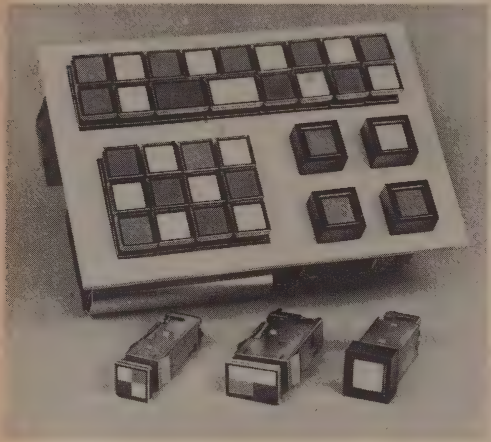
MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES DS MINIATURE DISPLAY SWITCHES



- MIL-S-22885 Qualified Versions
- Reliable SX—7 amp Basic Switch
- Long Life Lamps—Replaceable From Panel Front
- Rugged Mounting System—Enables One-Hole Matrix or Strip Mounting
- Individual Mount Option
- RFI Attenuation
- Projected and Transmitted Color

Designed to meet the requirements of MIL-S-22885, the "DS" Series of miniature lighted display switches have exceptional RFI attenuation and rugged metal construction. Available in momentary and alternate action types, they provide outstanding control flexibility and display versatility; are highly adaptable to many military and commercial applications.

There are two design options: (1) custom matrix configurations featuring plug-in switches which can be replaced from the panel front without special tools and are easily fitted into a pre-assembled box girder mounting system; (2) individual mount switches, used primarily for remote stations or indicating functions. Terminals are turret solder type. A snap-on bezel acts as a guard to reduce the possibility of accidental actuation of the pushbutton.

CONFIGURATION

Switch and indicators—1-unit (3/4" x 3/4") and 1-1/2-unit (3/4" x 1-1/8"). Switch stroke is .250". Indicators are the same configuration as switches, except the button has high free position force.

Matrix—any size and shape, depending on types and number of switches used. A single row will hold up to sixteen 1-unit switches or up to ten 1-1/2-unit switches.

Individual Mount—1-unit size.

PERFORMANCE CAPABILITIES

The DS device has been designed using MIL-S-22885 as a performance standard. The following areas which have been tested are minimum levels of performance applicable to all DS listings. In many cases these levels have been exceeded by MICRO SWITCH evaluation testing.

Electrical Endurance—Assemblies subjected to a minimum of 25,000 make and break cycles under applicable loading conditions.

Dielectric Withstanding Voltage—1,000 volts RMS.

Salt Fog Resistance—Device exposed to 5 percent solution for 96 hours

Sand and Dust—Switch front exposed to sand dust per MIL-STD-810A at +25°C and +71°C for two hours each.

Thermal Shock—Device exposed to −55°C and −85°C for ½ hour each, alternately for 5 hours.

Moisture Resistance—In accordance with Method 106 MIL-STD-202 for 10 days.

RFI—DSH and DSJ switches were individually tested in accordance with the general procedure of MIL-STD-285 as specified by MIL-S-22885/71. Contact your nearest MICRO SWITCH Branch Office for further information.

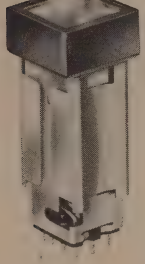
Electrical Endurance—DSJ type is qualified to MIL-S-22885 meets 25,000 operations minimum life at rated loads. DSA, DSH, and DSK types meet 25,000 operations minimum life on basis of similiarity to DSJ.

Vibration—Individual mount and up to and including 2 x 8 matrix—10 G's, 10-500 Hz; up to and including 4x5 matrix—3 G's, 10-500 Hz.

Shock—Per MIL-STD-202, Method 213—50 G half sine wave test.

SWITCH/INDICATOR ORDERING GUIDE

(Shown with DSB buttons installed)



1 Unit
Individual Mount

1 Unit

1½ Unit

Plug-In Strip and Matrix Mount

Individual mount units have a snap-on bezel. Termination is direct to the switch terminals on the **DSH** and to a captive connector block which is attached by a screw to the base of the **DSK**. They can also be mounted in strips.

Matrix mount DSA units require **DSM** mounting hardware which is ordered separately. They plug into connector blocks which enable replacement from the panel front without disturbing the wiring.

Catalog listings for switch/indicators (less buttons) are derived from the ordering guide, as shown in the example below.

DSH-204BH is an individual mount, direct wire, 1-unit switch, has 1-pole alternate action silver contacts, black bezel and circuitry for two lamps in positions 1 and 4.

Example:

DSH — 204 B H

HOUSING TYPE

DSH
Individual mount, direct wire.

DSK
Individual mount, with captive connector block.

DSA
For strip or matrix mounting. Includes connector block.
(Requires DSM mounting hardward.)

Order buttons separately, from page A57.

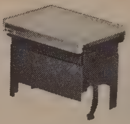
1 Unit



1½ Unit

The 1-unit (3/4"x3/4") and 1½-unit (3/4"x1-1/8") DSB buttons are ordered separately for assembly to **DSA, DSH,** and **DSK** switch/indicators. Button catalog listings are derived from the ordering guide, as shown in the example below.

DSB22-RRGG-NRI is a 1½-unit 2-section (vertical split) button which is red in quadrants 1 and 2 and green in quadrants 3 and 4 (transmitted color), no legend, 5-volt lamps in all four positions.

DISPLAY COLOR OPTIONS

Transmitted color refers to the use of clear lamps and colored buttons in applications which require the color to be distinguished when the display is unlighted.

Projected color is a technique that uses white buttons and colored filters over the clear lamps. When the lamps are lighted, the white translucent button takes on the color projected by the filters.

Note: If lamps are not desired, omit the last two characters in the catalog listing

DSB22 — RRGG — N R 1

2	28 Volt

LAMP DATA

Each device, either 1 or 1½-unit size, can use up to four MS24515 long-life lamps within the button housing. They retain the same brightness at any button level. Lamps are easily installed or removed from the panel front without special tools. The 5-volt, .115 amp lamps (Type 718) have a 40,000 hour life expectancy, while 28-volt .024 amp lamps (Type 6839) have 16,000 hours. They have a common ground to simplify wiring.

LEGENDING

The legend plate is located between the button cap and diffuser plate. Re-legending of buttons is accomplished by removing the old film strip and replacing with the new one. MICRO SWITCH will provide hot stamp legend service in 7/64", 9/64", and 13/64" character height on the legend film strip.

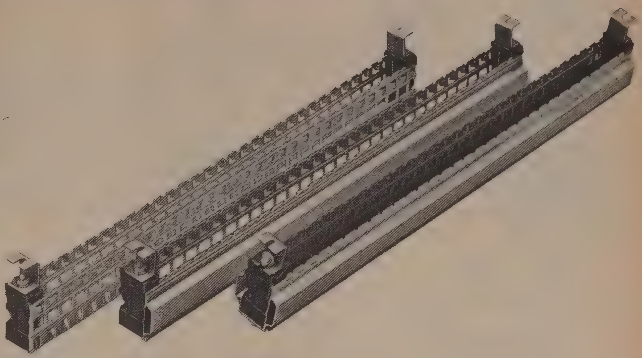
Ask your MICRO SWITCH Branch Office for DS Legend Order Sheet (FO-62799).

MATRIX MOUNTING HARDWARE ORDERING GUIDE

Mounting hardware shown on this page can be used with either 1 unit or 1½ unit DSA switches. It consists of mounting bars assembled with mounting blocks on the ends of the rows to form a rigid box girder frame.

Rows are interlocked to build the mounting matrix. Each mounting block has a U-shaped bracket attached at the top to facilitate panel installation.

There is a provision for attaching other rows on both sides of **DSM-1** mounting bars and on one side of **DSM-2** mounting bars.



DSM-1 DSM-2 DSM-3

Catalog listings for mounting hardware are derived from the ordering guide as shown in the example below.

DSM-309 can be used to mount five units of switches and/or indicators in a single strip mount, such as two 1 1½ unit switches and two 1-unit switches.

Example:

DSM-2 15

MOUNTING HARDWARE TYPE
DSM-1 For inside rows of matrix.
DSM-2 For outside rows of matrix. (reinforced on one side)
DSM-3 For single strip mount. (reinforced on both sides)

FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES DS MINIATURE DISPLAY SWITCHES

COMPLETELY ASSEMBLED
MIL-S-22885 INDIVIDUAL MOUNT
DSJ LIGHTED SWITCH/INDICATORS

DSJ switches meet the requirements of MIL-S-22885 and are available in single-hole mount 1-unit size. Mounting can be on .062" to .242" thick panels. They are complete assemblies, consisting of: (1) two SPDT silver contact SX type subminiature basic switches rated at 7 amps, 250 vac; and (2) three-piece white buttons (cap, diffuser plate and housing.) Display can utilize up to four T-1 Type lamps. If projected or transmitted color, lamps or less circuitry either in switch or lamp are needed, see DSH and DSK switches.

DSJ catalog listings charted below consist of a completely assembled lighted pushbutton switch or indicator. Lamps are not furnished. Select desired display and switching action or indicator only.

4DM1 MOMENTARY
2004DM1 Alt. Action

Series DM switches offer a choice of several button styles and one or two single pole double throw circuits. Switch actions include momentary, push-pull, alternate action, and a momentary with pull to cheat option. Silver contacts are standard, gold alloy contacts are available, also combinations of gold or silver. Other options include single throw circuits, angled terminals, plus plungers and faceplates in white, black, gray or red. Request further information from your local Branch Office.

TERMINATION

Quick-connect 4,8 mm x 0,5 mm/.188" x .020" terminals are standard. (Series DM can also be furnished with 6,4 mm x 0,8 mm/.250" x .032" terminals.)

SWITCHES WITH SNAP-ON BUTTONS

Switches on this page can be purchased with the buttons ready-installed or switches and buttons can be ordered separately. Switches have gray faceplates.

SERIES DM SWITCHES

WITH INTEGRAL BUTTONS/PLUNGERS

Manual and Interlock Applications

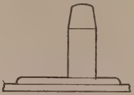
Series DM switches that are described on this page have integral design pushbuttons. They have the same features and options of DM Pushbuttons. Concave surface plungers are available in red or black with gray faceplates. Many other features/modifications are available including alternate action, housing and color variations, terminal variations and single-throw circuitry.

ELECTRICAL RATING

UL and CSA Listing: 125,250 or 277 VAC, 10 amps. 1/3 H.P.
For listings designed to meet CEE24 or low current gold contacts contact your local Branch Office.

ALTERNATE-ACTION

Alternate-action devices have a push on-push off operation. The maintained "on" position of the plunger is at a lower level than the normal "off" position. (Two-level alternate-action.)



Bullet Nose Description*	Catalog Listing	Circuitry
White Plastic	2001DM1	SPDT
Black Plastic	2002DM4	DPDT

*Other plungers available contact a MICRO SWITCH Branch Office.

PULL TO CHEAT

A "pull to cheat" feature allows normal momentary option. However, by pulling the plunger out beyond normal free position a maintained "on" position is achieved.

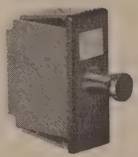
SERIES DM

LIGHTED PUSHBUTTON SWITCHES



Push-pull-Type

Series DM lighted pushbutton switches are available with all the features of non-lighted switches plus 6 or 28 volt incandescent or 115 volt neon lamps with a choice of lens colors. They are available in single pole only.

ORDERING INFORMATION

To order, combine the basic (function) listing from Table 1 with the desired color suffix (for the lens) to complete the catalog listing. (For example, catalog listing 106DM301-R is a push-pull two-position switch with a 6 volt lamp and a red lens.)

TABLE 1—BASIC LISTING ORDER GUIDE

SWITCH TYPE	LAMP	BASE LISTING (Add Color Suffix)
Momentary Action	6 volt	106DM1—
	28 volt	128DM1—
	115 volt	1115DM1—
Push-Pull	6 volt	106DM301—
	28 volt	128DM301—
	115 volt	1115DM301—
Alt. Action	6 volt	2106DM1—
	28 volt	2128DM1—
	115 volt	2115DM1—

NOTE: All above listings have black buttons and faceplates. White or gray faceplates can be supplied in production quantities.

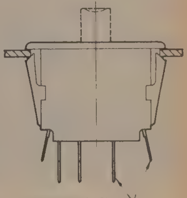
TABLE 2—COLOR SUFFIX

LAMP TYPE	LENS COLOR (Add suffix letter to base listing)					
6 or 28 volt (Translucent Lens)	Red -R	Yellow -Y	Green -G	Blue -B	White -W	Colorless
115 Volt Neon Transparent Lens)	-R	-Y				-C

The average life of the permanently assembled (non replaceable) lamp is 25,000 hours, as rated by the lamp manufacturer. The neon lamp version is supplied with an integral series-wired resistor.

LAMP RATINGS:

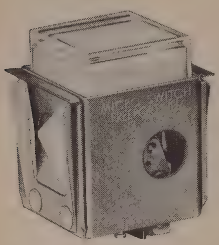
6V	.20 amp
28V	.94 amp
115V	1.9 milliamp

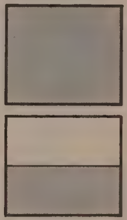


DIMENSIONS SHOWN ARE FOR REFERENCE ONLY

Key: $\frac{0,0 - \text{mm}}{0.00 - \text{inches}}$

SERIES 302PB LIGHTED PUSHBUTTON SWITCHES





SHOWN ACTUAL SIZE

Series 302PB is available in a choice of momentary or alternate-action operation of two single-pole double-throw switches. When the alternate-action switch is pushed, the display screen remains slightly depressed and circuit transfer is maintained until the next operation.

MATCHING INDICATORS

Series 302LT indicators are identical to 302PB switches in size and appearance, but have no switching function.

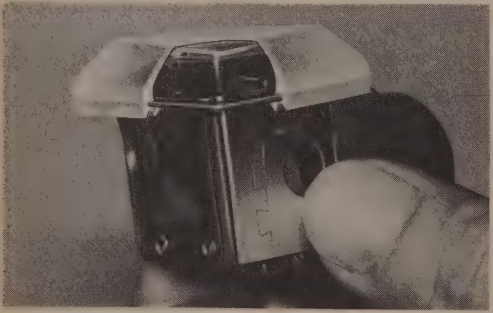
TWO LAMPS

Two long-life 5 volt T-1 lamps are provided with each unit, one under each half of the display screen. 12 and 28 volt lamps are also available. Lamp terminals are separate from switch terminals.

MOUNTING

Units snap into panels, held secure by spring clips on the mounting flanges. Recommended panel thickness is .060" to .250" (1,5 mm to 6,3 mm). Thicker panels lessen retention. Row mounting requires a .903" (+.020 −.000) wide slot or single in a .903" (+.020 −.000) by .826" hole. (22,9 mm by 21 mm).

PANEL SEAL

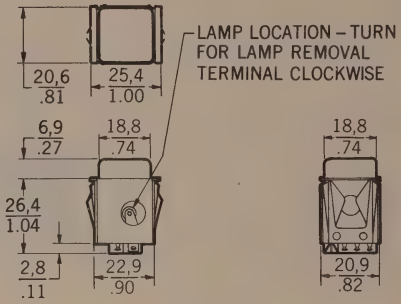


A seal accessory, Catalog Listing 302PA2, is available for protecting switches, indicators and other behind panel components from moisture or dirt.

Clear elastomer cover fits over screen and edge of mounting plate (see cutaway) during installation.

This seal is used with individual units, but is not suited to row mounted units or applications which require spacing barriers.

- Miniature Size-Occupies Less Than One Cubic Inch
- One or Two-Section Display, Two-Lamp Indication



ELECTRICAL RATING

28 vdc . . . 7 amps res., 4 amps ind. sea level, 2.5 amps ind. at 50,000 ft., 4 amps motor load, 2.5 amps lamp load and 25 amps max. inrush. UL and CSA listing for basic switch: 115/230 vac . . . 7 amps res. and ind., 15 amps inrush.

SPACING BARRIERS

Spacing barriers may be used to separate groupings of switches or indicators and guard against accidental operation of two screens with one push.

The barriers mount separately on the panel and are not attached to the switches or indicators. They seat flush against the flat sides of the units. Barriers are .115" thick.

302PB4-T-	302PB6-T-	302LT3-

Two-section screens are also available in a one-piece retractive style which has a lens pattern on the inside contour. When lighted, it provides a sparkling jewel-like appearance. There is no provision for a legend insert. For more information, contact your nearest MICRO SWITCH Branch Office.

Each screen on these switches and indicators has a transparent colorless cap, divided translucent colored two-section base and two .325" x .655" (.030" thick) translucent colored legend inserts which match the base color. They can be furnished in single color or two color combinations. A baffle in the base prevents light spillage from one section to the other when only one lamp is lighted.

HOW TO ORDER

To order momentary or alternate-action switches and indicators with two-section display, combine the basic (function) listing in Table 2a with the desired color suffix in Table 2b to complete the catalog listing. For example, 302LT3-GY is an indicator with a green-yellow screen.

HOW TO ASSEMBLE INSERTS

Inserts are package with each switch or indicator, unassembled. Bend insert slightly between the thumb and two fingers and push completely through slot. It will then flatten out and be retained. It cannot fall out.

SEALED AT BUSHING, BUTTON, PANEL AND SWITCH UNITS

MOMENTARY ACTION

Catalog Listing **2PB901-T2** meets the submergence requirements of MIL-STD-108D (up to 10 p.s.i. water pressure for one hour). It is sealed facenut-to-panel, button-to-facenut, and bushing-to-facenut (prevents entry of water from back of panel, up and over bushing wall). The two SPDT switch units are potted in a corrosion-resistant metal enclosure.

The knurled facenut is chrome finished to provide an attractive panel appearance with the black button.

4-POLE

Hermetic Seal

Sealing consists of metal-to-metal fusion around the cover, actuator, base and mounting holes of each switching unit. The terminals are joined to the housing by glass-to-metal seals. The vapor-proof container permits use in damp locations without danger of condensation on the contacts, as well as providing protection from external contaminants. All external parts are corrosion resistant and meet MIL-S-6743 specifications. This design also meets explosion-proof requirements of MIL-E-5272.

Electrical Rating: 3 amps. ind., 5 amps. res., 28 VDC and 115 VAC 400 cps.

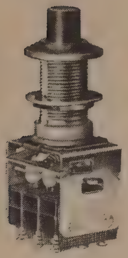
Easy To Assemble to Wide Variety of Basic Switches

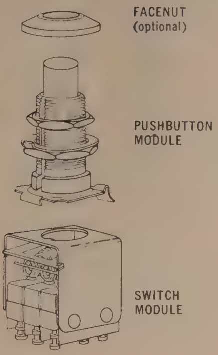
Series 12MA actuators can be combined with A and Z pin plunger basic switches in Section G and TB basic switches in Section F to provide custom pushbutton assemblies for most electrical capacity or circuitry requirements.

They accommodate panels 1,5 to 7,9 mm/.060 to .312-inch thick. A neat, attractive panel appearance is presented by the smooth plastic ½" and 1" diameter buttons and clear anodized aluminum bushings. A keying stud prevents bushing rotation. (Order actuators and switches as separate items.) Two sets of switch mounting screws and lockwashers are supplied with each actuator.

SWITCHES SHOWN ARE NOT INCLUDED WITH THE ACTUATOR

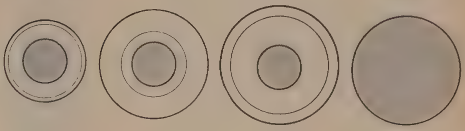
SERIES 6 MODULAR PUSHBUTTON SWITCHES **B**





- East-to-Assemble Modules
- Wide Array of Switch Modules
- Choice of Three Facenut Types, Including One With Panel Seal

custom pushbutton switch assemblies can be built up from interchangeable modules, enabling lower inventories.



Panel views, left to right: hexnut, with 6C3, 6C2 and 6C1 facenuts, and ¾" diameter button.

PUSHBUTTON MODULES

Pushbutton modules consist of an operating button, mounting bushing, two hexnuts and a keying washer. Mounting, clips are provided at the base of the bushing for attachment of switch modules (or optional hold-in coil modules). They can be mounted in panels up to .312" thick.

COIL MODULE

Hold-in coils can be added to a Series 6 assembly between the pushbutton and switch modules to provide electromagnetic maintained and released contact. Refer to Page A47 for catalog listings.

SWITCH MODULES

All switch modules shown on Pages A49-A52 can be snapped onto Series 6 pushbutton modules.

FACENUTS

A more attractive panel appearance can be achieved by substituting a facenut for one of the hexnuts supplied with the pushbutton modules.

Catalog Listing 6C1 has panel-to-bushing and bushing-to-button seals. It is for use with 6A46, 6A47 and 6A48 pushbutton modules only. The edge is knurled for assembling ease.

Catalog Listing 6C2 has a beveled edge and 6C3 has a knurled edge.

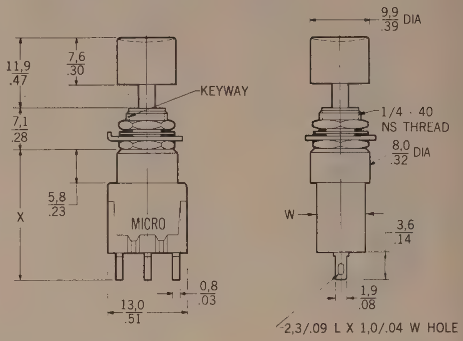
SERIES 8 PUSHBUTTON SWITCHES — TYPE 8N AND 8P

Series 8 pushbutton switches are part of a complete line of miniature manual switches, which also includes toggle, rocker, and paddle switches. Refer to pages C1-C10 for information on these other Series 8 products.

Type 8N and 8P switches meet requirements for a miniaturized 1/4" diameter bushing mounted pushbutton. Concave surface buttons are available in two sizes and eight colors. Type 8P switches have bushing and panel seals, and a "D" bushing instead of a keyway slot.

Switch catalog listings are derived from the ordering guide, as shown in the example below. Buttons are ordered separately.

TYPE 8N
(Shown with small button)



Note: Mounting dimensions for 8P switches are similiar to the 8N, however they have a "D" bushing instead of a keyway slot. Refer to page C10 for the "D" bushing panel cutout.

W = 8,0/.31 1 pole
13,0/.51 2 pole
18,0/.70 3 pole
23,0/.89 4 pole
X = 21,0/.83 1 & 2 poles
23,6/.93 3 & 4 poles

Example:

8N	2	02	1	A
PUSHBUTTON SWITCH	NO. OF POLES	ACTION	TERMINAL STYLE	CONTACT MATERIAL
8N 1/4" Bushing **8P** 1/4" Bushing (Panel and Bushing Seal.) Order button separately.	1 1 pole 2 2 pole 3 3 pole 4 4 pole	01 Alternate Action 02 Momentary Action	1 Solder 2 P.C. 3 Wirewrap	A Silver contacts. Copper end terminals. Brass center terminals, silver plating. B Brass contacts and terminals, with .0001" min. gold over .0002" min. nickel. C Fine silver contacts and brass terminals, with .0001" min. gold over .0002" min. nickel.

8N switches are furnished with momentary (push-on, release-off) or alternate action (push-on, push-off). A double-headed arrow (↔) on the switch case identifies momentary switches, while a single-headed arrow identifies alternate-action types.

Buttons, available in two sizes and eight colors, are ordered separately. They press-fit to the switch plunger after the switch is mounted.

CONTACT ACTION

When the button is depressed, alternate-action 8N devices transfer the circuit between the center (common) terminal(s) and the terminal(s) on one side of the switch. When the button is released, the circuit is maintained. The next operation transfers the circuit to the terminal(s) on the other side of the switch.

Momentary action switches have the normally closed terminal(s) located on the keyway side of the switch. When the button is depressed, the circuit transfers the circuit to the terminal(s) opposite the keyway. Releasing the button transfers the circuit to the terminal(s) on the keyway side.

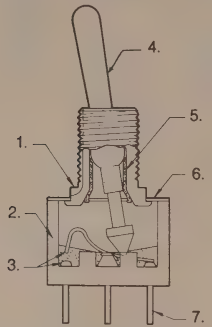
MICRO SWITCH

A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES 8 MINIATURE MANUAL SWITCHES

Series 8 offers an outstanding variety of electrical and structural features throughout this line of commercial miniature manual switches.

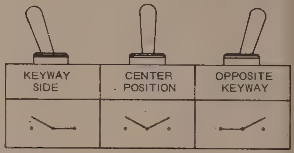


The MICRO SWITCH Series 8 line of miniature manual switches is ideally suited for commercial applications which have limited space requirements and demand high quality and performance standards. There is a wide choice of operator options: toggles - with small, large, flatted, color tipped, short, long, and pull-to-unlock levers; rockers - in lighted and unlighted versions; paddles; and pushbutton switches - with a choice of two button sizes. Accessories, such as colored plastic lever sleeves for toggle switches and colored bezels for rocker and paddle switches, can be used to enhance panel appearance and to identify control functions.

QUALITY CONSTRUCTION

1. HIGH TORQUE BUSHING. Prevents toggle switch bushing from rotating or separating from case during assembly.
2. ARC-RESISTANT CASE. Constructed of high strength plastic and compartmented to assure isolation of circuits in multi-pole devices.
3. CONTACTS. Choice of fine silver, gold/nickel plated brass, or gold/nickel plated fine silver contacts for handling a variety of electrical loads.
4. OPERATORS. Choice of levers, i.e., small, large, flatted, color tipped, short, and long levers; and rocker, paddle, and pushbutton operators, to provide maximum flexibility.
5. LEVER STOP. Toggle switch bushings have a built-in lever stop to prevent contact transfer or switch damage should a downward force be applied to the lever.
6. RECESSED COVER ATTACHMENT. All Series 8 switches have the steel cover attached to the case away from close proximity to the switch terminals. This isolation aids in preventing shorting between the terminals and case during assembly or use.
7. EPOXY SEALED TERMINALS. All switches have epoxy sealed terminals, except the 8A1011.

LEVER/ CIRCUIT RELATIONSHIP



The operating sequence above is repeated in multipole devices. Each pole has double-throw circuitry and consists of three terminals which exit at the bottom of the switch case. The keyway is a helpful reference when you are applying a switch with the momentary (ON) circuit at one of the extreme lever positions.

SERIES 8 PUSHBUTTON SWITCHES ARE SHOWN ON PAGE B5.

SERIES 8 MINIATURE MANUAL SWITCHES

SPECIFICATIONS

ELECTRICAL DATA

Fine Silver Contacts: 6 amps, res; 2 amps., ind., 125 VAC (60Hz) and 28 VDC. UL Listed (most models): 6 amps, 125 VAC. Gold/Nickel Plated Brass or Fine Silver Contacts: 0.5 VA max. at 20 volts max.

PERFORMANCE DATA

Initial Switch Resistance 10 milliohms max. at 2-6 VDC, 1 amp, resistive.

Initial Dielectric Strength: 100 microamps max. current leakage between mutually insulated terminals and ground, at sea level at 1000 VAC

Initial Insulation Resistance 1000 megohms min. resistance between mutually insulated terminals and ground, at 500 VDC

Mechanical Endurance: 100,000 switching operations - 95% survival for type 8A1

Strength of Actuator: Will withstand 3.6 Kg. (8 lbs.) push test in any direction.

Strength of Terminals: Will withstand 2.3 Kg (5 lbs.) pull in any direction.

Strength of Mounting Means: For normal installation, mounting nut will withstand torque of 1.7 Nm (15 in. lbs.) without damage to threads or switch body.

Vibration: 100-500 Hz at 10G—10 microseconds max.

Shock: 50 G, 1/2 Sinwave

Seal (8F and 8P): Will withstand 1 meter (3.3 ft.) head of water for 30 minutes.

TOGGLE SWITCHES

Bushing: Nickel plated brass. Toggle Lever: Chrome-plated brass, except type 8C which has a nickel plated brass lever. Lever Sleeves for 8A and 8B: Vinyl. Colored Lever Tips for 8S: Nylon.

PADDLE AND ROCKER SWITCHES

Operators and Bezels: Polycarbonate. 8H and 8K Mounting Clips: Stainless Steel. 8K Lamp Terminals: Silver plated phosphor bronze terminals which accept two No. 22 AWG wires. 8Q and 8M Mounting Plates: Cold rolled cadmium plated steel. 8Q and 8M Standoffs: Nickel plated brass.

PUSHBUTTON SWITCHES

Buttons: Nylon

GENERAL

Case: Epoxy resin, with epoxy terminal seals standard on all switches, except 8A1011. Metal Housing: Cold rolled steel, zinc plated.

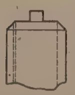
LEVER LOCK FEATURE

Pull-to-Unlock levers are a guard against accidental lever movement. To change lever positions, a spring-loaded locking mechanism must be released by pulling outward on the knobbed lever.

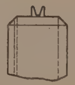
Two-position switches have a type D locking configuration which locks the lever in either of the two extreme positions. Three-position switches have a type A configuration which locks the lever in any of the three positions.

*Dimensions for panel and bushing sealed type 8F switches are similar to type 8A. Type 8F switches have a "D" bushing instead of a keyway slot. Refer to page C10 for the "D" bushing panel cutout.

**Refer to page C9 for mounting dimensions.



TYPE "D"
LOCKED IN TWO EXTREME POSITIONS (NO CENTER POSITION)



TYPE "A"
LOCKED IN THREE POSITIONS

TOGGLE SWITCH ORDERING GUIDE

Toggle switch catalog listings are derived from the ordering guide as shown in the example below. Refer to page C10 to order colored lever sleeves for type 8A nd 8B switches.

Example:

8A 2 01 I A

TOGGLE & BUSHING

8A
¼" bushing, .12" dia. x .41" length lever.

8B
15/32" bushing, .24" dia. x .45" length lever.

8C
1/4" bushing, .20" dia. x .41" length flatted lever.

8D
1/4" bushing, .13 dia. x .84" length lever.*

8E
1/4" bushing, .22" dia. x .59" length pull-to-unlock lever.

8F
Panel and bushing seal, ¼" bushing, .12" dia. x .20" length lever.

8G
Non-threaded 1/4" bushing, .11" dia. x .27" length lever.

TOGGLE SWITCH OPTIONS

Add suffix code numbers to Series 8 toggle switch catalog listings to designate the desired option.

Example: **8A2011A-001** has a "D" bushing instead of a keyway slot.

For information on additional Series 8 options, contact your nearest MICRO SWITCH Branch Office.

CODE NUMBER	TOGGLE SWITCH OPTION
-001	¼" dia. "D" bushing. (See page C10 for panel cutout)
-002	Black bushing and hardware.
-003	Black toggle lever, bushing, and mounting nut.
-004	8Z0178 dressnut in place of 8Z0171 dressnut.*
-005	8Z0182 locking ring in place of 8Z0174 locking ring*
-007	Metric thread for 1/4" dia. bushing

*See page C10

SERIES 8 PADDLE AND ROCKER SWITCHES

Paddle and rocker operators used with type 8H switches are interchangeable. Type 8K lighted switches are used with rocker operators only.

The wide choice of operator colors enable color coding of switch functions. They also provide a coordinated, attractive panel appearance when used in a mixed panel of Series 8 miniature toggle switches and pushbutton switches. (For information on three-hole mount switches with non-removable paddle rockers, refer to pages C7 and C8.)

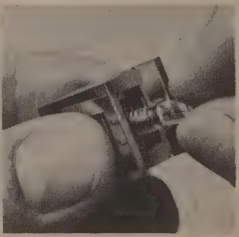
EAST TO RELAMP

Relamping of 8K switches is accomplished by (1) grasping the rocker and removing it with an outward pull and (2) extracting lamp by unscrewing or by pulling it out with a lamp tool. The lamp is installed by inserting it in the lamp socket.

MICRO SWITCH lamp tool, catalog listing **15PA7,** or a short length of plastic tubing (.220-inch I.D.) can also be used for lamp removal.

REMOVE ROCKER



REPLACE LAMP

LAMP INFORMATION

There are a number of type T-1¾ subminiature screw-base lamps which will fit the socket of 8K switches.

Lamps that are rated for 28 volts or less are recommended.

Lamps which are below .8 watt or above 1.5 watts should not be used in these devices. The former will be too dim for adequate illumination of the rockers and the latter will be too warm for the plastic or the finger's touch, especially if used with over-voltage.

Lamps are not furnished with 8K switches. However, MICRO SWITCH will stock and sell limited quantities of the following types (Order by catalog listing):

CATALOG LISTING	RATED VOLTAGE	NOMINAL CURRENT (AMPS)
8Z0101	6.3	.20
8Z0102	14.0	.08
8Z0103	28.0	.04

PADDLE AND ROCKER SWITCH ORDERING GUIDE

To simplify user parts inventories and provide versatility in operator options, switches, paddles, and rockers are sold separately. Switches snap into panels and are held secure by spring clips on the mounting flanges. They can be mounted individually or in strips.

8H TYPE

8H switches with paddle operators enable quick identification of the toggle position. Rocker operators have the advantages of toggle switch circuitry and versatile pushbutton control and styling.

8K TYPE

8K switches feature one-lamp illumination and relamping from the front of panel. They combine the features of rocker operation with an independent light source for illuminated color display, using a T-1¾ commercial grade screw base lamp.

Catalog listings for type 8H and 8K switches are derived from the ordering guide, as shown in the example, below.

Example: 8H 1 01 1 A

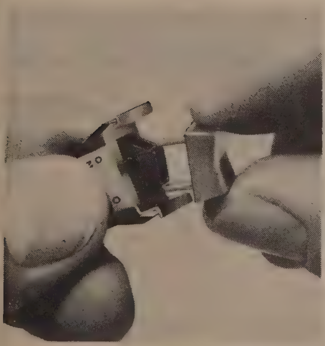
C
Fine silver contacts and brass terminals, with .0001" min. gold over .0002" min. nickel.



Operators are easily assembled to the switches by simply pressing them into place in the recesses of the switch operator socket. They are not intended to be easily removed.

BEZEL ACCESSORY

An optional colored bezel accessory is available for use with individual mount units (see photo) to enhance panel appearance and identify control functions. The bezel is assembled by snapping it into the flanges on two sides of the switch. They can be removed and replaced if color changes are necessary.

SOLDERING PROCEDURES

1. 60-40 solder should be used
2. 700°F solder iron tip temperature

Hold solder tip to terminal 1½ to 3 seconds. **3 SECONDS MAX.**

This allows the terminal to heat quickly on the exterior of the switch only and reduces greatly the chance of flux migrating inside the switch.

QUICK-CONNECTOR RECEPTACLES

The chart below lists a number of quick-connector receptacles that can be used with Series 8 type 2 and type 3 terminals. There are hand crimp tools available to install the connectors that are sold "loose piece" in 500-piece quantities: AMP #46412, for use with AMP #61976-1; and AMP #90204,. for use with AMP #61454-1.

For further information on these items, contact American Pamcor Incorporated, Valley Forge, Penn.; or AMP Incorporated, Harrisburg, Penn.

Terminal Type	Connector Part No.	Description
Style 1 Solder	AMP #60658-1 AMP #61976-1	Unplated brass, sold in "reels" of 10,000 pieces. Unplated brass, sold "loose piece" in 500-piece quantities.
Style 2 (P.C.)	AMP #60900-1 AMP #60900-2 AMP #60900-3 AMP #61454-1	Tin plated brass, sold in "reels" of 12,000 pieces. Gold plated brass, sold in "reels" of 12,000 pieces. Unplated brass, sold in "reels" of 12,000 pieces. Tin plated brass, sold "loose piece" in 500-piece quantities.

SERIES TW TOGGLE SWITCHES

- Qualified to MIL-S-83731
- Space & Weight Saver
- SPDT or DPDT
- Molded-in Terminals
- Choice of 1/4" Or 15/32" Bushing
- Pull-To-Unlock Option on 15/32" Bushing

Series TW offers toggle switching versatility equal to larger toggle switches with the additional advantages of small size and light weight. It meets the requirements of MIL-S-83731. Housing is nickel-plated brass on a high dielectric thermoset plastic switching base. Molded-in terminals are plated for soldering. There is positive return on momentary versions and reasonable operating forces. All switches are furnished with a lockwasher, a keying washer, and two hexnuts. Special ("on-on-on") circuitries, similar to those shown for series TL are available for TW also

STANDARD
TOGGLE

1-POLE

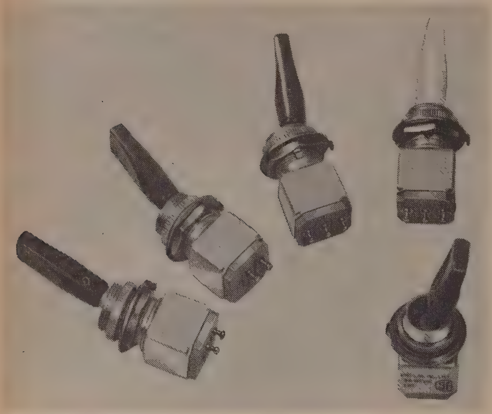
15/32" Bushing
STANDARD
TOGGLE

Miniature-size Series TW toggle switches are available with IWTS (Integrated Wire Termination System) to provide you with a reliable, completely serviceable unit which meets Military Specification requirements. There is a choice of 1/4" or 15/32" diameter bushings, in one or two pole circuitry.

Versions will accept no. 20 wire utilizing MIL-C-39029 contact pins. Connections are resistant to shock, vibration and high pulling forces. A 15/32" bushing pull-to-unlock toggle is also available.

Contact your nearest MICRO SWITCH Branch Office for further information.

SERIES TW TOGGLE SWITCHES WITH COLORED TAB LEVERS

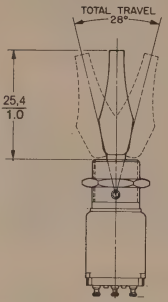


Decorator colored tab levers in eight standard colors are available in white, black, blue, red, green, orange, light gray and medium gray for the TW Series of miniature toggle switches.

The lever shape and color offers designers an attractive front-of-panel apperance for graphic display and functional identity. Levers are made of sturdy nylon and can withstand temperatures up to 85°C (185°F).

All TW19 switches are furnished with a decorative knurled nut to further enhance front-of-panel appearance, a lockwasher, keying washer and hex nut.

TAB SHAPE PROVIDES EASY FUNCTION IDENTIFICATION



HOW TO ORDER

To order, combine the basic (function) listing from Table I with the desired lever color suffix from Table II to complete the catalog listing.

For Example: Catalog Listing 11TW19-2-A003 is a 2-position, 1-pole maintained toggle with blue tab lever.

SERIES TL TOGGLE SWITCHES

- Qualified to MIL-S-3950
- Environment-Proof Sealing
- 1-, 2-, and 4-Pole Circuitry
- Standard and Pull-To-Unlock Toggle Levers
- 2- and 3-Position, Maintained and Momentary Toggle Action

Type "TL" toggle switches are the most versatile line of toggle switches offered by MICRO SWITCH to the military/aerospace and commercial aircraft industries. Varsatility is accomplished by combining a choice of toggle levers with two- and three-position maintained and mementary toggle action, and 1-, 2- and 4-pole circuitry. The high strength, temperature resistant, non-tracking case material, silver cadmium oxide constact and the step-design screw and solder turret terminal construction assure electrical stability and non-shorting wiring connections. Operating temperature range is from −65° to + 71.1°C (−85° to 160°F). TL toggle switches meet military Specification Number MIL-S-3950 (Immersion).

TOGGLE OPTIONS

Standard toggle lever operates on a direct action spring loaded toggle mechanism to provide excellent tactile feed-back in both the momentary and maintained toggle positions. The toggle lever is approximately ⅝ inch long and has a non-glare matte nickel plated finish.

Pull-to-unlock toggle levers prevent accidental toggle movement. The knobbed toggle lever must be pulled out approximately .090 inch to change positions. Thirteen different locking configurations are available. This lever style also has a non-glare matte nickel finish.

†Also add appropriate suffix letter to the Military Approval number

SPECIAL CIRCUITRIES

Catalog Listings with —**10**, —**50**, and —**70** suffix numbers shown in the TL, TP, and TS Ordering Charts have special "on-on-on" circuits, as illustrated. TL's with —12 suffix are same as —50, except keyway position is maintained; while —72 is same as —50, except that opposite keyway position is momentary.

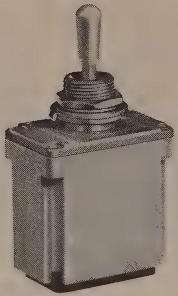
SERIES TL TOGGLE SWITCHES

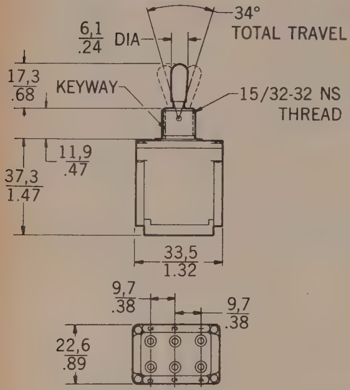


IWTS VERSION

IWTS (Integrated Wire Termination System) provides a reliable, completely serviceable unit which meets MIL-S-3950 requirements.

IWTS improves maintainability since wiring bundles need not be disturbed. Leads are quickly and easily assembled or removed with an insert-extract tool.

A unique three-rib (grommet style) elastomer seal protects the lead connections without potting. There are no exposed metal terminals. Versions are available that will accept No. 16 or 20 wire, utilizing MIL-C-39029 contact pins. Connections are resistant to shock, vibration and high pulling forces.



HOW TO ORDER

101TL, 102TL and 104TL type switches with IWTS termination are qualified to MIL-S-3950 and have the same circuitry and electrical rating as their 1TL, 2TL, and 4TL counterparts which are described on pages C15 and C16. Listed below are the MS drawing numbers for the IWTS versions. The complete numbers are shown in data sheet 204.

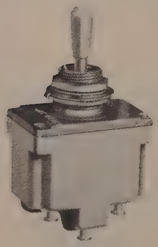
	Circuitry	Type	Std. Lever	Lever Lock
For No. 16 Wire	One Pole	101TL1	MS27722	MS27781
	Two Pole	102TL1	MS27723	MS27782
	Four Pole	104TL1	MS27724	MS27783
For No. 20 Wire	One Pole	101TL2	MS27784	MS27787
	Twp Pole	102TL2	MS27785	MS27788
	Four Pole	104TL2	MS27786	MS27789

Terminal accessory packets are necessary for wiring. They contain an insert-extract tool, contact pins, and plugs for unused terminal holes.

	PACKET LISTINGS		CONTENTS		
	For No. 16 Wire*	For No. 20 Wire**	Tool	Contact Pins	Seal Plugs
ONE POLE	15PA111-1	15PA112-1	1	3	1
TWO POLE	15PA111-2	15PA112-2	1	6	2
FOUR POLE	15PA111-4	15PA112-4	1	12	4

*Accepts contact pin M39029/01-14-16
**Accepts contact pin M39029/01-16-20

SOLDER TURRET TERMINAL VERSION



HOW TO ORDER

11TL, 12TL, and 14TL type switches with solder turret terminals are qualified to MIL-S-3950. They have the same circuitry and electrical ratings as their 1TL, 2TL, and 4TL counterparts which are described on pages C15 and C16. For example, 11TL1-2 is the same as 1TL1-2, except it has solder turret terminals instead of screw terminals. The complete MS drawing numbers are shown in data sheet 204.

Circuitry	Type	Std. Lever	Lever Lock
One Pole	11TL	MS27734	MS27737
Two Pole	12TL	MS27735	MS27738

SERIES TP ROCKER BUTTON SWITCHES

- **2- and 3-Position Pushbutton Action**
- **2 Button Styles**
- **1-, 2-, and 4-Pole Circuitry**
- **Flush Panel or Above Panel Mounting**

"TP" rocker button actuated switches combine the advantages of toggle switch circuitry and current carrying capacity with versatile pushbutton manual control and styling. Their internal operating mechanism and case design are identical to the "TL" lever actuated toggle switches. They also offer similar versatiltiy with two button styles, two- and three-position, maintained and momentary operation, and 1-, 2- and 4-pole circuitry. "TP" rocker button switches have a temperature range of from −65° to +160°F (-54° to 71°C).

*Referred to in Ordering Charts

MOUNTING OPTIONS

Above panel mounting presents a distinct button appearance.

Flush panel mounting presents a low button profile and permits edge lighting of depressed buttons.

"TP" switches are 3-hole mounted. The button panel cutout dimension is 23,9 mm x 38,4 mm/.94" x 1.151" centered on the switch mounting holes.

If a smaller panel cutout is desirable, the following dimensions are suggested: 23,1 mm x 36,1 mm/.91" x 1.50". CAUTION: This panel cutout requires close tolerances in centering the cutout with the mounting holes.

SERIES TP ROCKER BUTTON SWITCHES

BUTTON OPTIONS

Buttons are removable and interchangeable, and measure .870" x 1.46".

Transparent buttons accept under-the-surface legend inserts for station and function identification. NOTE: Legend inserts are not furnished. Legended inserts or engraving on buttons should be obtained from your local supplier.

Translucent (white plastic) buttons offer clean unlighted appearance, and are most acceptable for edge lighting (as described under Mounting Options). They may be engraved and filled, if legending is desired.

Colored plastic buttons enable color coding of switch functions.

TP7 and TP8 switches without buttons may be ordered for use with colored buttons. To convert catalog listings shown in the charts to TP7 and TP8 designs, substitute TP7 for TP1 and TP12, for above panel mounted switches; and substitute TP8 for TP4 and TP16 for flush panel mounted switches. Example: catalog listing **1TP8-2** is the same as **1TP4-2**, but it is supplied without a button.

- Rugged Construction
- Solder, Screw, or Quick Connect Terminals
- UL and CSA Listed Electrical Ratings

Series 11TS and 12TS toggle switches are ruggedly constructed for contact protection from dust and moisture. Available with either solder, screw or .250" width quick connect terminals, this series offers a choice of single-pole double-throw or double-pole double-throw circuitries. The series also has UL and CSA listed electrical ratings.

MICRO SWITCH Toggle Switch Assemblies couple a toggle switch operator with one or more precision SM, SX or V3 type basic switches. In two position devices, i.e., Series 6AT and 23AT, the normally open contacts of all basic switches are actuated when the toggle lever is located in the keyway position. In three position devices, i.e., 7, 8, 10, 11, 13, 15, and 22AT devices, one set of normally open contacts are actuated in each extreme position, while all switches in the center position are released, closing the normally closed contacts. Schematic at left shows actuation by positions.

Series 6AT Toggle Switch Assemblies control 1, 2, or 3 pole, double-throw precision SM basic switches. SM basic switches used in these assemblies are offered with gold or silver contacts in a choice of pierced solder terminals, "T" turret terminals, or "T2" double-turret terminals. Bushing sizes are offered in ¼" or 15⁄32" as charted below. Silver contacts are offered for general use, while gold contacts are offered for low energy circuits.

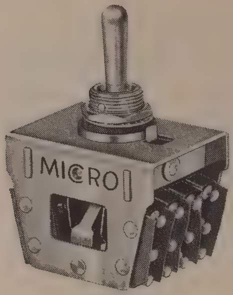
SERIES 22AT TOGGLE SWITCH ASSEMBLIES



- Contains 8 SPDT "SM" Type Switches
- Basic Switches UL and CSA Listed
- Panel and Lever Seals
- Momentary and Maintained Positions

Series 22AT Toggle Switch Assemblies contain 8 SPDT silver contact SM basic switches. Basic switches are mounted in two banks controlled by a single lever. Movement of lever from the center position actuates one bank of 4 switches in each extreme position providing a variety of wiring combinations. Splash type bushing and lever seals prevent the entrance of moisture and dust behind the panel, or into the contact area.

The 213AT Series uses the hermetically sealed HM switch as its basic switching unit. The true hermetic sealing of the HM is achieved with a metal-to-metal, glass-to-metal construction that assures maximum seal effectiveness for exceptionally long periods of time despite continuous changes in atmospheric pressures and temperatures. See the internal construction drawing below for details of the HM basic.

Catalog Listing **213AT11** has two independently operating single-pole double-throw circuits. The toggle action is three position with a maintained center and a momentary in both extremes. Alternate switches are operated in each extreme position.

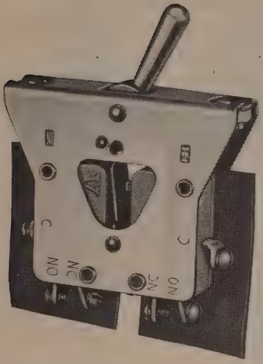
TOGGLE SWITCH HIGH CAPACITY ASSEMBLIES—3 POSITIONS



- 2-4-6-8-10 Switch Control
- Basic Switches UL and CSA Listed
- High Electrical Capacity
- Maintained and Momentary Positions
- 3 Hole Mounting—Rugged Construction

"AT" Toggle Switch Assemblies shown in the chart below contain high capacity V3 basic switches with terminal screws. Mounting is three-hole with (2) fastening screws (not furnished) from face of panel. Two toggle lever lengths are offered, with longer lever assembled to 6-8-10 switch units for reduced operating force. "AT" assemblies charted below contain two banks of V3 switches, with one bank operated in each extreme position.

MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES ET TOGGLE SWITCHES MAGNETICALLY HELD

Type "ET" toggle switches include a holding coil within their sealed housing to offer unique application possibilities to toggle switch users. Basically, the coil replaces mechanical holding mechanisms to maintain the toggle in an operated position. The toggle can be released by breaking the coil circuit. This type of operation is useful in missile launching complexes where a sequence of operations and checks must be performed and are subject to remote, immediate and simultaneous cancellation, and in other remote release applications.

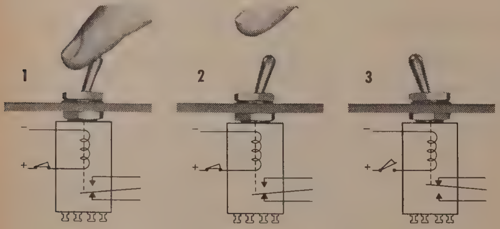
Seal Definition: Environment-Proof
Toggle Action: Two and Three-Position, magnetically maintained
Military Specifications: MIL-S-5594
Temperature Range: −54°C to 70°C (−65°F to +158°F)

Principle of Operation

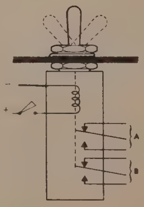
When hold-in coil circuit is open, the "ET" functions as a momentary contact switch. When the coil is energized (through remote contacts), the toggle lever is held (maintained) in the operated position. De-energizing the coil causes the lever to snap back to the unoperated position. The lever can also be released manually.

NOTE: The solenoid has a holding capacity only. It will not pull the toggle lever into an operating position from an unoperated position.

Two-position — The illustration below show the operating sequence for a "25ET" type switch with one SPDT circuit: (1) circuit closed manually, (2) energized solenoid holds switch circuit closed, and (3) remote control breaks solenoid circuit, releases toggle, opening switch circuit. (In the case of "26ET" type switches, which have two SPDT circuits, both circuits transfer when the lever is operated.)



Three-position — "27ET" type switches have two SPDT circuits. There is magnetic hold-in capability in both directions from center. When the lever is in the center position, the circuitry is as shown in the illustration at right. When the lever is moved to one extreme position, switch (A) circuit is transferred and switch (B) circuit is maintained. In the other extreme position, switch (B) circuit is transferred, while switch (A) circuit is maintained.



- Qualified to MIL-S-5594
- Environment-Proof Sealing
- Two and Three Position Magnetically Maintained Toggle Action
- Standard, Tab, and Pull-To-Unlock Levers
- Turret, Leadwire, and Screw terminals

SERIES ET TOGGLE SWITCHES MAGNETICALLY HELD

TOGGLES

STANDARD

PULL-TO-UNLOCK

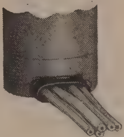
PUSH-TO-UNLOCK

TAB

Standard — Tapered matte finish stainless steel.
Pull-to-unlock — Prevents accidental actuation; must be pulled out to change positions.
Push-to-unlock — As a guard against accidental operation, the toggle must be depressed. 100 inch (approx.) before it can be moved to either extreme position. Energizing the coil causes the extreme positions to be electrically maintained until the coil circuit is broken.
Tab—Paddle shaped clear anodized aluminum tab.

TERMINALS

TURRET



LEADWIRE

SCREW

Turret — Plated for easy solder connection of up to #14 wire.
Leadwire — No. 20 wire per MIL-W-5086, marked per MIL-W-5088. Standard length of 6 feet. Leadwire ends are stripped and solder dipped. Other material and lengths can be furnished. Contact your nearest MICRO SWITCH Branch Office for further information.
Screw — 4-40NC x .125 round head screws with lockwashers. Separated by molded phenolic barriers.

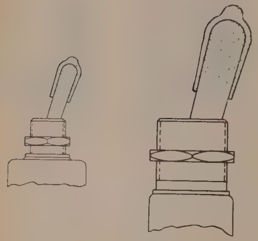
TOGGLE SWITCH ACCESSORIES



COLORED PLASTIC LEVER CAPS

Colored plastic lever caps fit ¼" and 15/32" diameter bushing toggle switches listed in the chart below.

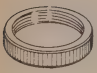
To order lever caps, add the appropriate letter(s) to the basic catalog listing. Example: 15PA90-2G is a green sleeve that fits the toggle lever of a TW toggle switch with a ¼-inch bushing.

Toggle Switch Catalog Listing	Lever Cap Catalog Listing	Colors Available					
		Blue	Black	White	Green	Yellow	Red
For all 6AT2 types	15PA90-1	BL	BK	W	G	Y	R
For ¼" bushing TW toggle	15PA90-2	BL	BK	W	G	Y	R
For 6AT68 type	15PA90-3		BK	W			R
For all Standard Lever toggles (TW, TL TS, etc.)	15PA90-4		BK	W			R

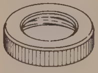
To order, add color designation to basic listing.

DECORATIVE MOUNTING HARDWARE

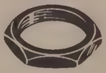
MICRO SWITCH offers several styles of dress hardware for both ¼" and 15/32" bushing sizes. All are designed to be decorative additions to any panel design. The four available styles are illustrated below.



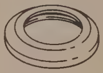
A



B



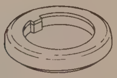
C



D

Style	Description	Bushing Size	Catalog Listing
A	Knurled Nut	¼"	19PA5-1
	(Chrome Finish)	15/32"	19PA6-1
	(Black Finish)	15/32"	19PA6-4
B	Knurled Capnut	¼"	19PA5-2
	(Chrome Finish)	15/32"	19PA6-2
C	Hex Nut	¼"	19PA5-3
	(Black Finish)	15/32"	19PA6-3
D	Tapered Nut (Chrome Finish)	15/32"	19PA6-5

PANEL SEAL



Offered for 15/32" bushing toggle switches, this panel seal is a round, corrosion resistant steel cupwasher with a silicon elastomer lining and keying tab for sealing keying slot on toggle bushing. Order Catalog Listing 15PA87 (MS25196).

SERIES RM AND AS ROTARY SELECTOR SWITCHES

- Completely Enclosed Contacts
- Camshaft Insures Accurate Sequencing
- Virtually Infinite Variety Of Switching Sequence Combinations
- Load Handling Versatility
- Excellent Feel of Detent Action

MICRO SWITCH Series 1RM and AS Rotary Selection Switches feature direct action switching through a camshaft operating mechanism. In addition to insuring accurate sequencing over a long operating life, the camshaft principle eliminates the need for complicated "jumper" wiring to provide the desired switching sequence. All cams are long-wearing, fungus-resistant, laminated thermosetting plastic.

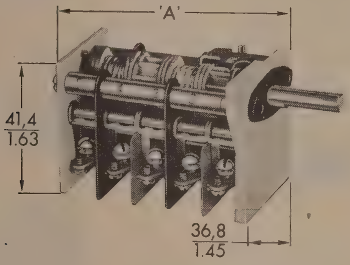
The precision snap-action switches used in the assembly have single-pole double-throw circuitry, which enables "on-off", "on-on", and "off-on" switching. Both movable and stationary contacts are enclosed to help prevent dust and dirt from entering the switching chamber. Some types are completely sealed.

SUMMARY OF ROTARY SELECTOR SWITCH OPTIONS

ROTARY SWITCH SERIES	TYPE OF BASIC SWITCH	NO. OF BASICS	NO. OF OPERATING POSITIONS	DETENT ANGLES (DEGREES)	SHAFT EXTENSION* MM INCHES	BUS BAR	SHAFT SEAL	PANEL SEAL
1RM	V3	2-8	2-8	45,90	25,4 19,1 12,7 1.0, .75, .50	Optional	Yes	Yes
20AS	V3	4-20	2-12	30, 60	19,1 25,4 .75*, 1.00*	Optional	Optional	Optional
17AS	SM or HM	2-8	2-12	30, 36, 45, 90	18,5 22,4 .73*, .88*	No	Optional	Optional
25AS	SE	2-8	2-8	45, 90	22,4 .88*	No	Optional	Optional
27AS** and 28AS	SM	2-8	2, 3	90	17,8 .70	No	Yes	No

*Deduct 0,76 mm (.03") approx. if panel seal is not used.
**27AS has potted lead wire termination.

SERIES 1RM



No. of Dasics		2	3	4	5	6	7	8
Dim. "A"	mm	33,0	43,2	53,3	66,0	76,2	88,9	99,1
	in.	1.3	1.7	2.1	2.6	3.0	3.5	3.9

The IRM Series of rotary selector switches have a single-bank arrangement of up to eight type V3 high capacity basic switches. Twin torsion springs on the camshaft provide positive detent positions.

IRM rotaries are mounted at the front of the panel. Three holes are required, one for the ¼-inch diameter shaft and two for the 6/32NC mounting screws.

A flexible gasket on the front plate compresses flush to the mounting surface during installation, sealing the assembly to the panel. A ring seal further limits the entry of dust, dirt and moisture into the shaft bearing surface from the mounting holes.

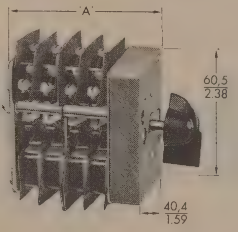
SERIES 20AS



KNOB NOT FURNISHED

No. of Basics		4	6	8	10	12	14	16	18	20
Dim. "A"	mm	45,7	55,9	66,0	78,7	88,9	102	112	122	132
	in.	1.8	2.2	2.6	3.1	3.5	4.0	4.4	4.8	5.2

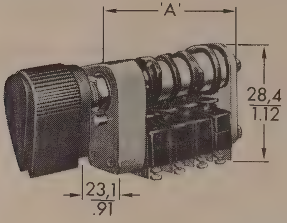
This double-bank design features up to 20 type V3 basic switches in one compact assembly. Series 20AS is normally front mounted by means of three holes, one for the ¼-inch diameter shaft and two for the 6-32 NC mounting screws. Rear mounting means can be furnished. Panel and shaft seals are optional.

Basic Switch Type	Electrical Data	Terminals
V3	SPDT, SPNO or SPNC. Up to 15 amps. ⅓ hp. 120 or 250 VAC. (Gold contacts available.)	Solder, Screw or Quick-Connect

MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

SERIES RM AND AS ROTARY SELECTOR SWITCHES

SERIES 17AS



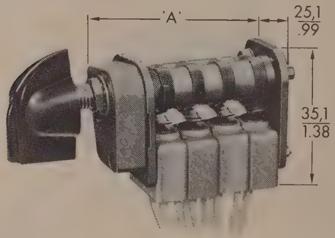
KNOB NOT FURNISHED

No. of Basics		2	3	4	5	6	7	8
Dim. "A"	mm	30,5	38,1	43,2	50,8	58,4	66,0	71,1
	in.	1.2	1.5	1.7	2.0	2.3	2.6	2.8

The 17AS Series is a single-bank arrangement of up to 8 type SM (shown) or hermetically-sealed HM basic switches. Front mounting on the ¼-inch diameter bushing is standard but rear mounting can be provided. Panel and shaft seals are optional.

As is the case with all MICRO SWITCH rotaries, the basic switches are factory assembled to be operated in the sequence required by your application. For example, Decimal-to-Binary versions have been set up, primarily for use on computer consoles, to introduce information by converting decimal constants to a positional number code.

SERIES 25AS



KNOB NOT FURNISHED

No. of Basics		2	3	4	5	6	7	8
Dim. "A"	mm	38,1	45,7	55,9	63,5	71,1	83,8	91,4
	in.	1.5	1.8	2.2	2.5	2.8	3.3	3.6

Single-bank 25AS rotaries have up to 8 environment-proof type SE basic switches. Mounting is from the front on the ¼-inch diameter bushing.

ORDERING INFORMATION

Each rotary selector switch is factory assembled and adjusted to the desired sequence on a custom basis.

Because of the almost infinite number of design combinations, it is not feasible to include all the available catalog listings.

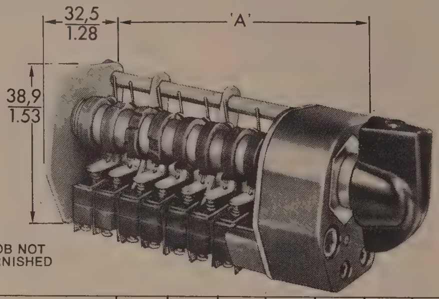
0.00 — inches

COCK-AND-FIRE SERIES 27AS AND 28AS



KNOB NOT FURNISHED

No. of Basics		2	3	4	5	6	7	8
Dim. "A"	mm	45,7	53,3	58,4	66,0	73,7	78,7	86,4
	in.	1.8	2.1	2.3	2.6	2.9	3.1	3.4

Cock-and-Fire rotary selector switches move positively from one position to another, without encountering circuit tease or actuator hang-up between the detents. They are furnished with up to eight type SM basic switches. Mounting is from the device's front by means of three holes, one for the ¼-inch diameter shaft and two for the 6-32 NC mounting screws. The 27AS is identical to the 28AS (shown), except for being provided with No. 20 leadwires, which are embedded in epoxy at the terminal entrance.

SWITCHING UNITS

Basic Switch Type	Electrical Data	Terminals
SM 	SPDT. Up to 10 amps, ¼ hp, 125 or 250 VAC. (Gold contacts available.)	Solder "T" and "T2", solder post, or quick-connect terminals.
HM Hermetically Sealed 	SPDT. Up to 5 amps res., 28 VDC or 115 VAC 400 Hz. (Gold contacts available.)	Solder post terminals or leadwire.
SE Environment Proof 	SPDT, SPNO, or SPNC. 5 amps res., 28 VDC, 125 or 250 VAC 60 Hz	Solder "T" terminals or leadwire

Contact your nearest MICRO SWITCH Branch Office or Authorized Distributor for assistance in choosing the exact combination of features to meet your needs.

ORDER GUIDE DOOR INTERLOCK SWITCHES

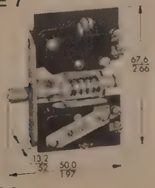
STYLE 7



STYLE 8

For use on hazardous electronic equipment. They automatically cut power when service door or drawer is opened helping to protect personnel and equipment.

To test circuits with the power "on" the actuating rod can be manually set (pulled) to a maintained—on position. When the door or drawer is closed following test or service, the actuating rod automatically returns to the normal or reset position so that next time the door is opened, power is cut off.

Series DM switches are also widely used as door interlock switches. See page A61 for additional interlock switch possibilities.

CIRCUITRY		ELECTRICAL DATA
Single-Pole Double-Throw	A	15 amps, 125, 250 or 480 VAC; ½ amp, 125 VDC; ¼ amp, 250 VDC.

*Not for use in temperatures over +185°F (85°C)
For higher temperatures order steel actuator Catalog Listing 2AC or 3AC in place of Catalog Listing 22AC or 23AC respectively. Order Catalog Listing 4AC8 in place of Catalog Listing 24AC2 for higher temperature use.

PX NUMERIC KEYBOARD

- Oiltight and Watertight
- Jam-Proof Buttons
- Durable Legends
- Reliable, Direct Drive Gold Contacts
- Low Cost Installation
- Low Profile Construction
- Silicone or Neoprene Covers
- Positive Tactile Feedback
- Suitable for Outdoor Environments

PX Numeric Keyboards are designed for use in adverse environments. The one-piece elastomer cover (neoprene or silicon) seals out oils, grease water, dust, sand and chips. Even sticky substances won't affect the operation of the keyboard. PX Keyboards can be washed down from front of panel without affecting operations.

The keys provide tactile feedback and the internal construction makes them jam-proof. Permanent legends remain readable in the grimiest environments.

The standard legends (as illustrated) are double-shot molded for durability. Special legends can be hot-stamped. The inserts are interchangeable for varying formats. Operating the keys exerts force directly on the gold contacts for reliable switching of low energy circuits and dependable operation over a wide range of electronic voltages.

The low profile, compact keyboards require minimum panel space. They install quickly and easily with mounting studs. Solder pin terminals are grouped in the center of the board for convenient wiring and simple panel preparation.

SERIES SW and SD

KEYBOARDS TO FIT EVERY NEED

At MICRO SWITCH, we have the world's most complete line of solid state keyboards . . . which means unmatched design flexibility for you. Our application engineers will custom tailor a keyboard to your exact specifications, whether from our time-proven SW series of our new low-profile SD series.

Choose from keys offering over 10,000 legends, 30 colors, and 60 shapes, including standard, sculptured or re-legendable keys — or create new keys to fit your needs. Even lighted and two-level keys are available.

MICRO SWITCH keyboards are available with features like MOS, TTL and DTL encoding, and with two-key or N-key rollover. Your choice of alpha and numeric arrays.

FAST DELIVERY

Working with MICRO SWITCH, you draw on our extensive solid state experience. We've been designing reliable keyboards for hundreds of applications since 1968 and are presently producing thousands of units a week. Each offering a 1% AQL and two-year warranty. This means we can supply you quickly at lower unit prices.

So whatever your needs, and whatever your budget, we'd like to supply a keyboard to fit. Contact a MICRO SWITCH Branch Office for complete information.

MODULES

If you prefer to build your own keyboards, our complete line of Series SD and SW modules are available to you.

DC CONTROL MOTORS

If you'd like to give your products a faster start, ask us about our complete line of low inertia motors with fast acceleration and deceleration. Sizes from 1 to 6 inches diameter, with integral tachometer options. For more information, contact your nearest MICRO SWITCH Branch Office.

POSITION SENSING SWITCHES
TABLE OF CONTENTS

BASIC SWITCHES

Type SX

Smallest snap action switch. Rated to 7 amps. Choice of actuators and terminals.

Page F1-F4

Type SM

Subminiature size. Rated to 11 amps. Choice of actuators and terminals.

Page F5-F8

Type V3

Miniature size. Rated to 15 amps. Wide selection of actuators and terminals.

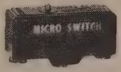
Page F9-F12

Type TB

Two and four circuit, double break. Rated to 10 amps. Choice of auxiliary actuators and terminals.

Page F13

Type Z & A



Standard size switches. Ratings to 20 amps. High precision — long life. Wide choice of actuators and terminals.

Page G1-G10

Type SE/XE

Sealed, environment proof switches. Rated to 7 amps. Choice of auxiliary actuators and termination.

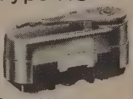
Page H1-H3

Type HM

Hermetically sealed. Subminiature size. Rated to 5 amps at 28 VDC or 115 VAC, 400 Hz. Choice of auxiliary actuators and termination.

Page H4-H5

Type HS



Hermetically sealed, standard size. Rated to 25 amps, 28 VDC. Choice of levers and termination.

Page H6

Type HT

High temperature, to 1000°F. Standard size. Rated to 3 amps.

Page H7

Mercury Switch

Glass enclosed, hermetically sealed. Rated to 45 amps. Tilt to operate.

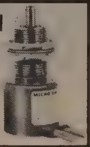
Page I1-I4

LIMIT SWITCHES

Limit Switches Selection Guide and other limit switches. Industry's widest selection of enclosed limit switches.

Front of Section J

Type EN



Environment proof. Many variations of actuators, circuitry, termination and electrical ratings for military/aerospace and commercial applications.

Page J1-J6

Type HE

Hermetically sealed EN type switch.

Page J7

Type HR

High temperature hermetically sealed switches, to 600°F.

TYPE SX SUBMINIATURE BASIC SWITCHES

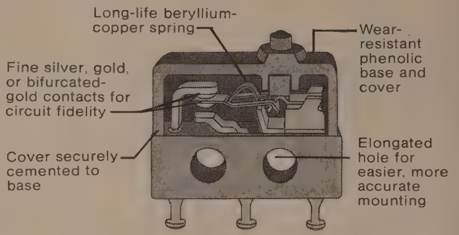
The SX series basic switches are the smallest snap-action switches from MICRO SWITCH. These switches are ideal where savings in space and weight are important. Unless otherwise noted, all listings have silver contacts.

Some of the important features available with design variations include:

- Low operating force to 3 ox. (85 grams) maximum
- Sensitive differential travel of .001 inch maximum
- Power load switching capability of 7 amperes
- Long mechanical life of 10,000,000 cycles—95% survival for 11SX series
- Temperature tolerance −65° to +250°F (−54 to 121°C) on standard construction
- High temperature designs for up to +400°F (204°C)
- Gold contacts for low energy applications
- Bifurcated gold contacts for maximum reliability
- Variety of integral and auxiliary actuators
- Choice of several terminal styles
- Military Standard construction with 4 listings on the MIL-S-8805 qualified products list
- UL and CSA listed

The 1SX switches are available with several types of terminations. The T and T2 terminals provide easy lead wire attachment. The H58 terminal offers the simplicity of quick-connect. The H58 terminals mate with AMP .058-inch receptacles.

AVAILABLE TERMINALS



Long-life beryllium-copper spring
Wear-resistant phenolic base and cover
Fine silver, gold, or bifurcated-gold contacts for circuit fidelity
Cover securely cemented to base
Elongated hole for easier, more accurate mounting

*All characteristics are taken with actuator assembled on Catalog Listing 1SX1-T as shown

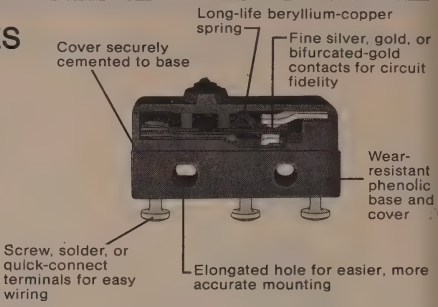
**Switch is mounted with plunger end reversed from JX-40

†"A" measurement is from center of mounting hole nearest tip of lever to the point indicated on drawing.

NOTE: Above actuators should be used at temperatures below +300° F (149°C); except listings JX-95, JX-96, JX-219 and JX-220 are for use with the 4SX1-T to 400°F. (204°C)

MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

TYPE SM SUBMINIATURE BASIC SWITCHES



Long-life beryllium-copper spring
Cover securely cemented to base
Fine silver, gold, or bifurcated-gold contacts for circuit fidelity
Wear-resistant phenolic base and cover
Screw, solder, or quick-connect terminals for easy wiring
Elongated hole for easier, more accurate mounting

The SM series switches are slightly larger than the SX switches. These switches combine small size and light weight with ample electrical capacity, precision operation and long life. Unless otherwise noted, all listings have silver contacts.

Some of the important features available with design variations include:

- Los operating force to 56 grams maximum
- Sensitive differential travel of .001 inch (0,025 mm) maximum
- Power load switching capability to 11 amps (VAC)
- Motor load handling capacity to ¼ hp (VAC)
- Long mechanical life of 10,000,000 cycles—95% survival for 11SM series
- Standard temperature range −65° to +180°F (−54 to 85°C)
- High temperature construction available for use to +400°F (204°C)
- Gold contacts for low energy applications
- Bifurcated godl contacts for maximum reliability
- Variety of integral and auxiliary actuators
- Choice of several terminal styles
- Military Standard construction with two listings on the MIL-S-8805 qualified products list
- UL and CSA listed
- BSI and TV-2 construction available

Various terminals are available for most listings. These include the T and T2 for wrap around soldering of leadwires. Solder terminals for solder connections. H58 terminals and the H4 series terminals provide easy quick-connect installation. H6 type are rectangular wire wrap terminals. Other quick-connect terminals of the Series H types are available as well as screw terminal designs. Contact a MICRO SWITCH Branch Office for ordering information.

* All characteristics are taken with actuator assembled to Catalog Listing 11SM3-T as shown

** Travel characteristics on tandem actuators vary with actual basic switch characteristics.

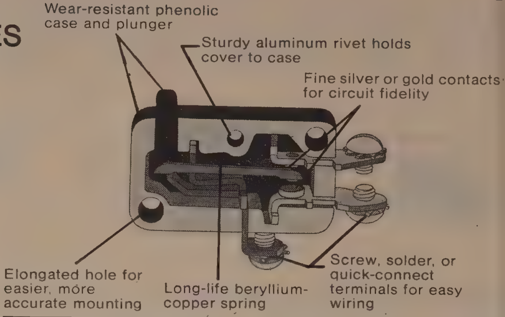
NOTE: Above actuators should be used below +300°F. See page H5 for other actuators that may be used with SM switches at higher temperatures.

†"A" measurement is from the pivot point of lever to the point indicated on drawing.

MICRO SWITCH

A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

TYPE V3 MINIATURE BASIC SWITCHES



Wear-resistant phenolic case and plunger
Sturdy aluminum rivet holds cover to case
Fine silver or gold contacts for circuit fidelity
Elongated hole for easier, more accurate mounting
Long-life beryllium-copper spring
Screw, solder, or quick-connect terminals for easy wiring

The V3 series switches are small switches which feature high electrical capacity and long life. Their size and shape meet design requirements in all types of applications.

Some of the important features with design variations include:

- Low operating force to 15 grams maximum
- Sensitive differential travel of .008 inch maximum
- Power load switching capability up to 15 amperes
- Motor handling capacity of ½ horsepower
- Long mechanical life of 10,000,000 cycles — 95% survival for V3-100 Series.
- Temperature tolerance up to +180°F (82°C) on standard construction
- High temperature construction for use up to +600°F (316°C)
- Gold alloy contacts for special applications
- UL and CSA listed
- 3,1 mm mounting holes available

TV RATED SWITCHES

V3 basic switches are available with TV-3, TV-4, and TV-5 ratings. There is a choice of SPDT, SPNC, and SPNO circuitry. All lever styles and terminal variations can be furnished.

MICRO SWITCH A DIVISION OF HONEYWELL
FREEPORT, ILLINOIS 61032/ PHONE 815-232-1122

TYPE TB DOUBLE-BREAK BASIC SWITCHES

Type TB switches are small double-break units which offer a means of controlling isolated circuits. These switches find many uses in modern control systems because of their circuitry.

Features within the TB series include:

- Power Load Switching Capability Up To 10 Amperes
- Motor Handling Capacity of ½ Horsepower, 125 VAC
- Two- and Four-Circuit Double-Break
- Several Auxiliary Actuators
- Choice of Terminal Styles
- UL and CSA Listed

APPLICATION REQUIREMENTS

The terminals of two- and four-ciurcuit double-break switches must be wired to equal voltage sources and the same polarity. The loads should be on the same sides of the lines.

AUXILIARY ACTUATORS

For use with 1TB1-1 and 1TB1-2 switches

DIMENSIONS SHOWN ARE FOR REFERENCE ONLY

Key: $\frac{0,0 - \text{mm}}{0.00 - \text{inches}}$

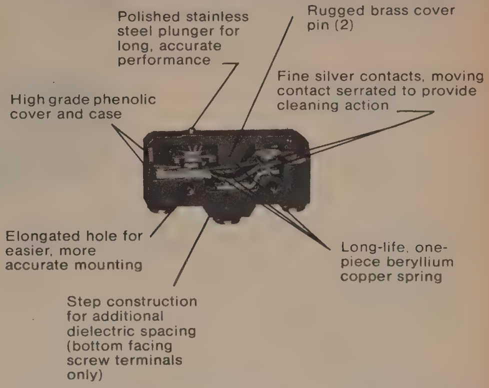
TYPES Z AND A

The type Z switch design meets most applications needs. Modifications of the standard silver contact design and material, spring configuration, and plunger locations give the type A switches greater electrical load handling capacity. Other changes in materials and switch design provide operating characteristics, temperature tolerances, and sealing to cover a wide range of special requirements.

Some of the important features available with design variations include:

- Operating Force as low as 4 oz. (113 grams) maximum
- Sensitive Differential Travel of .0002 to .0003 inches (0,0005 to 0,008 mm)
- Power Load Switching cabability to 20 Amperes
- Motor Handling Capacity of 2 Horsepower at 250 VAC
- Long Mechanical Life
- Temperature Tolerance From −65°F to +180°F (−54 to 82°C) on Standard Construction
- High Temperature Construction For Up To +400°F (204°C)
- Sealed Plunger and Cover
- Momentary or Maintained Contact Action
- Alloy Contacts for Special Application Needs
- Variety of Integral Actuators
- Variety of Auxiliary Actuators
- Variety of Terminal Designs
- Versatility of Mounting
- Military Standard Construction With Over 50 Listings On the MIL-S-8805 Qualified Products List
- UL and CSA Listed

Most of the catalog listings in the following order guides have A2 type terminals. Several other terminal styles are available and specific information should be requested from a MICRO SWITCH Branch Office or Authorized Distributor.



Polished stainless steel plunger for long, accurate performance
Rugged brass cover pin (2)
Fine silver contacts, moving contact serrated to provide cleaning action
High grade phenolic cover and case
Elongated hole for easier, more accurate mounting
Long-life, one-piece beryllium copper spring
Step construction for additional dielectric spacing (bottom facing screw terminals only)

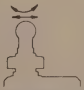
ACTUATORS

Basic switches in this section use the actuators described below.

Roller Leaf —
low-force, large movement actuation.



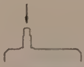
Panel-mount Roller Plunger —
actuation by cams.

Lever —
very low force,
slow cams and slides.

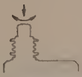
Leaf —
low-force, slow moving cams or slides.

Pin Plunger —
in-line motion.

Roller Lever —
very low force,
fast moving cams.



Overtravel Plunger —
in-line applications requiring additional overtravel.



Panel-mount Plunger —
heavy-duty in-line applications or slow cams.
Cam rise should not exceed 30°.

Added overtravel. For manual in-line operation and for slow 30° (max) rise cams	16	A	BZ-2RQ-A2	255-368 9-13	113 4	0,38 .015	5,56 .219	0,01-0,05 .0004-.0020	38,10 ±0,51 1.500 ±.020
Operating in temperature to +250°F (121° C)	16	A	BZ-2RQ24-A2	255-368 9-13	113 4	0,38 .015	5,56 .219	0,01-0,05 .0004-.0020	38,10 ±0,51 1.500 ±.020
BZ-2RQ-A2 type applications with bushing mount	17	A	BZ-2RQ1-A2	255-368 9-13	113 4	0,38 .015	5,56 .219	0,01-0,05 .0004-.0020	21,82 .859
MIL-S-8805 application requirements	17	A	BZ-2RQ1T04 (m 8805/1-020)	255-368 9-13	170 6	0,38 .015	5,56 .219	0,01-0,05 .0004-.0020	21,82 .859
Applications requiring gold alloy contacts	17	P	BZ-2RQ172-A2	255-368 9-13	113 4	0,38 .015	5,56 .219	0,01-0,05 .0004-.0020	21,82 .859
Operating in temperature to +250° F (121° C)	17	A	BZ-2RQ124-A2	255-368 9-13	113 4	0,38 .015	5,56 .219	0,01-0,05 .0004-.0020	21,82 .859
Up to 20 ampere load handling	18	G	BZ-2RQ1-A2	397-624 14-22	284 10	1,27 .050	5,56 .219	0,05-0,191 .0020-.0075	21,82 .859
Added overtravel. Roller plunger for rapid cam (30° max) rise and slide operation	19	A	BZ-2RQ18-A2	255-368 9-13	113 4	0,38 .015	3,56 .140	0,01-0,05 .0004-.0020	33,32 ±1,14 1.312 ±.045
Applications requiring gold alloy contacts	19	P	BZ-2RQ1872-A2	255-368 9-13	113 4	0,38 .015	3,56 .140	0,01-0,05 .0004-.0020	33,32 ±1,14 1.312 ±.045
Operating in temperature to +250° F (121° C)	19	A	BZ-2RQ1824-A2	255-368 9-13	113 4	0,38 .015	3,56 .140	0,01-0,05 .0004-.0020	33,32 ±1,14 1.312 ±.045
Applications requiring roller plunger 90° to major axis of switch	20	A	BZ-2RQ181-A2	255-368 9-13	113 4	0,38 .015	3,56 .140	0,01-0,05 .0004-.0020	33,32 ±1,14 1.312 ±.045

Except where stated * ±0.76 mm.
